

Submission Instructions for Phosphate Management Forms

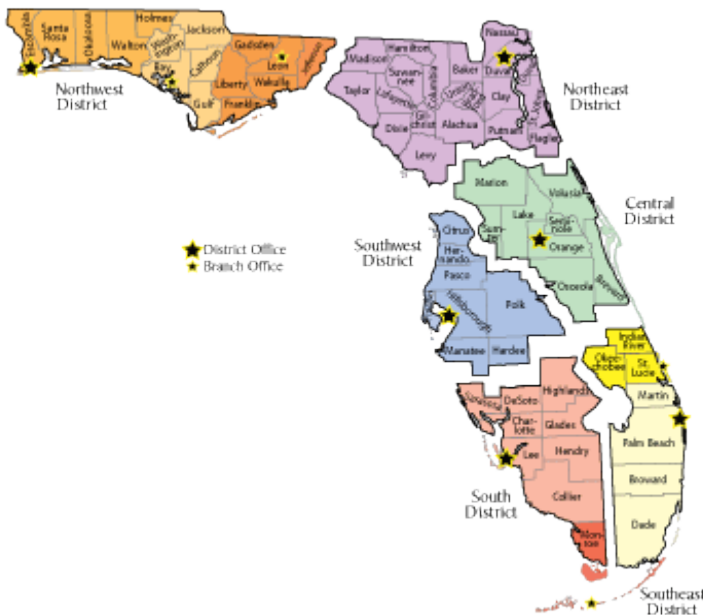

62-673.900(4)(a), Phosphogypsum Stack System Trust Fund Agreement to Demonstrate Closure, Water Management and/or Long-Term Care Financial Assurance is a permit application form that is used for surface and/or ground water discharging (NPDES or non-NPDES) phosphate management facilities.

All permit application forms associated with phosphate management facilities should be submitted to either the Northeast District Office for facilities within the boundaries of the Northeast District (see map below) or to the Phosphate Management program in Tampa for all other facilities.

PLEASE NOTE: Forms for facilities that discharge to surface waters must be completed, printed, hard-copy signed, and then mailed, along with any applicable attachments, to the applicable DEP office as outlined above.

Note, an electronic copy of the form will constitute the multiple additional copies that are required by Rule 62-620.310(3), F.A.C for facilities that discharge to surface water. To email the electronic copy please click the applicable DEP Office below.

Forms for facilities that **do not** discharge to surface waters may be either mailed to the appropriate DEP Office or submitted via email.
