Public Financing of Coastal Construction "SLIP Study Rule" Rule 62S-7 Rule Development Workshop

December 13, 2023, 1:30 p.m.
Marjory Stoneman Douglas Building, Room 137A, and
Virtually via GoToWebinar

The department is amending this rule chapter to implement Section 380.0937, F.S., which modifies the Sea Level Impact Projection (SLIP) study requirements for state-financed construction projects located within areas at risk due to sea level rise, expanding both the geographic area and types of structures to which this requirement applies, as required by s. 380.0937(3), F.S. The department will also define a threshold for potentially at-risk structures or infrastructure located in areas at risk due to sea level rise for which replacement cost is not an appropriate metric as required by s. 380.0937(1)(e)2., F.S. Beginning July 1, 2024, a state-financed constructor may not commence construction of a potentially at-risk structure or infrastructure located within an area at risk due to sea level rise without conducting a SLIP study that meets the requirements established by the department. These rule amendments will apply only to construction not commenced as of July 1, 2024; however, projects initiated prior to July 1, 2024, remain subject to the SLIP study requirements and standards established by Section 161.551, F.S. A [Notice of Rule Development](#), including a Rule Development Workshop notice, was published in the FAR on Oct. 25, 2023.

Agenda for the Rule Development Workshop

1. Opening remarks, Krista Shipley, Resilient Florida Program, Planning and Policy Administrator
2. Introductions
3. Presentation of 62S-7 Rule Development, Stephanie Link, Resilient Florida Program, Planning Consultant
 - Legislation
 - Rule Structure
 - Proposed Draft Language
 - Definitions
 - Requirements of The State-financed Constructor
 - SLIP Study Standards
 - Implementation of SLIP Study findings
 - Effective Date
4. Next steps
