

## FDEP Petroleum Restoration Program Site Summary

|                     |                             |
|---------------------|-----------------------------|
| Site Name: _____    | FDEP FAC ID/Score: _____    |
| Site Address: _____ | City / County Name: _____   |
| Site Manager: _____ | Cleanup Team/LP: _____      |
| Cost: _____         | Remediation Strategy: _____ |

Please initial and date to indicate approval to proceed with the strategy and cost described below for sites where it is anticipated that the cost of remediation and resulting purchase order will exceed \$500,000.

| Initials | Date  |                       | Initials | Date  |                  |
|----------|-------|-----------------------|----------|-------|------------------|
| _____    | _____ | Team PE               | _____    | _____ | DWM Director     |
| _____    | _____ | Team Leader           | _____    | _____ | Deputy Secretary |
| _____    | _____ | Chief PE              | _____    | _____ | Chief of Staff   |
| _____    | _____ | Program Administrator | _____    | _____ | Secretary        |

1. Describe the site lithology and extent of contamination, include soil type(s), depth to water, size and depth of contaminated soil and ground water.

2. Describe the remedial strategy, e.g., volume/type of excavation, size/type of remediation system and length of expected operation, and remediation goals.

3. Describe any other remedial alternatives considered, any previous remediation attempts and why the chosen strategy is the most appropriate.

4. Describe the risk associated with the contamination at this site, e.g., threat to supply wells in the area, potential for plume migration or exposure to petroleum vapors, and threats to surface waters/springs.
