Re: Pirana Aerobic Bacteria Generator

Dear Mr. Fife:

This letter is in response to your request to utilize the Pirana Aerobic Bacteria Generator to remediate failing or failed drainfields in the state of Florida. After reviewing the data and drawings submitted the department has no objection to the use of this product to inject the Pirana Blend bacterial additive in accordance with manufacturer's recommendations. Installations must be in accordance with Chapter 64E-6, Florida Administrative Code (F.A.C) provisions for electrical wiring and tanks. This injection system, in combination with the Pirana Blend product, may be used as an alternative repair method as set forth in s. 64E-6.015(3), F.A.C.

Be advised that the department is not a testing agency and that this determination reflects only a review of the information submitted by you for compliance with Florida Statutes and Florida Administrative Code. Our product evaluation does not investigate the validity of performance claims by manufacturers. For this reason, departmental acceptance must not be interpreted as certifying effectiveness, endorsing or recommending use of an additive. There shall be no advertising of the Pirana Aerobic Bacteria Generator as state approved. The Florida Department of Health also does not assume liability for any promise, guarantee or expectation from purchasing or using the product. The department reserves the right to withdraw acceptance if product formulation, injection method or ingredients are modified after product evaluation by the department or subsequently found not to be in compliance with rule.

This letter of compliance is limited to Department of Health jurisdictional circumstances as defined in Chapter 64E-6, Florida Administrative Code and Chapter 381.0065, Florida Statutes. If we may be of further assistance or should you have any additional questions regarding this letter, please contact Mr. Paul Booher at (353) 922-2159.

Sincerely,

Gerald R. Briggs, Chief
Bureau of Onsite Sewage Programs
