

Interactive Maps Primer

Populating Unique Values When Filtering

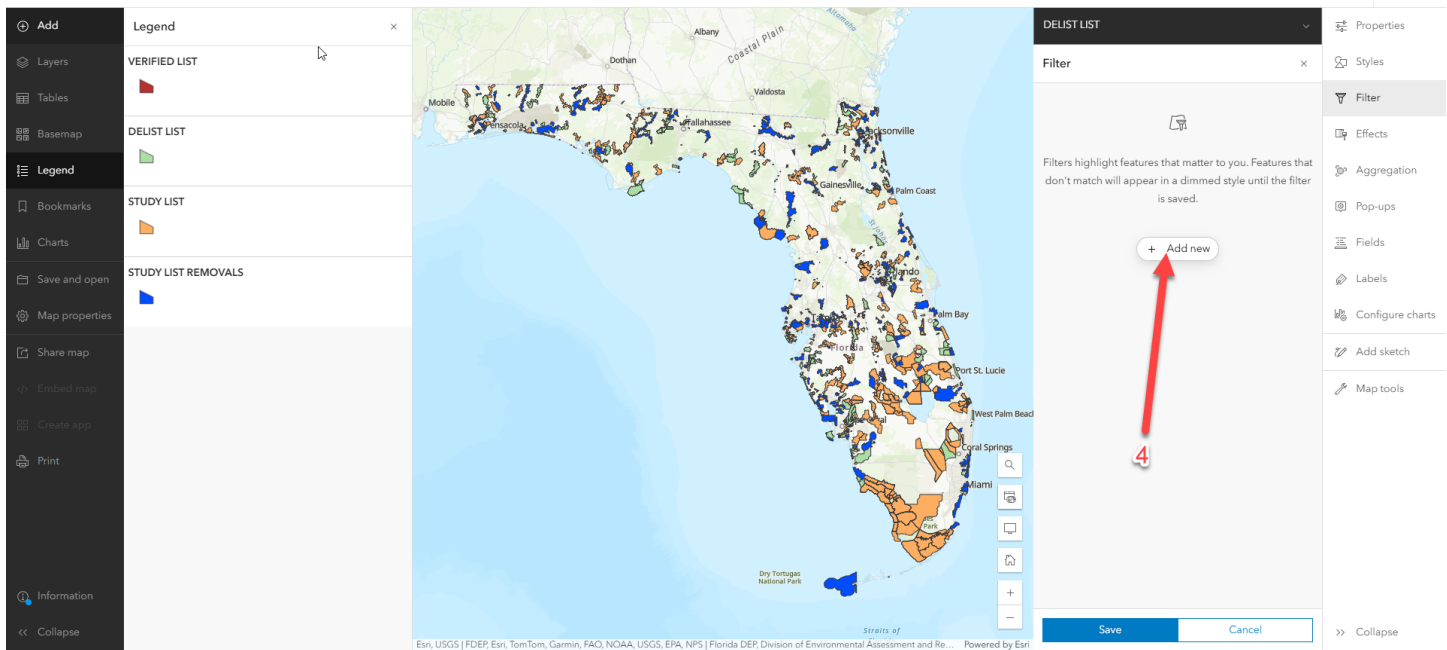

1. Click Filter on the right-hand menu

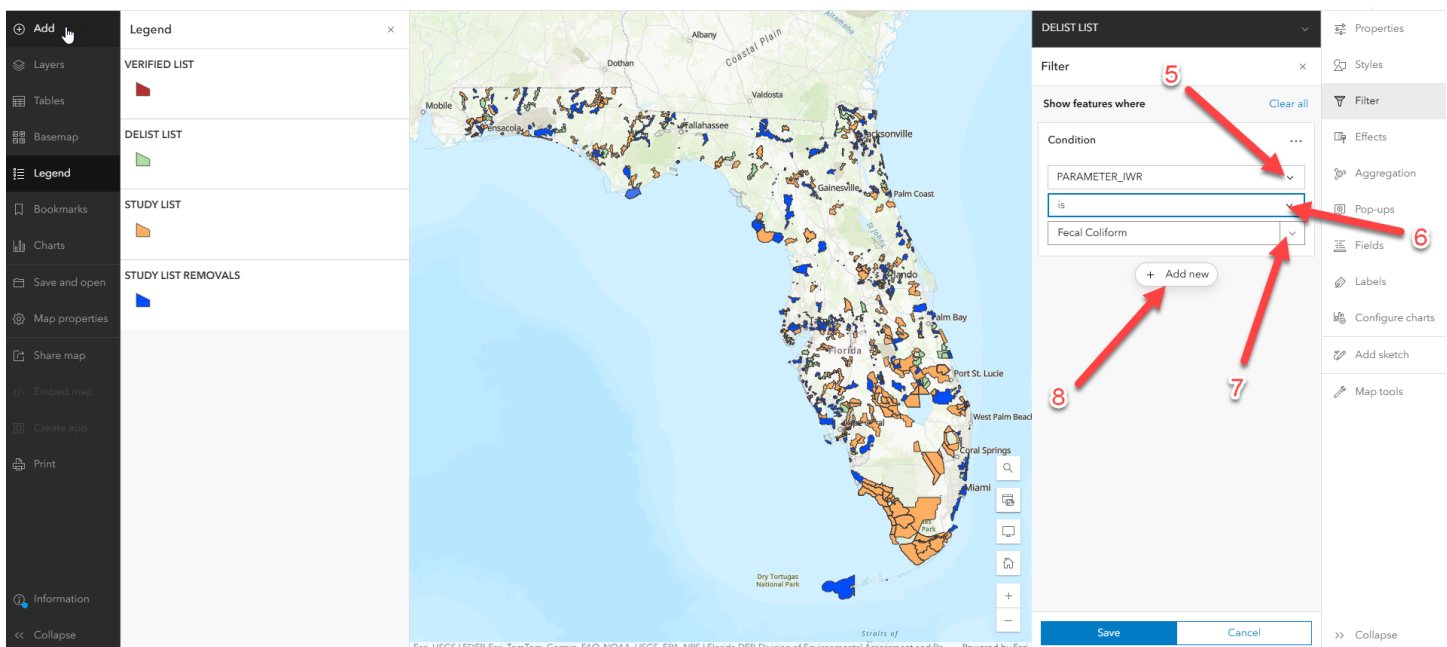

2. If you want to work with the layer shown, select the field you want to filter on
3. Otherwise, select the layer from the drop-down menu

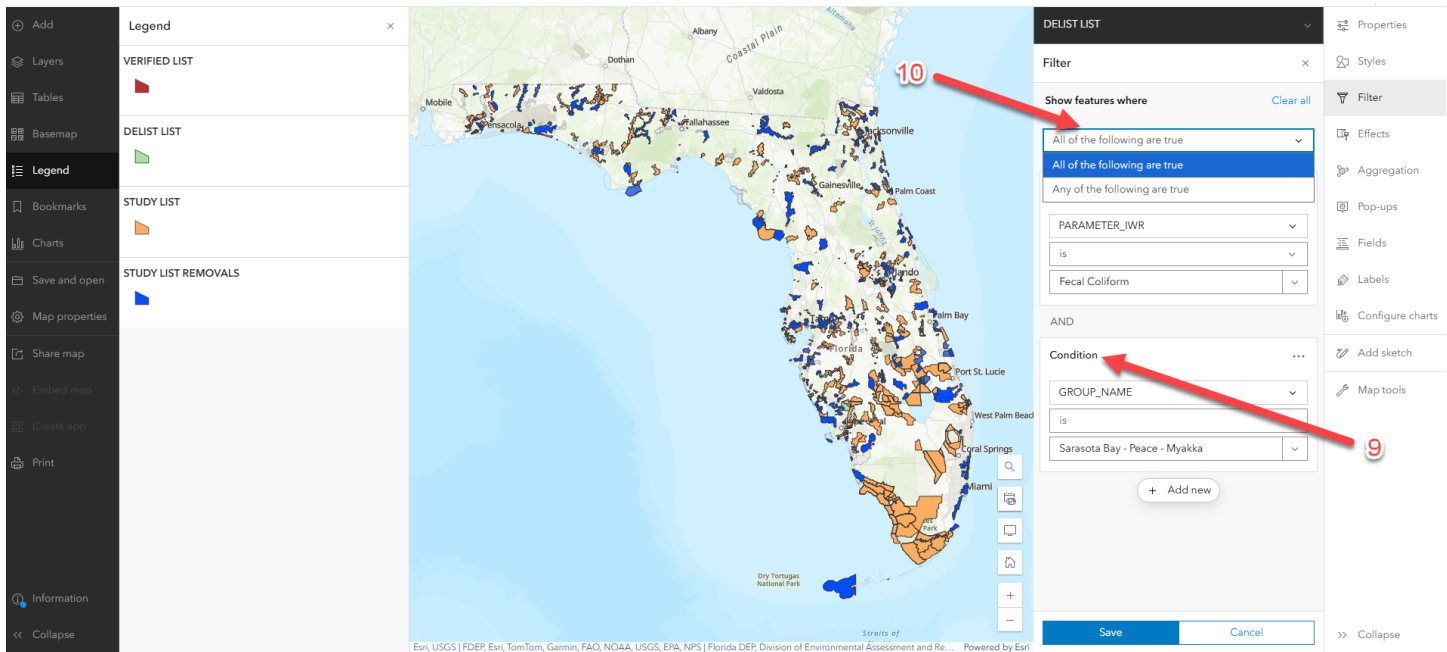

4. Click Add new

5. Select the field you want to filter on
6. Pick from a drop-down menu of operators
7. Choose the value you're interested in
8. You can apply multiple filters on the same layer by using the Add new button

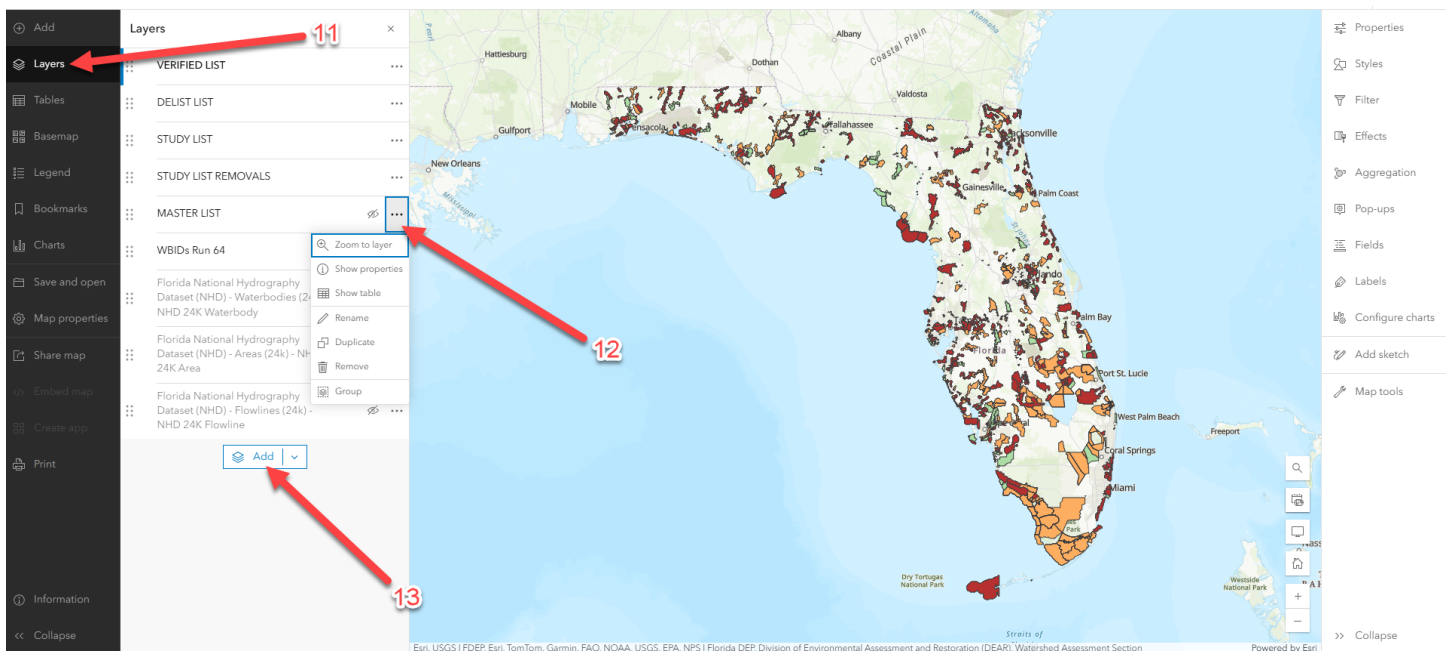

9. Fill out the next condition by repeating steps 5 through 7
10. You have 2 choices under “Show features where”, “All the following are true” is the equivalent of an AND statement, “Any of the following are true” is the equivalent of an OR statement

11. If you want to add layers open an attribute table, click Layers in the left-hand menu

12. Click the ellipsis beside the layer of interest and click Show table to open the attribute table

13. Click Add if you want to add layers

14. After clicking Add, you can use the search bar or scroll through available layers. In the top drop-down box, you also have the option to search through the Living Atlas or ArcGIS Online
