

PLEASE REMEMBER TO COMPLETE REQUIRED TESTS AND REPORTS FOR AIR COMPLIANCE

- All facilities are required to conduct compliance testing on regulated emission units and/or prepare compliance reports and submit the results to the Florida Department of Environmental Protection, and in some cases, to the federal Environmental Protection Agency.
- In many cases there are required forms and deadlines.
- Some of these are stated within the facility permit, and some are stipulated within applicable rules.
- If you have questions, contact DEP's Northeast District Air Compliance Program at 904-256-1700 or email Christopher.Kirts@Dep.State.FI.US
