INNOCENT VICTIM PETROLEUM STORAGE SYSTEM RESTORATION PROGRAM (IVPSSRP)

Who should file this Application?

An owner of a contaminated site acquired prior to July 1, 1990, which ceased operating as a petroleum storage or retail business prior to January 1, 1985, and there is petroleum product contamination from a petroleum storage system(s) for which a state funded cleanup is being requested should complete this application and send to:

Eligibility Coordinator
Florida Department of Environmental Protection
2600 Blair Stone Road, MS 4580
Tallahassee, Florida 32399-2400
(850) 245-8839

The Florida Department of Environmental Protection (Department) will review your application and determine eligibility for the IVPSSRP. A facility inspection may be required in order to verify eligibility. The Department will send you a written decision upon completion of this review, along with further instructions regarding facility cleanup procedures. Submission of this application does not guarantee that you will receive state funding assistance.

Instructions for completing the IVPSSRP Application - (Use an "X" if the answer is unknown)

Fill in the name and physical address of the facility.

Fill in the name and mailing address of the current real property owner, if different.

Fill in current real property owner's phone numbers and email address.

Fill in the date the current real property owner acquired the property (title taken).

Give the date when contamination was discovered at the facility. A Discharge Reporting Form must be filed with the Department's contracted local program or the Department's District Office in which the facility is located. Petroleum contamination from the petroleum storage system must be verified for eligibility in this program.

Give the date the facility last stored petroleum products for consumption, use or sale. Please provide tangible evidence that this site ceased operating as a petroleum storage or retail business prior to January 1, 1985. Such evidence could be a combination of, but is not limited to:

- dated aerial photographs
- dated site photographs
- historical telephone directories
- historical city or suburban directories
- dated government permits (building occupancy, licenses, construction, etc.)
- local or state tax invoices or receipts
- dated business documents or receipts (Articles of Incorporation, etc.)
- business contracts with suppliers
- employment records

Give the date the petroleum storage system(s) were properly closed. Must comply with the Department's petroleum storage system closure requirements. If you are financially unable to comply with the Department's petroleum storage system closure requirements the Department will request and you must provide financial documents that show the facility owner is financially unable to comply with the petroleum storage system closure requirements. The Department will take into consideration the owner's net worth and economic impact.

Give the DEP Facility number if known. If the facility is not registered, information on the storage tanks is required and the Department will assign a facility number.

Tank(s)	Size(s) gallons	Underground Aboveground	Tank Contents When in Service	Date of Last Use
Example): 1 2	 1000 X	 Underground Aboveground	 X Gasoline	 3/16/85 XX/XX

Sign and date application. Provide any supporting documentation on contamination, property ownership, and date the tanks were last used or last stored petroleum product.
