

# 2018 Public Sector Recycling Report

Prepared by the Department of Environmental Protection  
Waste Reduction and Recycling Section

This report was generated using data collected by  
The Florida Department of Environmental Protection  
under Section 403.7032(3), Florida Statutes.

This Florida Statute states that:

"Each state agency, public institution of higher learning, community college, and state university, including all buildings that are occupied by municipal, county, or state employees and entities occupying buildings managed by the Department of Management Services, must at a minimum, annually report all recycled materials to the county using the department's (DEP's) designated reporting format."

This statute requires reporting, whether or not you are recycling. Even if a public sector entity is not recycling, that entity must report a zero percent recycling rate.

The information provided in this report is limited to municipal solid waste, which, per section 403.706(5) F.S., includes only Construction & Demolition Debris, Yard Waste, Metals, White Goods, Tires, Food Wastes, Textiles, Glass, Aluminum Cans, Steel Cans, Plastic Bottles, Other Plastics, Newspapers, Corrugated Paper, Office Paper, and Other Paper. Municipal Solid Waste does NOT include agricultural waste, industrial waste, mining waste or sludge.

The Solid Waste and Recycling data collected is presented in tons reported both disposed and recycled for calendar year 2018
