Rural & Family Lands Protection Program
“Protecting Florida’s Agricultural Lands into the Future”

Rural and Family Lands Protection Program

Project Summary

Project Name: Sandy Gully Dairy, Inc.

Owner: Sandy Gully Dairy, Inc.

County: Highlands

Total Land Area: 3,217 Acres

Agricultural Land Use	Acres	Agricultural Land Use	Acres	Forest Land Use	Acres	Natural Wetlands	Acres
1. Improved Pasture	859	5. Row Crops	0	8. Natural Forest (Upland)	933	10. Natural Forest (wetland)	827
2. Native Pasture	0	6. Citrus	0	9. Planted Timber	0	11. Marsh, Wet Prairie, Open Water	151
3. Hay / Silage	400	7. Other (List) Roads, structures, etc.	47				
4. Sod	0			Total Upland (1-9)	2,239.34	Total Wetland (10-11)	978.5

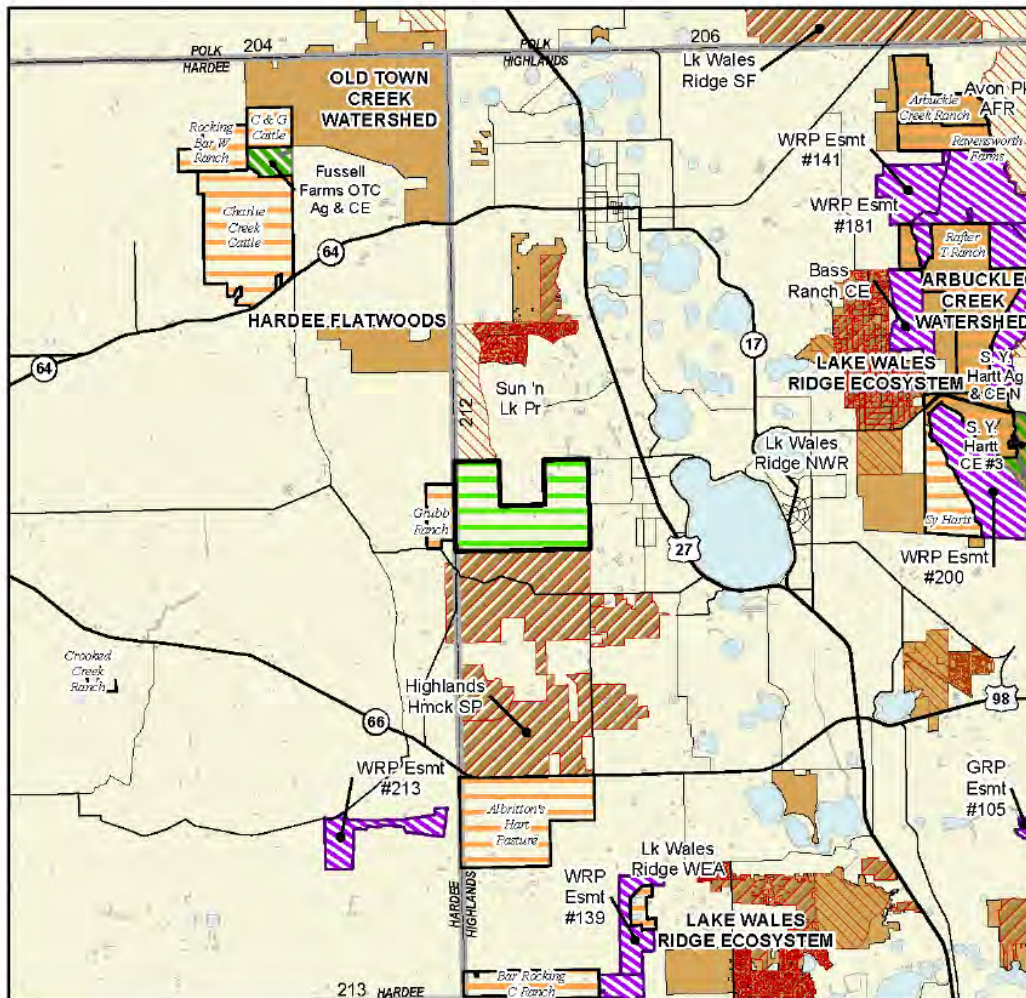

Agricultural Uses:

- Cow/Calf
- Hay Harvesting

Property/Ag Operation Description:

Also known as Elrod Dairy, Sandy Gully is a cow/calf operation, with hay and timber as added operations. The property sits between and is adjacent to Highlands Hammock State Park and Highlands County Preserve. Two streams on the property are tributaries to Little Charlie Creek and cattle are watered from an artesian well. An adjacent property on the Ranch's western boundary, Grubb Ranch, is also applying for RFLPP. There are multiple listed species on the property.

Sandy Gully

Public Purposes - as Determined by the DACS Site Visit Technical Team

Does the Project Comply with RFLPP Goals and Objectives:

- Protects the integrity and function of working landscapes
- Ensures opportunities for viable agricultural activities on working lands threatened by conversion to other uses

Score
(None, Low, Moderate, High)

Moderate
High

Does the Property Meet Any Public Purposes:

- Perpetuates open space on working lands that contain significant natural areas: Moderate
- Protects, restores or enhances water bodies, aquifer recharge areas including upland and springsheds, wetlands, or watersheds: Moderate
- Promotes a more complete pattern of protection, including buffers to natural areas, ecological greenways, functioning ecosystems and military installations: High
- Promotes the restoration, enhancement or management of species habitat: High

Score

Agricultural / Forestry Legacy (Land and/or Landowner)

Three generations of the Elrod / Goolsby family have owned land and participated in the Florida agriculture industry. In the 1930's, O.W. Goolsby purchased land to establish a dairy farm in Hiawatha, Florida. In 1968, after more than three decades of successful dairy operation, Mr. Goolsby moved his business to central Florida and purchased two tracts of land in Highlands County, one of which is now Sandy Gully Dairy, also known as Elrod Dairy. The land was purchased from Doyle Shoemaker, who managed a beef cattle operation on the property.

Historical Values (Structures/Sites)

The Sandy Gully Line is a railroad tram that was built and used in the 1930s and 1940s for logging operations. No components of the railway (ties, etc.) still exist. A record for the Sandy Gully Line is maintained in DHR's master site file.

Several original wooden structures/shacks located in an oak hammock exist on the property. The structures were part of a turpentine camp that operated in the 1920s and 1930s. The structures housed harvesting crews that collected turpentine for a week before being relieved by the next crew. No master site file record exists for this site.

Description of Agricultural Uses from DACS Technical Team Site Visit

Silviculture Operations

No timber resources are managed on the property.

	<u>Score</u>
	(None, Low, Moderate, High)
DACS Staff Assessment (site visit) – Silviculture/Forestry	
• Silvicultural BMP's followed during forestry operations(Yes/No)	N/A
• Quality of forestry/ silvicultural operations	N/A
• Suitability of the project's land for long-term forestry / silvicultural use	N/A

Cow / Calf - Livestock Operations

Originally a dairy operation; transitioned to cow/calf in 2002. Sandy Gully runs about 650 to 700 head of crossbred cattle including replacement heifers that are retained each year. Average body condition score of cattle observed is 4.

Cattle are adequately stocked for pasture conditions. Cattle are not rotated between pastures, but they are in the process of implementing an intensive rotational grazing system this year.

There is no breeding program in place at this time. Bulls are left out year-round, but they are planning to implement a controlled breeding program in the future. The ranch is not on the animal ID program. The only identification for cattle is a holding brand and registration papers on bulls. All cattle and calves are vaccinated and de-wormed once a year. Cattle have access to free choice mineral year-round and additional supplemental feeding as needed.

The owner fertilizes hay fields every year based on IFAS recommendations, but does not routinely fertilize pastures. Weeds are controlled by mowing or spraying (with limited success).

Fencing, pens and gates on the property are in fair to good condition. Mr. Elrod is working with NRCS and FDACS to rebuild fence to better facilitate rotational grazing. The milking parlor and feed barns are still standing from the previous dairy operation. Structures appear to be in poor condition. An old camp house on the property appears to be in fair condition.

There are no other livestock (horses or swine) operations.

	<u>Score</u>
	(None, Low, Moderate, High)
DACS Staff Assessment (site visit) - Cow / Calf Operations	
• Beef quality assurance guidelines implemented (Yes/No)	Yes
• Quality of cow-calf / livestock operations	Low
• Suitability for long-term ranch / cow-calf /or other livestock use	Moderate

Farming Operations / Other Agricultural Uses

Some acreage has been cropped in watermelons as a means to renovate the pastures. No annual cropping occurs on the property. 350 – 400 acres are planted in hemarthria and jiggs. Some hay is

harvested, baled and sold, though most is kept for the feeding of cattle. Hay is cut at least two times a year, but up to five times a year if weather permits.

Overall DACS Agricultural/Forestry Production / Marketing Observations

Mr. Elrod is progressively implementing BMPs to improve production and land management. There are plans to install several water control structures to rehydrate wetlands and store moisture in the pasture, as well as installing cross fencing and water troughs to better facilitate rotational grazing. The family has been working closely with FDACS and the local livestock agent to educate themselves on grass production and have been closely monitoring soil health and proper use of fertilizers.

Calves and cull cattle are currently sold at the local livestock market. It is the goal of the landowner to move toward two breeding seasons so that calves can be sold through an online auction. No other commodities are marketed at this time.

	<u>Score</u>
DACS Assessment (site visit) Overall Ag/Forestry Production & Marketing: (None, Low, Moderate, High)	
• Participation DACS Agricultural/Silviculture BMP Program (Yes/In Process/No)	Yes
• Given BMP compliance, etc. quality of agricultural/forestry production	Moderate
• Given marketing and overall business approach, suitability of project for long-term agricultural/forestry use	Moderate

Property Management & Other Activities

Wildfire History / Prescribed Fire Regime: No wildfire history. Pastures are burned in rotation every two to three years in late winter between January and March.

Presence of Non-Native Invasive Species: Some thistle, soda apple and dog fennel were noted and the owner has been spraying and mowing with limited success.

Recreational Use / Hunting: The family sponsors twelve individual turkey hunts per year on the property and the family hunts recreationally on the property. There are no recreation leases or public visitation on the property.

Agricultural/Forestry Government Program Participation:

NRCS – Grazing Management Plan	2016	3,043

Natural Resources – Habitat, Plants, and Wildlife

Florida Natural Areas Inventory (FNAI) Observations (2017 Update):

The Sandy Gully proposal includes 3,218 acres (per application; 3,210.31 as determined in GIS) in northern Highlands County adjacent to the western county line just > 1 mile west of the city of Sebring. It is a contiguous piece of property situated on the western slope of the Lake Wales Ridge.

The property is a working cattle ranch. Hay production and timber harvesting are secondary uses. About 37% of the property, especially the northeastern and southwestern portions, has been converted to pasture and agriculture. Historically, the eastern portion of the property on the Lake Wales Ridge was a complex of high rosemary scrub and lower areas of scrubby and mesic flatwoods with a few isolated marshes and baygalls. The slope of the ridge, located in the center of the proposal, was dominated by seepage-driven baygall and cutthroat grass prairies and flatwoods. From the base of slope would have begun a large flat expanse of pine woods and treeless prairies with frequent isolated depression marshes and wet prairies. Although mesic pine flatwoods appear to have been mostly converted to pasture on Sandy Gully, the property retains several large patches of scrub and scrubby flatwoods that, although disturbed by land use activities, appear to have a natural structure and composition. The large baygall/wet flatwoods complex on the ridge slope is mostly intact except for a large thinned area in the southern portion of the property.

Two rare species are documented on the property. The entire property is split evenly between the 'abundant' (east) and 'common' (west) designations of the Florida black bear range as denoted by the Florida Fish and Wildlife Conservation Commission. The application also lists Florida sandhill crane, bald eagle, Sherman's fox squirrel, eastern indigo snake, gopher tortoise, and Florida panthers as utilizing the property. Also, the existing xeric communities on the property, in particular, have the potential to harbor a suite of rare, often endemic, plants, including Ashe's savory, Britton's beargrass, Florida jointweed, Highlands goldenaster, Highlands scrub hypericum, Lewton's polygala, nodding pinweed, paper-like nailwort, pygmy fringe tree, scrub bluestem, short-leaved rosemary, and Small's jointweed. In addition to a large number of rare invertebrates, animals such as blue-tailed mole skink, crested caracara, eastern diamondback rattlesnake, and sand skink are possible.

Natural Resources (continued)

DACS Technical Team Site Visit Observations:

The uplands on the property are generally in good condition. The landowner does conduct prescribed burns; however, some of the flatwoods and scrubby flatwoods/scrub exhibit overgrown mid-stories, suggesting more frequent fire is needed. Understories observed in these communities contain primarily native species, with some pasture grass encroachment along boundaries between pasture and flatwoods. Cattle are allowed to graze a portion of the scrub, which could be detrimental to native/rare plant cover due to the soil disturbance sensitivity of this community.

Only a small portion of the wetlands were observed during the visit. Some lygodium infestation was present, as was Brazilian pepper along wetland boundaries, but the landowner has a contract with NRCS to eradicate these infestations. Pasture grasses have replaced native species in varying degrees within and/or around wetlands. Artificial disturbance of stream channels was observed. Endangered cutthroat grass was observed during the site visit.

Much of the ecological value of the property lies in the relatively large size of the natural communities present and their contiguity with those on adjacent public lands. Of particular significance is the scrub, an imperiled natural community of which few large, intact parcels remain outside of public ownership.

According to the application, turkey, white-tailed deer, otter, Florida black bear, alligator, red-tailed hawk, coyote, and fox are commonly observed on the property. Also according to the application, Florida sandhill crane, Sherman's fox squirrel, gopher tortoise, eastern indigo snake, Florida panther and bald eagle have been observed on the property. During the site visit, wood storks, two fox squirrels, and several gopher tortoises were observed.

	<u>Score</u>
DACS Staff Assessment (site visit) – Natural Resources/Features	(None, Low, Moderate, High)
Overall significance / condition of natural areas / wildlife / species habitat	High

Florida Fish and Wildlife Conservation Service (FWC)

The FWC uses the Integrated Wildlife Habitat Ranking System (IWHRS 2009) Geographic Information System (GIS) model to interpret wildlife habitat value on a scale from 0 to 10; a rank of 10 being of greatest value. This GIS model ranks landscape level wildlife habitat of importance to terrestrial vertebrates including listed species, focal species, or species that are otherwise rare or imperiled. Application of this model assists in the identification and conservation of important wildlife habitats. The Overall Score was adjusted based on the property: 1) being adjacent to public managed lands; 2) containing potential habitat for 10 or more species; 3) 50% being identified as Priority 1-3 in the FNAI Rare Species Potential Habitat Conservation Priorities layer.

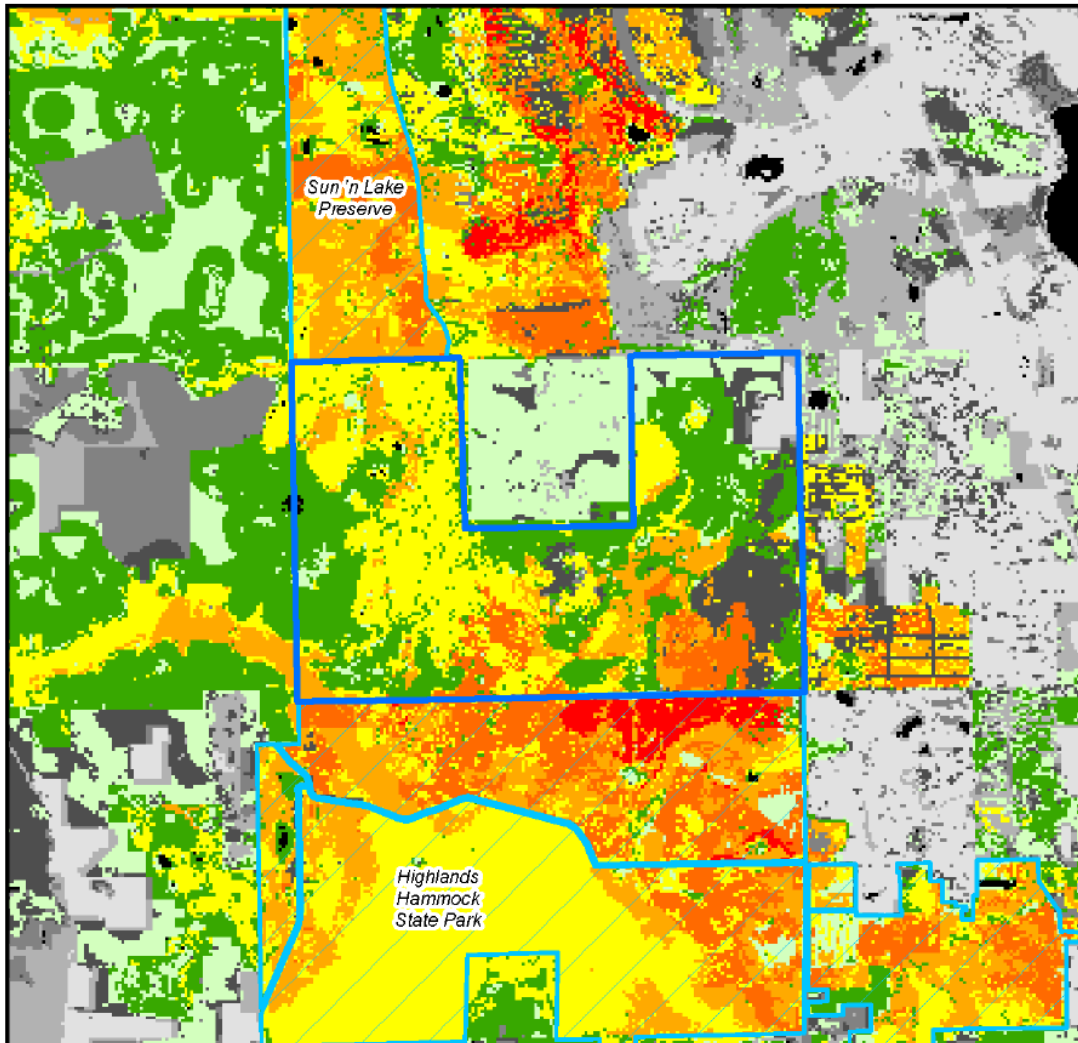

The project has an IWHRS 2009 mean score of 6.36 / FWC Overall Score of 8.36

FWC Staff Observations:

Property is adjacent to Sun 'n Lake Preserve and Highlands Hammock State Park.

Recorded Listed Species Occurrences on Property (2000-2016): Florida black bear*, Gopher tortoise

Wildlife Resource Evaluation 2016

Sandy Gully

0 0.4 0.8 1.6 Miles

Mean IWHS Value: 6.36

Hydrological Resources – Wetlands, Waterbodies, Watersheds, Aquifer Recharge, Surface Water/Springs Protection

Southwest Florida Water Management District Observations (SWFWMD):

Approximately 36% of the parcel is located within FEMA flood zone A indicating a 1% chance of annual flood within the zone. Wetlands associated with the tributaries contributing to Little Charlie Bowlegs Creek are categorized as Priority 2 Surface Water Resources out of 6 where 1 is the highest. The mixed wetland hardwood corridor on the western third of the property, as oriented in a north/south alignment, is categorized as Priority 2 and 3 Surface Water Resources.

The higher priority surface water features are protected by natural upland communities on the western portion of the property; surface waters on the east side of the property tend to be altered to the wetland edge. The greatest level of wetland protection associated with Sandy Gully is the protection from further development into the wetlands and surface water features associates with Little Charlie Bowlegs Creek.

In addition to the landscape significance related to Little Charlie Bowlegs Creek, Sandy Gully is part of a greater wetland system located at the western edge of the Lake Wales Ridge. The east side of the property is associated with the Lake Wales Ridge and has very high recharge values exceeding 25 inches annual recharge. The west side is at the base of the Lake Wales Ridge and has low recharge values ranging from 0-3 inches of annual recharge. Sandy Gully is not located within a known springshed.

SWFWMD Assessment – Hydrological Resources:

Score
(None, Low, Moderate, High)

- Overall hydrological resource benefit

High

DACS Technical Team Site Visit Observations – Hydrological Resources/Conditions:

The Sandy Gully property drains from the eastern scrub and sloughs toward the west and south, passing into the forested wetlands areas via two streams, which act as tributaries of Little Charlie Bowlegs Creek, which flows through Highlands Hammock. Little Charlie Bowlegs Creek eventually feeds Charlie Creek, which in turn flows to the west and southwest, and eventually drains into the Peace River.

The site visit confirmed that a significant amount of water flows through this property and into Little Charlie Bowlegs Creek. Cattle are generally excluded from the waterbodies and have had little impact on functionality. Mr. Elrod is working with NRCS to install crossings ovetop of the flowing waterbodies to reduce erosion and sedimentation from heavy traffic. Wetland vegetation is somewhat overgrown with invasive plant species, but still acts as a good buffer to filter agricultural inputs in the water before leaving the site.

There is an artesian well on the property used for watering cattle. Six 2-inch wells have been drilled on the property to supply a fresh water source. Four of the wells are powered using solar energy.

Basin Management Action Plan

Is the property located within a geographic region protected by a Basin Management Action Plan as adopted by DEP Executive Order? (yes / no) **No**

A Basin Management Action Plan (BMAP) is the "blueprint" for restoring impaired waters by reducing pollutant loadings to meet the allowable loadings established in a Total Maximum Daily Load (TMDL). A BMAP represents a comprehensive set of strategies - permit limits on wastewater facilities, urban and agricultural best management practices, conservation programs, financial assistance and revenue generating activities, etc. - designed to implement the pollutant reductions established by the TMDL. These broad-based plans are developed with local stakeholders - relying on local input and local commitment - and BMAPs are adopted by Secretarial Order to be enforceable.

Connectivity / Buffering Benefit

Florida Department of Environmental Protection Observations (DEP):

This project is not located within or near any Florida Forever Projects; benefits would be minimal. Public conservation lands or easements adjacent include Sun 'n Lake Preserve and Highlands Hammock State Park.

This project is located adjacent to two managed lands and one RFLPP project, with other conservation areas within close proximity. Benefits would be significant to connectivity as it would provide a more congruent pattern of conservation lands. With multiple managed areas in close proximity, this project would provide an excellent buffer from encroaching urban development.

Adjacent Public Land Manager's Observations:

Highlands County Sun N' Lake Preserve: A major wildlife corridor exists between The Preserve, Sandy Gully, and Highlands Hammock State Park. Preserve staff members have documented (cameras) good use by black bear and occasional use by Florida panther, other species using the corridor. The Preserve property handles massive amounts of water, some of which pass to the south through Sandy Gully to Highlands Hammock State Park. To benefit water quality, it is important that the water flows through as much native habitat as possible on its way to Charlotte Harbor.

One of the main threats to wildland management and especially prescribed burning is the loss of a buffer. Prescribed burning can be accomplished more frequently, efficiently, and safely when conducted routinely on all adjoining properties. Currently, no one lives along the preserve's eastern or northern boundaries, but these areas are unprotected against future development. The buffer provided by Sandy Gully will allow the wildlife corridor to remain intact without fragmentation. It will also allow critical hydrological flow-ways between the 3 properties to remain intact.

Highlands Hammock State Park: If natural resource restoration best management practices and maintenance are conducted on non-improved areas of the property, conditions beneficial to the Florida scrub jay could be improved, as well as containment / management of invasive exotic plant and animal species. Sandy Gully Dairy shares 3 miles of its southern boundary with the state park. Shared natural communities include scrub, scrubby flatwoods, mesic flatwoods, and wetlands, as well as Charlie Bowlegs Creek.

Florida Natural Areas Inventory (FNAI) (2017 Update):

The property is contiguous on the north with Highland Hammock State Park and on the south with Sun N' Lakes Preserve (Highlands County). Other local conservation lands preserving portions of the Lake Wales Ridge ecosystem are within a few miles of the property; these include Saddle Blanket Scrub and Carter Creek (TNC), Lake Wales Ridge State Forest, Lake Wales Ridge National Wildlife Refuge (USFWS), and several conservation easements. Lake Wales Ridge Ecosystem Florida Forever BOT Project - Silver Lake is located 2.5 miles to the north of the property. There are two existing RFLPP easements in the immediate area: Fussell Farms Old Town Creek 8 miles to the northwest, and S. Y. Hartt 10 miles to the east. Several other properties proposed to the RFLPP are within 10 miles of Sandy Gully. One of these, Grubb Ranch, is adjacent to the proposal's western boundary.

Land Planning and Growth Management

Florida Department of Economic Opportunity Observations (DEO):

Land Use Designation

The existing land use on the subject property is agriculture (primarily cattle ranching). The existing land use on the surrounding area is: (North) primarily urban and suburban residential and nonresidential, limited amount of agriculture, and Highlands County Preserve (1,350 acre managed wildlife habitat); (South) Highlands Hammock State Park; (East) urban and suburban residential and nonresidential; and (West) agriculture (Grubb Ranch).

The subject property is designated as "Agriculture" on the Highlands County Comprehensive Plan Future Land Use Map. The Agriculture future land use category allows the following: agriculture use; residential density of one dwelling unit per five acres (one dwelling unit per ten acres if development parcel is located in wetlands and no suitable uplands) and clustering of residential development; churches; schools; cemeteries; agro-industrial research and educational facilities; telecommunication facilities; self-contained temporary plants such as asphalt plants or pipe yards intended to serve a specific project for a limited period of time; solar based power generation facilities; wastewater treatment plants; and recreation and open space. Thus, the subject property has a residential development potential of 643 dwelling units (3,217 acres with a density of one dwelling unit per five acres).

Threats of Conversion

The subject property has a high potential of conversion to non-agricultural use because it is in close proximity to existing and planned urban and suburban residential and nonresidential uses. Although factors discourage conversion to non-agricultural use (the future land use designation on the subject property is Agriculture, and Highlands County has a relatively low rate of population growth), the development trends in the surrounding area are strong threats of conversion to non-agricultural use on the subject property.

Development Trends

The development trends in the surrounding area to the north/northeast and east are predominantly urban and suburban residential and nonresidential development. The application reports that the 7,109 acre Sun n Lake Development to the north contains over 10,000 lots within a 2.5 mile radius of Sandy Gully and every lot is smaller in size than 0.47 acres. Over 6,350 platted, subdivided and sold lots are located east of the subject property within a 2.5 mile radius. A sewer treat plant (owned by the City of Sebring) is located adjacent to the eastern boundary of the subject property, and the plant serves adjoining housing developments. The Highlands Hammock State Park is located adjacent to the southern boundary of the subject property. The Highlands County Preserve (1,350 acre managed wildlife habitat) is located adjacent to the north/northwest boundary of the subject property. Agricultural use (Grubb Ranch) is located to the west in Hardee County. The urban and suburban development might serve to adversely impact future agriculture on the subject property.

OPTION AGREEMENT FOR SALE AND PURCHASE

THIS OPTION AGREEMENT FOR SALE AND PURCHASE ("Agreement") is made this ____ day of _____, 202__, between SANDY GULLY DAIRY, INC., a Florida corporation, whose address is 1251 Cougar Blvd, Sebring, Florida 33872 as "Seller," and the BOARD OF TRUSTEES OF THE INTERNAL IMPROVEMENT TRUST FUND OF THE STATE OF FLORIDA ("Trustees"), whose address is Florida Department of Agriculture and Consumer Services ("FDACS"), Florida Forest Service, 3125 Conner Boulevard, C-25, Tallahassee, Florida 32399-1650, as "Buyer." Buyer's agent in all matters shall be the Florida Forest Service.

1. GRANT OF OPTION. Seller hereby grants to Buyer the exclusive option to purchase a perpetual conservation easement (the "Easement") in the entirety of the real property located in Highlands County, Florida, described in Exhibit "A" (the "Property"), in accordance with the provisions of this Agreement. This Agreement becomes legally binding on execution of this Agreement, but exercise of the option is subject to approval by Buyer and is effective only if FDACS gives written notice of exercise to Seller.

2. OPTION TERMS. The consideration for the option granted by this Agreement is \$100.00 ("Option Payment"). Upon execution of this Agreement by FDACS, FDACS will apply to the Chief Financial Officer for a state warrant in the amount of the Option Payment, which, will be forwarded to the escrow agent to hold for the benefit of Seller. The Option Payment is non-refundable such that Seller shall be entitled to retain the Option Payment regardless of whether Buyer exercises the Option; Provided, however, the Option Payment shall be credited toward the purchase price at closing if Buyer timely exercises the option as discussed below. The option may be exercised during the period beginning with Buyer's approval of this Agreement at a regularly scheduled meeting of the Governor and Cabinet sitting as the Trustees, and ending 120 days after Buyer's approval of this Agreement ("Option Expiration Date"), unless extended by other provisions of this Agreement. If Buyer's funds in the amount of the purchase price (as hereinafter defined in paragraph 3.A.) are not available by the Option Expiration Date the period of exercise of the option may be extended until such funds become available, not to exceed 60 days after the Option Expiration Date, by written notice to Seller. If Buyer's funds are not available at the end of the 60-day extension then this Agreement shall terminate and neither party shall have further obligations under the provisions of this Agreement. If Buyer does not exercise its option by the Option Expiration Date, as extended if applicable, then the escrow agent is directed to release and disburse the Option Payment to Seller the following day. If Buyer does timely exercise its option, then escrow agent shall credit the Option Payment toward the purchase price paid by Buyer at closing.

3.A. PURCHASE PRICE. The purchase price for the Easement is ONE MILLION SEVEN HUNDRED FORTY THOUSAND AND NO/100 DOLLARS (\$1,740,000) ("Initial Purchase Price") which, after credit for the Option Payment, will be paid at closing. Seller hereby authorizes Buyer to issue a state warrant for the Purchase Price directly to an escrow agent who is authorized by law to receive such payment, and who is acceptable to Buyer, and to require the escrow agent to pay Seller's expenses of sale and real estate taxes. The Initial Purchase Price is subject to adjustment in accordance with paragraph 3.B. This Agreement is contingent upon approval of the Final Adjusted Purchase Price, hereinafter defined, by Buyer and upon confirmation that the Final Adjusted Purchase Price is not in excess of the maximum value of the Easement as determined in accordance with Section 253.025(8), Florida Statutes ("FDACS Approved Value"). The determination of the FDACS Approved Value and the Final Adjusted Purchase Price can only be made after the completion and FDACS's approval of the survey required in paragraph 6.

3.B. ADJUSTMENT OF PURCHASE PRICE. If, prior to closing, FDACS determines that the Initial Purchase Price exceeds the FDACS Approved Value of the Easement, the Initial Purchase Price will be reduced to the FDACS Approved Value of the Easement (herein the "Final Adjusted Purchase Price"). If the Final Adjusted Purchase Price is less than 97% of the Initial Purchase Price because of the adjustment provided for in this paragraph, Seller shall, in Seller's sole discretion, have the right to terminate this Agreement and neither party shall have any further obligations under this Agreement. If Seller elects to terminate this Agreement, Seller shall provide written notice to FDACS of Seller's election to terminate this Agreement within 10 days after Seller's receipt of written notice from FDACS of the Final Adjusted Purchase Price. If Seller fails to give Buyer a written notice of termination within the aforesaid time period from receipt of FDACS' written notice, then Seller shall be deemed to have waived any right to terminate this Agreement based upon a reduction in the Initial Purchase Price pursuant to the provisions of this paragraph 3.B. The Final Adjusted Purchase Price as calculated in this paragraph 3.B. is subject to further adjustment in accordance with the provisions of this Agreement. The Initial Purchase Price and the Final Adjusted Purchase Price, whichever

is applicable depending on whether or not an adjustment has occurred under the provisions of this paragraph 3.B. are hereinafter referred to as the "Purchase Price".

4. ENVIRONMENTAL SITE ASSESSMENT. Buyer, prior to the exercise of the option and at its sole cost and expense, may conduct an environmental site assessment of the Property to determine the existence and extent, if any, of any Hazardous Materials on the Property. If further investigations, testing, monitoring or environmental site assessments are required by FDACS to determine the existence or extent of Hazardous Materials on the Property, Buyer, at its sole option may elect to extend the Option Expiration Date to conduct such procedures at the Buyer's sole cost and expense. For purposes of this Agreement "Hazardous Materials" shall mean any hazardous or toxic substance, material or waste of any kind or any other substance which is regulated by any Environmental Law (as hereinafter defined in paragraph 5.)

5. HAZARDOUS MATERIALS. If the environmental site assessment provided for in paragraph 4 confirms the presence of Hazardous Materials on the Property, Buyer, at its sole option, may elect to terminate this Agreement and neither party shall have any further obligations under this Agreement. Should Buyer elect not to terminate this Agreement, Seller shall, at Seller's sole cost and expense and prior to the exercise of the option and closing, promptly commence and diligently pursue any assessment, clean up and monitoring of the Property necessary to bring the Property into full compliance with Environmental Law to FDACS' satisfaction in its sole discretion. "Environmental Law" shall mean all federal, state and local laws, including statutes, regulations, ordinances, codes, rules, judgments, orders, decrees, permits, concessions, grants, franchises, licenses, agreements and other governmental restrictions relating to the protection of the environment or human health, welfare or safety, or to the emission, discharge, seepage, release or threatened release of any contaminant, solid waste, hazardous waste, pollutant, irritant, petroleum product, waste product, radioactive material, flammable or corrosive substance, carcinogen, explosive, polychlorinated biphenyl, asbestos, hazardous or toxic substance, material or waste of any kind into the environment, including, without limitation, ambient air, surface water, ground water, or land including, but not limited to, the Federal Solid Waste Disposal Act, the Federal Clean Air Act, the Federal Clean Water Act, the Federal Resource and Conservation and Recovery Act of 1976, the Hazardous and Solid Waste Amendments of 1984, the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980, the Federal Superfund Amendments and Reauthorization Act of 1986, Chapters 161, 253, 373, 376 and 403, Florida Statutes, Rules of the U.S. Environmental Protection Agency, Rules of the Florida Department of Environmental Protection, and the rules of the Florida water management districts now or at any time hereafter in effect. However, should the estimated cost to Seller of clean up of Hazardous Materials exceed a sum which is equal to 3% of the Initial Purchase Price as stated in paragraph 3.A. Seller may elect to terminate this Agreement and neither party shall have any further obligations under this Agreement. If Hazardous Materials placed on the Property prior to closing are discovered after closing, Seller shall remain obligated hereunder, with such obligation to survive the closing, delivery, and recording of the easement described in paragraph 9 of this Agreement, to diligently pursue and accomplish the clean up of Hazardous Materials in a manner consistent with all applicable Environmental Laws and at Seller's sole cost and expense.

Further, if neither party elects to terminate this Agreement as provided above, Seller shall indemnify and save harmless and defend Buyer, its officers, servants, agents and employees from and against any and all claims, suits, actions, damages, liabilities, expenditures or causes of action of whatsoever kind arising from Hazardous Materials placed on the Property prior to closing. Seller shall defend, at Seller's sole cost and expense, any legal action, claim or proceeding instituted by any person against Buyer as a result of any claim, suit, or cause of action for injuries to body, life, limb or property for which Hazardous Materials placed on the Property prior to closing are alleged to be a contributing legal cause. Seller shall save Buyer harmless from and against all judgments, orders, decrees, attorney's fees, costs, expenses and liabilities in and about any such claim, suit, investigation or defense thereof, which may be entered, incurred or assessed as a result of the foregoing.

The limitation herein on Seller's contractual obligation to indemnify Buyer as specified in this paragraph 5 shall not be construed to limit Seller's legal liability under any Environmental Law for Hazardous Materials located on the Property or to limit Buyer's legal and equitable remedies against Seller under any Environmental Law for Hazardous Materials located on the Property.

6. SURVEY. Buyer may have the Property surveyed at its expense. If the survey ("Survey"), certified by professional surveyor and mapper licensed by the State of Florida, shows any reduction in acreage from the appraised acreage to the surveyed acreage, any encroachment on the Property or that improvements intended to be located on the Property encroach on the land of others, the same shall be treated as a title defect.

7. TITLE INSURANCE. Buyer may provide a marketable title insurance commitment, to be followed by an owner's marketable title insurance policy (ALTA Form "B" with Florida revisions) from a title insurance company

approved by FDACS, insuring marketable title to the Easement in the amount of the Purchase Price at Buyer's expense.

8. **DEFECTS IN TITLE.** If the title insurance commitment or Survey furnished pursuant to this Agreement discloses any defects in title which are not acceptable to Buyer, Seller shall, within 90 days after notice from Buyer, remove said defects in title. Seller agrees to use diligent effort to correct the defects in title within the time provided therefor, including the bringing of necessary suits. Defects arising from liens against the Property shall be satisfied at closing from Seller's proceeds. If Seller is unsuccessful in removing the title defects within said time, Buyer shall have the option to either: (a) accept the title as it then is with a reduction in the Purchase Price by an amount determined by FDACS, (b) accept the title as it then is with no reduction in the Purchase Price, (c) extend the amount of time Seller has to remove the defects in title, (d) cut out the affected portion of the Property and reduce the Purchase Price by an amount equal to the product of the Purchase Price per acre for the acres being cut out, multiplied by the acreage cut out, or (e) terminate this Agreement, thereupon releasing Buyer and Seller from all further obligations under this Agreement. If Seller fails to make a diligent effort to remove the title defects, Seller shall be in default and the provisions of paragraph 18 of this Agreement shall apply.

9. **INTEREST CONVEYED.** At closing, Seller shall execute and deliver to Buyer a perpetual, enforceable conservation easement in substantially the same form as hereto as Exhibit "B," free and clear of all liens, reservations, restrictions, easements, leases, tenancies and other encumbrances, except for those that are acceptable encumbrances in the sole discretion of Buyer and do not impair the marketability of the title to the Easement.

9.1 **SUBORDINATION.** If at the time of conveyance of the Easement, the Property is subject to a mortgage or other liens and encumbrances not accepted by Buyer and Seller elects to subordinate such encumbrances rather than satisfy them at closing, Seller shall obtain the agreement of the holder of such encumbrances, by separate instrument that will be recorded immediately after the Easement, to subordinate its rights in the Property to the Easement to the extent necessary to permit the Buyer to enforce the purpose of the Easement in perpetuity and to prevent any modification or extinguishment of the Easement by the exercise of any superior rights of the holder. The priority of any existing mortgage with respect to any valid claim on the part of the mortgage holder to the proceeds of any sale, condemnation proceedings, or insurance or to the leases, rents, and profits of the Property shall not be affected by the Easement, and any lien that may be created by Buyer's exercise of any of its rights under this Agreement or by Buyer's rights under the provisions of the Easement shall be junior to any such existing mortgage. Upon request, Buyer agrees to subordinate its rights under this Agreement and the Easement to the rights of any future mortgage holders or beneficiaries of deeds of trust to the proceeds, leases, rents, and profits described above and likewise to subordinate its rights under any lien and to execute any documents required with respect to such subordination, except that the priority of any lien created by Buyer's exercise of any of its rights under this Agreement or Buyer's rights under the provisions of the Easement prior to the creation of a mortgage or deed of trust shall not be affected thereby, nor shall this Agreement or the Easement be subordinated in any other respect.

10. **PREPARATION OF CLOSING DOCUMENTS.** Upon execution of this Agreement, Seller shall submit to Buyer a properly completed and executed beneficial interest affidavit and disclosure statement as required by Sections 286.23, 375.031(1) and 380.08(2), Florida Statutes. Buyer shall prepare the easement described in paragraph 9 of this Agreement, Buyer's and Seller's closing statements and the title, possession and lien affidavit certified to Buyer and title insurer and an environmental affidavit on FDACS forms provided by FDACS.

10.1 **BASELINE DOCUMENTATION.** Buyer shall prepare baseline documentation adequately documenting the condition of the Property at the date of closing. The cost of the baseline documentation shall be borne by Buyer. If the form of conservation easement provides for use of a management plan, the management plan shall be prepared as a part of the baseline documentation and the cost therefore absorbed in the same manner the cost of the baseline documentation is absorbed.

11. **FDACS REVIEW FOR CLOSING.** FDACS will approve or reject each item required for closing under this Agreement. If FDACS rejects an item for closing which was submitted by the Seller, Seller will have 30 days thereafter to remove and resubmit any rejected item. If Seller fails to timely deliver any items required of Seller, or FDACS rejects any item after delivery, the Option Expiration Date shall be extended until FDACS approves Seller's documents or until Buyer elects to terminate the Agreement.

12. **EXPENSES.** Seller will pay the documentary revenue stamp tax and all other taxes or costs associated with the conveyance, including the cost of recording the Easement described in paragraph 9. of this Agreement and any other recordable instruments that FDACS deems necessary to assure good and marketable title to the Easement.

13. TAXES AND ASSESSMENTS. Seller shall be responsible for paying all real estate taxes and assessments applicable to the Property that are legally due and payable.
14. CLOSING PLACE AND DATE. The closing shall be on or before 15 days after Buyer exercises the option; provided, however, that if a defect exists in the title to the Property, title commitment, Survey, environmental site assessment, or any documents required to be provided or completed and executed, the closing shall occur either on the original closing date or within 60 days after receipt of documentation removing the defects, whichever is later. Buyer shall set the date, time and place of closing.
15. RISK OF LOSS AND CONDITION OF PROPERTY. Seller assumes all risk of loss or damage to the Property and warrants that the conservation easement shall be transferred and conveyed to Buyer with the Property in the same or essentially the same condition as of the date of Seller's execution of this Agreement, ordinary wear and tear excepted. If the condition of the Property is altered, by an act of God or other natural force beyond the control of Seller, however, Buyer may elect, at its sole option, to terminate this Agreement and neither party shall have any further obligations under this Agreement. Seller represents and warrants that there are no parties other than Seller in occupancy or possession of any part of the Property. Seller warrants that there are no facts known to Seller materially affecting the value of the conservation easement or the Property that are not readily observable by Buyer or which have not been disclosed to Buyer.
- Seller agrees to clean up and remove all abandoned personal property, refuse, garbage, junk, rubbish, trash, and debris (hereafter, "trash and debris") from the Property to the satisfaction of FDACS prior to the exercise of the option by Buyer. If the Seller does not remove all trash and debris from the Property prior to closing, Buyer at its sole option, may elect to: (a) deduct the expense necessary to remove trash and debris from the Seller's proceeds of sale up to but not to exceed 5% of the Initial Purchase Price and proceed to close, with the Buyer incurring any additional expenses necessary to remove all trash and debris and clean up the Property subsequent to closing, (b) extend the amount of time the Seller has to remove all trash and debris from the Property, (c) terminate this Agreement, and neither party shall have any further obligations under the Agreement.
16. RIGHT TO ENTER PROPERTY. Seller agrees that from the date this Agreement is executed by Seller through Closing, Buyer, and its agents, upon reasonable notice, shall have the right to enter the Property for all lawful purposes in connection with this Agreement.
17. ACCESS. Seller warrants that there is legal and practical ingress and egress for the Property over public roads or valid, recorded easements for the use and benefit of and as an appurtenance to the Property.
18. DEFAULT. If Seller defaults under this Agreement, Buyer may waive the default and proceed to closing, seek specific performance, or refuse to close and elect to receive the return of any money paid, each without waiving any action for damages, or any other remedy permitted by law or in equity resulting from Seller's default.
19. BROKERS. Seller warrants that no persons, firms, corporations or other entities are entitled to a real estate commission or other fees as a result of this Agreement or subsequent closing, except as accurately disclosed on the disclosure statement required in paragraph 10. Seller shall indemnify and hold Buyer harmless from any and all such claims, whether disclosed or undisclosed.
20. RECORDING. Buyer may record this Agreement, or notice of it, in the appropriate county or counties.
21. ASSIGNMENT. This Agreement may be assigned by Buyer, in which event Buyer will provide written notice of assignment to Seller. Seller may not assign this Agreement without the prior written consent of Buyer.
22. TIME. Time is of essence with regard to all dates or times set forth in this Agreement.
23. SEVERABILITY. If any of the provisions of this Agreement are deemed to be unenforceable and the unenforceability of said provisions does not adversely affect the purpose and intent of this Agreement, in Buyer's sole discretion, the enforceability of the remaining provisions of this Agreement shall not be affected.
24. SUCCESSORS IN INTEREST. This Agreement shall bind and inure to the benefit of Seller and Buyer and their respective heirs, legal representatives and successors. Whenever used, the singular shall include the plural and one gender shall include all genders.

25. ENTIRE AGREEMENT. This Agreement contains the entire agreement between the parties pertaining to the subject matter contained in it and supersedes all prior and contemporaneous agreements, representations and understandings of the parties. No supplement, modification or amendment to this Agreement shall be binding unless executed in writing by the parties. Notwithstanding the foregoing, the parties acknowledge that the legal description contained in Exhibit "A" was prepared based upon historic chain of title information, without the benefit of a current survey of the Property. The parties agree that if, in the opinion of FDACS, it becomes necessary to amend the legal description of the Property to correct errors, to more properly describe the Property, to cut out portions of the Property affected by title defects unacceptable to Buyer or which cannot be timely cured by the Seller, or to otherwise revise the legal description of the Property, the legal description to be used in the Survey (if any) and in the closing instruments required by this Agreement shall be revised by or at the direction of FDACS, and shall be subject to the final approval of FDACS. Anything to the contrary hereinabove notwithstanding, such a revision of the legal description of the Property shall not require a written amendment to this Agreement. In such event, the Seller's execution and delivery of the closing instruments containing the revised legal description and the Buyer's acceptance of said instruments and of the final Survey (if any) containing the revised legal description shall constitute a full and complete ratification and acceptance of the revised legal description of the Property by the parties. Any reduction in the square footage area of the Property resulting from changes in the legal description of Exhibit "A" or more accurate survey of the Property shall result in pro rata reduction of the purchase price for the Property, which reduction shall not constitute an adjustment to purchase price as contemplated in Paragraph 3.B above.

Seller acknowledges that the Trustees have made various delegations of power for the purpose of land acquisition, and not all representatives of the Trustees or the FDACS have authority to act in all situations. Consequently, this Agreement may be terminated by the Trustees pursuant to any provision therefor contained in this Agreement only in writing signed by the person or persons who signed this Agreement on behalf of the Trustees or that person's successor.

26. WAIVER. Failure of Buyer to insist upon strict performance of any covenant or condition of this Agreement, or to exercise any right herein contained, shall not be construed as a waiver or relinquishment for the future of any such covenant, condition or right; but the same shall remain in full force and effect.

27. COUNTERPARTS. This Agreement may be executed in one or more counterparts, but all such counterparts, when duly executed, shall constitute one and the same Agreement.

28. ADDENDUM. Any addendum attached hereto that is signed by the parties shall be deemed a part of this Agreement.

29. NOTICE. Whenever either party desires or is required to give notice unto the other, it must be given by written notice, and either delivered personally, transmitted via facsimile transmission, mailed postage prepaid, or sent by overnight courier to the appropriate address indicated on the first page of this Agreement, or such other address as is designated in writing by a party to this Agreement.

30. CERTIFICATION REGARDING TERRORISM. Seller hereby certifies that to the best of Seller's knowledge, after making all appropriate inquiries, Seller is in compliance with, and shall use all funds derived from the sale of the Easement in compliance with all applicable anti-terrorism laws, regulations, rules and executive orders, including but not limited to, the USA Patriot Act of 2001, 18 U.S.C. sections 2339A-C, and U.S. Presidential Executive Orders 12947 and 13224.

31. SURVIVAL. The covenants, warranties, representations, indemnities and undertakings of Seller set forth in this Agreement shall survive the closing, the delivery and recording of the Easement described in paragraph 9 of this Agreement.

IF THIS AGREEMENT IS NOT EXECUTED BY THE SELLER, ON OR BEFORE **APRIL 17, 2023**, BUYER SHALL BE UNDER NO OBLIGATION TO ACCEPT THIS AGREEMENT. BUYER'S EXECUTION OF THIS AGREEMENT IS SUBJECT TO APPROVAL BY THE BOARD OF TRUSTEES OF THE INTERNAL IMPROVEMENT TRUST FUND OF THE STATE OF FLORIDA. THE EXERCISE OF THE OPTION PROVIDED FOR HEREIN IS SUBJECT TO: (1) CONFIRMATION THAT THE PURCHASE PRICE IS NOT IN EXCESS OF THE FDACS APPROVED VALUE OF THE EASEMENT, AND (2) FDACS APPROVAL OF ALL DOCUMENTS TO BE FURNISHED HEREUNDER. THE STATE OF FLORIDA'S PERFORMANCE AND OBLIGATION TO PAY UNDER THIS AGREEMENT IS CONTINGENT UPON AN ANNUAL APPROPRIATION BY THE LEGISLATURE AND UPON THE FUNDING OF THE APPROPRIATION THROUGH THE ISSUANCE OF FLORIDA FOREVER BONDS BY THE STATE OF FLORIDA OR OTHER FUNDING AS PROVIDED BY THE LEGISLATURE.

THIS IS INTENDED TO BE A LEGALLY BINDING AGREEMENT WHEN DULY EXECUTED. IF NOT FULLY UNDERSTOOD, SEEK THE ADVICE OF AN ATTORNEY PRIOR TO SIGNING.

DEED OF CONSERVATION EASEMENT

THIS GRANT OF CONSERVATION EASEMENT is made this _____ day of _____ 202_, by SANDY GULLY DAIRY, INC., a Florida corporation, whose address is 1252 Cougar Boulevard, Sebring, Florida 33872, ("Grantor"), in favor of the BOARD OF TRUSTEES OF THE INTERNAL IMPROVEMENT TRUST FUND OF THE STATE OF FLORIDA, whose address is Florida Department of Agriculture and Consumer Services, Florida Forest Service, 3125 Conner Boulevard, Tallahassee, Florida 32399-1650, ("Grantee").

The terms "Grantor" and "Grantee" shall include the singular and the plural, and the heirs, successors and assigns of Grantor and Grantee, and the provisions of this Easement shall be binding upon and inure to the benefit of Grantor, Grantee and their heirs, successors, and assigns.

NOTICES

All notices required to be given pursuant to this Deed of Conservation Easement shall be sent to the parties at the following addresses.

Grantor's Address: 1252 Cougar Boulevard, Sebring, Florida 33872.

Grantee's Address: Florida Department of Agriculture and Consumer Services, Florida Forest Service, 3125 Conner Boulevard, Tallahassee, Florida 32399-1650. Attention: Program Director, Rural and Family Lands Protection Program.

RECITALS

A. Grantor is the sole owner in fee simple of certain real property described in Exhibit "A" attached hereto ("Property"), which is the subject of the terms of this Deed of Conservation Easement ("Easement").

B. This Easement is acquired under the Rural and Family Lands Protection Program administered by the Florida Department of Agriculture and Consumer Services ("FDACS"). The goal of this program is to protect the integrity, economic viability, and function of working landscapes, ensure opportunities for sustainable agricultural activities on working lands, and to promote the conservation, restoration, and enhancement of species habitat and natural areas consistent with sustainable agricultural activities and the purposes for which this Easement is acquired.

C. The fact that any use of the Property that is expressly prohibited by the terms of this Easement may become greatly more economically valuable than uses allowed by the terms of this Easement, or that neighboring properties may, in the future, be put entirely to uses that are not allowed by this Easement has been considered by Grantor in granting this Easement and by Grantee in accepting it.

D. Grantor and the Grantee mutually recognize the special character of the Property as a working landscape that has traditionally been used for agriculture, as that term is defined in Section 570.02(1), Florida Statutes, and have the common purpose of conserving certain values and character of the Property by conveyance to the Grantee of a perpetual conservation easement on, under, over, and across the Property, to conserve the character of the Property, continue certain land use patterns that are consistent with the purposes of this Easement, and prohibit certain further development activities on the Property.

E. The existing agricultural uses and conservation values of the Property are documented in the Baseline Documentation Report dated _____ ("Baseline Documentation Report" or "BDR"), which consists of reports, maps, photographs, and other documentation that the parties agree provide, collectively, an accurate representation of the Property at the time of this Easement and which is intended to serve as an objective information baseline for monitoring compliance with the terms of this Easement. The BDR is maintained in the offices of the FDACS and is incorporated in this Easement by this reference. A copy of the BDR is available from the FDACS upon request.

F. Significant Natural Area ("SNA"). There are certain agricultural lands with important species habitat or water resources occurring within the boundaries of the Property, more particularly identified as SNA(s) in the BDR. An SNA is defined as a particularly outstanding or sensitive area that the parties agree are desirous of protection due to the presence of the following: 1) high-quality terrestrial or aquatic habitats, which possess significant biodiversity, high-quality resources, intact community organization, or other ecologically significant qualities; 2) habitats for rare species of plants or animals; or 3) significant geological features or historic sites. Designation of an SNA accords an extra level of protection, ensuring that the natural or cultural features within the SNA will continue to be managed appropriately and in a manner ensuring the continued protection of the

resources. While the designation of these areas as SNAs in the BDR is intended to set them aside for conservation, management activities in an SNA may include activities commensurate with the management of conservation lands to include such activities as prescribed burning, removal of invasive species and native species restoration, and maintenance of existing agricultural structures, primarily roads, fences, drainage improvements, and boundary signs. In addition, Grantor may continue livestock grazing in an SNA, as long as Grantor's management of such grazing activity protects the quality and integrity of the SNA. Other activities that may be undertaken in SNAs are scientific research and environmental education, at Grantor's sole discretion. The SNAs are identified on the map in Exhibit "B" attached hereto.

G. Grantee is an agency authorized under the terms of Sections 570.71, Florida Statutes, to hold easements for the preservation and protection of agricultural lands threatened by conversion to other uses, as well as the promotion and improvement of wildlife habitat, protection and enhancement of water bodies, aquifer recharge areas, wetlands and watersheds, and perpetuation of open space on lands with SNAs.

H. The parties agree to honor the purposes for which this Easement is acquired and to preserve and protect in perpetuity the values of the Property for the benefit of this generation and the generations to come.

NOW, THEREFORE, to achieve these purposes, and in consideration of \$10.00 and other good and valuable consideration, including the recitals above, and the mutual covenants, terms, conditions, and restrictions contained herein, the receipt and sufficiency of which is acknowledged, and pursuant to the laws of Florida, and in particular Section 570.71, Florida Statutes, but without intending the validity of this Easement to be dependent on the continuing existence of such laws, Grantor hereby voluntarily grants and conveys to Grantee a conservation easement in perpetuity over the Property of the nature and character hereinafter set forth, and the parties intending to be bound hereby agree as follows:

ARTICLE I. RECITALS

The Recitals set forth above are true and correct and incorporated herein by reference.

ARTICLE II. DURATION OF EASEMENT

This grant of Easement over the Property shall be perpetual. It is an easement in gross, runs with the land, and is enforceable by Grantee against Grantor, Grantor's personal representatives, heirs, successors and assigns, lessees, agents, guests, and licensees.

ARTICLE III. PURPOSE OF EASEMENT

It is the purpose of this Easement to (i) effect the Rural and Family Lands Protection Program (“RFLPP”) pursuant to Florida Statutes; (ii) assure that the Property will be retained forever in its condition as a working landscape; (iii) preserve the Property as productive agricultural land that sustains for the long term both the economic and conservation values of the Property and its environs; and (iv) provide a relatively natural habitat for fish, wildlife, plants, or similar ecosystems, through management guided by the following principles:

- Conservation and maintenance of economically viable agricultural practices that protect the landscape as a working enterprise in harmony with the open space and scenic qualities of the Property.
- Conservation and maintenance of soil productivity and control of soil erosion.
- Conservation and maintenance or improvement of the overall quality of the timber resource.
- Conservation and protection of the integrity and function of the working landscape, including any buffers to natural areas, ecological greenways and functioning ecosystems.
- Promotion of the restoration, enhancement, or management of species habitat, consistent with the purposes for which this Easement is acquired.
- Conservation and protection, restoration, or enhancement of water bodies and aquifer recharge areas including uplands and springsheds, wetlands, or watersheds.
- Conservation and protection of unique and fragile natural areas and rare species habitats.
- Perpetuation of open space on working lands that contain significant natural areas.
- Allow appropriate uses of the Property for activities which will provide long term economic sustainability consistent with this Easement.

The above purposes (i.e., clauses (i) through (iv), inclusive of the bulleted principles) are hereinafter referred to as the “Easement Purposes.” Grantor agrees that this Easement will confine the use of the Property to such activities as are consistent with the Easement Purposes, and Grantor agrees to manage the Property in a manner consistent with the Easement Purposes.

ARTICLE IV. RIGHTS GRANTED TO THE GRANTEE

To accomplish the Easement Purposes the following rights are conveyed to Grantee by this Easement:

A. The right to enforce protection of the Easement Purposes of the Property for which this Easement was acquired.

B. All future residential, commercial, and industrial rights, together with all development rights incidental thereto, that are now or hereafter allocated to, implied, reserved, or inherent in the Property except as may be specifically reserved to Grantor in this Easement. The parties agree that such rights are hereby terminated and extinguished and may not be used on or transferred to other property. Neither the Property nor any portion thereof may be included as part of the gross area of other property not subject to this Easement for the purposes of determining density, lot coverage, or open space requirements, under otherwise applicable laws, regulations or ordinances controlling land use and building density. No development rights that have been encumbered or extinguished by this Easement shall be transferred to any other lands pursuant to a transferable development rights scheme or cluster development arrangement or otherwise. Nor shall any development rights or density credits be transferred onto the Property from other property.

C. The right to enter upon the Property on an annual basis, and more often if Grantee determines that such entry is warranted, at reasonable times in order to inspect and monitor compliance with and otherwise enforce the terms of this Easement (“Inspections”); provided that such entry shall be upon prior reasonable notice to Grantor, and Grantee shall not unreasonably interfere with Grantor’s use and quiet enjoyment of the Property.

D. The right to conduct Inspections, annually or otherwise, to monitor Grantor’s compliance with the terms of this Easement shall be in accordance with Rule Chapter 5I-7, F.A.C., and the Easement Monitoring Form attached hereto as Exhibit “C”. The Grantee will review the completed monitoring form after each inspection and shall determine whether the uses and activities on the Property are consistent with the terms of this Easement and, where applicable, Grantee will enforce the terms through a corrective action plan, as agreed to by Grantor and Grantee; provided, however, that such corrective action plan will be in addition to, and not in lieu of or as a prerequisite to, Grantee’s other enforcements rights hereunder. Upon Grantee’s finding that Grantor is in compliance with the terms of this Easement, a copy of the completed monitoring form will be provided to the Grantor and a copy will be retained by the Grantee for a minimum of five (5) years. Upon a finding of noncompliance, a corrective action plan may be developed, which may be a notation in the comments section on the monitoring form regarding completion of certain actions or cessation of actions in order to attain compliance or the plan may be a more detailed plan developed separately to set expectations and deadlines for completion of remedial measures. In either case, the Grantee will work with the Grantor to negotiate a reasonable schedule, but all remedial measures shall be completed at Grantor’s expense.

E. The right to prevent any activity on or use of the Property that is inconsistent with the Easement Purposes or terms of this Easement and to require the restoration of or to restore such areas or features of the Property that may be damaged by any inconsistent activity or use, at Grantor's cost.

F. The right to have the ad valorem taxes, assessments and any other charges on the Property paid by Grantor.

G. A right to prior notice of Grantor's intent to sell or transfer title as provided in Article IX, Paragraph G. This right of notice shall be triggered by sales or transfers of title by Grantor, including gifts and bequests as well as transfers to entities in which Grantor owns, directly or indirectly, a majority of the controlling interests.

H. The right to be indemnified by Grantor for any and all liability, loss, damage, expense, judgment or claim arising out of or related to the Grantor's acts or omissions with respect to the Property or the acts or omissions of Grantor's agents, guests, lessees, licensees, invitees, or any others on the Property with the express or implicit permission of Grantor.

I. The right to be indemnified by Grantor for any liability for injury or property damage to persons on the Property arising out of any condition of the Property known to the Grantor to the best of Grantor's knowledge.

J. The right to have the Property maintained in accordance with the terms of this Easement, understanding that the Property may develop through the forces of nature hereafter, subject only to the exercise of Grantor's Reserved Rights, and the Rights Granted to the Grantee, as described in this Easement.

K. The right to cut and remove timber in Grantee's sole discretion, if Grantor, after a 30-day notice from Grantee, fails to cut and remove said timber damaged by natural disaster, fire, infestation, or the like. Any such cutting and removal by Grantee shall be at the expense of Grantee and all proceeds from the sale of any such timber shall inure to the benefit of Grantee.

ARTICLE V. PROHIBITED USES

The Property shall be maintained to preserve the Easement Purposes. Without limiting the generality of the foregoing, Grantor agrees that the following uses and practices, though not an exhaustive recital of inconsistent uses and practices, are prohibited on the Property:

A. Dumping of biodegradable or nonbiodegradable, toxic, unsightly, offensive or hazardous substances, trash or garbage, wastes, abandoned vehicles, appliances, machinery, toxic wastes or substances, pollutants or contaminants, or similar

material including those defined by the Federal Solid Waste Disposal Act, the Federal Clean Air Act, the Federal Clean Water Act, the Federal Resource Conservation and Recovery Act of 1976, the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980, the Federal Superfund Amendments and Reauthorization Act of 1986, the Federal Emergency Planning and Community Right-To-Know Act, the Federal Insecticide, Fungicide and Rodenticide Act, the Toxic Substances Control Act, Chapters 161, 253, 373, 376, and 403, Florida Statutes, and the rules and regulations of the (i) United States Environmental Protection Agency, (ii) the Florida Department of Environmental Protection, and (iii) the governmental water management district applicable to or having jurisdiction over the Property (“Water Management District”), now or at any time hereafter in effect, or any Florida Statute defining hazardous materials, wastes or substances, toxic wastes or substances, pollutants or contaminants (collectively referred to as “Contaminants”) on the Property. This prohibition shall not be construed to include reasonable amounts of waste generated in accordance with allowed uses, including agriculture or game management, conducted in accordance with the terms of this Easement, and that is disposed of in accordance with applicable local, state and federal requirements, and Best Management Practices (“BMPs”) adopted by FDACS or its successor agency, as amended from time to time.

B. The mining, excavation of surface or subsurface materials, the exploration for and extraction of oil, gas, minerals, dolostone, peat, muck, marl, limestone, limerock, kaolin, fuller’s earth, phosphate, common clays, gravel, shell, sand and similar substances either directly or indirectly by Grantor or on Grantor’s behalf or with the joinder or consent of Grantor in any application for a permit so to do, by an individual or entity acting under and by virtue of the authority of a grant or reservation or other form of ownership of or interest in or control over or right to such substances, except for i) seismic or other non-invasive testing and the drilling for and extraction of oil, gas, and all other hydrocarbons under the property by slant or directional drilling from adjacent properties, so not to damage or interfere with the Easement Purposes or Property; ii) as reasonably necessary to combat erosion or flooding using material from existing excavation sites identified in the BDR; or iii) as necessary and lawfully allowed for the conduct of allowed activities using material from existing excavation sites identified in the BDR.

C. Activities that affect the hydrology of the land or that detrimentally affect water conservation, erosion control, soil conservation, or fish and wildlife habitat, except those required for environmental restoration, federal, state or local regulatory programs, or BMPs. There shall be no activities that will be detrimental to drainage, flood control, or fish and wildlife habitat preservation unless otherwise provided in this Easement. There shall be no dredging of new canals, construction of new dikes, manipulation of natural water courses, or disruption, alteration, or pollution of existing surface or subsurface water flow or natural water sources, freshwater lakes, ponds and pond shores, marshes, creeks, or any other water bodies except as

consistent with BMPs for the type of agricultural activities being conducted. Provided, however, Grantor may construct, operate, maintain, or replace groundwater wells, ditches, swales and other water conveyance structures, drainage structures or other water management improvements incident to allowed uses on the Property, subject to legally required permits and regulations.

D. Planting of nuisance, exotic or non-native plants as listed by the Exotic Pest Plant Council or the University of Florida's Institute of Food and Agricultural Sciences, or their successors, except for plants approved by Grantee and needed to support agricultural activities allowed hereunder. The Grantor shall, to the extent practical, control and prevent the spread of nuisance exotics or non-native plants on the Property. Grantor hereby grants to Grantee the right, in Grantee's sole discretion and at Grantee's expense, to develop and implement an exotic plant removal plan for the eradication of exotics, or non-native wild plants, on the Property. Under no circumstances shall this right conveyed to Grantee be construed to diminish Grantor's responsibilities under this paragraph or as an obligation of the Grantee.

E. Concentrated animal feeding operation as defined by the United States Environmental Protection Agency.

F. New construction or placing of temporary or permanent buildings, mobile homes, or other structures in, on or above the ground of the Property except as may be necessary by Grantor for maintenance or to serve the permitted uses of the Property that are consistent with the Easement Purposes or during emergency situations or as may otherwise be specifically provided for in this Easement. For purposes of this paragraph the term "emergency" shall mean those situations that will have an immediate and irreparable adverse impact on the Easement Purposes.

G. Construction or placing of roads, billboards or other advertising, utilities, or structures, except those structures and unpaved roads necessary for the agricultural operations on the land or structures necessary for other activities allowed under this Easement, and except for linear facilities described in section 704.06(11), Florida Statutes. Provided, however, Grantee (i) may erect and maintain signs designating the Property as land under the protection of Grantee, and (ii) shall be entitled to recover from Grantor, and Grantor's personal representatives, heirs, successors, and assigns reasonable compensation based on diminution in value of Grantee's interest for the construction and operation of any public or private linear facilities and related access and appurtenances, as described in section 704.06(11)(b), Florida Statutes.

H. Fertilizer use, including sludge or sludge products, for agriculture activities not in accordance with agricultural BMPs recommended by the United States Department of Agriculture Natural Resources Conservation Service ("NRCS") or FDACS, whichever is more stringent, as those BMPs may be amended from time to time. No agricultural activities shall occur within a 100-foot buffer around sinkholes or karst features that are connected to spring conduits, except as provided in the

applicable BMPs.

- I. Actions or activities that may reasonably be expected to adversely affect state or federally listed threatened or endangered species.
- J. Any subdivision of the Property.
- K. Commercial water wells on the Property.
- L. Harvesting of cypress trees in the SNAs.
- M. Mitigation banks pursuant to Section 373.4135, et. seq., Florida Statutes.
- N. Construction or improvements in any SNA or conversion of any SNAs to more improved areas or more intense uses. Any use of the Property which would impair, adversely impact, or destroy an SNA, including a change to more intensive agricultural practices, is also prohibited.
- O. Activities detrimental to the preservation of historical, architectural, archaeological, or cultural resources on the Property.
- P. Conversion of forested areas within the SNAs as shown in the BDR to non-forested areas.

ARTICLE VI. GRANTOR'S RESERVED RIGHTS

Grantor reserves to Grantor, and to Grantor's personal representatives, heirs, successors, and assigns, the following specified rights ("Reserved Rights"), which are deemed to be consistent with the Easement Purposes. The exercise of the Reserved Rights is subject to the prohibitions in Article V and must be in full accordance with all applicable BMPs and local, state and federal law, as amended from time to time, as well as in accordance with the Easement Purposes.

A. Grantor has, and shall be deemed hereby to have retained, the underlying fee simple title in the Property, subject to this Easement. Further, Grantor retains and reserves all rights of, in, and to the Property not conveyed to Grantee under Article IV or prohibited by Article V.

B. Agricultural and Related Rights. (i) The right to continued use of the Property for agricultural purposes and uses identified in the BDR; (ii) The right to convert any property not designated an SNA (as delineated in the BDR) to other agricultural and silviculture purposes and uses; (iii) The right to engage in cattle grazing as set forth in the BDR, including the right to maintain, utilize, restore, fertilize, and mow improved pasture; (iv) The right, as part of cattle operations, to supplement the cattle using minerals and hay; (v) The right to use current technologies on the Property,

including fertilizers, pesticides and herbicides commonly used on agricultural property in the State of Florida at such time; and (vi) The right to install, use, maintain, replace and repair non-commercial groundwater wells on the Property. Any and all agricultural uses shall be conducted in accordance with BMPs and in compliance with all laws, rules, and regulations.

C. The right to conduct silvicultural operations on the Property provided, however, that prior to any timbering in an SNA, Grantor shall consult with Grantee concerning reforestation methods and methods consistent with the perpetual protection of the SNAs.

D. The right to conduct prescribed burning on the Property; provided, however Grantor shall obtain and comply with a prescribed fire authorization from the Florida Forest Service of FDACS or its successor agency.

E. The right to mortgage the Property; provided, however, that the Mortgagee's lien shall be inferior and subordinate to this Easement.

F. The right to contest tax appraisals, assessments, taxes, and other charges on the Property.

G. The right to continue to use, maintain, repair, and reconstruct, but not enlarge all existing buildings, barns, outbuildings, fences, roads, ponds, wells, utilities, drainage ditches, culverts and such other facilities on the Property as depicted in the BDR. Expanding existing cow pens as necessary to conduct normal cattle operations on the Property shall be allowed, except when located in an SNA.

H. The right to sell, devise or otherwise transfer ownership of fee title to the Property to a third party. No easements, rights-of-way, restrictions, or less than fee simple interests in the Property shall be granted or conveyed after the date of this instrument unless such encumbrances are approved, in advance and in writing, by the Grantee and recorded in the public records of the county(ies) in which the Property is located. The Grantee may give such approval if it determines, in its sole discretion, that such encumbrance would be consistent with the Easement Purposes.

I. The right to exclusive use of the improvements on the Property.

J. The right to obtain and comply with all permits for management of stormwater, water wells, and consumptive uses as may be required by the Water Management District or any governmental agency having jurisdiction over those activities.

K. The right to construct, after giving notice to Grantee, buildings or other structures incident to agricultural uses carried on in accordance with sound agricultural practices. Such buildings shall not be used as residences.

L. The right to establish (by survey, fencing, or marking) and maintain property lines around the perimeter of the Property to protect the Property from trespassing and to assist Grantor in the management of the Property in accordance with this Easement.

M. The right to observe, maintain, photograph, introduce and stock native fish or wildlife on the Property, and to use the Property for hiking and horseback riding. Grantor reserves, and shall continue to own, the hunting and fishing rights on or related to the Property and Grantor may lease and sell privileges of such rights.

N. The right to install connections to normal utility systems, such as electric, cable, water, sewer, communication, and telephone that are consistent with the Easement Purposes and incidental to serve the allowed uses of the Property. If a connection to a sewer system is not available, this right shall include the right to install a septic system provided it is not located in an SNA. The granting of easements or rights-of-way for power lines, gas lines, sewer lines, waterlines, telecommunications towers, and wind farms is prohibited, unless approved by Grantee pursuant to Article VI, Paragraph H. Existing utilities may be replaced or repaired at their current location.

ARTICLE VII. GRANTEE'S REMEDIES

A. If Grantee determines that Grantor is in violation of the terms of this Easement, including any amendments, modifications, updates, or revisions thereto, or that a violation is threatened, Grantee shall give written notice to Grantor of such violation and demand corrective action sufficient to cure the violation and, where the violation involves injury to the Property, to restore the portion of the Property so injured. If Grantor fails to cure the violation within 30 days after receipt of notice thereof from Grantee or, under circumstances where the violation cannot reasonably be cured within a 30-day period, fails to begin curing such violation within the 30-day period, or fails to continue diligently to cure such violation until finally cured, Grantee may bring an action at law or in equity in a court of competent jurisdiction to: (i) enforce the terms of this Easement, (ii) enjoin the violation, *ex parte* as necessary, by temporary or permanent injunction, (iii) recover any damages to which it may be entitled for violation of the terms of this Easement or injury to any values or Easement Purposes protected by this Easement, including damages for the loss of scenic, aesthetic, or environmental values, and (iv) require the restoration of the Property to the condition that existed prior to any such violation or injury.

B. Without limiting Grantor's liability therefor, Grantee, in its sole discretion, may apply any damages recovered to the cost of undertaking any corrective action on the Property. If Grantee, in its sole discretion, determines that circumstances require immediate action to prevent or mitigate significant damage to the values of the Property, Grantee may pursue its remedies under this Article VII without prior notice to Grantor or without waiting for the period provided for cure to expire.

C. Grantee's rights under this Article apply equally in the event of either actual or threatened violations of the terms of this Easement, and Grantor agrees that Grantee's remedies at law for any violation of the terms of this Easement are inadequate and that Grantee shall be entitled to the injunctive relief described in this Article, both prohibitive and mandatory, in addition to such other relief to which Grantee may be entitled, including specific performance of the terms of this Easement, without the necessity of proving either actual damages or the inadequacy of otherwise available legal remedies. Grantee's remedies described in this Easement shall be cumulative and shall be in addition to all remedies now or hereafter existing at law or in equity.

D. Enforcement of the terms of this Easement shall be at the discretion of Grantee, and any forbearance by Grantee to exercise its rights under this Easement in the event of any breach of any term of this Easement by Grantor shall not be deemed or construed to be a waiver by Grantee of such term or of any subsequent breach of the same or any other term of this Easement or of any of Grantee's rights under this Easement. No delay or omission by Grantee in the exercise of any right or remedy upon any breach by Grantor shall impair such right or remedy or be construed as a waiver.

E. Grantor hereby waives any defense of estoppel, adverse possession, or prescription.

F. Nothing contained in this Easement shall be construed to entitle Grantee to bring any action against Grantor for any injury to or change in the Property resulting from causes beyond Grantor's control, including fire, flood, storm, and earth movement, or from any prudent action taken by Grantor under emergency conditions to prevent, abate, or mitigate significant injury to the Property resulting from such causes.

G. Grantor shall hold harmless, indemnify, and defend Grantee and its directors, officers, employees, agents, and contractors and the personal representatives, successors, and assigns of each of them (collectively "Indemnified Parties") from and against all liabilities, penalties, costs, losses, damages, expenses, causes of action, claims, demands, or judgments arising from or in any way connected with: (1) injury to or the death of any person, or physical damage to any property, resulting from any act, omission, condition, or other matter related to or occurring on or about the

Property, regardless of cause, unless due solely to the negligence of any of the Indemnified Parties; (2) the obligations specified in Article IX, Paragraphs A and B; or (3) the enforcement of this Easement.

ARTICLE VIII. PUBLIC ACCESS

A. **No General Public Access.** The granting of this Easement does not convey to the public the right to enter the Property for any purpose whatsoever, and Grantee will cooperate with Grantor in the enforcement of this prohibition.

B. **Scientific, Environmental, Conservation, Educational Organizations.** Notwithstanding the foregoing, Grantor, in its sole discretion, may grant to scientific, environmental, conservation and educational organizations the right to enter upon the Property or adjoining property of Grantor to conduct scientific or educational investigations or studies consistent with the Easement Purposes, on such terms as Grantor, in its sole discretion, may determine.

ARTICLE IX. MISCELLANEOUS

A. **Costs and Liabilities.** Grantor retains all responsibilities and shall bear all costs and liabilities of any kind related to the ownership, operation, upkeep, and maintenance of the Property, including the maintenance of adequate comprehensive general liability coverage. Grantor shall keep the Property free of any liens arising out of any work performed for, materials furnished to, or obligations incurred by Grantor.

B. **Taxes.** Grantor shall pay before delinquency all taxes, assessments, fees, and charges of whatever description levied on or assessed against the Property by competent authority (collectively "taxes"), including any taxes imposed upon or incurred as a result of this Easement, and shall furnish Grantee with satisfactory evidence of payment upon request. Grantee is authorized but in no event obligated to make or advance any payment of taxes, upon 3 days prior written notice to Grantor, in accordance with any bill, statement, or estimate procured from the appropriate authority, without inquiry into the validity of the taxes or the accuracy of the bill, statement, or estimate, and the obligation created by such payment shall bear interest until paid by Grantor at the maximum rate allowed by law.

C. **Extinguishment.** If unforeseen circumstances arise in the future that render the Easement Purposes impossible to accomplish, this Easement can only be terminated or extinguished, whether in whole or in part, by judicial proceedings in a court of competent jurisdiction, and the amount of the proceeds to which Grantee shall be entitled, after the satisfaction of prior claims and costs of sale, from any sale, exchange, or involuntary conversion of all or any portion of the Property subsequent to such termination or extinguishment, shall be determined, unless otherwise

provided by Florida law at the time, in accordance with Article IX, Paragraph D. If sufficient funds are not available for Grantee to be paid its entire Proportionate Share (as hereinafter defined) out of the proceeds, or if for any other reason Grantee is not paid its entire Proportionate Share, Grantee has the right to recover such deficiency (including the right to record a lien to secure its recovery of such deficiency) from the record owner of the Property at the time of such sale. Grantee shall use all such proceeds in a manner consistent with the Easement Purposes or the purposes of the bond or statutory program under which Grantee obtained the purchase money for this Easement. Grantor believes that any changes in the use of neighboring properties will increase the benefit to the public of the continuation of this Easement, and Grantor and Grantee intend that any such changes shall not be deemed to be circumstances justifying the termination or extinguishment of this Easement. In addition, the inability of Grantor to conduct or implement any or all of the uses allowed under the terms of this Easement, or the unprofitability of doing so, shall not impair the validity of this Easement or be considered grounds for its termination or extinguishment.

D. **Proceeds.** This Easement constitutes a real property interest immediately vested in Grantee, which, for the purposes of Article IX, Paragraphs C and E, the parties stipulate to have a fair market value determined by multiplying the fair market value of the Property unencumbered by the Easement (minus any increase in value after the date of this grant of Easement attributable to improvements) by the ratio of the value of the Easement at the time of this grant to the value of the Property, without deduction for the value of the Easement, at the time of this grant (Grantee's percentage interest is referred to herein as Grantee's "Proportionate Share"). For the purposes of this paragraph, the ratio of the value of the Easement to the value of the Property unencumbered by the Easement shall remain constant.

E. **Condemnation.** If the Easement is taken, in whole or in part, by exercise of the power of eminent domain or otherwise acquired by any authority with power of eminent domain through a purchase in lieu of a taking, Grantee shall be entitled to its Proportionate Share from the recovered proceeds in conformity with the terms of Article IX, Paragraph D. The respective rights of Grantor and Grantee set forth in this paragraph shall be in addition to, and not in limitation of, any rights of Grantee under applicable law.

F. **Assignment.** This Easement is transferable by Grantee, but Grantee may assign its rights and obligations under this Easement only to a governmental entity with the legal capacity to enforce the terms of this Easement.

G. **Property Interest Transfers.** In addition to Grantee's approval rights set forth in Article VI, Paragraph H, Grantor further agrees to give written notice to Grantee of the transfer of any interest in the Property. The failure of Grantor or Grantee to

perform any act required by this paragraph shall not impair the validity or priority of this Easement or limit its enforceability in any way.

1. Right of Grantee to Negotiate in Advance of Sale.

a. The terms of this right are such that if Grantor intends to publicly offer the Property for sale, or any interest or portion thereof, Grantor shall deliver to Grantee notice of such intent (including the date, time, and location of the intended offering) at least 45 days prior to offering the Property for sale.

b. In addition, if Grantor receives an unsolicited, but acceptable, offer from a prospective buyer to purchase the Property, or any interest therein or portion thereof, Grantor shall deliver to Grantee notice of Grantor's intent to accept the offer, including the names and addresses of any party to whom the Property is to be transferred, a description of the land to be transferred, and all relevant terms of the offer received, such that Grantee receives the notice at least 45 days prior to execution of a contract for such sale (Grantor agrees that any such contract for sale shall be made expressly subject to Grantee's right to negotiate for the purchase of the Property provided in Paragraph 1.c. below).

c. Under notice provided pursuant to Paragraphs 1.a. and 1.b. above, Grantor shall, in good faith, afford Grantee an opportunity to negotiate the acquisition of the Property, or such portion thereof or interest therein that Grantor intends to sell. If Grantee desires to negotiate the acquisition of the Property (or such portion thereof or interest therein as applicable), Grantee shall so notify Grantor within 30 days after receipt of Grantor's notice of intent. If Grantor and Grantee are unable, in good faith, to agree to terms of an acquisition of the Property (or such interest therein or portion thereof as applicable) within 45 days after Grantee's notice to Grantor under this paragraph, Grantor may sell the Property free of the right granted in this Article IX, Paragraph G.1.

d. This right of notice shall not be triggered by sales or transfers between Grantor and lineal descendants of Grantor or entities in which Grantor owns a majority of the controlling interests. The right or notice granted herein applies to the original Grantor and to said original Grantor's heirs, successors, and assigns.

2. Subsequent Transfers. Grantor agrees to notify Grantee of the names and addresses of any party to whom the Property, is to be transferred at least 45 days prior to the date of such transfer.

3. Continuation of Agricultural Production. Grantor shall obtain assurances in writing from the prospective transferee that the Property will continue to be used for bona fide agricultural production purposes in accordance with this Easement.

In addition, Grantor will incorporate (whether by reference or otherwise) the terms of this Easement in any deed or other legal instrument by which Grantor divests or conveys any interest in the Property, including a lease or license.

4. **Statement of Compliance.** Grantor may request in writing at least 45 days prior to sale, mortgage, transfer or long term (five years or longer) lease of the Property, or any portion thereof, a written statement from Grantee stating that, to Grantee's actual knowledge, Grantor is in compliance with the terms of this Easement, or if Grantor is not in compliance with the terms of this Easement, stating what violations of this Easement exist according to Grantee's actual knowledge. Grantee agrees in such cases to acknowledge, execute, and deliver to Grantor or to any mortgagee, transferee, purchaser, or lessee such a written statement concerning compliance within 45 days from receipt by Grantee of a written request therefor. Nothing contained in this Easement shall relieve the Grantor from the responsibility to comply with applicable federal, state, and local laws and regulations.

5. **Grantor's Liability after Transfer.** In the event of a sale or the transfer of title of the Property to an individual or entity other than the current legal owner, Grantor will immediately notify Grantee. Thereafter, Grantee will confer with the new owner within 30 days and explain, discuss, and plan the transfer of the responsibility of carrying out the terms of this Easement, such that the long-term benefits to everyone concerned and the terms of this Easement will not be impaired by default or otherwise. Grantor and each subsequent owner of the Property shall have no personal liability for the observance or performance of the obligations of the Grantor hereunder, with respect to any interest in the Property conveyed, after the Grantor or subsequent owner has conveyed their interest in the Property as permitted by and pursuant to the terms of this Easement.

H. **Notices.** Any notice, demand, request, consent, approval, or communication that either party desires or is required to give to the other party under this Easement shall be in writing and either served personally or sent by first class mail, postage prepaid, or by overnight mail service, addressed to the parties as set forth in this Easement, or to such other addresses such party may establish in writing to the other. If time is of the essence, initial notice by electronic mail is acceptable, but shall be followed by written notice as provided in this paragraph as soon as possible.

I. **Recordation.** Grantee shall record this instrument and any amendments in timely fashion in the official records of the county(ies) in which the Property is located, and may re-record it at any time as may be required to preserve its rights in this Easement.

J. **Non-Homestead Certification.** Grantor hereby certifies that if a Grantor who is married signs this Easement without the joinder of his or her spouse, the Property

is neither the homestead of Grantor/Grantor's spouse nor the primary physical residence of Grantor/Grantor's spouse, nor is the Property contiguous to the homestead or primary physical residence of Grantor/Grantor's spouse.

K. **Amendments.** The terms of this Easement may be amended by the mutual consent of the parties hereto. No amendment shall be effective until executed with the formality of a deed and recorded in the public records of the county(ies) in which the Property is located.

L. **Controlling Law.** The laws of the State of Florida shall govern the interpretation and performance of this Easement.

M. **Liberal Construction.** Any general rule of construction to the contrary notwithstanding, this Easement shall be liberally construed in favor of the Grantee to effect the Easement Purposes and the policy and purpose of Section 570.71, Florida Statutes. If any provision in this instrument is found to be ambiguous, an interpretation consistent with the Easement Purposes that would render the provision valid shall be favored over any interpretation that would render it invalid.

N. **Severability.** If any provision of this Easement, or the application thereof to any person or circumstance, is found to be invalid, the remainder of the provisions of this Easement, or the application of such provision to persons or circumstances other than those as to which it is found to be invalid, as the case may be, shall not be affected thereby.

O. **Joint Obligation.** The obligations imposed by this Easement upon Grantor shall be joint and several.

P. **Successors.** The covenants, terms, conditions, and restrictions of this Easement shall be binding upon, and inure to the benefit of, the parties hereto and their respective personal representatives, heirs, successors, and assigns and shall continue as a servitude running in perpetuity with the Property.

Q. **Termination of Rights and Obligations.** A party's rights and obligations under this Easement terminate upon transfer of the party's entire interest in the Easement or Property as permitted by and pursuant to the terms hereof, except that liability for acts or omissions occurring prior to transfer shall survive transfer.

R. **Captions.** The captions in this instrument have been inserted solely for convenience of reference and are not a part of this instrument and shall have no effect upon construction or interpretation.

S. **References.** References to statutes or rules in this Easement shall be to the text of such statute or rule on the date of execution of this Easement.

TO HAVE AND TO HOLD unto Grantee, its successors, and assigns forever.

MONITORING ASSISTANCE (IF ANY) /NAME: _____ AGENCY: _____

PURPOSE OF MONITORING SITE INSPECTION:

- DOCUMENT GRANTOR'S COMPLIANCE WITH THE TERMS OF THE CONSERVATION EASEMENT
- ASSURE ALL GRANTOR'S ACTIVITIES ADHERE TO ESTABLISHED BEST MANAGEMENT PRACTICES
- OUTLINE THE ACTIVITIES OF THE GRANTOR ON THE PROPERTY DURING PRECEDING YEAR(S)
- REVIEW ANY ACTIVITIES PROPOSED BY GRANTOR FOR UPCOMING YEAR TO ASSURE COMPLIANCE WITH EASEMENT

Please document below responses to each question explaining any activities/changes on the property during the past year as they relate to the Recitals, Prohibited Uses, and Grantor's Reserved Rights established in the Deed of Conservation Easement. The actual easement should be reviewed prior to the monitoring inspection to ensure all provisions and restrictions are considered during the site inspection and properly documented in this report.

(N/A = not applicable to Conservation Easement)

1. RECITALS / SPECIAL NATURAL AREAS*:

A	•HAS THERE BEEN ANY "CONVERSION", CONSTRUCTION, OR IMPROVEMENTS TO ANY SPECIAL NATURAL AREA? (DESCRIBE)
B.	•HAS THERE BEEN ANY USE OF THE PROPERTY WHICH WOULD IMPAIR OR DESTROY THE SPECIAL NATURAL AREAS? (DESCRIBE)
C.	•HAS THERE BEEN ANY TIMBERING IN A SPECIAL NATURAL AREA? •IF TIMBERING OCCURRED IN THE SPECIAL NATURAL AREA – WAS THE GRANTOR CONSULTED? (EXPLAIN)

* Note that in some Conservation Easements the Special Natural Areas are described using such terms as "Natural Areas" or "Wetland Areas"

2. PROHIBITED USES:

ADDENDUM
BENEFICIAL INTEREST AND DISCLOSURE AFFIDAVIT
(CORPORATION/PARTNERSHIP/LLC)

Before me, the undersigned authority, personally appeared Teresa Segert ("affiant"), this 14th day of April, 2023, who, first being duly sworn, deposes and says:

1) That affiant is the President of Sandy Gully Dairy, Inc., a Florida corporation, as "Seller", whose address is 1251 Cougar Blvd, Sebring, Florida 33872, and in such capacity has personal knowledge of the matters set forth herein and has been duly authorized by Seller to make this affidavit on Seller's behalf. That Seller is the record owner of the Property. As required by Section 286.23, Florida Statutes, and subject to the penalties prescribed for perjury, the following is a list of every "person" (as defined in Section 1.01(3), Florida Statutes) holding 5% or more of the beneficial interest in the disclosing entity: (if more space is needed, attach separate sheet)

<u>Name</u>	<u>Address</u>	<u>Interest</u>
-------------	----------------	-----------------

2) That to the best of the affiant's knowledge, all persons who have a financial interest in this real estate transaction or who have received or will receive real estate commissions, attorney's or consultant's fees or any other fees or other benefits incident to the sale of the Property are: (if non-applicable, please indicate "None" or "Non-Applicable")

<u>Name</u>	<u>Address</u>	<u>Reason for Payment</u>	<u>Amount</u>
Dean Saunders	1723 Barton Rd Lakeland FL 33801	Real Estate Commission	5%

3) That, to the best of the affiant's knowledge, the following is a true history of all financial transactions (including any existing option or purchase agreement in favor of affiant) concerning the Property which have taken place or will take place during the last five years prior to the conveyance of title to the State of Florida: (if non-applicable, please indicate "None" or "Non-Applicable")

<u>Name and Address of Parties Involved</u>	<u>Date</u>	<u>Type of Transaction</u>	<u>Amount of Transaction</u>
None			

This affidavit is given in compliance with the provisions of Sections 286.23, 375.031(1), and 380.08(2), Florida Statutes.

AND FURTHER AFFIANT SAYETH NOT.

ADDENDUM
(CORPORATE/FLORIDA)

A. At the same time that Seller submits the closing documents required by paragraph 9. of this Agreement, Seller shall also submit the following to Buyer:

1. Corporate resolution that authorizes the sale of the Property interest to Buyer in accordance with the provisions of this Agreement and a certificate of incumbency, and
2. Certificate of good standing from the Secretary of State of the State of Florida.
3. Copy of proposed opinion of counsel as required by paragraph B. below.

B. As a material inducement to Buyer entering into this Agreement and to consummate the transaction contemplated herein, Seller covenants, represents and warrants to Buyer as follows:

1. The execution of this Agreement and the performance by Seller of the various terms and conditions hereof, including, without limitation, the execution of all agreements, notices, and other documents hereunder, have been duly authorized by the requisite corporate authority of Seller.
2. Seller is a corporation duly organized, validly existing and in good standing under the laws of the State of Florida and is duly qualified to own real property in the State of Florida.
3. This Agreement, when executed and delivered, will be valid and legally binding upon Seller and enforceable in accordance with its terms and neither the execution of this Agreement and the other instruments to be executed hereunder by Seller, nor the performance by Seller of the various terms and conditions hereto will violate the Articles of Incorporation or By-Laws of Seller, nor will they constitute a breach or default under any agreement, indenture or other instrument to which Seller is a party or by which Seller is bound.

At the closing, Seller shall deliver to Buyer an opinion of counsel from an attorney licensed to practice law in the State of Florida and an active member in good standing with the Florida Bar, to the effect that the covenants, representations and warranties contained above in this paragraph B. are true and correct as of the closing date. In rendering the foregoing opinion, such counsel may rely as to factual matters upon such other documents as counsel may deem necessary and advisable.

Intended User of Review: Florida Department of Agricultural and Consumer Services, Florida Forest Service (FDACS/FFS).

Intended Use of Review Compliance with USPAP & SASBOT

From: Thomas G. Richards, MAI
Richards Appraisal Service, Inc.

Date: April 12, 2023

Project Information:

Richards Appraisal File Number	<u>1348</u>
Parcel Name	<u>Sandy Gully CE</u>
Location	<u>Highlands County, Florida</u>
Effective Date of Appraisals	<u>February 21, 2023</u>

Summary of Review

Pursuant to your request, I have reviewed two individual appraisal reports on the Sandy Gully Conservation Easement located in Highlands County, Florida. One appraisal report was prepared by Mr. Riley K. Jones, MAI, SRA of Florida Real Estate Advisors, Inc. The other report was prepared by Mr. Phillip M. Holden, MAI of S.F. Holden, Inc. I have determined after review of the reports and some minor changes to each appraisal that they are acceptable as submitted.

The Jones report is dated April 12, 2023. The Holden report is dated April 11, 2023. Both appraisals have a valuation date of February 21, 2023. The value indications for the proposed conservation easement reflected by each appraiser were:

(1) Riley K. Jones MAI, SRA	\$1,800,000
(2) Phillip M. Holden, MAI	\$1,673,000

In the reviewer's opinion the appraisal reports were completed substantially in conformance with USPAP, were well documented, and reflected reasonable value indications for the subject property. Both firms submitting appraisals consider their report to be appraisal reports according to USPAP. Both appraisals are considered sufficient to

satisfy the requirements of Standard 2 of USPAP as it is applied to this type of report. The appraisals are also in substantial conformance with the Supplemental Appraisal Standards for the Board of Trustees, Division of State Lands, Bureau of Appraisal, Florida Department of Environmental Protection, March 2, 2016.

The intended users of this appraisal assignment is the Florida Department of Agriculture and Consumer Services, Florida Forest Service (FDACS/FFS). The intended use is for FDACS/FFS and any other specific organization or entity that may be involved in the specific transaction or for consideration in determining the effect on value of the proposed conservation easement on the subject property.

Both Mr. Jones and Mr. Holden utilized the Sales Comparison technique to estimate the value of the subject tract which is essentially vacant ranch land utilizing the “before and after” technique which is deemed by the reviewer to be the most appropriate method. The appraisers utilized meaningful data, appropriate adjustment procedures and therefore, the resultant conclusions are well supported.

It is important to note that the Hypothetical Condition is made by the appraisers in assuming that the proposed conservation easement is in place on the date of the appraisal. Hypothetical Condition is defined as that which is contrary to what exists but is assumed for appraisal purposes. Uniform Standards dictate that these type assumptions are prominently disclosed. This Hypothetical Condition is prominently disclosed and treated appropriately by both appraisers and are necessary for a credible assignment result. One common **Extraordinary Assumption** was made by the appraisers regarding relying upon the “Draft Copy” of the easement which is not yet executed by the parties. The appraiser’s each stress the importance of the final agreement being exactly like the draft. This is also a common and reasonable procedure for this property type.

The appraisers and the reviewer are in agreement that the highest and best use for the subject parcel is for continued agriculture and recreational use for the foreseeable future. More details regarding the highest and best use is included in a later section of this review report.

The valuation problem consists of estimating the impact on value of a proposed “Conservation Easement” which will encumber the subject property. The significance of the conservation easement is that it is proposed to assure that the property will be retained forever in its natural, scenic, wooded condition to provide a relatively natural habitat for fish, wildlife, plants or similar ecosystems and to preserve portions of the property as productive farmland and forest land that sustains for the long term both the economic and conservation values of the property and its environs, through management.

In order to value the subject property, the appraisers have applied the traditional appraisal methods and have arrived at a supportable opinion of the impact on Market Value of the proposed conservation easement.

Statement of Ownership and Property History

The subject is currently titled as:

Sandy Gully Dairy, Inc.
1251 Cougar Blvd.
Sebring, Florida 33872

The property has been owned for in excess of five years and the property has not been marketed for sale.

Property Description

This appraisal assignment encompasses a parcel containing 643.38 acres of a larger ranch known as the Sandy Gully Ranch. The ranch is headquartered at 1251 Cougar Boulevard in Sebring, Florida in an unincorporated area of Highlands County, Florida. This location is approximately 7 miles west of Downtown Sebring.

The appraisal problem encompasses estimating the impact on value of a proposed conservation easement on 643.38 acres of the subject ranch holding all of which is located in unincorporated Highlands County. According to mapping provided by the client, the subject contains approximately 256.52 acres of uplands (40%) and approximately 386.86 acres of wetlands (60%). Otherwise, the ranch contains a mosaic of improved pasture areas, oak and cabbage hammocks along with intermittent wetland sloughs, hardwood and forested wetlands.

The surrounding area is typically comprised of larger cattle ranches and/or recreational tracts and large government land holdings. Residential development is rural and very limited in the immediate area and typically only in support of larger agricultural holdings.

The ranch is accessed by virtue of an easement through commonly owned Sandy Gully Dairy property from the southern terminus of Blueberry Road. This road is a shell road spanning from Schumacher Road approximately 1 mile north. Schumacher Road also extends by plat into the northeast corner of the subject property but is unimproved past Blueberry Road. Schumacher Road is paved from the intersection with Highway 27 for several miles and then turns to shell road nearer the subject. This location is approximately 3.25 miles west of Highway 27 and approximately 7 miles west of the town of Sebring, Florida. Highway 27 is a major four-laned divided highway that runs prominently north and south through the state of Florida. The subject parcel has a reasonably level topography as is common in this area of Highlands County Florida.

The title insurance policy is silent on OGM rights. Therefore, the appraisers and the reviewer believe that these rights are intact on this parcel.

The subject property is found on Highlands County FEMA Flood Maps 12055C0118C dated November 18, 2015. According to these maps the subject property, is located within Flood Zone A and X which are considered to be an area both within the 100-year

flood plain and outside the 100-year flood plain respectively. It appears that the subject is approximately 60% within zone A which appears consistent with the wetland ratio.

The subject ranch is improved with typical ranching improvements such as fencing, cross-fencing, gates, ditches, culverts, ranch roads and water holes.

While electrical and telephone services are readily available to the area a municipal source for potable water or sewage disposal is not. Wells and septic systems are typical in the region.

The subject has an AU; Agricultural zoning and Agriculture future land use classification by Highlands County. These classifications are generally associated with rural areas of the county and are typically committed to open space and agricultural activities. The permitted residential density is one dwelling unit per five acres of land area in Highlands County.

Highest and Best Use

Highest and best use is defined as the reasonably probable and legal use of vacant land or an improved property which is physically possible, appropriately supported, financially feasible, and that results in the highest value. The four criteria the highest and best use must meet are legal permissibility, physical possibility, financial feasibility, and maximum profitability.

Before

Mr. Jones concluded that the Highest and Best Use for the subject would be for continued agriculture and recreation with a limited potential for future residential development.

Mr. Holden concluded that the Highest and Best Use for the subject would be for continued recreational, agriculture, ranching with potential for large tract rural residential use.

After

Mr. Jones concluded that the Highest and Best Use for the subject, as encumbered, would be essentially limited to agricultural and recreational uses subject to the conservation easement limitations.

Mr. Holden concluded that the Highest and Best Use for the subject would be continued agricultural and recreational subject to the terms of the conservation easement.

Both appraisers recognize the limited development potential of the property in the before scenario. The two most significantly impacting criteria of the proposed conservation easement are the loss of development rights and/or the rights to subdivide the property.

Overall, the highest and best use conclusions of both appraisers are reasonably similar. Each has made a convincing argument and has provided adequate market evidence to support these conclusions. Each of the appraisers have adequately addressed the issue of highest and best use for the subject property and more importantly the reviewer is convinced that the sales data utilized is that of a basically similar highest and best use.

Reviewer Comments

The reviewer found the reports to be very comprehensive and informative as to the relative components of a typical appraisal report. The physical characteristics and site descriptions were also found to be typical as were the details and documentation of the comparable sales expected in an appraisal for this property type. The reports have also conformed to the reporting standards expected by FDEP/FDACS and are substantially in conformance with the Uniform Standards of Appraisal Practice (USPAP).

In the valuation of the Subject property the appraisers have applied the sales comparison approach to value which is deemed to be the traditional and most appropriate method to value a vacant agricultural parcel. Considering that the subject of the appraisal is to estimate the impact on value of the proposed conservation easement it was necessary to apply the before and after methodology.

In the before scenario the appraisers contrasted the subject property to a set of unencumbered comparable sales within the subject market area. In estimating the value for the subject, the appraisers analyzed sales of agricultural properties offering similar locational attributes and highest and best use characteristics. Mr. Jones analyzed three comparable sales in his effort and Mr. Holden also analyzed three comparable sales to contrast to the subject. The appraisers had one commonly utilized sales in this effort.

In the after scenario the appraisers contrasted the subject property to a set of comparable sales encumbered with conservation easements. Due to the limited number of sales meeting these criteria the sale search had to be expanded for this property type. In estimating the value for the subject as encumbered the appraiser's analyzed sales of agricultural properties offering similar locational attributes and highest and best use characteristics similarly encumbered by conservation easements. Mr. Jones analyzed four comparable sales in his effort and Mr. Holden also analyzed four comparable sales to contrast to the subject. The appraisers had two commonly utilized sales in this effort.

The appraisers demonstrated a very thorough analysis of the comparable data and adapted a very straightforward and reasonable valuation process. Both Mr. Jones and Mr. Holden utilized a qualitative adjustment process to contrast the sale properties to the subject. This method is widely accepted, well supported and reasonable.

Analysis of Appraisers' Sales

Jones Appraisal

The following sales were utilized by Mr. Jones in the valuation of the subject before the proposed conservation easement.

Sale No.	Subject	Sale 1	Sale 2	Sale 3
County	Highlands	Hendry	Okeechobee	Hardee
Sale Date	N/A	10/22	11/22	1/21-3/21
Price/Ac	N/A	\$5,505	\$4,777	\$4,204
Size/Ac	643.38	300.00	1,223.00	743.30
Upland %	40%	87%	55%	23%
Overall Rating	N/A	Superior	Similar	Inferior

Mr. Jones analyzed the three tabulated sales above for the purpose of estimating the value of the subject before placing the conservation easement on the property. The sales are located in Hendry, Okeechobee and Hardee Counties in Florida.

The sales analyzed for the subject parcel have sale dates ranging from January 2021 to November 2022. The comparables selected are all agricultural properties with similar highest and best use characteristics. The comparable sales selected and analyzed by Mr. Jones are considered to be good indicators of value for the subject. These sales reflect a range from \$4,204 to \$5,505 per gross acre.

Mr. Jones has elected to apply a qualitative adjustment process to the comparable sales for comparable factors such as property rights conveyed, financing terms, conditions of sale, market conditions, location/access, size, wetlands, utilities, zoning/land use and improvements/character. Overall, the entire process of contrasting the sales to the subject property seems reasonable. The appraiser utilized sound logic and reasoning in contrasting the comparable sales to the subject property and, overall, the analyses and qualitative adjustment process is well supported and adequately discussed.

In his final analysis Mr. Jones brackets the subject between superior rated sale 1 at \$5,505 per acre and similar rated sale 2 at \$4,777 per acre. Mr. Jones concludes at a value of \$4,850 per gross acre recognizing sales 1 and 2 which bracket the subject as being "most recent" sales. Therefore, \$4,850 times 643.38 acres; or \$3,120,393 which is rounded to \$3,100,000.

The following sales were utilized by Mr. Jones in the valuation of the subject after the proposed conservation easement.

Sale No.	Subject	Sale 1	Sale 2	Sale 3	Sale 4
County	Highlands	DeSoto	Manatee	Hendry	Glades
Sale Date	N/A	8/22	12/21	6/22	10/21
Price/Ac	N/A	\$1,456	\$3,405	\$2,622	\$1,426
Size/Ac	643.38	1,030.49	1,248.33	1,022.00	630.95
Overall Rating	N/A	Inferior	Far Superior	Similar	Similar

Mr. Jones analyzed the four tabulated sales above for the purpose of estimating the value of the subject after placing the conservation easement on the property. The comparables are located in DeSoto, Manatee, Hendry and Glades Counties in Florida.

The sales analyzed for the subject parcel have sale dates ranging from October 2021 to August 2022. The sales selected are all agricultural properties with similar highest and best use characteristics and encumbered by perpetual conservation easements. The comparable sales selected and analyzed by Mr. Jones are considered to be good indicators of value for the subject. These sales reflect a range from \$1,426 to \$3,405 per gross acre.

Mr. Jones has elected to apply a qualitative adjustment process to the comparable sales for comparable factors such as property rights conveyed, financing terms, conditions of sale, market conditions, location, size, wetlands, utilities, conservation easement and improvements. Overall, the entire process of contrasting the sales to the subject property seems reasonable. The appraiser utilized sound logic and reasoning in contrasting the comparable sales to the subject property and, overall, the analyses and qualitative adjustment process is well supported and adequately discussed.

In his final analysis Mr. Jones performs a ranking analysis and brackets the subject between similar rated sale 1 at \$1,456 per acre and similar rated sale 3 at \$2,622 per acre and concludes at \$2,000 per acre with consideration given to location, no cutouts, easement restrictions and 60% wetlands. Mr. Jones concludes at a value of \$2,000 per gross acre times 643.38 acres; or \$1,286,760 which is rounded to \$1,300,000.

Mr. Jones' value estimate for the conservation easement is the difference between the value of the property before, minus the value of the property as encumbered. This summary follows:

Total Value Before	\$3,100,000
Total Value After	<u>\$1,300,000</u>
Value of Easement	\$1,800,000

Holden Appraisal

The following sales were utilized by Mr. Holden in the valuation of the subject before the proposed conservation easement.

Sale No.	Subject	Sale 1	Sale 2	Sale 3
County	Highlands	Okeechobee	Glades	Okeechobee
Sale Date	N/A	11/22	10/22	6/22
Price/Ac	N/A	\$4,777	\$7,124	\$6,008
Size/Ac	643.38	1,223.00	625.12	1,698.38
Upland %	40%	55%	93%	85%
Overall Rating	N/A	Inferior	Very Superior	Very Superior

Mr. Holden analyzed the three tabulated sales above for the purpose of estimating the value of the subject before placing the conservation easement on the property. The comparables are located in Okeechobee and Glades Counties, Florida.

The sales analyzed for the subject parcel have sale dates ranging from June 2022 to November 2022. The comparables selected are all agricultural properties with similar highest and best use characteristics. The comparable sales selected and analyzed by Mr. Holden are considered to be good indicators of value for the subject. These sales reflect a range from \$4,777 to \$7,124 per gross acre.

Mr. Holden has elected to apply a qualitative adjustment process to the comparable sales for comparable factors such as interest conveyed, conditions of sale, market conditions, general location, size/shape, access/exposure, topography and site improvements and building improvements. Overall, the entire process of contrasting the sales to the subject property seems reasonable. The appraiser utilized sound logic and reasoning in contrasting the comparable sales to the subject property and, overall, the analyses and qualitative adjustment process is well supported and adequately discussed.

In his final analysis Mr. Holden brackets the subject between the indications from inferior rated Sale 1 at \$4,777 per gross acre and very superior rated Sale 3 at \$6,008 per gross acre. As such, a conclusion is reached at \$5,000 per gross acre nearer the lower end of the refined range taking into account the subject's high wetland ratio and lack of improved access. This equates to a final indication of 643.38 acres times \$5,000 per acre; or \$3,216,900 which is further rounded to \$3,217,000.

The following sales were utilized by Mr. Holden in the valuation of the subject after the proposed conservation easement.

Sale No.	Subject	Sale 1	Sale 2	Sale 3	Sale 4
County	Highlands	Okeechobee	DeSoto	Hendry	Highlands
Sale Date	N/A	6/22	8/22	6/22	1/23
Price/Ac	N/A	\$2,474	\$1,456	\$2,622	\$2,712
Size/Ac	643.38	323.41	1,030.49	1,022.00	1,069.20
Overall Rating	N/A	Very Superior	Inferior	Slightly Superior	Very Superior

Mr. Holden analyzed the four tabulated sales above for the purpose of estimating the value of the subject after placing the conservation easement on the property. The sales are located in Okeechobee, DeSoto, Hendry and Highlands Counties in Florida.

The sales analyzed for the subject parcel have sale dates ranging from June 2022 to January 2023. The comparables selected are all agricultural properties with similar highest and best use characteristics and all sales are actually encumbered by perpetual conservation easements. The comparable sales selected and analyzed by Mr. Holden are considered to be good indicators of value for the subject. These sales reflect a range from \$1,456 to \$2,712 per gross acre.

Mr. Holden has elected to apply a qualitative adjustment process to the comparable sales for comparable factors such as interest conveyed, conditions of sale, market conditions, general location, size, access/exposure, topography and site improvements, building improvements and permitted uses. Overall, the entire process of contrasting the sales to the subject property seems reasonable. The appraiser utilized sound logic and reasoning in contrasting the comparable sales to the subject property and, overall, the analyses and qualitative adjustment process is well supported and adequately discussed.

In his final analysis Mr. Holden reflects on a more refined range of value of from very superior rated sale 1 at \$2,474 per gross acre and inferior rated sale 2 at \$1,456 per gross acre. He concludes at a final value of \$2,400 per gross acre. This equates to a final indication of 643.38 acres times \$2,400 per acre; or \$1,544,112 which is further rounded to \$1,544,000.

Mr. Holden’s value estimate for the conservation easement is the difference between the value of the property before, minus the value of the property as encumbered. This summary follows:

Total Value Before	\$3,217,000
Total Value After	<u>\$1,544,000</u>
Value of Easement	\$1,673,000

Conclusions

Overall, the reviewer found both reports to be well supported and reasonable leading the reader to similar conclusions. The reports reflected a reasonable range of conclusions to value offering a variance of 7.59%. The appraisers both arrived at similar conclusions regarding the highest and best use of the subject. As such, both reports are considered acceptable and approvable as amended.

The **purpose of the appraisals** was to estimate the market value of the subject property before and after acquisition of the proposed conservation easement to be placed on the subject property to estimate its impact on value. The intended use of the appraisals was to serve as a basis for potential acquisition of a conservation easement by the Department of Agriculture and Consumer Services, Florida Forest Service (DACS/FFS).

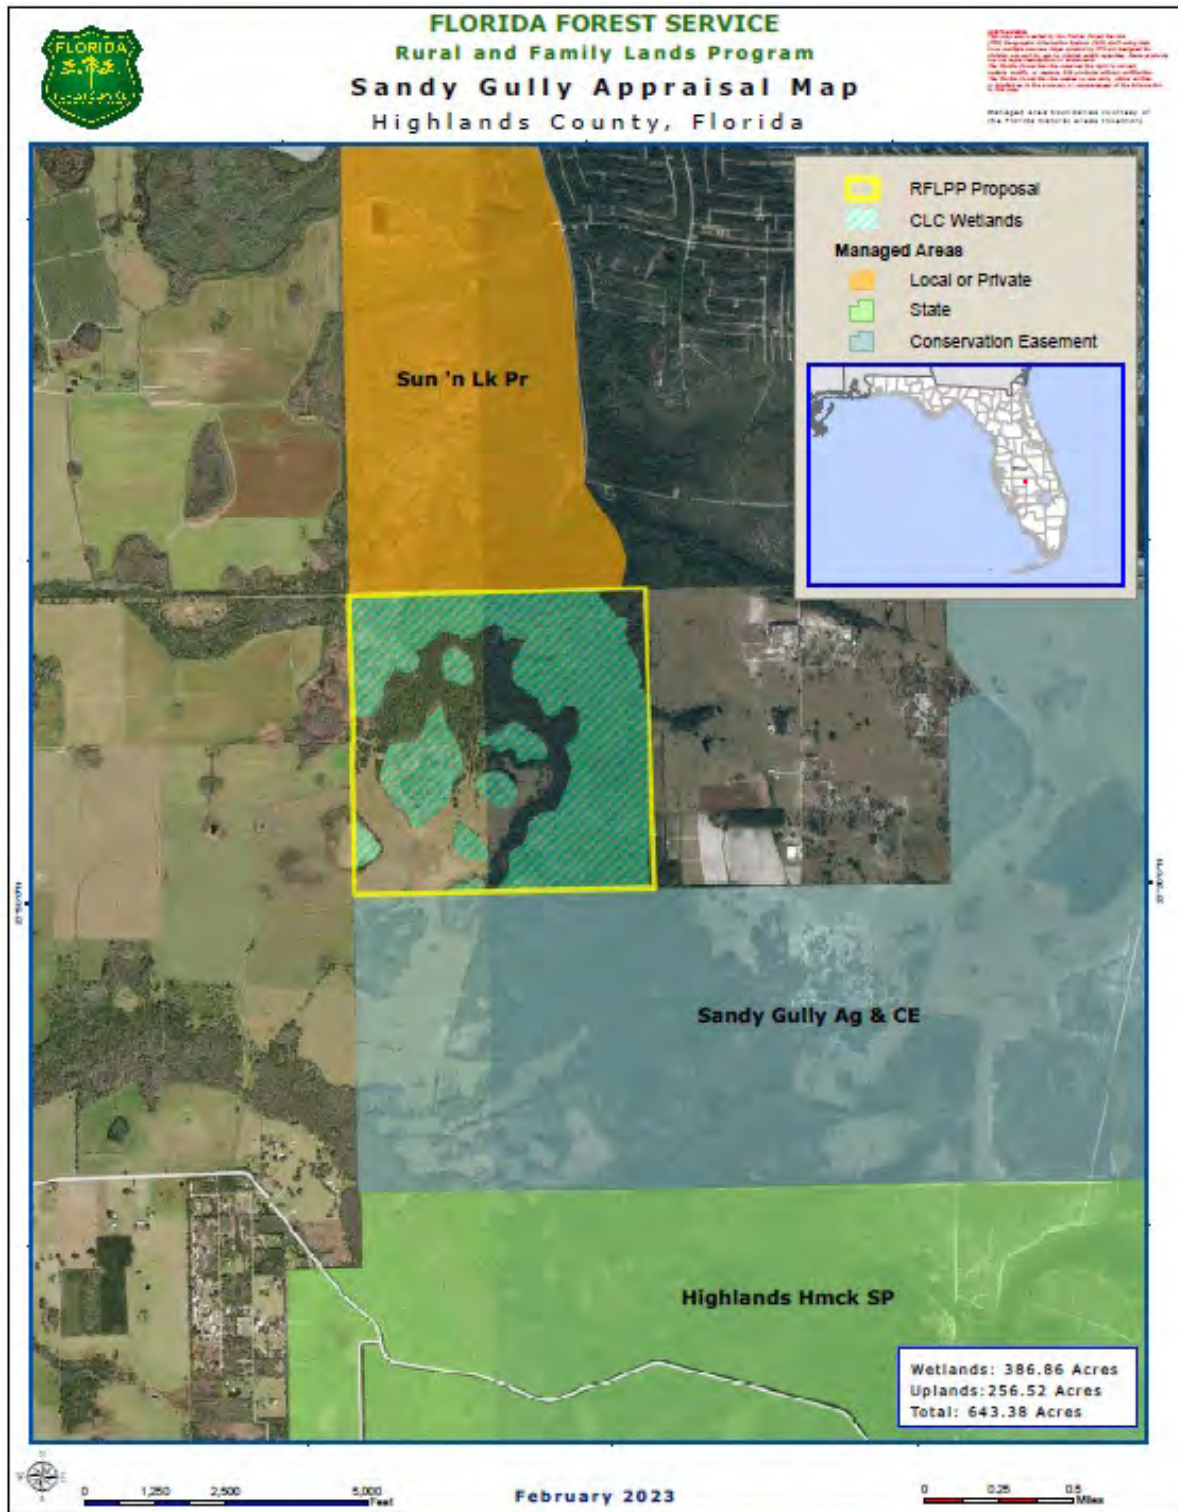

The reviewer has completed a **field review** of the above referenced appraisals. The Purpose of the Review is to form an opinion as to the completeness and appropriateness of the methodology and techniques utilized to form an opinion as to the value of the subject property.

The **Scope of the Review** involved a field review of each of the appraisal reports prepared on the subject property. The reviewer inspected the subject of these appraisals and is familiar with all of the data contained within the reports. The reviewer has not researched the marketplace to confirm reported data or to reveal data which may have been more appropriate to include in the appraisal report. As part of the review assignment the reviewer has asked the appraisers to address issues deemed relevant to the assignment. I have also analyzed the reports for conformity with and adherence to the *Uniform Standards of Professional Appraisal Practice* (USPAP) as promulgated by the Appraisal Foundation and that of the Appraisal Institute as well as the Supplemental Appraisal Standards for the Board of Trustees, Division of State Lands, Bureau of Appraisal, Florida Department of Environmental Protection, March 2, 2016.

Acceptance of Appraisals

The appraisal reports referenced herein are considered acceptable and approvable by the signed reviewer subject to the attached certification.

This program was developed with the approval of the Land Trust Alliance.

Certification

I certify that, to the best of my knowledge and belief:

1. The facts and data reported by the review appraiser and used in the review process are true and correct.
2. The analyses, opinions, and conclusions in this review report are limited only by the assumptions and limiting conditions stated in this review report, and are my personal, unbiased professional analyses, opinions and conclusions.
3. I have no present or prospective interest in the property that is the subject of this review and I have no personal interest or bias with respect to the parties involved.
4. My compensation is not contingent on an action or event resulting from the analyses, opinions, or conclusions in, or the use of this review report.
5. My analyses, opinion, and conclusions are developed and this review report was prepared in conformity with the Uniform Standards of Professional Appraisal Practice.
6. My analyses, opinion, and conclusions are developed and this review report was prepared in conformity with the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute and with the Supplemental Standards for the Board of Trustees Division of State Lands, Bureau of Appraisal, Florida Department of Environmental Protection, March 2016.
7. The appraisals reviewed are in substantial compliance with USPAP and SASBOT as well as Rule 18-1.006, Florida Administrative Code (FAC).
8. I did personally inspect the subject property.
9. No one provided significant professional assistance to the person signing this review report.
10. As of the date of this report, Thomas G. Richards, MAI has completed the requirements of the continuing education program for designated members of the Appraisal Institute.
11. The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
12. I have not appraised or performed any other services for any other party in regard to this property.
