State 404 Program Annual Report

July 1, 2021 – June 30, 2022

Division of Water Resource Management

Florida Department of Environmental Protection

This annual report is prepared in accordance with the requirements of 40 C.F.R. § 233.52 and the Memorandum of Agreement Between the Florida Department of Environmental Protection and the United States Environmental Protection Agency for Florida's State 404 Program.

Copies of this final annual report may be obtained from DEP's State 404 Program website at https://floridadep.gov/water/submerged-lands-environmental-resources-coordination/content/state-404-program, or by contacting State_404@FloridaDEP.gov.

Florida's State 404 Program: An Overview

On December 22, 2020, the U.S. Environmental Protection Agency (EPA) published approval of Florida's State 404 Program in the Federal Register, and the Florida Department of Environmental Protection (DEP) began administering the State 404 Program on that date. Since then, DEP has stood up a comprehensive regulatory program that complements other existing state environmental programs and has trained over 150 Certified Wetlands Evaluators and other staff.

State assumption of the 404 program provides a streamlined permitting procedure within which both federal and state requirements are addressed by state permits. This provides greater certainty to the regulated community, conserves resources of both the applicant and regulator, and affords the state greater control over its natural resources while complying with federal law. The State 404 Program is a separate program from Florida's existing Environmental Resource Permitting (ERP) program, and projects within state-assumed waters require both an ERP and a State 404 Program authorization.

The State 404 Program is responsible for overseeing permitting for any project proposing dredge or fill activities within state-assumed waters. Such projects include, but are not limited to: single family residences; commercial developments; utility projects; environmental restoration and enhancement; linear transportation projects; governmental development; certain agricultural and silvicultural activities; and in-water work within assumed freshwater bodies such as boat ramps, living shorelines and other shoreline stabilization.

Since program assumption, DEP has received over 6,000 State 404 permit applications and continues to make permit determinations as appropriate, subject to EPA oversight. DEP has issued over 296 individual permits under the Section 404 program and denied over 90 permit applications. While federal agencies retained responsibility for any pending enforcement actions undertaken prior to the date of assumption, DEP has primary responsibility for compliance monitoring and enforcement of Florida's 404 program and is committed to vigorous enforcement of the program. DEP has, since assumption, conducted approximately 200 compliance inspections for permits under the Florida Section 404 Program. From those inspections and other information, DEP has identified violations in some situations and is taking enforcement actions as appropriate. Florida is committed to vigorous enforcement of the Florida 404 program. In this timeframe, over 2,280 applications have been withdrawn by permit

applicants (in many instances, due to concerns raised by DEP). EPA has objected to only a small number of individual permits proposed for issuance by DEP, and in virtually all instances, DEP and EPA have been able to work cooperatively to resolve those objections. As of June 30, 2022, only one Section 404 permit proposed for issuance by DEP has been federalized by EPA and transferred to the Corps of Engineers. Florida remains committed to working with EPA to resolve any and all future objections that might arise.

Executive Summary

This is the second annual report for Florida's State 404 Program. This annual report covers a twelve-month period beginning July 1, 2021 and ending June 30, 2022. This report provides the information required in Title 40, Code of Federal Regulations (40 C.F.R.) Section 233.52 and the *Memorandum of Agreement Between the Florida Department of Environmental Protection and the United States Environmental Protection Agency* for Florida's State 404 Program. DEP has incorporated the additional information requested in response to the First State 404 Annual Report into this second annual report. DEP also submitted a draft report to the EPA on September 30, 2022. EPA responded with additional questions, comments, and requests for information on October 27, 2022, November 15, 2022, and April 10, 2023, the responses to which are incorporated into this Final Report.

Reporting categories as identified in 40 C.F.R. § 233.52 are as follows:

- Problems the state has encountered in the administration of its program and recommendations for resolving these problems;
- An assessment of the cumulative impacts of the state's permit program on the integrity of the state regulated waters;
- Identification of areas of particular concern and/or interest within the state;
- The number and nature of individual and general permits issued, modified, and denied
- An estimate of extent of activities regulated by general permits;
- The number of violations identified, and number and nature of enforcement actions taken;
- The number of suspected unauthorized activities reported, and nature of action taken; and
- The number of permit applications received but not yet processed.

Program Administration

As with any new regulatory program, DEP experienced some initial challenges in the early implementation of the State 404 Program. In May 2022, EPA Region 4 sent DEP a letter identifying issues related to Florida's administration of the 404 Program. On July 28, 2022, DEP responded to those items identified by EPA. This response is attached as Appendix 1 and incorporated by reference. The Department has received over 6,000 State 404 program applications since assumption. In response to the larger-than-anticipated number of applications, the Department has hired and trained additional staff to assist with processing State 404 Program applications. Additional details regarding staffing and training are provided later in this report.

To help prioritize resources and facilitate timely processing of applications, DEP decided that it would not perform stand-alone Waters of the United States (WOTUS) determinations (i.e, Section 404 jurisdictional determinations provided for a property without a planned project and project drawings). For a WOTUS determination under the State 404 Program, applicants are currently required to do one of three things: (1) apply for a permit and request a WOTUS determination during review; (2) apply for a formal determination under Chapter 62-340, Florida Administrative Code (F.A.C.) and request a WOTUS determination in conjunction with the formal; or (3) request a "No Permit Required" letter for a project where the applicant plans to avoid impacts to WOTUS (project drawings required).

The State 404 Program is implemented in conjunction with the ERP program and uses the state delineation method in Chapter 62-340, F.A.C., to determine the boundary of jurisdictional waters. DEP is continuing to work with the water management districts (WMDs) to find efficiencies between the implementation of the State 404 Program and the ERP program. DEP will continue to assess its program and implement solutions as challenges arise.

DEP is continually assessing the implementation of the State 404 Program and putting in place practices to improve the program.

No State 404 Program permits were appealed during this reporting period.

Public Participation

The State 404 Program includes several avenues for public participation. Members of the public may sign up to receive notice of receipt of applications within their areas of interest (defined by the user/subscriber) via DEP's Permit Application Subscription Service (PASS) and/or may request to be copied on correspondence or provide comments or information on any application(s) of interest at any time. When an application for an individual permit is deemed administratively complete, it is put out on public notice as described in Rule 62-331.060, F.A.C. Any interested person may comment or request a hearing during the public notice period. Public comments are added to each file in Oculus and the Information Portal. Projects are evaluated on a case-by-case basis, including evaluation of public comments. DEP does not collect information about requests for extension of comment periods on individual projects and whether they are granted.

DEP uses standard notice templates, which were provided in section f of the program description within Florida's assumption package. The notice template was crafted to contain the notice information specified at 40 C.F.R. 233.32(d), and the format was modeled after the current Corps public notice template. The notices include all specified information within the public notice template, including species information received during the pre-public notice review period from Florida Fish and Wildlife Conservation Commission (FWC) or U.S. Fish and Wildlife Service (USFWS) and information regarding historical, tribal, or cultural resources received from the State Historic Preservation Office (SHPO) or tribes. The notices also identify whether the applicant accepted all wetlands and other surface waters delineated using Chapter 62-340, F.A.C., as WOTUS, which helps streamline the public notice reviews conducted by EPA. DEP is not aware of any instance where a member of the public stated that the information contained within the public notices is insufficient. The public notice provides a summary of information that may be useful to an interested party, with additional information available in the file. The website where public notices are published includes the following information at the top of the page, with links to Oculus (DEP's official public records repository) and the referenced guidance documents:

The table represents the projects currently on public notice, as required by Rule 62-331.060, F.A.C.

> *The files are available online at the **OCULUS** website. You can refer to the Oculus Search Guide for assistance. You may also access the files through the **Information Portal** or locate records for a specific property using our online GIS tool, **Map Direct**. Please refer to the Information Portal Tutorial or the Map Direct Tutorial for assistance.*

DEP's user-friendly "Oculus" website also provides contact information for general inquiries related to any of its regulatory programs. It includes an information portal (https://prodenv.dep.state.fl.us/DepNexus/public/searchPortal), which provides extensive information about projects, including permit application materials, public comments, agency correspondence, and all other associated records. These databases provide more information on a real-time basis than is available from the Corps of Engineers.

Moreover, the DEP and EPA Memorandum of Agreement explains the process for additional coordination with other states and tribal groups; the DEP and Corps Memorandum of Agreement explains the process for DEP and the Corps of Engineers coordination; the Memorandum of Understanding between DEP, the FWC and USFWS explains the process for DEP coordinating with federal and state agencies concerning endangered species; and the Operating Agreement between DEP and the Florida Division of Historical Resources explains the process for DEP coordinating with tribal groups and stage agencies concerning historic resources. DEP follows the procedures described in these documents when coordinating with commenting agencies or outside entities.

Florida's Sunshine Laws, (found at Chapter 119, Florida Statutes (F.S.)) provide broader access to governmental records and information than the federal corollary statute, the Freedom of Information Act, 5 U.S.C. § 552. Unlike for Corps-issued permits, Florida provides real-time access to state permit records related to Section 404 permit applications via publicly accessible DEP websites. Written communications to or from state officials (including permitting staff) and other records regarding state business are readily available at no cost via one of DEP's online resources, including Florida's Oculus document management system (https://depedms.dep.state.fl.us/Oculus/servlet/login) and the DEP Information Portal (https://prodenv.dep.state.fl.us/DepNexus/public/searchPortal). Everything in the Information Portal is also in Oculus as the two systems are different search engines for the same records. The Nexus Information Portal uploads overnight, resulting in a slight delay in content availability (less than 24 hours). Documents are

uploaded by DEP staff upon receipt or finalization so that they are readily available to the public. If a document contains confidential information, it is placed in an Oculus "restricted file" but may still be provided to the public, when requested, after redaction of confidential or exempt information, as identified in Chapter 119, F.S. Confidential information is not viewable from the Information Portal or public-facing Oculus. Restricted files are not common; however, if a restricted folder is used, it is typically for national security, historic resource protection, or financial information. If an applicant requests that the sensitive portions of the file be exempt from the public record, these requests are included in the publicly available Oculus file. DEP does not currently separately track which permit files may contain confidential information; if EPA would like to view any specific file in depth, however, DEP can provide access upon request. Each publicly available State 404 Program permitting decision (exemption and general permit verifications and individual permits) contains a Notice of Rights pursuant to Chapter 120, F.S., which includes instructions for persons whose substantial interests are affected by the agency action to petition permitting decisions.

An Assessment of the Cumulative Impacts of the State's Permit Program on the Integrity of the State Regulated Waters

The State 404 Program is implemented in addition to Florida's long-standing, robust, Environmental Resource Permitting (ERP) Program. Activities regulated under the State 404 Program also require an ERP permit unless they qualify for an ERP exemption. With a programmatic goal of "no net loss" of wetland and other surface water functions, the ERP program frequently protects more wetlands and other surface waters than the State 404 Program. For example, the ERP program regulates activities impacting isolated wetlands that are not subject to Section 404 jurisdiction. The addition of the State 404 Program to ERP review was intended to reduce duplication in review between the federal and state agencies while maintaining the high level of environmental protection provided by all agencies. The tables in Appendix 2 show the authorized impacts and mitigation for each State 404 Program general and individual permit issued during this reporting period. Please note that this table does not include other projects that may have only required ERP coverage.

Florida does not use ratios to determine how much mitigation is needed for impacts. Instead, Florida utilizes several rapid assessment methods to determine the loss and gain of wetland functions. Rapid

assessment methods are more appropriate than ratio methods because they use ecological principles to calculate functional loss and gain units, rather than simple qualitative descriptions and acreage. Florida's rapid assessment method is called the Uniform Mitigation Assessment Method (UMAM) and is found in Chapter 62-345, F.A.C. Each applicant must provide justification that their project will meet the mitigation rule criteria and provide documentation that the proposed project will not result in in a functional loss of wetland or other surface water benefits. The DEP permit reviewer conducts a site-specific analysis, considering habitat and functions, to determine whether more than "minimal individual and cumulative adverse environmental effects" (i.e. insignificant impacts) will occur in accordance with rule criteria. A completed UMAM Part II assessment includes a narrative of the evaluation considerations for each category scored. Documentation of the functional gain/loss assessment for each project is located in the UMAM assessment as well as the Technical Staff Report for that file. While UMAM is the required assessment for current projects, older methods such as ratios, WRAP (wetland rapid assessment procedure) and WATER (wetland assessment technique for environmental review) are still used when mitigation is proposed at an older 404 mitigation bank site that was reviewed under one of those earlier rapid assessment methods.

DEP requires the use of the Chapter 62-340, F.A.C., delineation method for ERP and State 404 permitting purposes. Department Certified Wetland Evaluators (CWEs) verify all assessment methodology scores submitted by applicants to ensure that the scores reflect a reasonably accurate accounting of loss and compensation and that the compensation provided for the permits is adequate to fully mitigate impacts. A CWE visits the site and completes a UMAM analysis. If the applicant has provided UMAM documentation, and the CWE agrees with the evaluation, the CWE verifies the scores onsite. If the CWE does not agree with the applicant's UMAM score, the CWE will adjust that score to reflect actual site conditions observed in the field. DEP staff are directed to attach the completed assessment to the CWE work product cover sheet and the CWE signs the document acknowledging the documentation is completed in accordance with rule and that the information provided accurately reflects site conditions at the time of inspection. DEP Certified Wetland Evaluator approved delineation information should be included in each of the project files, available through Oculus. DEP is not aware of any instance where the DEP CWE did not review the delineation line for the State 404 Program permit. CWEs perform wetland verifications in the field and complete required 62-340 Data Forms, which are added to the file record. DEP continues to emphasize the importance of including this

documentation in the Oculus files and to instruct all new and existing CWE staff to include 62-340 Data Forms in the permit file as they are completed. DEP did not collect data on which Chapter 62-340, F.A.C. delineations were different from previous delineations done under the federal method. Pursuant to the 404 Handbook, section 1.1, DEP considers all wetlands and other surface waters delineated using Chapter 62-340, F.A.C., to be WOTUS unless the applicant provides documentation clearly demonstrating otherwise.

To assist the CWEs in their reviews, DEP drafted guidance for "Delineations for Projects that May Require a State 404 Program Permit" (404 Delineation Guidance). This guidance clarifies the requirement to always use the 62-340 F.A.C. delineation method (see the section titled "existing delineations and determinations)." DEP provided the 404 Delineation Guidance was provided to EPA on January 6, 2023.

DEP uses the mitigation hierarchy in the 404 Handbook, section 8.5.1, to determine the most appropriate type of mitigation. Where the project is within a mitigation bank service area, and credits are available, the mitigation bank credits are prioritized over other types of mitigation unless the applicant proposes an alternative form of mitigation that is found to be environmentally preferable. Where a mitigation banking instrument (MBI) provides for use of the bank outside of the mapped service area, DEP considers use of that bank for projects outside of the mapped area on a case-by-case basis. Most MBIs that allow such use require the approval of the Interagency Review Team (IRT) or the MBI signatories. DEP works with the ACOE mitigation bank team and provides a memo in each such project for IRT review and ACOE concurrence, consistent with the MOA and respective mitigation banking or in-lieu fee instruments. DEP works with applicants to obtain approval where appropriate. EPA has requested additional information regarding use of compensatory mitigation outside the impact area. DEP does not currently separately track all of the requested information, but all of this information is available, where applicable, in each Oculus file. Further, DEP has committed to track and provide information regarding which projects used compensatory mitigation outside the service area, per Corps of Engineers concurrence, along with rationale for why it was determined to be the most environmentally preferable option, in future Annual Reports. In addition, DEP has updated the IRT memo format to help capture additional information. This new format became effective in October of 2022 and will assist in the

compilation of future reports. The memo template is available upon request and can also be included in future annual reports, for reference.

Rule 62-331.051, F.A.C., requires that all activities the applicant plans to undertake which are reasonably related to the same project shall be included in the same permit application, so that all impacts can be reviewed holistically and cumulatively. Cumulative effects/impacts are reviewed in accordance with Applicant's Handbook Volume I, section 10.2.8, and the 404 Handbook, section 8.3.5. DEP, like the Corps, uses the concept of "independent utility" to determine whether applications are unique or part of the same larger project. Generally, where a project appears to be interconnected for some identifiable reason or depends on other project phases to function, DEP considers the project as part of a larger project unless the applicant successfully demonstrates otherwise. DEP also looks at ownership. If a project is only proposed for a portion of contiguous lands owned by the applicant, DEP will ask the applicant to provide information about future development plans for the other properties and whether they will be part of the same larger project.

EPA approved Florida to issue permits in WOTUS as defined under the Navigable Waters Protection Rule (NWPR). Florida is working cooperatively with EPA to navigate the changing definitional regimes of WOTUS and is committed to administering its assumed CWA Section 404 program in accordance with the requirements of the Clean Water Act and regulations promulgated thereunder. DEP looks forward to continuing our productive dialogue concerning this matter.

Even as actions at the federal level have continued to create substantial confusion as to the WOTUS definition, DEP remains committed to administering Florida's CWA programs consistent with applicable law and to maintaining its cooperative partnership with the federal agencies to ensure maximum protection of Florida's water resources. In this regard, it is important to note that Florida's Environmental Resource Permit Program extends protection to all "waters of the state," which goes far beyond the extent of waters subject to the CWA. And DEP continues to work cooperatively with EPA on resolving concerns for specific 404 permits where there may be some potential difference of view as to whether a site is jurisdictional for 404 purposes. Where an unresolvable difference of views may arise, EPA is able to federalize the permitting action (as it has done on one occasion). As such, all waters in Florida continue to be protected. DEP is committed to working cooperatively with EPA to address WOTUS-related concerns as they arise.

Identification of Areas of Particular Concern and/or Interest within the State

Areas of particular concern include those referenced in recent correspondence between EPA and DEP, as discussed above and incorporated by reference herein. Two other areas of particular interest identified during this reporting period are noted below.

During this reporting period, EPA agreed to reconsider its prior "no effects" determination for species and habitats under the jurisdiction of the National Marine Fisheries Service (NMFS) and to prepare a Biological Evaluation and effects determination for NMFS-listed species and critical habitats. Based on this review, EPA has stated that it "will initiate ESA consultation with NMFS, as appropriate." DEP supports Section 7 consultation for purposes of Section 404 assumption approval and requests to be kept closely informed as to progress on this issue. DEP notes that, during this reporting period, EPA provided comments on a permit application (Miami-Dade Water and Sewer Dept. – North District WWTP, File Number: 13-0372409-005-SFI) that involved successful coordination with NMFS under the existing framework due to potential impacts to mangrove habitats.

Another area of interest arose as part of DEP's review of a large development project (Collier Enterprises Management Inc., file number 396364-001) known as Bellmar Community, located in Collier County. The project received over 600 public comments through email over approximately two days, primarily related to potential impacts to multiple species. The number of comments received required a significant amount of staff time and resources to enter into Oculus, DEP's online document management system. In order to streamline this process and help make public comments available quicker, the Department expanded the DEP Nexus Business Portal to allow for public comments to be submitted online for State 404 Program applications (Public Comment | DEP Business Portal (fldepportal.com)). The ability to submit public comments through the portal increases transparency as it enables the public to view any public comment within 24 hours of receipt. This ability will also benefit future review of other State 404 Program applications. The Bellmar project also provides an opportunity for DEP to implement the ESA review process. DEP believes that agency coordination for ESA review has worked well thus far for this project. The application is still under review, so a final decision and/or conditions have not been published as of the date of this Annual Report.

The Number and Nature of Individual and General Permits Issued, Modified, and Denied

The Department reviewed applications for – and issued, modified, or denied – a total of 193 individual permits and 981 general permits during this reporting period. The individual and general permits issued were able to successfully undergo complete review by the commenting agencies, the Department and the public in that timeframe.

Application withdrawals

Approximately 1,444 State 404 Program applications were withdrawn during this second reporting period. Discussion with the district offices and programs revealed that applicants regularly requested withdrawals for activities that already have an existing, valid Corps permit. Additionally, some applicants have requested a withdrawal to reassess and redesign projects in lieu of denial. Some applications were logged in as the incorrect permit type, withdrawn, and then re-logged for the correct permit type. The reasons for withdrawal are reflected in each permit file, either by a change in the permit type or a withdrawal email from the applicant. An application for a Section 404 permit is not required to provide a reason for withdrawal of permit applications, nor are specific reasons for withdrawal of applications recorded as a standard practice. Appendix 3 below lists withdrawn applications during this reporting period which can be viewed using one of the methods described on DEP's Public Records webpage at https://floridadep.gov/sec/sec/content/public-records.

Permit modifications

Of the 26 permit modifications issued during this reporting period, ten (10) were for minor modifications and 16 were for major modifications. DEP uses reasonable scientific judgement (RSJ) for purposes of determining whether there has been a "material permit modification" or "material changes in the scope of the project." DEP did not define the term "significant" in our ERP or State 404 Programs, partly because there is so much variability in what could be considered "significant" for different projects.

Long-Term Projects

DEP reviews long-term projects pursuant to the process described in the State 404 Applicant's Handbook Section 5.3.2-3 and Rule 62-331.051, F.A.C., as detailed and accepted in Florida's 404 assumption package. This analysis includes cumulative impacts for the total project, as well as for each permit phase. DEP complies with the public notice requirements outlined in the State 404 Applicant's Handbook Section 5.3.1 and Rule 62-331.060, F.A.C., and includes in the public notice a link to the Oculus file for the application.

DEP has received State 404 Program applications for projects that either already have or are applying for an ERP Conceptual Approval Permit. However, DEP did not collect data for identifying these projects. For those projects where the ERP Conceptual Approval and the State 404 Program application are reviewed simultaneously and require a long-term planning document, the phases should align in most respects. However, this is project and site specific and may not always be the case. To get a State 404 Program permit, the project needs to meet the requirements of the program, including Section 5.3.2 of the 404 Handbook. If the State 404 Program application does not meet those specific requirements, the project permit application will be denied.

The Department issued three individual permits with a long-term plan during this reporting period [The Chemours Company, TT, LLC, for the Florida Mine Trail Ridge West Levee, file number 137482-022-SFI; ICI Homes – Middlebourne, Longleaf Pine Parkway, file number 396565-001-SFI; and Babcock Property Holdings for Babcock Ranch Community, file number 396574-001-SFI]. Four other long-term planning projects remain under review during this reporting period and are included in Table 2, below. Prior to permit issuance, applicants must submit a long-term planning document with all of the elements required in Section 5.3.2 of the 404 Handbook. DEP assists applicants throughout the process as needed, including through pre-application meetings and during the review process through meetings and RAIs. The public notice, once published, indicates that the project under review is a long-term planning project. The long-term planning document would then be available for public review through Oculus or the DEP Information Portal.

No subsequent phases were reviewed under the expedited permit review process outlined in Rule 62-331.060(8), F.A.C. for long term projects as no subsequent phase applications were submitted during

this reporting period. Since permits are issued for a period of five years, it is anticipated that future long-term planning applications for subsequent phases will be submitted closer to the current phase's expiration date as authorized activities near completion. No No Permit Required letters (NPRs) were issued in association with a long-term planning project.

Table 2 – Long-Term Planning Projects Under Review as of June 30, 2022

File Number	Project Name	Application Received
137482-021-SFI	Trail Ridge West Levee (The Chemours Company TT LLC – Florida Mine)	1/8/2021
166176-033-SFI	App Alico Phase 3D (Cemex Construction Materials Florida – Alico Road Quarry)	1/8/2021
173508-004-SFI	North Florida Rock – Marianna Mine	1/8/2021
399660-001-SFI	Wild Turkey Sand Mine	2/28/2021
400133-001-SFI	Greystone North, South, & West	3/10/2021
396966-001-SFI	Collier Enterprises, Rural Lands West	1/8/2021
396574-002-SFI	Babcock Ranch Community Phase 3	6/13/2022

The tables below (Tables 3-6) contain the number and nature of State 404 Program individual and general permits issued, modified, or denied during this reporting period.

Table 3 – Number of Individual Permits Issued, Modified, or Denied

Permit Status	Number of Individual Permits
Effective (Issued)	152
Denied	15
Modified	26
Withdrawn	464

Table 4 – Nature of Individual Permits Issued, Modified, or Denied

Primary Category of Work	Effective Total	Denied Total	Modified Total
Agriculture		1	
Commercial	12	3	
Dams/Levees/Impoundments	1		3
Ditches/canals/flood control	6		
Ecological restoration	1		
Mining	1		
Residential development (multi-family/subdivision)	29	3	5
Roadways	32	1	8
Single-family residence	62	4	2

An Estimate of Extent of Activities Regulated by General Permits

Table 7 summarizes the total impact acres authorized under each general permit type that was issued within the reporting period. Details regarding the impacts and mitigation for each issued permit are included in Appendix 2.

Table 7 – Estimate of Extent of Activities Regulated by General Permits

General Permit Type	Number Issued	Total Fill Impacts (Acres)
62-331.210 General Permit for Maintenance or Removal	39	7.342

General Permit Type	Number Issued	Total Fill Impacts (Acres)
62-331.211 General Permit for Fish and Wildlife Harvesting, Enhancement, and Attraction Devices	1	0.46
62-331.213 Survey Activities	1	0.16
62-331.214 General Permit for Outfall and Intake Structures	12	9.321
62-331.215 General Permit for Utility Line Activities	64	56.139919[1]
62-331.216 General Permit for Bank Stabilization	117	0.709
62-331.217 General Permit for Linear Transportation Projects	109	31.5101
62-331.220 Minor Activities	20	1.779
62-331.223 Approved Categorical Exclusion	3	3.482
62-331.224 Structural Activities	1	0.40
62-331.225 General Permit for Aquatic Habitat Restoration, Enhancement, and Creation Activities	26	N/A Project results in habitat restoration, enhancement, or creation
62-331.227 General Permit for Residential Developments	143	57.13
62-331.229 General Permit for Maintenance of Existing Flood Control Facilities	3	1.0
62-331.233 General Permit for Boat Ramps	6	0.125
62-331.236 General Permit for Commercial and Institutional Developments	39	17.044
62-331.238 Reshaping Existing Drainage Ditches	2	1.344
62-331.239 Recreational Facilities	3	0.355
62-331.240 Stormwater Management	18	0.25
62-331.243 Activities in Ditches	2	4.8037
62-331.245 Land-Based Renewable Energy Generation Facilities	5	0.834
62-331.248 Florida Department of Transportation and Florida's Turnpike Enterprise	10	12.621
RGP SAJ-103 Residential fill in Holley by the Sea	4	0.75
RGP SAJ-105 Certain fill in Bay County (West Bay)	2	16.68
RGP SAJ-13 Aerial Transmission Lines in Florida	10	25.072

[1] This GP authorizes impacts up to ½ acre in size per single and complete crossing; it authorizes multiple crossings per GP.

General Permit Type	Number Issued	Total Fill Impacts (Acres)
RGP SAJ-14 Sub-aqueous Utility and Transmission Lines in Florida	2	0.0506
RGP SAJ-86 Certain fill in Bay and Walton Counties (Choctawhatchee, Lake Powell, West Bay)	11	58.662

No Permit Required Letters

For this reporting period, DEP issued a total of 486 NPRs for projects which were determined to have no impacts to WOTUS, 259 of which were both received and issued within the reporting period. To issue an NPR, DEP staff is required to include sufficient documentation in the file to support the determination, including a desktop verification, an onsite field assessment, at least one 62-340 Data Form, and/or a signed WOTUS Determination Form. DEP continues to emphasize the importance of including this documentation in the Oculus files and to provide consistent training for all new and existing staff. A summary of NPR projects with the basis of jurisdiction is included in Appendix 4.[2] Jurisdictional determinations are made in accordance with DEP's current authorized State 404 Program. As explained in prior correspondence, all NPRs are available to EPA for review.

DEP has also provided DEP's NPR Guidance to EPA. The guidance was updated as of September 22, 2022, was provided again on January 3, 2023, and is attached hereto. NPRs are used to indicate to the regulated community a preliminary assessment of whether or not a proposed project may require authorization. The NPR serves as a verification that the activity as proposed in the submitted site plan/drawings would not impact WOTUS. In addition, the text of each letter states as follows: "This verification reflects current regulations and is only valid for a period of no longer than five years from the date of this letter unless new information warrants a revision of this verification before the expiration date."

[2] The Appendix 4 submitted as part of the draft annual report has been updated. DEP's response provided on January 6, 2023, to EPA's questions of October 27, 2022, included a more comprehensive view than that originally provided; the current Appendix 4 the same chart that was provided in January 2023, incorporated herein.

Number of Permit Applications Received but not yet Processed

As of June 30, 2022, DEP had the following numbers of applications under review:

- Exemption verification requests: 13
- General permit notices: 573
- Individual permit applications: 764
- "No Permit Required" letter requests: 466
- Formal determinations of the landward extent of wetlands and other surface waters: 91
- Emergency Authorizations: 3
- Modifications: 5

The Number of Violations Identified and Number and Nature of Enforcement Actions Taken and The Number of Suspected Unauthorized Activities Reported and Nature of Action Taken

Typically, a permit compliance inspection is triggered by one of the following: 1) a permittee submits Form 62-330.350(1), "Construction Commencement Notice," (for individual permits); 2) a permittee submits Form 62-331.200(1) – "Certification of Compliance with a State 404 Program General Permit"; 3) at least one year has passed since permit issuance; or 4) a complaint is received. DEP typically does not inspect earlier than the occurrence of one of the above because many projects have not yet begun construction within one year of permit issuance. As such, the number of permit compliance inspections, provided in table 8 below, is driven largely by the number of permits issued during the previous reporting cycle (December 22, 2020, to June 30, 2021).

Table 8 – Permit compliance inspections by district

District	Permit Compliance Inspections	Violations
CD	23	5
NED	65	5
NWD	30	2
SD	28	6

SED	13	2
SWD	39	11
TOTAL	198	31

Table 9 shows the total number of suspected unauthorized activities during this reporting period. Suspected unauthorized activities include complaints received within state-assumed waters that were relevant to the State 404 Program (for example, complaints regarding docks in state-assumed waters were not included because docks are typically not regulated under the State 404 Program), and referrals from permitting. Specifically, discharge of fill material (2)(i) in Appendix B of the State 404 Program Applicant's Handbook indicates that the "placement of pilings in WOTUS that does not have or would not have the effect of a discharge of fill material shall not require a 404 permit." A referral from permitting typically occurs when a permit processor performs a site inspection during review of a permit application and finds a suspected unauthorized activity. All compliance and enforcement staff are capable and dedicated to conducting inspections of suspected unauthorized activities; all suspected unauthorized activities are inspected. Many complaints were still in the process of being investigated at the end of the reporting period. Responses to violations are shown in Table 10. appropriate type of response is determined as described in section (g) of the program description. Penalties are not collected at the time they are assessed, as each enforcement document specifies the due date for any penalties. Because penalty collections occur after inspections and initiation of enforcement cases, the penalty collection amounts for the violations reported in this report will be reflected in subsequent reporting periods.

Table 9 – Suspected Unauthorized Activities

Suspected Unauthorized Activities (Complaints and Referrals)	**Total**
Total suspected unauthorized activities	1074
Total confirmed violations	191
Total still under investigation or awaiting agency action	103
Total closed w/out agency action	868

Table 10 – Response to Confirmed Violations

Response to Violations (Formal and Informal Enforcement)	**Total**
Compliance Assistance Offer (CAO)	15
Warning Letters (WL) issued	25
Notices of Violation issued	1
Short Form Consent Orders executed	0
Long Form Consent Orders executed	6
Total Settlement Agreements executed	6
Penalties Assessed	$24,525
Penalties Collected	$21,525
Post-Enforcement Permits issued	3

Enforcement Coordination with EPA

The EPA/DEP MOA, in Section III.E (Unauthorized Activity) states:

> *FDEP shall coordinate with EPA when a violation is identified that is within the permit and discharge categories in Section II.B.(1) of this Agreement. FDEP shall provide a summary of the unauthorized activity and inform EPA of the status of the file as enforcement actions are taken, including any decision to accept an after-the-fact permit application.*

DEP copies EPA on actions as they occur for those projects that fall within the non-waiver categories outlined in Section II.B.(1) of the MOA. DEP and EPA discussed the possibility of EPA creating a special mailbox to receive these communications in a standardized way. If such a mailbox is created, DEP will use that mailbox to send EPA copies of those actions.

DEP has set up a recurring monthly enforcement call with EPA to discuss any enforcement-related subject matter as needed by either DEP or EPA.

The database of record for permit compliance actions is currently DEP's ERPce database. Data is not uploaded to ICIS. DEP discussed the potential use of ICIS with EPA and found that other assumed states do not use ICIS, nor does the US Army Corps of Engineers. ICIS does not appear to be built for activities regulated under Section 404 of the Clean Water Act. DEP plans to continue to use ERPce and will provide data to EPA upon request as outlined in Section III.D. of the MOA, or through the annual report as required by Section III.C. of the MOA.

DEP maintains its "program designed to identify persons subject to regulation who have failed to obtain a permit or to comply with permit conditions," as required by 40 C.F.R. § 233.40(a), by updating our ERPce database when complaints are received and when complaint or permit inspections reveal a violation. The database is searchable, so agency reviewers can check to see if a person has violated in the past and consider that information when determining the best path to resolution.

Staff Training

DEP has provided multiple field and virtual staff trainings with high participation rates. Recordings of virtual trainings and associated documents and training materials are posted to the Division's internal website where staff may access them at any time. As of June 30, 2022, DEP provided the following training opportunities for staff:

- Weekly training webinars prior to assumption (August – December 2020), attendance numbers for the trainings listed in Table 11 ranged from 186-250 participants.
- Weekly training webinars after assumption (December 2020 – June 30, 2021), attendance numbers for the trainings listed in Table 12 below were routinely between 100 and 120 participants.
- Training webinars as needed listed in Table 13 (July 1, 2021 – June 30, 2022) attendance between 100 and 120 participants
- Each processing office was assigned a Division mentor to assist them with 404 permitting and compliance questions
- Weekly meetings between the mentors and their assigned processing offices

- Chapter 62-340, F.A.C., Basic and advanced field delineation training (for 3 years prior to assumption) and post assumption (Table 14).

Historical, Cultural, and Tribal Resources

DEP is committed to full engagement with the State Historic Preservation Officer (SHPO) and the Tribes on protecting historic and cultural resources in the State of Florida. For each State 404 general and individual permit application received between July 1, 2021, and June 30, 2022, DEP provided advance notice to the SHPO, the Seminole Tribe of Florida (STOF) and the Miccosukee Tribe of Indians of Florida (MTIF) according to the procedures outlined in the Operating Agreement (August 6, 2020) between DEP and the SHPO. The Operating Agreement provides for an opportunity for the SHPO and the Tribes to review permit applications for effects to cultural resources or historic properties, make requests for additional information, and/or make effects determinations and recommendations.

Every State 404 Program public notice is a solicitation for comments, including comments on the potential effects to historic/cultural resources. Our public notice template provides information regarding any known historic properties and/or cultural resources within the permit area and provides a summary of recommendations received by SHPO/THPO/Indian Tribes during initial review of the application. SHPO/THPO/Indian Tribes are also notified when the public notice is posted; and, each entity is able to provide additional comments in response to public notice. Any public comments received from other tribes with which DEP does not have an established operating agreement are reviewed and considered along with public comments and are included in the project specific file. The date of receipt for all public comments, including the timing for any comments from a commenting agency or tribe, are available in the associated permitting file. There were no instances where DEP did not accept the recommendations and/or determinations from a commenting agency or tribe.

SHPO

Between July 1, 2021, and June 30, 2022, the SHPO requested additional information for 61 applications, mostly requesting Cultural Resource Assessment Surveys. The SHPO provided four (4) conditional no adverse effect determinations and three (3) no adverse effect determinations. The SHPO also provided 265 no effect determinations, with a request for the inclusion of the standard condition for unanticipated discoveries.

Tribes

Between July 1, 2021, and June 30, 2022, the Seminole Tribe of Florida requested additional information for 58 permit applications. Fifty-six (56) of the requests were for Cultural Resource Assessment Surveys and two (2) were for project-specific information. Additionally, the STOF provided twenty-three (23) no effect determinations and three (3) conditional no adverse effect determinations. The STOF recommended DEP condition permits to include avoidance of a known cultural resource for two (2) permit applications. The STOF consistently provided comments and recommendations in advance of public notice. Between July 1, 2021, and June 30, 2022, the Miccosukee Tribes In Florida (MTIF) submitted no requests for additional information and provided no determinations of effect.

There were no instances in which consulting parties determined a State 404 undertaking had the potential to adversely affect historic properties eligible for listing in the National Register of Historic Properties or of other religious and cultural significance. DEP was not notified of any unanticipated discovery of human remains as a result of the implementation of a State 404 permitted activity.

DEP is required to place all finalized file materials into Oculus and has instructed processing staff to do so. Any information generated during the advance notice and public notice process which identifies the location of an archaeological site is uploaded into Oculus as a restricted file. Per section 267.135, Florida Statutes, this information is exempt from s. 119.07(1), F.S., and s. 24(a) of Art. I of the State Constitution.

DEP does not recommend any actions or revisions to the DEP-SHPO Operating agreement or the Programmatic Agreement at this time.

Table 15 – Recommendations Following Effects Determinations (July 1, 2021, to June 30, 2022)

Commenter	**Permit No.**	**Comment**	**Recommendation**
SHPO	146897-001	Conditional No Adverse Effect	Monitoring
SHPO	417211-002	Conditional No Adverse Effect	Monitoring
SHPO	416646-001	Conditional No Adverse Effect	Monitoring

Commenter	Permit No.	Comment	Recommendation
SHPO	407978-001	No Adverse Effect	Standard condition for unanticipated discoveries included in permit.
SHPO	419228-001/002	No Adverse Effect	Standard condition for unanticipated discoveries included in permit.
Seminole	ST404_396374	Conditional No Adverse Effect	Concurrence with proposed project provided that the standard condition for unanticipated discoveries is included in permit.
Seminole	ST404_406799	Conditional No Adverse Effect	Site avoidance, include standard condition for unanticipated discoveries in the permit.
Seminole	ST404_416622	Conditional No Adverse Effect	Monitoring

Listed Species

DEP provides early Endangered Species Act coordination engagement for all State 404 general and individual permit applications. The Memorandum of Understanding (August 5, 2020) between DEP, FWC and USFWS describes the roles, responsibilities and commitments of each agency in implementing the State 404 Program. The corresponding coordination procedures for the State 404 Program are outlined in the State 404 Rule and in the USFWS's Programmatic Biological Opinion for the EPA's Approval of DEP's Assumption of the Administration of the Dredge and Fill Permitting Program under Section 404 of the Clean Water Act, dated November 2020. The State 404 Rule and the procedures established in the USFWS programmatic biological opinion (State 404 BiOp) ensure that endangered and threatened federally listed species and their critical habitats are protected as an integral part of the State 404 Program. FWC is the species coordination lead for individual permit reviews. FWC and USFWS are each responsible for providing their comments for general permits, with the exception

of the general permit for single family residences at Rule 62-331.227, F.A.C., when the project is within Florida panther habitat. FWC is the species coordination lead for those projects.

The Endangered and Threatened Species Technical Team convenes once a week to discuss specific projects and improvements to coordination procedures. The team has worked together to provide training to DEP, FWC, and USFWS staff regarding review procedures. Additionally, FWC and DEP compile and share weekly reports on both pending and closed applications to provide general information needed for each agency's review.

Both USFWS and FWC provide effects determinations before a permit is issued. Effects determinations are categorized as jeopardy or no jeopardy, may or may not affect, and likely or not likely to adversely affect. A determination of "may affect, likely to adversely affect" a listed species indicates anticipated incidental take, possible jeopardy of the affected listed species, and/or adverse modification to designated critical habitat. A determination of "no jeopardy" or "may affect, not likely to adversely affect" indicates the availability of adequate protective measures, which are implemented by incorporation as specific conditions to the State 404 permit.

Tables 16 and 17 below summarize the actions DEP, FWC and USFWS have taken to ensure the continued existence of endangered and threatened federally listed species and the protection of designated critical habitats (as per Rule 62.331.053, F.A.C., and Rules 62.330.301 and 62.330.302, F.A.C.). There were no projects proposed in this reporting period where the anticipated effects to federally listed species were determined to be "jeopardy" and no proposed projects with anticipated adverse modification to or destruction of designated critical habitats. Fourteen (14) permit reviews included an initial determination of "may affect, likely to adversely affect" a listed species. After further review, each of these "likely to adversely affect" determinations were changed during the permitting process to either "no jeopardy" or "may affect, not likely to adversely affect" and protective measures were incorporated into the final permit as specific conditions.

Table 16 below shows how many project applications could affect each of the federally listed species where the initial effect was determined to be "may affect, likely to adversely affect."

Table 16: Initial determinations of "May Affect, likely to Adversely Affect" federally listed species for State 404 Permits issued between July 2020 and June 2021

Federally listed species	Number of Permits/Projects
Audubon's crested caracara	1
Black rail	1
Bluetail mole skink	1
Eastern indigo snake	4
Florida bonneted bat	2
Florida panther	3
Panama City Crayfish	1
Sand skink	3
St. Andrews beach mouse	2
Total	18

Table 17 below shows issued permits where the initial effect determinations were "may affect, likely to adversely affect." There were twelve (12) Individual Permits, one Regional Permit and one General Permit.

Table 17: Permits with initial determinations of "May Affect, likely to Adversely Affect" that were resolved before being issued between July 2021 and June 2022

Project	**Permit**	**Affected Species or Critical Habitat**	**Requirements to Reduce Effects**
West SR 50 from Sumter-Lake County Line to CR 33 Widening (FDOT)	396371-01-SFI	Sand skink	Purchase of 2.68 credits for loss of 1.34 acres of habitat; Other conditions added
Central Polk Pkwy from Polk Pkwy to US 17 (FDOT/ Florida's Turnpike Enterprise)	401073-001-SFI	Sand skink, Bluetail mole skink, and Eastern indigo snake	Purchase of 0.92 credits for the loss of 0.46 acres of skink habitat; Purchase of 7.23 credits from the Platt-Branch Mitigation Bank (PBMB); Other conditions added
SR 90 at Oasis Visitor Center (FDOT)	410501-001-SFI	Florida panther	Purchase of 13.68 Panther Habitat Unit (PHU) credits for the loss of 1.47 acres of habitat.

Project	Permit	Affected Species or Critical Habitat	Requirements to Reduce Effects
Babcock Ranch Community (BRC)	396574-001-SFI	Florida panther, Florida bonneted bat (FBB), Eastern indigo snake, and Audubon's crested caracara	FBB foraging habitat: Approximately 12,981 acres of habitat preservation and enhancement of foraging habitat. In addition, approximately 4,534 acres of wetland/surface water preservation, 418± acres of wetland enhancement, and 368± acres of wetland creation areas. FBB roosting habitat: 8,024± acres of forested preservation and enhancement. Panther Loss of habitat minimized by conservation and restoration of habitat; Eastern indigo snake Minimized by conservation of large areas of habitat and other conditions added; Audubon's crested caracara Conditions added
Trail Ridge South Mine	137482-022-SFI	Eastern indigo snake	Conditions added
Bond Farm Hydrological Enhancement	272622-004-SFI	Florida bonneted bat (FBB)	Conditions added
Isles of Collier (Minto Sabal Bay - Fleishman)	398942-001-SFI	Florida panther and Eastern indigo snake	Enhancement of 27.7 acres of habitat and purchase of 5.85 credits, equivalent of 199 PHU credits. Conditions added for Eastern indigo snake.
SR91 Turnpike Widening O'Brian Rd to Minneola (FDOT)	397417-002-SFI	Sand skink	Purchase 0.22 credits for loss of 0.11 acres of sand skink habitat
Vanderbilt Road Extension	396550-001-SFI	Florida panther	Purchase at least 1,240 PHUs; Other conditions added

Project	Permit	Affected Species or Critical Habitat	Requirements to Reduce Effects
Crooked Island Hotel	0403618-001-SFI	St. Andrews beach mouse	Wetland mitigation and conservation easement on Lathrope Island; Conditions added to avoid and minimize harm of 7.14 acres of beach mouse habitat.
Sugar Sands Partners, LLC	0409872-001-SFG	St. Andrews beach mouse	Conditions added on 9.77 acres within the 14.76 acre construction footprint. Restoration of 2.23 acre temporary impact area.
FDOT Gulf Coast Parkway from US 98 to Star Avenue	404227-001-SFI	Panama City Crayfish	Conditions added
FPL Farmlife Substation Expansion	13-355773-006-SFI	Florida panther	Purchase of 0.85 credits, which would provide a value of 30.4 PHUs, (exceeds USFWS suggested mitigation of 11.4 PHUs)
FPL Barna-Norris Patrol Rd	397043-00-SFRP	Black rail	Conditions added

As specified in Appendix 1, DEP is working to ensure that all correspondence is being uploaded into Oculus and has instructed DEP processing staff to do so. DEP staff has also requested that USFWS and FWC provide pertinent communication between FWC and USFWS within the processing timeframes for inclusion in Oculus.

Internal training opportunities for listed species issues continued during this period, as follows:

- July 2021: DEP staff provided a webinar to DEP permit process staff regarding updates to State 404 listed species coordination procedures;
- September 2021: the USFWS gave a presentation to DEP staff for an online tool that is currently being updated for Florida species (IPaC) that will facilitate the 404 federal listed species reviews in the future;
- April 2022: DEP organized a virtual “meet and greet” Teams meeting for FWC and USFWS staff involved in reviewing State 404 Program permits to provide the opportunity for staff

statewide, including supervisors, to introduce themselves and their job responsibilities to each other, if they had not already done so in the course of coordination in the previous months;

- May 2022: DEP staff presented an in-depth look at requirements for our responsibility to address federally listed species;

In addition to these trainings, the State 404 Program's endangered and threatened species Technical Team continues to discuss emerging issues, specific projects and improvements to the review process. During this reporting period, the Technical Team provided multiple recommendations to resolve process questions that arose during implementation. Some recommendations included:

- Two additional standard permit conditions to address federal species issues;
- A list of various sample federal wildlife permit conditions, organized by species, that permit processors may reference when drafting permit conditions;
- A similar list of sample conditions specific to transportation projects; and
- Increased communication to identify and quickly correct any process errors before permits are issued and before species are affected.

Program Auditing

DEP endeavors to implement a state 404 program that is at least as stringent as the federal program. As detailed in section g of the accepted Program Description, the Division of Water Resource Management, Submerged Lands and Environmental Resources Coordination Program (SLERC), is responsible for ensuring statewide consistency in the implementation of the State 404 Program. SLERC is composed of technical staff housed in the Tallahassee DEP headquarters. This staff performs multiple functions statewide; the 404 team within SLERC specifically handles audits, delineation training, and other 404 topics. This team also provides programmatic oversight and tracks information used in reporting to EPA. To that end, DEP adopted a standard form of documentation for determinations of the landward extent of wetlands or other surface waters. The Chapter 62-340, F.A.C., Data Form (data form) is analogous to the Wetland Determination Data Form used by the Army Corps of Engineers. The data form facilitates standardization of field procedures and documentation of wetland determinations.

To further ensure consistency, program auditing requirements, including target numbers, are described in section (g) of the approved Program Description. A DEP SLERC technical staff team conducts auditing on an annual basis. An organizational chart for SLERC was included in section C of the assumption package; an updated chart was provided to EPA on January 3, 2023. After the end of each quarter starting July 1 each year, staff pull a list of permits and formal determinations issued the same quarter of the previous year. Staff review 50% of individual permits, 25% of general permits, and 100% of formal determinations for the time period from a list of all files in that category using one of two methods: Method 1 – using Microsoft Excel's random function to randomly select the correct percentage of authorizations per district or program office; or Method 2 – choosing every n^{th} file from a list (example: to audit 20% of permits, pull every 5th file number from a list.) The audit reported in this annual report reflects the previous annual report's time period, from December 20, 2020 – June 31, 2021. This and future annual reports will continue to identify and describe any concerns found through these consistency initiatives and to provide recommendations for their resolution.

Formal Determination Audit Summary

A Formal Determination (FD) is a binding determination of the landward extent of wetlands and other surface waters as defined by Chapter 62-340, F.A.C. A formal determination may be based on a certified survey, an approximate delineation, or a combination thereof. The determination is conducted by a CWE from DEP or one of the five Water Management Districts (WMDs). A formal determination is binding for five years and may be renewed or reissued in accordance with the procedures in Section 7 of the Applicant's Handbook Vol I. This portion of the audit focused on data forms submitted with FD applications; data forms submitted with individual or general permit applications were reviewed under those audits, respectively.

Pursuant to Rule 62-330.201, F.A.C., staff must use the Chapter 62-340, F.A.C., Data Form (data form) to document the landward extent of wetlands and other surface waters for any application that requires a wetland determination or assessment. The forms are used to document and support the delineation of wetlands and other surface waters. Section 7.1.1 in ERP Applicant's Handbook, Volume I, clarifies that at least one complete data form is required for a data point for each time an agency concludes or determines than an area is a non-wetland surface water, wetland, or upland. SLERC staff provided

webinars and field trainings to instruct approximately 256 participating staff on completing the data form. SLERC also created an internal Certified Wetland Evaluator (CWE) certification to demonstrate that those staff who are reviewing wetland delineations under Chapter 62-340, F.A.C., and performing WOTUS determinations possess the necessary skillset to satisfactorily carry out those responsibilities. As of June 30, 2021, eighty-four (84) staff members had received CWE certification. As of June 30, 2022, one hundred fifty-nine (159) staff members had received CWE certification.

SLERC conducted an audit of all sixty-three Formal Determinations (FDs) issued during the auditing period to evaluate implementation of the CWE and 62-340 data form requirements, determine consistency in documentation standards, and identify future training needs. The audit involves an inspection of the data form documentation, in combination with additional reliable available information, to verify that the landward extent of wetlands and surface waters has been accurately identified and documented.

Individual Permit Audit Summary

For this auditing period (December 20, 2020 – June 31, 2021), six individual permits were issued, of which SLERC audited 50%. The randomly selected projects are included in Table 18, below. The below projects were some of the very first State 404 Program Individual Permits issued. Our District offices worked closely with SLERC 404 mentors to ensure review and processing of the application was conducted correctly. As such, the results of the audit reflect the successful processing of these initial applications. Demonstrated aptitude is considered when hiring or promoting a SLERC 404 mentor, rather than strictly relying on years of experience. The mentors work as a team to be available to all State 404 regulatory staff. They serve an advisory rather than supervisory role for district processors. The Division Mentorship positions are useful tools to help ensure consistency in implementation, in addition to state program requirements.

Table 18: Individual Permits – Audit (December 22, 2020 – June 30, 2021)

Individual Permit Number	Agency Action Type	Primary Category of Work	District office
397140-001-SFI	Effective (Issued)	Local government construction	SD
396414-001-SFI	Effective (Issued)	Roadways	SWD
396366-001	Effective (Issued)	Residential Development Multi-family	NED

General Permit Audit Summary

SLERC reviewed general permits to evaluate consistency with the review procedures for State 404 program general permits (62-331.201, F.A.C.). Each project file was inspected to determine whether the site documentation, interagency coordination, and authorization are sufficiently documented.

In total, 33 authorizations for fifteen (15) types of general permits were issued. The most frequently authorized activities were residential developments (62-331.227, F.A.C) and bank stabilization (62-331.216, F.A.C.).

Audit findings

SLERC will share any detailed audit results with CWEs to inform them of the overall trends noticed and to generate feedback on any delineation challenges CWEs may have experienced during the audit period. Based on the results of this first audit, SLERC has identified the following topics that are being addressed where applicable:

- Ensuring complete descriptions and photographs of indicator factors. Any shortfalls in this category are presumed to be attributable to an over-confidence with the ease of completing this part of the evaluation.
- Clerical errors. Project files occasionally include references to site visits, photographs, and/or completed data forms that have not been uploaded contemporaneously.
- Site Visits. SLERC is providing staff additional recommendations and training on best practices to prepare for a site visit and for more consistent documentation of site information.

- Renewal and Reissuance: SLERC will reiterate to staff the data form is also required for the renewal and reissuance of FD authorizations. Renewed or reissued FDs may have been previously verified without the data form prior to the data form being required; however, all FDs require field verification of the lines consistent with Chapter 62-340, F.A.C.

SLERC created a Chapter 62-340, Data Form mobile application ("data form app") to modernize data collection and reporting, and to improve efficiency. Use of the app is expected to reduce the errors or omissions noted above. The data form app prompts staff to provide photo documentation at each step in the delineation process. DEP is committed to ensuring each field vehicle is equipped with a tablet that has the Chapter 62-340 Data Form App installed. As of the date of this report, SLERC has provided training to introduce the app to CWEs and demonstrate its functionality.

Although areas for improvement have been identified, SLERC is pleased with the overall implementation of 62-330.201, F.A.C., and the CWEs are conducting the determinations of the landward extent of wetlands or surface waters.

Other Information

In total, approximately 212 people work within the State 404 program. A permitting team of ninety (90) individuals processes and reviews applications; sixty-nine (69) of these individuals spend the majority of each workday evaluating activities for the assumed program. The DEP State 404 Program Compliance and Enforcement team is comprised of fifty-four (54) total individuals with thirty-four (34) members whose primary job responsibilities support the State 404 Program. All compliance and enforcement staff are capable and dedicated to conducting inspections of suspected unauthorized activities; all suspected unauthorized activities are inspected. This provides a total of 144 positions directly involved in permitting and compliance and enforcement activities. Additional staff members provide a supporting role outside of permitting and compliance and enforcement activities. This includes clerical, training, guidance, and leadership personnel statewide who contribute to the continued implementation of the State 404 Program.

DEP continues to obtain new positions and hire new staff as quickly as possible to handle the large workload. With the increase in total applications for this reporting period, the workload has increased

for existing staff. The scope of this report includes activities through June 30, 2022; the legislature has allocated an additional 33 employees to the Department for implementation of the State 404 program, effective as of July 1, 2022. As DEP fills these positions, staffing increases will be included in next year's annual report. It is difficult to predict the change in workload going forward, as it depends on the number of permit applications received.

As of June 30, 2022, there were 159 active CWEs, 35 of which are dual employed by the WMDs and DEP. As of June 30, 2022, DEP had 93 Certified Wetland Evaluators (CWEs) and over 161 CWEs were employed at DEP and the five Water Management Districts. A total of 208 agency staff (including DEP, WMDs, and Hillsborough County EPC) have been certified as CWEs. All CWEs for DEP perform at least some additional duties. The number of CWEs continues to increase as more staff are hired and trained. Dual-employed CWEs conduct formal determinations utilizing Chapter 62-340, F.A.C., and complete the required data form. Only DEP CWEs process 404 applications and make WOTUS determinations.

DEP issued 7 verifications of State 404 Program exemptions, Table 19, below:

Table 19 - Verifications of Exemption

Application #	Project Name	Exemption	Agency Action
0410115-001-SFE	Simmons Cattle Pond	(c)(3) – Farm or stock ponds, irrigation or drainage ditches	Exempt
0419600-001-SFE	Virginia Street	(c)(3) – Farm or stock ponds, irrigation or drainage ditches	Exempt
0404929-001-SFE	Jertberg Culvert	(c)(1) - Agriculture	Exempt
0408550-001-SFE	Channel 4 Panel Replacement	(c)(2) – Maintenance	Exempt
0405827-001-SFE	Desseret Riverbend Ditch	(c)(3) – Farm or stock ponds, irrigation or drainage ditches	Exempt
0399159-002-SFE	Chassa Low Water Crossing	(c)(6) – Farm, forest, or temporary access roads	Exempt
0399159-003-SFE	CWMA Culvert Replacement	(c)(6) – Farm, forest, or temporary access roads	Exempt

Summary

In its second year, Florida's section 404 permit program has continued to grow into a successful and robust regulatory program. The success of Florida's program is no doubt the fruit of EPA and DEP's front-end efforts to institute a detailed and comprehensive regulatory scheme as well as the agencies' continued commitment to the Clean Water Act's cooperative federalism framework. This commitment has led DEP to implement the improvements identified above and is the reason there has been only one federalized section 404 permit out of over 6,000 permit applications. Despite the early success of Florida's program, DEP is committed to the continuous development and improvement of its program and welcomes EPA's assistance and input along the way.

Atlanta Federal Center
61 Forsythe Street, SW
Atlanta, Georgia 30303-3104

Dear Mr. Thompson:

Thank you for your letter of May 23, 2022 concerning Florida's draft annual report for the first reporting period and other issues related to Florida's administration of the Clean Water Act (CWA) Section 404 Program.

Florida Department of Environmental Protection (FDEP) appreciates our partnership with the United States Environmental Protection Agency (EPA) and the U.S. Army Corps of Engineers as well as the opportunity to continue productive discussions aimed at addressing early implementation issues and challenges. FDEP remains firmly committed to the full protection of all water resources in the State of Florida in a manner consistent with applicable federal and state laws and regulations.

In the 18 months since EPA approved Florida's Section 404 program, FDEP has stood up a comprehensive Section 404 permit program that complements other existing state environmental programs and trained over 130 Certified Wetlands Evaluators and other staff. FDEP is processing Section 404 permits for non-retained waters in compliance with the CWA. To date, FDEP has received over 5,770 permit applications and is continuing to make permit determinations as appropriate, subject to EPA oversight.[1] FDEP has issued over 213 individual permits under the Section 404 program and denied over 75 permit applications. In that timeframe, over 2,060 applications have been withdrawn by permit applicants (in many instances, due to concerns raised by FDEP). To date, EPA has objected to only a small number of individual permits proposed for issuance by FDEP, and in virtually all instances, FDEP and EPA have been able to work cooperatively to resolve those objections. To date, only one Section 404 permit proposed for issuance by FDEP has been federalized by EPA and transferred to the

[1] FDEP has made its permitting statistics available online at https://fldep.dep.state.fl.us/parep/pa_query_pa_data.asp. Consistent with the federal Section 404 program administered by the Corps, most activities governed by Section 404 are authorized via general or nationwide permits.

Corps of Engineers. We are committed to working with EPA to resolve any and all objections that might arise.

In the May 23rd letter, EPA provided several comments, questions, and requests for additional information regarding FDEP's draft annual report. Florida submitted its first initial draft annual report in September 2021, and over the course of the last 9 months, our staffs have worked together to properly resolve EPA's questions or concerns. Consistent with 40 C.F.R. § 233.52(e), FDEP submitted a final version of FDEP's Annual Report on June 23, 2022, with revisions, as necessary, to address EPA's feedback related to the first reporting period. FDEP welcomes any further comments, questions, or concerns that EPA might have at this time.

As your letter recognizes, the first reporting period ran from December 22, 2020 to June 30, 2021. As such, the Annual Report addresses those issues and concerns for that time period. Moreover, as part of EPA's oversight responsibility, your letter of May 23rd raised certain other issues that have arisen following the end of the reporting period. Each of those issues is addressed below.

"WOTUS" Definition

In its May 23rd letter, EPA expressed concern over Florida's use of the Navigable Waters Protection Rule (NWPR) to determine the scope of "waters of the United States" for purposes of the Clean Water Act. Florida has previously identified a variety of legal questions concerning whether the pre-NWPR regulatory definition is applicable to Florida's Section 404 program at this time. EPA previously stated that the agencies intend to publish a final rule recodifying the pre-NWPR definition by August 2022.[2] As of the date of this letter, EPA has not yet published its final rule, nor has EPA meaningfully addressed the variety of legal questions surrounding its position that a definition not contained in existing regulations is directly and immediately applicable to Florida's Section 404 program.

As we work together to navigate this temporary period of uncertainty surrounding the WOTUS definition, FDEP would encourage EPA to proceed with appropriate caution in light of the legal uncertainty surrounding the Arizona order as well as the Supreme Court's recent decision to, once again, review the WOTUS definition in *Sackett v. EPA*, No. 21-454 ("*Sackett II*"). EPA expressly asked the Supreme Court to decline review of *Sackett II* because of the ongoing WOTUS rulemaking process, but rejecting that request, the Supreme Court decided to address

[2] According to the most recent version of the OMB Unified Agenda, EPA and the Corps of Engineers are expected to publish a final rule restoring a prior version of the WOTUS definition, with some changes, by August 2022, with a second rulemaking to consider further revisions to the WOTUS definition commencing in mid-2023. *See also* Congressional Research Service, Redefining Waters of the United States (WOTUS): Recent Developments, at 1 ("On December 7, 2021, the agencies published a proposed rule to restore the pre-2015 regulations updated to reflect consideration of Supreme Court decisions. The Corps and EPA set August 2022 as their target date for publishing a final rule.").

"the proper test for determining whether wetlands are 'waters of the United States' under the Clean Water Act, 33 U. S. C. §1362(7)."[3]

Even as actions at the federal level have continued to create substantial confusion as to the WOTUS definition, FDEP remains committed to administering Florida's CWA programs consistent with applicable law and to maintaining its cooperative partnership with the federal agencies to ensure maximum protection of Florida's water resources. In this regard, it is important to note that Florida's Environmental Resource Permit Program extends protection to all "waters of the state," which goes far beyond the extent of waters subject to the CWA. And FDEP continues to work cooperatively with EPA on resolving concerns for specific 404 permits where there may be some potential difference of view as to whether a site is jurisdictional for 404 purposes. Where an unresolvable difference of views may arise, EPA is able to federalize the permitting action (as it has done on one occasion). As such, all waters in Florida continue to be protected.

EPA believes Florida should immediately implement the pre-2015 definitional regime (even before the completion of EPA's rulemaking process anticipated in August 2022). However, consistent with the cooperative federalism approach under the CWA, federal regulations expressly provide states up to one year to amend their state regulations to reflect changes in federal law:

> Any approved program which requires revision because of a modification to this part or to any other applicable Federal statute or regulation shall be revised within one year of the date of promulgation of such regulation, except that if a State must amend or enact a statute in order to make the required revision, the revision shall take place within two years.[4]

This one-year window to adjust state programs to reflect changes in federal law is a basic component of the cooperative federalism approach embodied by the CWA and its implementing regulations. It cannot be expected that, any time a federal district court in any particular state issues an order (especially one that is not on the merits) about a particular CWA regulation, every state program is automatically and directly changed as though its state laws are directly and immediately impacted by those decisions. The CWA regulations are not silent on this point. To account for the possibility of significant intervening changes in federal laws that are implemented by the states under EPA-approved programs, the CWA regulations allow for a one-year period of time for states to bring their programs into conformity.

FDEP remains committed to working through these issues in a cooperative manner and to addressing any differences as to actual permitting decisions within the governing framework provided by the Section 404 Program (including, for example, through EPA's exercise of oversight responsibilities with regard to permits where differences as to the correct WOTUS definition may be relevant). Once a new Supreme Court decision is issued in the coming

[3] *See* Order Granting Cert Petition in *Sackett II* (Jan. 24, 2022). The governing test for defining WOTUS was the central issue in the Ninth Circuit's consideration of *Sackett II* below.
[4] 40 C.F.R. 233.16(b).

months,[5] EPA would be able to consult with the states, including Florida, on developing new regulations, as necessary. This seems like the most prudent and lawful path for all involved.

Moreover, there is a substantive problem with simply agreeing to EPA's request that Florida return to the pre-2015 regime prior to adoption of a federal regulation: though EPA states that the proposal merely returns to the "familiar pre-2015 definition," the actual proposed language deviates from the pre-2015 definition in a number of ways. And crucially, various aspects of this new language are drawn from the EPA's current interpretation of *Rapanos* – an interpretation that is now squarely before the Supreme Court.

In its May 23rd letter, EPA asserts that Florida's Section 404 program is currently being administered in a manner that is "narrower in scope than contemplated under the CWA." FDEP respectfully disagrees. FDEP is utilizing the definition that remains part of EPA's regulations and is working hand-in-hand with EPA to resolve any objections to specific permitting proposals, as those may arise.

As a path forward, FDEP respectfully suggests that, immediately upon EPA's codification of a final rule adopting the pre-1986 regulatory regime, EPA and Florida meet to confer about next steps to ensure a timely update of Florida's program, as warranted. As stated above, if EPA issues its final rule in August 2022 (as shown in the Unified Agenda), FDEP expects to be able to timely complete a state rulemaking process to incorporate the new federal regulatory definition as provided by law. During the interim, FDEP will work closely with EPA to address any potential WOTUS-related concerns on a permit-by-permit basis, as has already been the case.

"NPR" Letters

In the May 23rd letter, EPA raised questions about FDEP's documentation of "No Permit Required" (NPR) determinations and requested more information about FDEP's procedures for making these determinations. FDEP is providing all requested information about NPRs. Notably, NPRs are similar to Preliminary Jurisdictional Determinations issued routinely by the Corps of Engineers to aid the regulated community. Like Preliminary JDs, NPRs are entirely voluntary and non-binding, and provided only as a courtesy. All NPRs are available to EPA for review. To the extent EPA has questions or concerns about a particular NPR determination, FDEP would encourage EPA to raise those issues to our attention for further discussion and resolution. And while Florida believes NPRs provide valuable assistance to the regulated community and help to promote overall compliance with the law, a property owner in Florida with an NPR issued by FDEP still proceeds at their own risk. If projects occur in waters of the United States, they remain subject to Section 404 purview and possible enforcement.

With regard to EPA's request for more information about the NPR procedures, FDEP has enclosed FDEP's internal procedures for guiding the processing of NPRs (see *NPR Guidance*, enclosed). FDEP welcomes input from EPA on the NPR Guidance. An NPR is not a

[5] The Supreme Court has set oral argument for October 3, 2022. Based on past experience, the Court may be expected to render a decision in *Sackett II* before the end of 2022 or early 2023.

determination of WOTUS, or a tool to establish jurisdiction. An applicant may apply for a State 404 "No permit required" verification when the activity has avoided all impacts to wetland or surface waters delineated using 62-340, F.A.C., or when the activity has been designed to only impact wetlands or surface waters that are excluded from jurisdiction as WOTUS (40 C.F.R. 120). In instances where an applicant has requested an NPR verification for an activity impacting excluded waters, the application must include a WOTUS determination form completed by the applicant.

NPR letters may also be used to verify that the activity proposed is not a regulated activity. Activities such as those listed below, that do not meet the definitions of "discharge of dredged material" and/or "discharge of fill material" as those terms are defined in 40 C.F.R. § 232.2 (see Appendix B of the State 404 Program Applicant's Handbook) are not regulated under the State 404 Program.

- Incidental fallback;
- Docks and piers constructed with typical pile-supported construction methods; and
- Piling-supported bridge structures (however, any associated fill would be regulated).

NPRs are specific for the work/activity identified in the project drawings and for the rules in existence at the time. This means that if the definition of WOTUS changes, the NPR may no longer be valid and the applicant may want to obtain a new NPR verification prior to construction for any activities impacting an "excluded water."

An NPR can be issued prior to the issuance of the ERP/ Water quality certification. Since the NPR is only valid for the specific activity requested, if the ERP submittal changes substantially, an applicant may want to obtain a new NPR to cover any changes onsite. All NPR application requests must be accompanied by site-specific project drawings, with sufficient detail to depict the single and complete activity. If the applicant is seeking to exclude some waters, they need to submit a completed WOTUS determination form. If the activity is located entirely in uplands, the application is not required to be accompanied by a WOTUS determination form. However, the site will require an inspection by a FDEP CWE and at least one data form with photos and supporting information sufficient to document conditions onsite. Site inspections for NPR requests should not be conducted until sufficient detail has been provided by the applicant for FDEP staff to confirm that all proposed activities associated with the single and complete project do not involve the discharge of dredge or fill material into WOTUS.

Documentation Issues

EPA also raised questions about availability of records related to FDEP Section 404 permitting activities (including coordination with the Corps of Engineers and other agencies). Importantly, Florida's Sunshine Laws (found at Chapter 119, Florida Statutes) provide broader access to governmental records and information than the federal corollary statute, the Freedom of Information Act, 5 U.S.C. § 552. *See* Fla. Const. Article I, § 24 (establishing constitutional right of access to public records in Florida); Fla. Stat. 119.07(1)(a) ("Every person who has custody of a public record shall permit the record to be inspected and copied by any person desiring to do

so, at any reasonable time, under reasonable conditions, and under supervision by the custodian of the public records."); Fla. Stat. § 119.011(12) (broadly defining a "public record").

Likewise, unlike for Corps-issued permits, Florida provides real-time access to state permit records related to Section 404 permit applications via publicly accessible DEP websites. Written communications to or from state officials (including permitting staff) and other records regarding state business are readily available at no cost via one of DEP's online resources, including:

(1) Florida's "**Oculus**" System,[6] which is a web-based electronic document management system providing access to public records associated with FDEP permitted facilities and activities. Documents in Oculus are filed under a specific FDEP program and facility. The public can access this system and search for all records under the Florida 404 Program, ERP Program, and various other Florida environmental programs.; and

(2) **FDEP Information Portal**,[7] which provides extensive information about projects, including permit application materials, public comments, agency correspondence, and all other associated records. These databases provide more information on a real-time basis than is available from the Corps of Engineers.

With regard to documentation of FDEP-Corps coordination activities, the process set forth in Section III of the Corps-FDEP MOU is working effectively and as intended. FDEP remains committed to fully implementing the program consistent with its agreements with the Corps of Engineers and other agencies. To address EPA's concern, FDEP is in the process of ensuring that all documents have been uploaded to Oculus. (Note: To the extent any particular documents had not yet been uploaded to Oculus, those documents still have been and remain fully accessible as public records.) Likewise, with regard to documentation of coordination with other agencies, including with regard to measures taken to protect listed species, FDEP is in the process of ensuring that all relevant documents are uploaded to Oculus, though all such records have been publicly available throughout the duration.

FDEP welcomes any further input from EPA on efforts to make records available to EPA and the public.

NMFS Consultation

EPA requests Florida's assistance in facilitating completion of a new round of Endangered Species Act (ESA) Section 7 consultation with the National Marine Fisheries Service (NMFS). Florida is firmly committed to protection of marine species and compliance with the ESA. With regard to EPA's decision to reinitiate consultation with NMFS, Florida would request more information about EPA's decision and ways EPA would request FDEP to assist. In April 2020, EPA determined that Section 7 consultation with NMFS could be concluded on the basis of "no effect" on marine species because, among other things, the Corps of Engineers retained jurisdiction to issue permits in retained waters (where marine species occur). At that time, NMFS explained in correspondence shared with FWS (and ultimately with EPA) that NMFS had

[6] https://depedms.dep.state.fl.us/Oculus/servlet/login
[7] https://prodenv.dep.state.fl.us/DepNexus/public/searchPortal.

extensive discussions with FDEP about the potential for ESA impacts for species subject to NMFS' jurisdiction.[8] In that correspondence, NMFS explained that it had received a request for input regarding species impacts in November 2019 and that, "[t]hrough subsequent communications with [FDEP], a review of state mapping products, NMFS' own mapping analysis, and a review of state-provided documents about the assumption, [NMFS] conclude[d] that [ESA]-listed species under NMFS' jurisdiction do not occur in waters that are assumable by the state." The letter explains how NMFS analyzed "the possible spatial overlap" of assumed waters with waters used by the shortnose sturgeon, Atlantic sturgeon, smalltooth sawfish, and Gulf sturgeon, and that, because of the extent of waters that would remain under federal 404 purview, including many inland river areas, species under NMFS jurisdiction would not be effected by Florida's assumption of the 404 program. NMFS also noted the shared jurisdiction between NMFS and FWS over the Gulf sturgeon." NMFS expressly stated: "Based on this determination we also assume that [EPA] will make a 'no effect' determination for NMFS' ESA-listed species that were originally identified as part of this proposed assumption." NMFS further thanked FDEP for "all the information and assistance" that FDEP provided in this process. This was reiterated in September 2020, when NMFS explained to EPA that NMFS "coordinated closely with Florida DEP on the potential for effects to endangered and threatened species under [NMFS'] jurisdiction."[9] For its part, EPA explained that, "where a species subject to jurisdiction under NMFS occurs in waters retained by the Corps that are located downstream from permitted activities in state-assumed waters, upstream protections provided by the state-issued permits would ensure that all action areas, including downstream areas that are indirectly affected by the action, have been considered."

Under these circumstances, Florida would like to better understand EPA's decision, on December 20, 2021, to "initiate consultation with NMFS, as appropriate," long after the approval of Florida's program occurred. To date, FDEP has not received copies of any correspondence between EPA and NMFS (or between those agencies and other outside stakeholders) related to this process, and FDEP has not been invited to have any meaningful role in that process.

Public Notices & Public Participation

EPA has requested more information about FDEP approval of multi-phase projects. During the 404 application process, this issue was extensively discussed between the agencies. The relevant rule language was workshopped, discussed in detail, and correctly approved by EPA. With regard to the issue of multi-phase project, EPA's response to comments (page 82) correctly explains as follows:

> *With regard to the commenter who raised the "segmentation" issue, "subsection 62-331.051(2), F.A.C., provides that all activities reasonably related to a project shall be included in the same permit application, which means that the applicant*

[8] *See* Letter from Cathryn E. Tortorici, NOAA Fisheries, Chief of ESA Interagency Cooperation Division, to Heather Mason, FDEP (April 15, 2020) (attached as Appendix A to the EPA Biological Evaluation).

[9] *See* Email from David Bernhart, NOAA Fisheries, Assistant Regional Administrator for Protected Resources, to Thomas McGill, et al., EPA (Sept. 3, 2020).

should provide sufficient information for the Agency to review the entire scope of the project. This will enable the Agency to assess whether the project as a whole meets the requirements of Chapter 62-331, F.A.C., and [the State 404 Program Applicant's Handbook]." Section 5.3.2 of the State 404 Handbook states that for large projects that cannot be completed within the maximum five-year permit duration, "[t]he applicant shall create a long-term planning document that explains how the project is phased, what activities are expected to be completed within each phase, an expected permitting timeframe for each phase, and an assessment of cumulative impacts. The long-term planning document shall be made part of the project file that goes out on public notice and federal review if required under 40 C.F.R. § 233.51." See section 5.3.2 of the State 404 Program Applicant's Handbook. The State 404 Program Applicant's Handbook further provides that "[d]uring its review of the first phase of the project, the Agency shall analyze and review the entire project, as proposed in the long-term planning document, under all 404 requirements. This analysis and review shall become part of the project file and be a basis of the agency action on the first phase, and the long-term planning document shall be incorporated into the permit." See id.

This remains correct. To the extent EPA believes a part of the program should be modified, EPA's procedures provide a process for considering and proposing such changes.

With regard to public participation, EPA asks Florida to ensure that its program "provides for access to judicial review and the CWA requirements for public participation are met." This seems to echo erroneous points raised by the Plaintiffs in the pending litigation against EPA in federal district court. FDEP has previously provided extensive information to EPA on this aspect of Florida's program and is glad to reiterate these points here.

Florida law provides significant opportunities for environmental groups to challenge FDEP permitting and regulatory actions, even beyond those provided in comparable federal proceedings. Environmental groups have at least three such avenues under Florida law. One, under the seminal case in Florida known as *Agrico Chem. Co. v. Dep't of Envt'l Regulation*, 406 So. 2d 478 (Fla. 2d DCA 1981), plaintiffs have standing to challenge permitting actions if they can demonstrate that their "substantial interests" are determined or affected by the action and their interests fall within the zone of interests of the relevant program. Under the *Agrico* framework, associations have standing if a "substantial number of its members, although not necessarily a majority, are substantially affected' …." *Fla. Home Builders Ass'n v. Dep't of Labor and Emp't Sec*., 412 So. 2d 351, 353-54 (Fla. 1982). This is the traditional avenue for environmental plaintiffs to obtain standing in Florida. Two, under separate statutory authority, environmental groups in Florida with "at least 25 current members residing within the county where the activity is proposed" have automatic standing to challenge a permitting action. See Fla. Stat. § 403.412(6). Three, and most importantly for this case, Florida law expressly provides that, "[i]n a matter pertaining to a federally delegated or approved program," like Florida's Section 404 program, "a citizen of the state may initiate an administrative proceeding under this subsection if the citizen meets the standing requirements for judicial review of a case or

controversy pursuant to Article III of the United States Constitution." Fla. Stat. § 403.412(7) (emphasis added). In other words, if Plaintiffs seek to challenge a permitting decision by FDEP under Florida's Section 404 Program, Florida law will simply require them to satisfy Federal standing doctrine. Id.

Though not expressly mentioned by EPA, it is worth noting that the Plaintiffs in the D.D.C. litigation vastly overstate the impact of Florida's fee shifting provision found at Section 403.412(2)(f), which "applies only to circuit court actions for injunctive relief," not administrative actions. *Agrico Chem. Co. v. Dep't of Envt'l Regulation*, No. 83-2708, 1984 WL 54261, at *2 (Fla. Div. of Admin. Hr'g, June 27, 1984); *accord Lake Hickory Nut Homeowners' Ass'n v. Schofield Corp*., No. 91-8088, 1992 WL 322912, at *13 (Fla. Div. of Admin. Hr'g, July 23, 1984); (explaining that Section 403.412(2)(f) only "relates to a civil injunction action and not to an administrative proceeding"). FDEP does not seek fees under Section 403.412(2)(f) from environmental groups challenging FDEP permitting actions. Plaintiffs cite no contrary examples.

Additional information about Florida's Permitting, Administrative and Judicial Review and other applicable procedures is set forth in the Program Description and other program application documents.

After-the-Fact Permits

EPA raised a concern about FDEP issuing so-called "after-the-fact permits" for "unauthorized discharges prior to resolution of any enforcement matters." The Corps of Engineers issues after-the-fact permits and has a general policy of not processing applications for such permits "where the district engineer determines that legal action is appropriate … until such legal action has been completed."[10] FDEP does not issue after-the-fact permits. Instead, in these contexts, FDEP only issues "post-enforcement" permits. As explained in Section (g) of the Florida Section 404 Program Description, in the limited circumstances when unauthorized discharges are allowed by the FDEP to remain in place, that material will be authorized through a State 404 Program individual permit. The Program Description expressly states: "No such permit shall be approved until resolution has been reached through an appropriate enforcement response and all administrative, legal and/or corrective action has been completed." This remains the policy and practice of the FDEP. If any corrective actions are necessary to render an unauthorized discharge permissible under the State 404 Program, any formal requirements for such corrective actions will be imposed exclusively through the enforcement process.

MOUs

In recent discussions, EPA has suggested the possibility of amending the existing MOUs between FDEP and EPA and other federal agencies. The MOUs were approved by the parties and, just 18 months into implementation, it would be premature to undertake an effort to make substantial changes. To the extent EPA seeks significant changes to Florida's program, federal

[10] 33 C.F.R. 326.3(e)(1)(ii) explains that the Corps of Engineers will not process applications for after-the-fact permits "where the district engineer determines that legal action is appropriate … until such legal action has been completed."

regulations set forth the proper process for seeking to make those changes. Any changes should be done in the spirit of cooperative federalism and not unilaterally dictated by one side or the other. Nevertheless, Florida is open to hearing any specific ideas that EPA might have for ways to update or improve the MOUs as appropriate. We would ask for specific requests that we can then consider. If requesting changes to the MOUs, Florida will also need to know whether the requested changes have also been sought for MOUs involving other states with State Section 404 Programs. Similarly-situated states should be treated equally. We look forward to further discussions with EPA on these topics.

EPA Comments to Annual Report

Thank you for EPA's feedback regarding Florida's draft 404 Program Annual Report. Based on EPA's comments, FDEP made appropriate revisions and submitted the Final Annual Report on June 23, 2022. A copy of that final Annual Report is enclosed for your convenience.

Conclusion

Florida appreciates the opportunity to submit this additional information. We trust that this addresses EPA's concerns on these points. With regard to the items for inclusion in future annual reports as suggested in your letter of May 23rd, FDEP looks forward to working with you and your staff at EPA Region IV on those issues.

We look forward to further discussions aimed at continuing to protect our vital water resources consistent with law.

Sincerely,

John Truitt
Deputy Secretary for Regulatory Programs
