

**PROJECT:** City of Jacksonville – Resiliency Analysis  
**RECIPIENT:** City of Jacksonville  
**FRCP FUNDS:** \$75,000

**SUMMARY:** The City will identify the critical infrastructure and natural resource communities which may be susceptible to increasing levels of precipitation, increasing changes in sea level or increased tidal surge, to identify the challenges and risks associated with these potential variances, and to provide for resiliency against the more severe storms, larger tidal events, and resulting impacts. This effort will endeavor to establish the vulnerability of infrastructure and natural resources that play an integral role in the City's operations and allow for proactive planning.
