

2021 Public Sector Recycling Report

Prepared by the Department of Environmental Protection
Waste Reduction and Recycling Section

This report was generated using data collected by
The Florida Department of Environmental Protection
under Section 403.7032(3), Florida Statutes.

This Florida Statute states that:

"Each state agency, public institution of higher learning, community college, and state university, including all buildings that are occupied by municipal, county, or state employees and entities occupying buildings managed by the Department of Management Services, must at a minimum, annually report all recycled materials to the county using the department's (DEP's) designated reporting format."

This statute requires reporting, whether or not you are recycling. Even if a public sector entity is not recycling, that entity must report a zero percent recycling rate.

The information provided in this report is limited to municipal solid waste, which, per section 403.706(5) F.S., includes only Construction & Demolition Debris, Yard Waste, Metals, White Goods, Tires, Food Wastes, Textiles, Glass, Aluminum Cans, Steel Cans, Plastic Bottles, Other Plastics, Newspapers, Corrugated Paper, Office Paper, and Other Paper. Municipal Solid Waste does NOT include agricultural waste, industrial waste, mining waste or sludge.

The Solid Waste and Recycling data collected is presented in tons reported both disposed and recycled for calendar year 2021

Reports prior to 2019 combined the 2 methods of "actual" and "estimated" used in determining amounts and recycling rates. Members who did not have access to the solid waste data provided an estimation based on their service contract and observable approximations. This report and those that follow will show those 2 methods separately to more accurately provide what the data represents.

Member	Estimated Tons Disposed	Estimated Tons Recycled
Alafia River State Park	79.56	0
Anclote Key State Park	0.41	0
Bald Point State Park	23.4	0
