

Florida Park Service 2014-2015 Resource Management Annual Report

FLORIDA PARK SERVICE RESOURCE MANAGEMENT ANNUAL REPORT

July 2014 - June 2015

Prepared by:
Bureau of Natural and Cultural Resources
3900 Commonwealth Boulevard
Mail Station 530
Tallahassee, Florida 32399-3000
(850) 245-3104

Table of Contents

Executive Summary	1
Fire and Burning.....	4
Mechanical Treatment.....	17
Exotic Plant Removal	18
Exotic and Nuisance Animal Removal.....	33
Marine Turtle Nesting	55

2014 –2015 Resource Management Annual Report Executive Summary

Prescribed Burning and Wildfires

- FPS burned 76,337 acres, a 10% increase from the previous fiscal year – 9003 acres more than the division’s minimum ecological target and 80% of the acres planned
- The number of fire-type acres in rotation (not backlogged) increased by 10.5%
- FPS conducted 386 prescribed burns, 18 fewer than the previous year
- 26 wildfires accounted for 1,855 acres (2.4%) of the total acres burned
- Of 90 parks with acres planned for prescribed fire, 75 conducted at least one prescribed burn
- 38 parks exceeded the minimum ecological target, two more than the previous year
- Districts One and Five achieved 100% of their planned goals
- 1513 acres were mechanically treated in 35 parks for habitat improvement or fuel reduction

Favorable weather conditions precluded the need for FPS to deploy wildfire strike teams for the third year in a row. FY 14-15 was the second best burn year on record for FPS. This included a large percentage of burns having been conducted during the growing season.

Exotic Plant Removal

- FPS treated 11,463 acres, a 16% decrease from the previous fiscal year
- The total number of acres in maintenance condition slightly decreased from the previous year, decreasing from 535,653 in FY 13-14 to 512,121 in FY 14-15
- 32 parks submitted projects for funding from FWC’s Upland Invasive Plant Management program
- 4 out of 5 districts met 100% of their treatment goal

2014 –2015 Resource Management Annual Report Executive Summary

Exotic and Nuisance Animal Removal

- 1934 feral hogs were removed from 43 parks, substantially fewer than the previous FY which had 3895 hogs removed
- The number of feral cats removed decreased by 29% last fiscal year
- When analyzing by vertebrate class, herpetofauna (amphibians and reptiles) consistently represent the greatest variety of species, while feral hogs consistently reflect the greatest number of mammals removed

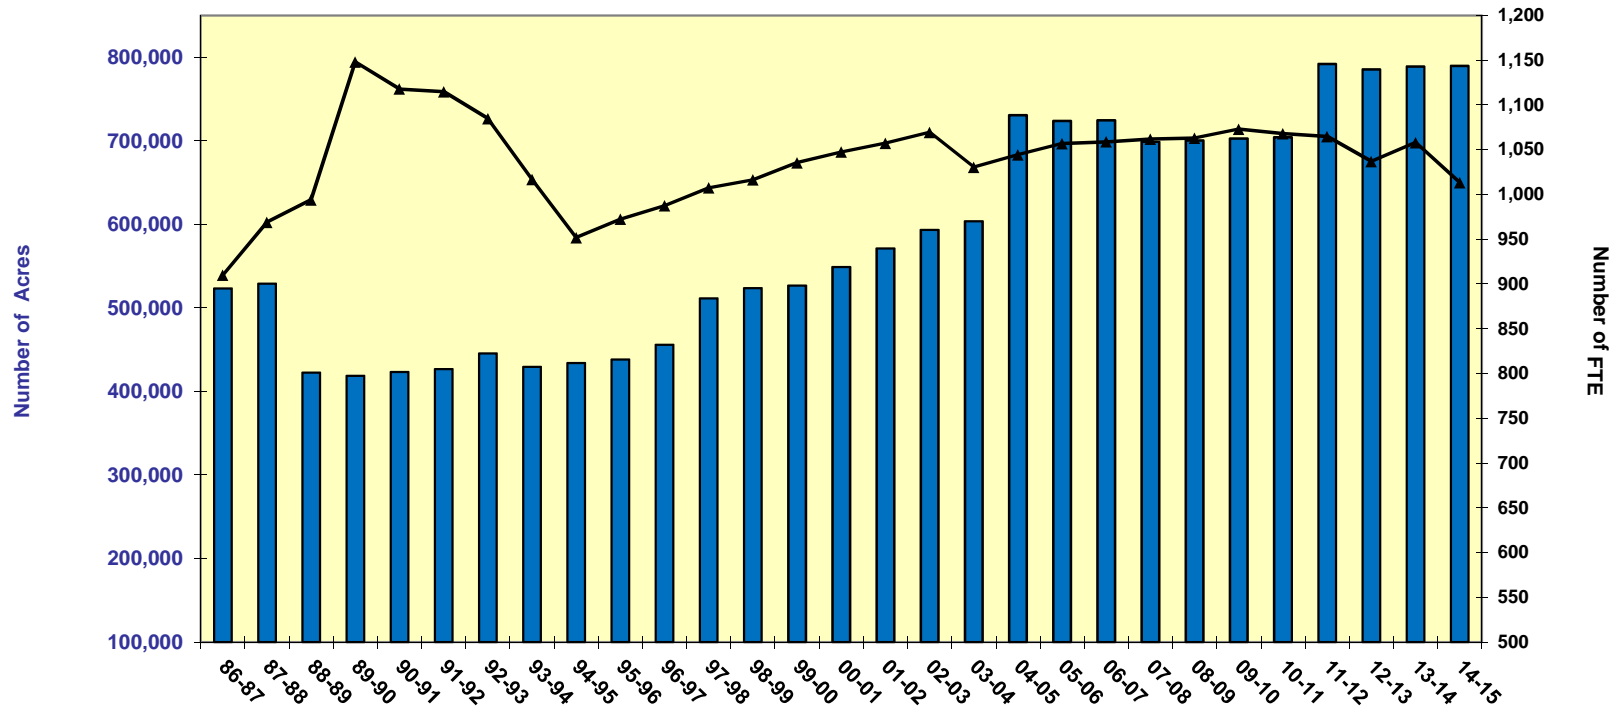

Marine Turtle Nesting

- 7223 total nests reported representing the highest number of nests ever documented on state park beaches
- 103 miles of beach surveyed in 39 state parks
- Nest depredation was 7% statewide
- A total of 5 suspected Kemp's Ridley nests in the process of being confirmed
- Nests lost to beach erosion increased from 128 nests in 2014 to 357 nests in 2015

The 2015 nesting season represented multiple new records. FY 2014-2015 showed records of the highest nest count ever on state parks, the second highest number of Loggerhead nests, the highest number of Green Turtle nests, and the highest number of suspected Kemp's Ridley nests. Hopefully, this means the long-term consistent sea turtle conservation efforts are really starting to pay off.

Comparison of Staff to Acres Managed

The chart below show the changes over time in the number of full-time staff compared to the number of acres under the jurisdiction of the Division of Recreation and Parks.

Acres = Upland and submerged.

PLANNING AS OF JULY 1

- Fire-Type (FT) Acres:** Includes all natural communities where fire is an ecological process and any other zones being managed with fire.
- FT Acres in Rotation:** Fire-type acres that do not exceed maximum Fire Return Interval. That is, acres that are not backlogged. Formula: Fire-Type Acres less Backlog Acres.
- FT Target Acres:** Range of fire-type acres that need to be burned to remain in rotation. Formula: Sum of Acres by zone divided by maximum / minimum fire return interval.
- FT Acres Planned:** Fire-type acres in the fiscal year plan for burning. Formula: Sum of Annual Planned Acres.

ACCOMPLISHMENTS - ACRES BURNED (RX / WILDFIRE)

- Total:** Acres burned during the fiscal year, showing both prescribed and wildfire.
- Quarterly:** Acreage burned during each fiscal quarter, showing both prescribed and wildfire.
- Burn Count:** Number of prescribed fires and wildfires during the fiscal year. Each entry with a FFS Authorization counts as a single prescribed burn.
Each entry with 'Day of 1st Report' for wildfire counts as a single wildfire burn.

EVALUATION (Figures are performance indicators during the year and statistically valid on June 30.)

- FT Acres in Rotation:** Acreage that would be considered in rotation if no further burning for the fiscal year is done. Formula: Acres in Rotation (as of July 1) less acres that would become backlogged on June 30, plus acres burned during the fiscal year.
- % of Plan Met:** Percent of planned acres that were treated with fire. Formula: Annual Acres Treated Total divided by Acres Planned with a maximum value of 100%

Florida Park Service Prescribed Burning History 1981-2015

Notes About This Graph

1981: FPS began systematically tracking fire program accomplishments

2005: Fire-type acres under management increased with the addition Office of Coastal and Aquatic Managed Areas properties

2005: Apparent increase in "Acres Planned" resulted from re-defining the plan to reflect ecological need rather than the operational plans

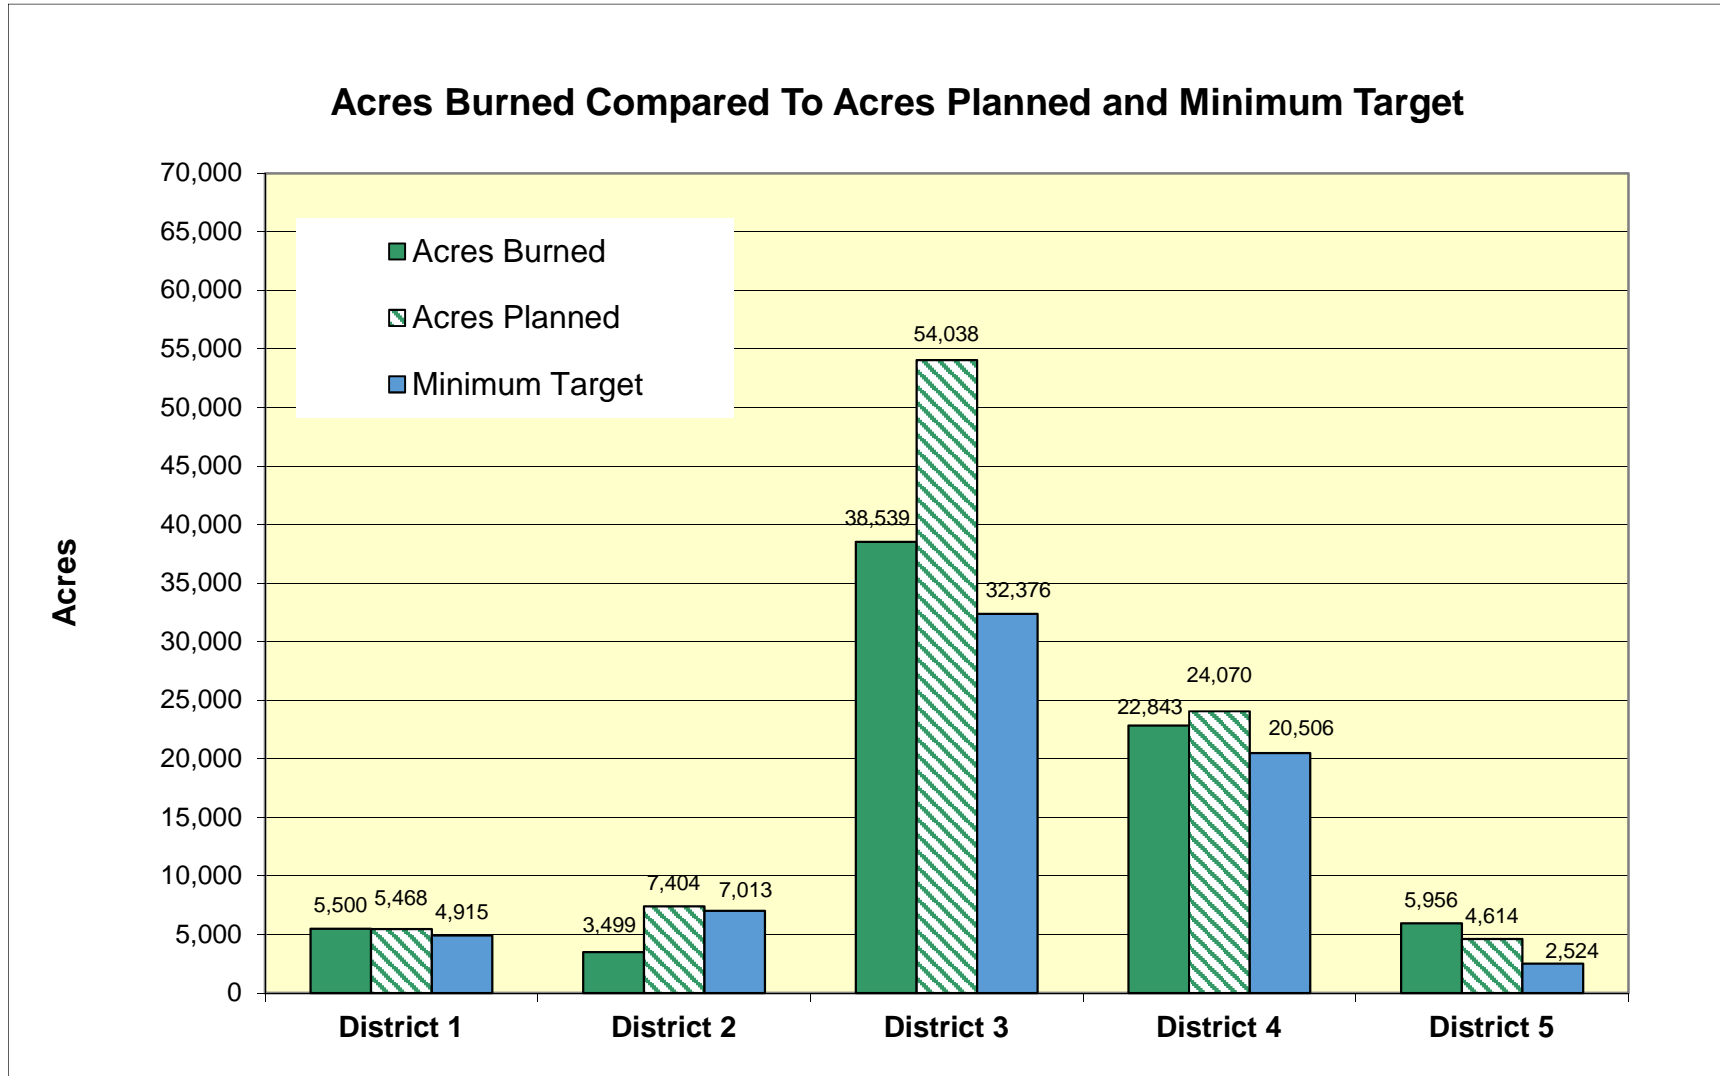

2007: Number of fire-type acres dropped significantly with the transfer of Tosohatchee State Reserve to FWC

2009: Began tracking fire management accomplishments with new, more accurate database; resumed tracking operational plans rather than ecological objective

2014: Greenways and Trails data were incorporated into the fire database adding nearly 30,000 acres of fire-type community.

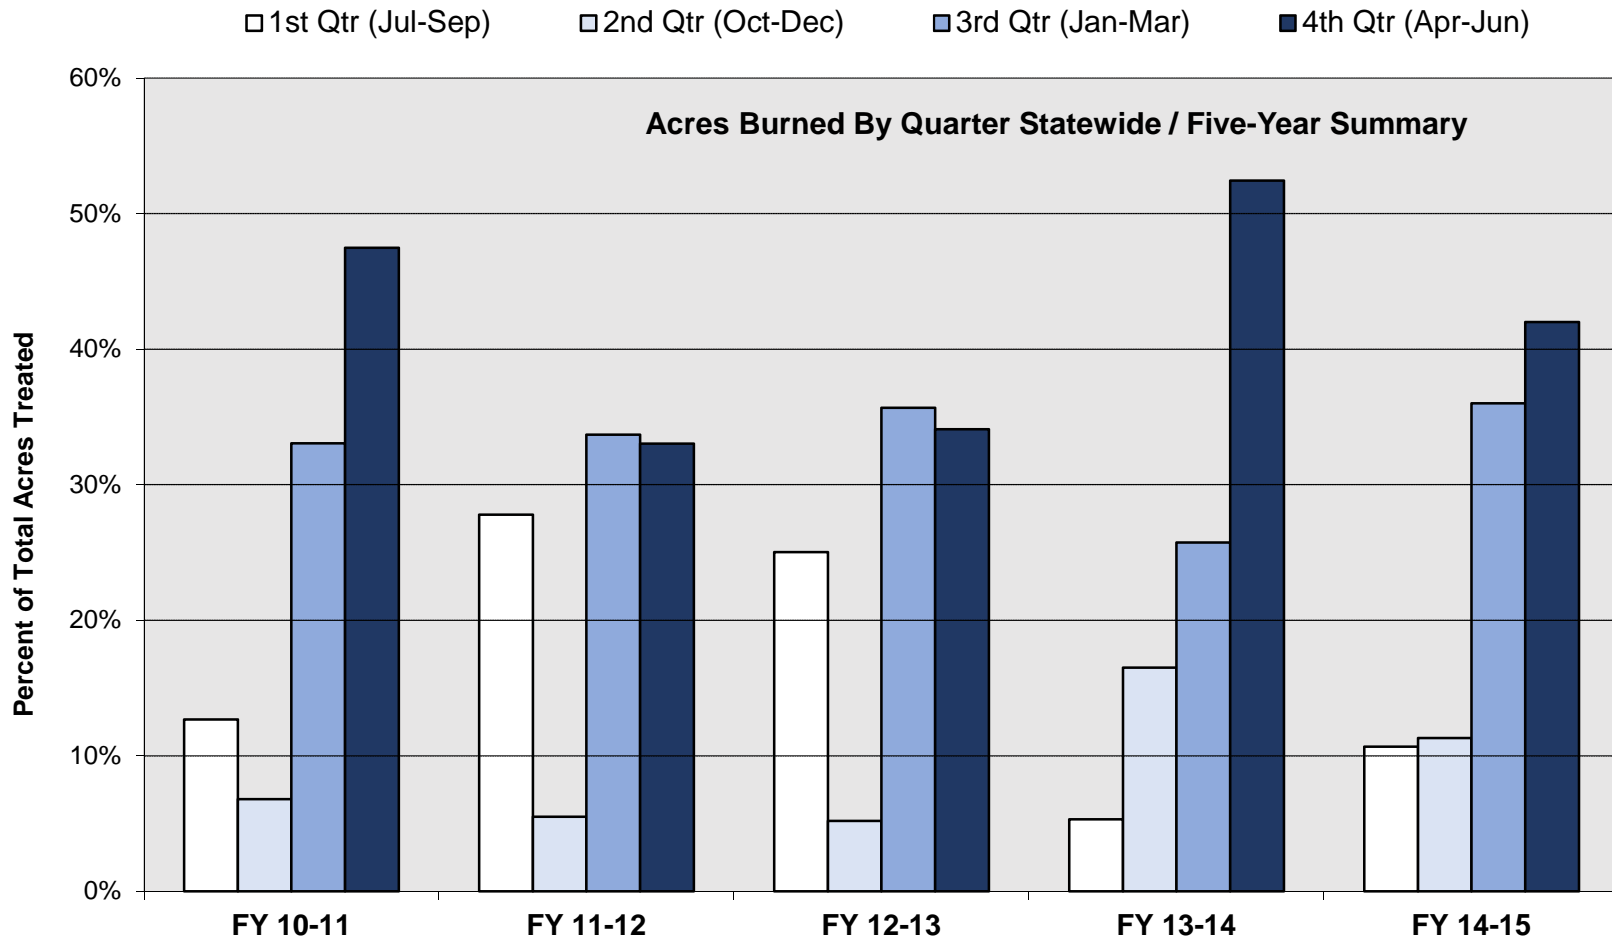

Florida Park Service
Annual Fire Report
Fiscal Year 2014-2015

The graph below shows the number of acres each district burned compared to the number planned and the minimum target. Acres burned are from both wildfire and prescribed fire. Minimum target represents the number of acres that must be burned to prevent additional backlog from accumulating and maintain appropriate inter-fire intervals for each fire-type community.

Florida Park Service
Annual Fire Report
 Fiscal Year 2014-2015

The graph below compares the percentage of acres that were burned (either by prescribed fire or wildfire during each quarter of the last five fiscal years.

Florida Park Service
Mechanical Treatment
 Fiscal Year 2014-2015

FPS began tracking mechanical treatment acres in fiscal year 2003 to document efforts to improve fire-type habitats. The figures below represent the number of fire-type acres mechanically treated (mowing, roller-chopping, etc.) for fuel hazard reduction prior to conducting prescribed burns. These figures do not include fireline construction or maintenance; mechanical exotic plant removal or timber harvests.

SUMMARY OF CURRENT CONDITIONS/PLANNING

- Total Park Acres:** The sum of the Management Zone acreages. This acreage may differ from the Division Jurisdiction Report.
- Acres in Maintenance Condition:** A field-based determination which should consider several factors. Generally, infestations in Maintenance Condition should: be manageable with existing staff and resources, not be expanding in size or percent cover, not contain large numbers of mature reproducing individuals, and not pose an imminent threat to imperiled plants, animals or natural communities. Additionally, any infestation that hasn't been surveyed within 24 months will fall out of maintenance condition.
- Gross Area (acres):** The general area occupied by one or more invasive exotic species. The area is estimated by imagining a line around the general perimeter of the infestation. The Gross Area may contain significant parcels of land that are not occupied by invasive exotic plants. Also interpreted as the total area that has to be worked to ensure complete treatment of the infestation.
- Infested Area (acres):** The approximate area of land covered by the invasive plants within a Gross Area if the invasive plants were accumulated into one area. Infested Area = Gross Area X midpoint of the Cover Class.
- Treatment Goals (Inf. Area):** The proposed area to treat (measured as Infested Area) established by the Park Manager as an achievable annual goal with the existing park resources or probable grants for the fiscal year.

ACCOMPLISHMENTS / INFESTED AREA TREATED

- Infested Area Treated:** Infested Area Treated (in acres) within each fiscal quarter (acres are not cumulative).
- Total Treated:** Sums, to date, the individual fiscal quarters for Infested Area Treated (in acres).
- % of Goal Met:** The percentage of the Treatment Goals accomplished at the time the report was generated.
- Gross Area Worked:** A running total of the Gross Area (in acres) that have been worked or traversed to treat the Infested Area.

Invasive Exotic Plant Report Statewide Summary

Fiscal Year 2014-2015

	Infested Acres Treated	Gross Area Worked	Number of Parks Treating Invasives
District One	310	2,819	30
District Two	612	5,109	41
District Three	3,820	18,672	26
District Four	3,849	12,728	34
District Five	2,872	8,154	23
Totals	11,463	47,482	154

Cogon grass and Brazilian pepper retained the top two spots as the species most frequently being treated in state parks. Five of the top ten worst offenders were present in all five districts. For the first time in ten years, Lantana replaced Chinese tallow tree as the fifth most removed species.

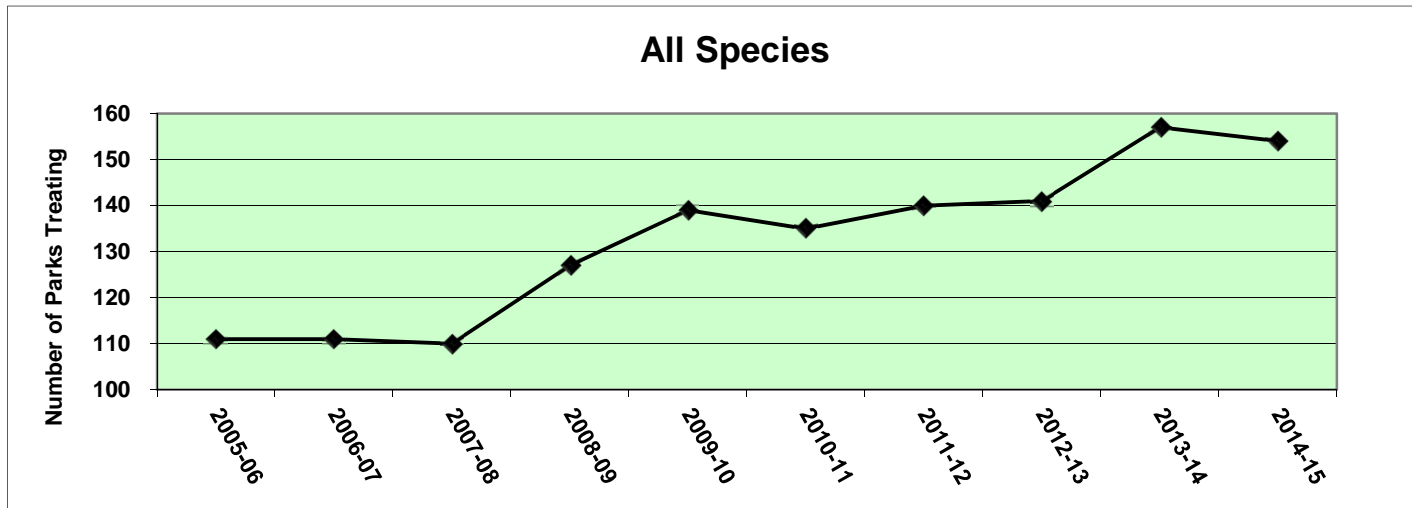

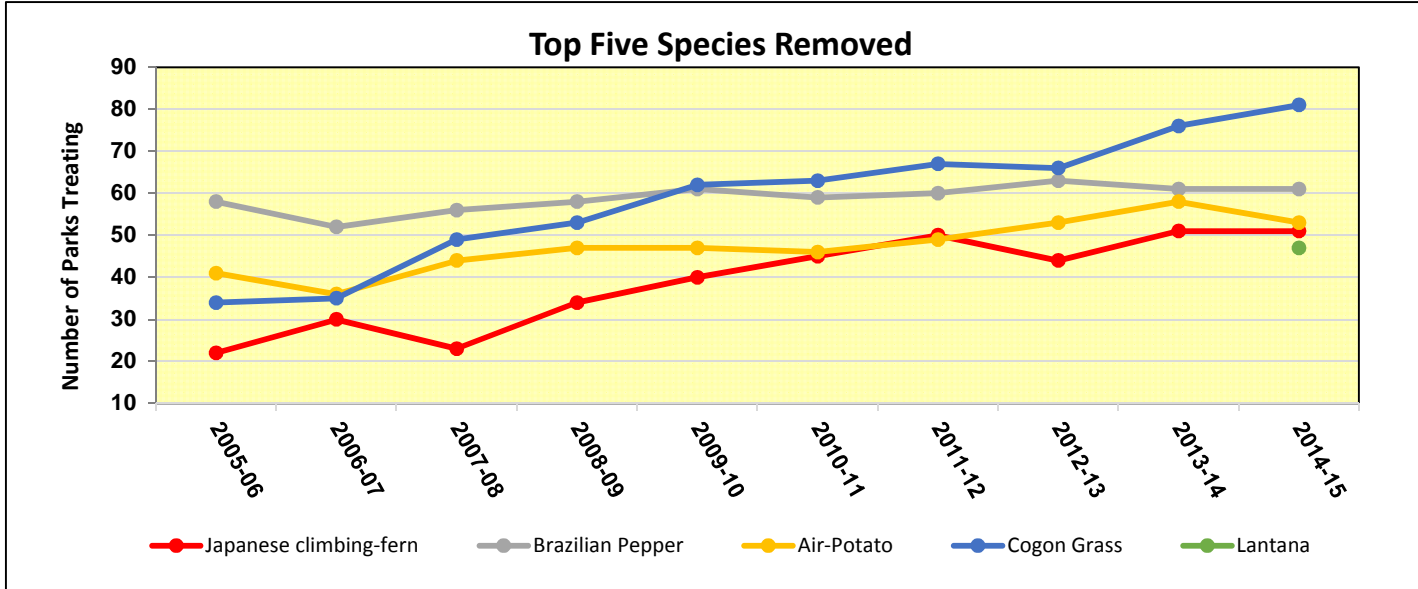

Number of Parks Treating Each of the Top 10 Most Commonly Removed Species						
Species	District 1	District 2	District 3	District 4	District 5	Total
Cogon grass	16	13	21	26	5	81
Brazilian pepper	0	4	9	26	22	61
Air potato	5	9	15	16	8	53
Japanese climbing fern	13	19	10	9	0	51
Lantana	6	11	15	10	5	47
Chinese tallow tree	13	18	10	4	1	46
Caesar's weed	0	5	18	17	4	44
Mimosa	13	22	7	1	0	43
Camphor tree	6	20	12	3	0	41
Rosary pea	0	0	8	21	7	36

Florida Park Service
Invasive Exotic Plant Report
 5 Year Trend

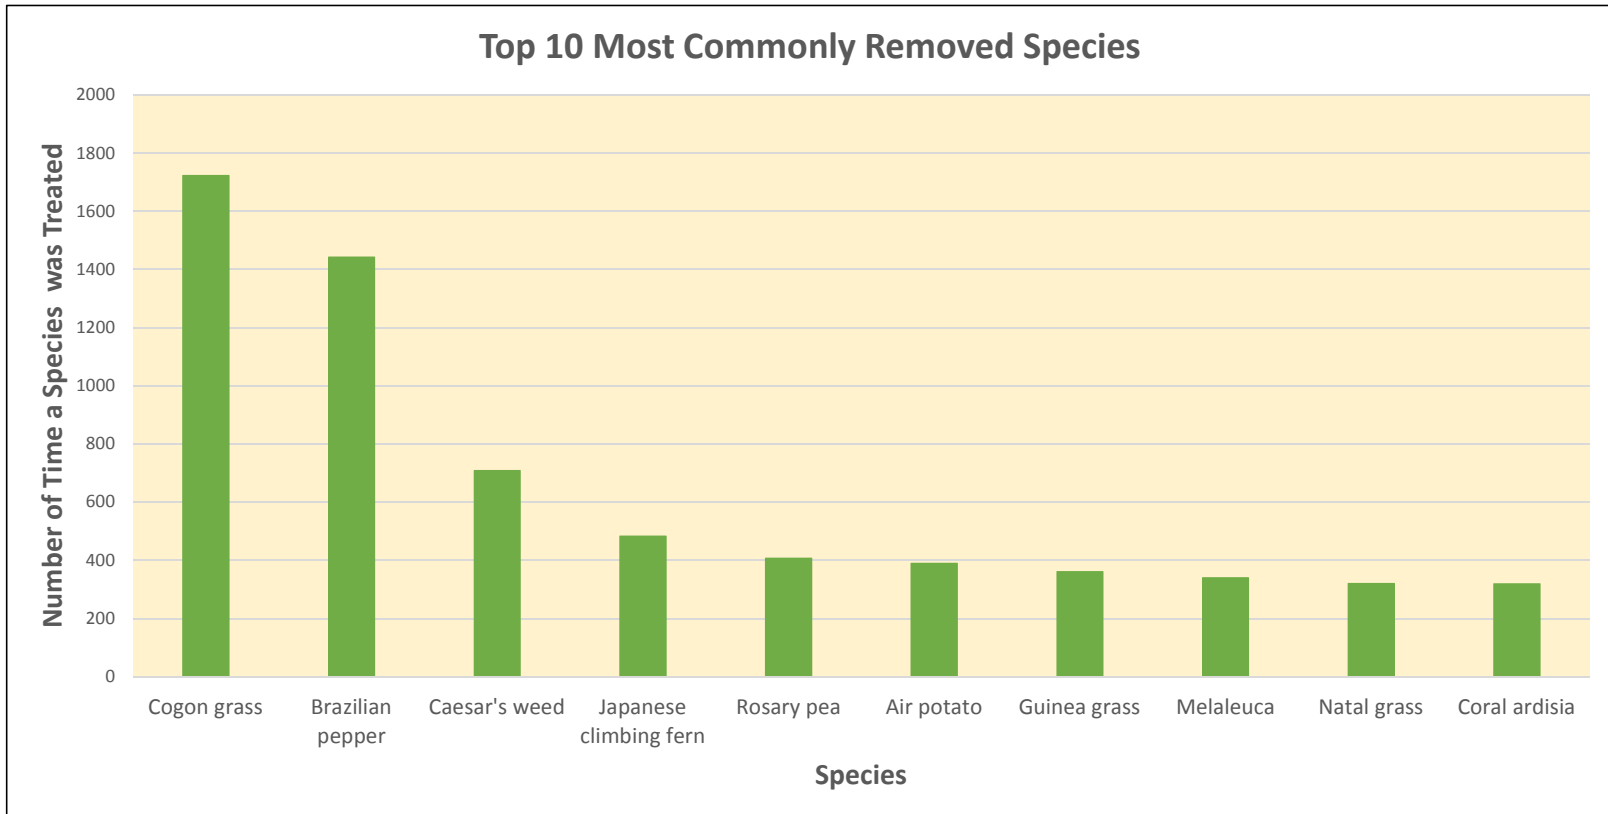

The graph below compares the percentage of treatments that occur during each quarter of the fiscal year. Typically, the fourth quarter of the fiscal year is the peak time for treatments.

From the exotic animal removal table, it can be seen that feral hogs are the most commonly removed with 1934 hogs removed while encompassing 43 parks. While this is true, the chart above indicate that the exotic species class herpetofauna has the highest percentage with 47% removed compared to the second most, mammals, with 29% removed. From the nuisance animal species chart, it can be seen that mammals make up 86% of the nuisance native species in Florida with raccoons making up the bulk of the percentage.

Florida Park Service
Exotic and Nuisance Animal Removal 10 Year Trends
 Fiscal Year 2014-2015

Animals Removed, 2005-2015

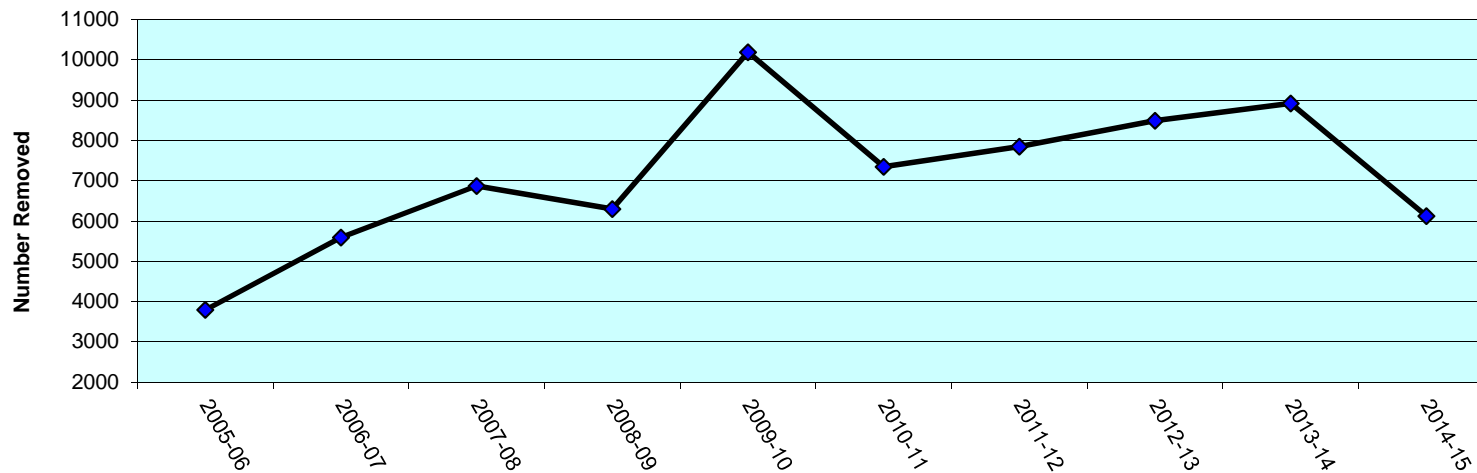

-- While Feral hogs continue to be the species removed from the most parks (43) and in the largest numbers (1934), there was a substantial drop compared to the previous year with a 50% decrease of hogs removed. The chart shows that for the past 10 years, feral hogs made up 50% of all animals removed from state parks.

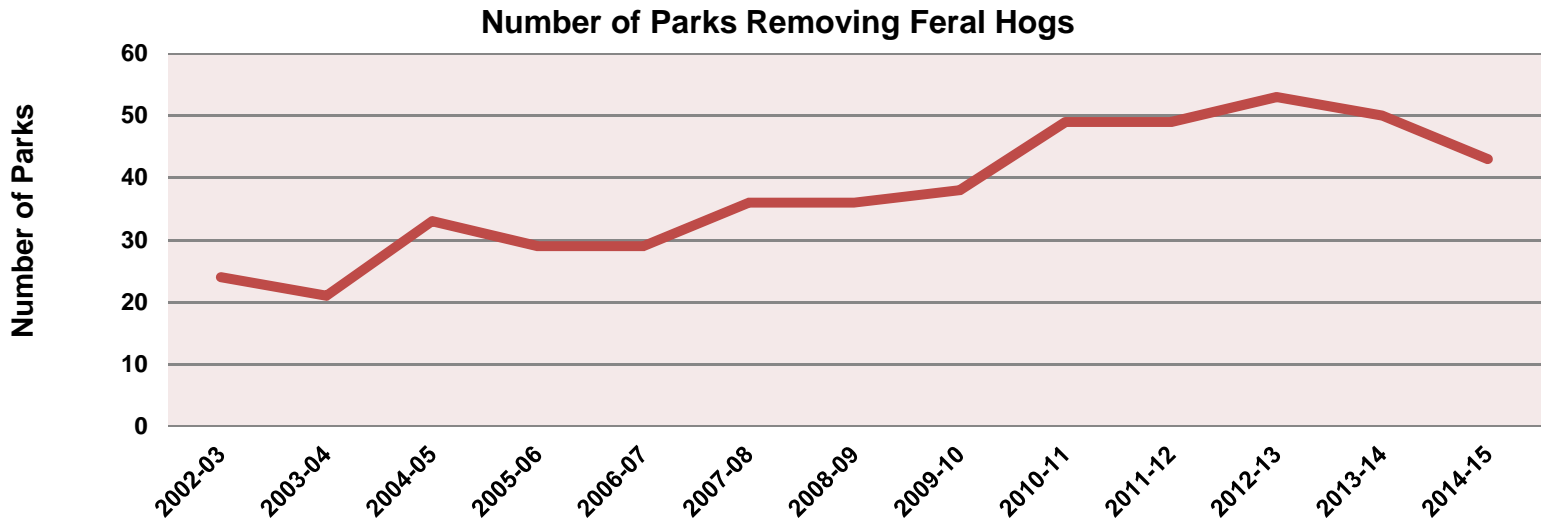

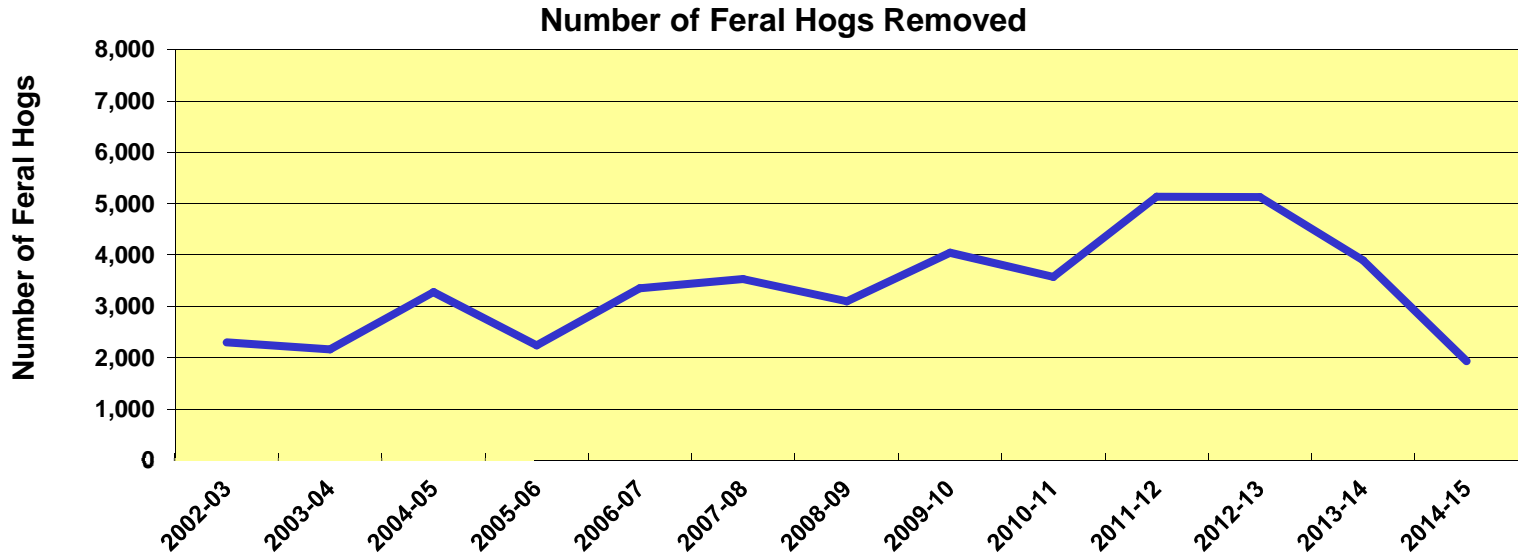

-- From the chart, the 10-year trend from 2005-2015 shows a 3% decrease in the amount of "Other" species removed compared to the 2004-2014 10-year trend. Likewise, the amount of feral hogs removed decreased by 3% compared to the previous 10-year trend.

-- The graph below shows a decrease in the total number of animals removed dropping from 8923 the previous year to 6128 this fiscal year. This decrease is due to the drop of feral hogs removed from 3895 feral hogs removed the previous fiscal year to 1934 this fiscal year. As a whole, the total number of animal removed decreased in every district.
