

State of Florida  
Land Management Uniform Accounting Council (LMUAC)  
2020 Annual Report (FY 2019-20)

---

*LMUAC Members*

*Melissa Tucker, 2020 LMUAC Chair and Acting Director  
Division of Habitat and Species Conservation, Florida Fish and Wildlife Conservation  
Commission (FWC)*

*Erin Albury, Director  
Florida Forest Service (FFS), Department of Agriculture and Consumer Services (DACS)*

*Alex Reed, Director  
Office of Coastal and Aquatic Managed Areas (CAMA), Department of Environmental  
Protection (DEP)*

*Eric Draper, Director  
Division of Recreation and Parks (DRP), DEP*

*Callie DeHaven, Director  
Division of State Lands (DSL), DEP*

*Timothy A. Parsons, Ph.D., Director  
Division of Historical Resources (DHR), Department of State (DOS)*

## ***Chair's Submittal and Report Abstract***

### 2020 Annual Report Land Management Uniform Accounting Council

The Land Management Uniform Accounting Council (LMUAC) was created by the 2000 Florida Legislature with the enactment of Section 259.037, Florida Statutes. The LMUAC is comprised of representatives from the Florida Forest Service, Division of Recreation and Parks, Office of Greenways and Trails, Florida Fish and Wildlife Conservation Commission, Office of Coastal and Aquatic Managed Areas, and the Division of Historical Resources. The Auditor General and the Office of Program Policy Analysis and Government Accountability are providing advice and assistance to the LMUAC.

As mandated by the legislation, the LMUAC developed a uniform method for compiling and reporting accurate costs of land management activities. This includes an agreed-upon list of standardized land management categories and sub-categories under which the managing agencies report management activities. This consensus list is attached as an addendum to this report. Although the individual management activities vary between agencies, this structure for organization can be applied in most all cases.

Since 2008, in addition to cost-accounting by categories, the report has also included information relating to: (1) available public use opportunities for each management unit [i.e. state park, forest, wildlife management area, trail or other management unit] with management costs for public access and public uses; (2) management intensity based on an analysis of natural and cultural resources, facilities and visitation for each unit; (3) amount of funds requested, received and expended for management; (4) acreages and overall management costs for each unit; (5) acres managed, cost of management, and lead manager for each management unit for which secondary management activities were provided; and (6) estimated financial benefit to the public for ecosystem services provided by conservation lands.

This report contains a summary of Fiscal Year (FY) 2019-2020 expenditures by these agencies, grouped according to the established categories and subcategories. It also includes a summary of accomplishments for each agency outlining their missions and primary goals for state lands management.

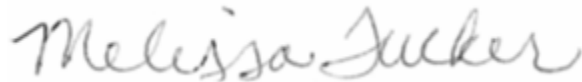

Expenditures in the various categories reflect the primary mission of the individual agencies. For example, the Division of Recreation and Parks has by far the greatest percentage of expenditures for recreation and visitor services and for capital improvements, as the Florida Forest Service and Florida Fish and Wildlife Conservation Commission manage large acreage that have passive recreational opportunities, including hunting and fishing. The Division of Historical Resources has only seven management units assigned to it for management, but many of their costs are incurred by providing assistance in historical resource management to other agencies. The Division of Historical Resources is responsible for locating and evaluating sites that have the potential to contain significant historical or cultural resources.

Some management costs are not included because they are difficult to relate to a unit of management. For example: The Office of Coastal and Aquatic Managed Areas and the Florida Fish and Wildlife Conservation Commission are responsible for managing submerged lands where it is difficult to quantify the actual acreage involved; expenditures by the Florida Fish and Wildlife Conservation Commission for invasive vegetation control on public managed lands (including local government, water management district and federal conservation lands); monitoring costs for the Board of Trustees' conservation easements; the Florida Forest Service provides wildfire suppression, administers the prescribed fire

authorization process on all public lands, and silviculture expertise on most state owned and private forested lands. This report does not include local and federal governments or nonprofit conservation organizations that provide significant services towards the state's land conservation and resource-based recreation goals and objectives.

Overall, this report from the Land Management Uniform Accounting Council presents a picture of how agencies allocated management funds last fiscal year. Please feel free to contact any of the agencies if you wish to obtain additional support details.

Respectfully Submitted,

A handwritten signature in cursive script that reads "Melissa Tucker".

## ***Acreages and Units Managed by State Conservation Agencies***

### **Acreages and Units Managed by State Conservation Agencies as of June 30, 2020**

Agency	Lead Management <sup>1</sup>		Additional Management <sup>2</sup>	
	Acreage	Units <sup>3</sup>	Acreage	Units <sup>3</sup>
Division of State Lands (DSL)	-	-	263,778	129
Division of Recreation and Parks (DRP)	797,181	175	8	1
Office of Coastal and Aquatic Managed Areas (CAMA)	59,148	5	4,661,175	45
Florida Forest Service (FFS)	1,153,691	39	485,106	18
Fish and Wildlife Conservation Commission (FWC)	1,460,443	54	4,542,233	96
Division of Historical Resources (DHR)	97	7	4	4
<b>Totals</b>	<b>3,470,560</b>	<b>280</b>	<b>9,952,304</b>	<b>293</b>

**Notes:**

<sup>1</sup> Predominately upland acres managed by a state conservation agency with primary on-the-ground management responsibilities. Mostly state-owned land titled to the Board of Trustees of the Internal Improvement Trust Fund, but also includes substantial amount of land owned by other public entities (e.g., water management districts, federal government, etc.).

<sup>2</sup> Includes management units managed as: aquatic preserves (submerged lands); secondary manager (non-lead agency); conservation easements; or subleases to another agency for management. **Substantial acres reported in this column overlap with acreages reported under Lead Management, and with others under Additional Management** because more than one agency assists in the management of lands managed by another agency. Substantial portion of this land is not owned by the state, but is owned by the federal government, water management districts or private entities. Notes for each agency:

- **DSL** oversees private sector management of conservation easements;
- **DRP** oversees management of sites subleased to local and federal governments for recreational trails;
- **CAMA** manages the aquatic preserves, estuarine research reserves and marine sanctuaries that are predominately submerged lands;
- **FFS** provides timber management for many sites and assists other agencies in developing timber management plans, etc.;
- **FWC** provides wildlife management and oversees hunting for other agencies; and
- **DHR** oversees management of sites subleased to counties, cities etc. and assists other agencies in historical and archaeological resource management.

*Note: FWC's wildlife mitigation parks are reported this year under lead management.*

<sup>3</sup> A unit is a state park, a state forest, a state wildlife management area, a state trail or other management unit.

## Florida Department of Environmental Protection

### **Mission Statement**

The Florida Department of Environmental Protection protects, conserves and manages the state's natural resources and enforces its environmental laws.

### **Office of Coastal and Aquatic Managed Areas (CAMA)**

#### **Mission Statement**

Conserving, protecting, restoring and improving the resilience of Florida's ocean, coastal and aquatic resources for the benefit of people and the environment.

#### **Management Goals**

- Protect and restore natural and cultural resources;
- Increase biodiversity of listed species;
- Reduce targeted exotic plants and animals;
- Increase compatible public use of managed areas; and
- Restore or maintain natural watershed function.

#### **Background and Significant Developments**

The Office of Coastal and Aquatic Managed Areas (CAMA) protects natural resources on state-owned sovereign submerged lands and coastal uplands through administration of the state's 42 Aquatic Preserves, three National Estuarine Research Reserves, Florida Keys National Marine Sanctuary, and the Coral Reef Conservation Program. CAMA also oversees the Florida Coastal Management Program, Clean Boating Program, the Florida Resilient Coastlines Program, and the Beach and Inlet Management Program.

Aquatic Preserves are submerged lands of exceptional ecological character to be maintained in their natural or existing conditions for future generations. There are 42 Aquatic Preserves, coastal and fresh water sites, encompassing 2.6 million acres of sovereign submerged lands. National Estuarine Research Reserves were designated by joint action of the state and federal government through the National Oceanic and Atmospheric Administration (NOAA). CAMA provides stewardship, education, training, research and monitoring programs at Florida's three National Estuarine Research Reserves (Apalachicola, Guana Tolomato Matanzas and Rookery Bay), as well as direct management of 59,143 acres of uplands. CAMA also manages an additional 88 acres of uplands adjacent to aquatic preserves. CAMA also oversees the organization and operation of several ecotourism activities that are hosted in some managed areas.

The Florida Keys National Marine Sanctuary, established in 1990 by Congress, and confirmed by the Board of Trustees of the Internal Improvement Trust Fund, covers 2.3 million acres of

state and federal submerged lands. The Florida Keys National Marine Sanctuary contains unique and nationally significant marine resources, including the southern portion of the Florida Reef Tract (the world's third largest barrier coral reef), extensive sea grass beds, mangrove-fringed islands and more than 6,000 species of marine life. CAMA leads state co-management efforts in the Sanctuary in partnership with the Florida Fish and Wildlife Conservation Commission and NOAA.

The Coral Reef Conservation Program coordinates research and monitoring, develops management strategies and promotes partnerships to protect the northern portion of the Florida Reef Tract along the southeast Florida coast, pursuant to the U.S. Coral Reef Task Force's National Action Plan. The Coral Reef Conservation Program also implements Florida's Local Action Strategy, the Southeast Florida Coral Reef Initiative. The program leads response, assessment and restoration efforts and jointly oversees enforcement efforts for non-permitted reef resource injuries (vessel groundings, anchor and cable drags, etc.) in southeast Florida pursuant to the Florida Coral Reef Protection Act (Section 403.93345, F.S.).

The Florida Coastal Management Program is based on a network of agencies implementing 24 statutes that protect and enhance the state's natural, cultural and economic coastal resources. The goal of the program is to coordinate local, state and federal government activities using existing laws to ensure that Florida's coast is as valuable to future generations as it is today. CAMA is responsible for directing the implementation of the statewide coastal management program. The Florida Coastal Management Program provides funding to promote the protection and effective management of Florida's coastal resources at the local level through the Coastal Partnership Initiative grant program.

The Outer Continental Shelf Program is responsible for coordinating the state's review, oversight, monitoring and response efforts related to activities that occur in federal waters on the Outer Continental Shelf to ensure consistency with state laws and policies and that these activities do not adversely affect state resources. Reviews are conducted under federal laws, including the Outer Continental Shelf Lands Act, Coastal Zone Management Act, National Environmental Policy Act, Deepwater Ports Act, Marine Protection, Research and Sanctuaries Act, Rivers and Harbors Act, Clean Air and Water Acts and the regulations that implement them.

The Clean Boating Program includes Clean Marina designations to bring awareness to marine facilities and boaters regarding environmentally friendly practices intended to protect and preserve Florida's natural environment. Marinas, boatyards and marine retailers receive clean designations by demonstrating a commitment to implementing and maintaining a host of best management practices. Via the Clean Boating Program, the Clean Vessel Act provides grants, with funding provided by the U.S. Fish and Wildlife Service, for construction and installation of sewage pumpout facilities and purchase of pumpout boats and educational programs for boaters.

The Florida Resilient Coastlines Program's mission is synergizing community resilience planning and natural resource protection tools and funding to prepare Florida's coastline for the effects of climate change, especially rising sea levels. This program is working to ensure Florida's coastal communities are resilient and prepared for the effects of rising sea levels, including coastal flooding, erosion, and ecosystem changes. The program is synergizing community resilience planning and natural resource protection tools; providing funding and technical assistance to prepare Florida's coastal communities for sea level rise; and continuing to promote and ensure a coordinated approach to sea level rise planning among state, regional, and local agencies.

A healthy beach and dune system provides protection for upland development and critical infrastructure, preservation of critical wildlife habitat for threatened and endangered species, and a recreational space that drives the state's tourism industry and economy. In order to protect, preserve and manage Florida's valuable sandy beaches and adjacent coastal systems, the Legislature adopted the Florida Beach and Shore Preservation Act, Chapter 161, Florida Statutes, in 1986. The Act provides for the creation of a statewide, comprehensive beach management program that integrates coastal data acquisition, coastal engineering and geology, biological resource protection and analyses, funding initiatives and regulatory programs designed to protect Florida's coastal system both above and below the water line. This comprehensive approach allows DEP's Beach and Inlet Management Program to collaborate with coastal communities to address erosion caused by managed inlets, imprudent construction, rising seas and storm impacts. CAMA will seek to officially change the office's name to the Office of Resilience and Coastal Protection in an upcoming legislative session.

One tool for protection of Florida's significant waters has been the acquisition of coastal lands to buffer them from upland development. Where appropriate, CAMA manages these lands. CAMA manages 59,143 acres of uplands in its three NERRs, the state-owned uplands adjacent to the Pinellas County Aquatic Preserve, and the state-owned uplands adjacent to Gasparilla Sound-Charlotte Harbor Aquatic Preserve. These lands and waters have high value for low impact recreational activities, such as hiking, biking, nature appreciation, boating and fishing. Population growth has increased the demand for public outdoor recreation, contributed to the degradation of ecosystems, and made resource management of the protected lands and waters more challenging. Growth along Florida's coasts, along with its \$562 billion contribution to Florida's economy, makes protection of natural coastal areas particularly important. It is, therefore, essential that public and private entities work together for the restoration and protection of all state lands.

CAMA manages and restores submerged and upland resources through adaptive, science-based resource management programs such as prescribed burning, removal of invasive species, re-vegetation, and restoration of degraded habitats and water regimes. CAMA also conducts applied coastal research to contribute valuable knowledge that addresses CAMA's management program needs and those of the coastal and ocean science community at large. Some of CAMA's

scientists have published key research in peer-reviewed journals, bringing the program into the national and international spotlight. CAMA works hand in hand with marine dependent private industry on issues important to their business base. Profession training and technical assistance is offered.

CAMA's submerged lands are not gated and do not have turnstiles. They are always open to the public for commercial and recreational use. CAMA's oversight of these lands enhances private industry and public recreation. For example, Biscayne Bay Aquatic Preserves' boundary runs from Oleta River near Arch Creek in the north, down into Little Card Sound in Key Largo, not including Biscayne National Park. Biscayne Bay is Miami-Dade County's economic driver. The Biscayne Bay Economic Study (2005) showed the bay contributed \$13.7 billion in output, \$6.9 billion in income, 143,000 jobs and \$686 million in tax revenue for Miami-Dade.

Encouraging environmental stewardship in the community through education and outreach is as important to conservation as good resource management practices. CAMA has built state-of-the-art environmental learning and visitor centers at each of its three NERRs to conduct education and outreach programs.

During fiscal year 2019-20, visitors to CAMA's three managed upland reserves generated 933 jobs, \$4.09 million in sales tax revenues and a total economic benefit of \$58.3 million to the local communities. The total number of visitors rose slightly from 614,048 in the 2018-19 fiscal year to 635,707 in the 2019-2020 fiscal year as sites recovered from Hurricane Michael, but closed visitor centers due to COVID-19. Volunteer hours at CAMA's three upland reserves decreased in 2019-20, to 37,771, owing largely to COVID-19.

## **Division of Recreation and Parks (DRP)**

### ***Mission Statement***

The mission of the Division of Recreation and Parks (DRP) is to provide resource-based recreation while preserving, interpreting and restoring natural and cultural resources. The Division carries out this mission by making high quality outdoor recreation opportunities available to the public and by implementing a natural systems approach to resource management.

### ***Background and Significant Developments***

During Fiscal Year 2019-2020, DRP managed 797,181 acres of land and water in 175 separate management units as part of Florida's state park system. The DRP was staffed by 1,033.5 Full Time Equivalent (FTE) positions. The operating budget for the state park system exceeded \$92 million and the capital improvement budget exceeded \$52 million. The 175 state parks and greenways and trails had an overall direct economic impact of over \$2 billion on local economies throughout the state in Fiscal Year 2019-2020. Over \$150 million was contributed to general revenue in the form of state sales tax and approximately 31,810 jobs were supported as the result of the state parks greenways and trails operations.

### ***Resource Management***

During Fiscal Year 2019-2020, the start of the coronavirus pandemic affected the ability to complete resource management in both positive and negative ways. Despite staffing and safety obstacles, DRP land managers treated 9,425 infested acres of invasive exotic plants throughout the state parks, covering 52,638 gross acres in the process. A widespread drought in our peak burning season combined with the pandemic complicated fire management, but staff were able to prescribe burn a total of 46,628 acres of fire-type habitats and mechanically treat an additional 1,402 acres to reduce fuel loading.

The cultural resources section made significant headway in recording a backlog of over 300 historic properties including historic buildings, bridges, cemeteries, resource groups, and archeological sites, and assisted with the successful nomination of three FPS properties to the National Register of Historic Places. In the historic collections area progress was made in transitioning from an antiquated collections management system to the modern PastPerfect collections management system. Cultural resource section staff have been working with staff and volunteers from Paynes Prairie, Crystal River, Yulee Sugar Mill, Camp Helen and Eden Gardens to upload a large collection of digitized photos and archives (creating searchable pdf's in the process) which represent about 9,905 records.

Lastly, in coastal management, of the 40 beach parks in the Florida Park Service, 4 parks underwent post-nourishment monitoring; nourishment is performed to maintain space for plants / wildlife, as well as visitor use areas. DRP land managers continue to utilize strategic partners to ensure long-term maintenance of coastal natural communities through cost-sharing and improved resource allocation.

### ***Visitor Services***

During Fiscal Year 2019-2020, over 24.8 million visitors enjoyed the state parks and greenways and trails, generating over \$54 million in revenues from user fees and concession activities. Since 1999, state park attendance has grown from 14.6 million to over 24.8 million, an overall increase of approximately 170%. This was the result of both increased marketing and promotion activities and the development of additional recreation facilities in the parks.

### ***Volunteers and Citizen Support***

DRP hosted more than 8,796 volunteers in state parks during Fiscal Year 2019-2020 who contributed a combined total of 1.05 million hours of service. The work performed by these volunteers would have required an additional 505 full-time employees to accomplish. In addition, 83 Citizen Support Organizations (non-profit, 501 (c) (3) corporations) assisted parks by fundraising, providing special events and visitor programs, and contributing to capital improvement projects that DRP would not have had the financial ability or staffing to complete.

### **Staffing**

Since 1999, combined central office and field staffing increased by less than 2% (1,016.5 FTEs to 1033.5 FTEs). Greater use of volunteers and outsourcing, more aggressive pursuit of grants, increase in multiple parks administered by one park manager, and use of temporary or seasonal employees have helped supplement permanent park employees.

### **Revenue**

Since 1999, the total revenue generated by the state parks increased from \$25.6 million to \$54 million, an increase of 211%.

## **Division of State Lands (DSL)**

### **Mission Statement**

To acquire, conserve and manage Florida's critical state-owned lands titled to the Board of Trustees of the Internal Improvement Trust Fund.

### **Background and Significant Developments**

Although the DSL is not primarily a land managing agency, it is responsible for monitoring approximately 246,949 acres of conservation easements either purchased with Florida Forever and Preservation 2000 funds or obtained through other means such as donations and land exchanges. The Office of Environmental Services (OES) within DSL has contracts with the Florida Natural Areas Inventory (FNAI) to conduct site visits and produce monitoring reports.

In FY 2019-2020, the State acquired seven conservation easements to be monitored by DSL/OES:

- Etoniah/Cross Florida Greenway: Wetland Preserve, LLC
- Seven Runs Creek Final Phase: Stella Davis 2015 Plantation Trust
- Seven Runs Creek Final Phase: Nokuse Education Inc.
- Seven Runs Creek Final Phase: Nokuse Education Inc. (donation)
- Lower Suwannee River and Gulf Watershed: Lyme Timber II – Block 1
- Myakka Ranchlands: Pallardy Ranchland Trust 2006

In FY 2019-2020 the DSL spent \$50,599 to monitor 29 of the 129 conservation easements and Green Swamp land protection agreements, for a total of 46,056 acres. Monitoring for 3 easements originally scheduled for the 4th quarter of the fiscal year was cancelled due to travel restrictions enacted during the COVID-19 epidemic. These easements were rescheduled for the upcoming year. DSL monitors easements every 36 months.

## Florida Department of State (DOS)

### Division of Historical Resources (DHR)

#### Mission Statement

To identify, evaluate, manage, promote and protect the historical, archaeological and folk cultural resources of Florida. The DHR Director serves as Florida's State Historic Preservation Officer and acts as a liaison with the national historic preservation program of the National Park Service with the U.S. Department of the Interior. The DHR, formerly the Division of Archives, History and Records Management, was established in 1967.

#### Historical Resources Management Goals

- To protect Florida's known and potential historical and archaeological resources;
- To cooperate with agencies, groups and individuals in conducting comprehensive inventories of historical resources throughout the state;
- To implement a statewide comprehensive historic preservation plan;
- To identify all properties eligible for listing in the National Register of Historic Places;
- To ensure that historic resources are taken into account at all levels of planning and development;
- To establish and maintain an inventory of historic sites and properties known as the Florida Master Site File;
- To provide public information, education and technical assistance regarding historic preservation programs; and
- To establish guidelines for state agency responsibilities relating to historic sites and properties in accordance with s. 267.061(2), Florida Statutes.

#### Background and Significant Developments

The DHR holds title to "all treasure trove, artifacts, and such objects having intrinsic or historical and archaeological value that have been abandoned on state-owned lands or state-owned sovereignty submerged lands" for administration and protection (§267.061(1)(b), Florida Statutes). The DHR's Bureau of Archaeological Research (BAR) maintains state-owned artifact conservation and collections facilities at its Tallahassee office. At the end of FY 2019-2020, these facilities maintained 658,729 inventory line items comprising well over 3.5 million individual artifacts at DHR, an increase of 39,369 from the previous year. A total of 88,170 inventory line items are currently on loan for exhibit and study to 107 unique institutions. This represents an increase of 655 objects or groups of objects over the previous year.

DHR is also responsible for maintaining the database of recorded historical resources in state ownership in the Florida Master Site File. At the end of FY 2019-2020, there were 11,816 historic properties recorded on state lands. This includes 8,894 archaeological sites, 1,760 historic buildings and structures; 140 historic cemeteries; 255 historic bridges, and 767 resource

groups such as historic landscapes, canals, roads and railroads. Of these properties, 189 are listed in the National Register of Historic Places, and 15 have been designated as National Historic Landmarks. The Florida Master Site File is also the central state repository for reports and other manuscripts relevant to state-owned prehistoric and historic sites, including 5,093 field survey reports that occurred on state-owned lands.

Staff from the DHR's Public Lands Archaeology Program (PLA) assesses state-owned lands to identify areas of archaeological sensitivity, conducts surveys to locate and record sites, prepares nominations of sites to the National Register of Historic Places, provides damage assessments on looted and vandalized sites, oversees the archaeological research permit program, and provides management recommendations for site preservation and protection. Since 1990, program staff has surveyed 1,298,193 acres of land on 282 state-managed properties, and recorded or updated 1,559 archaeological and historical sites. During FY 2019-2020, PLA conducted archaeological reconnaissance of 1,045 acres of newly acquired property on Box-R Wildlife Management Area. In addition, PLA conducted four damage assessments of vandalized archaeological sites on state lands. The cost of damage and restoration to state-owned property documented during these assessments was \$235,349. PLA staff assist other state agencies with their historic preservation responsibilities by participating in an advisory capacity on Land Management Reviews, serving on Management Advisory Groups, and commenting on Unit Management Plans prior to their review by the Acquisition and Restoration Council. During FY 2019-2020, PLA staff participated in 6 Land Management Reviews, served on 13 Management Advisory Groups, and commented on 21 draft Unit Management Plans.

The DHR is statutorily responsible for reviewing, issuing and monitoring permits for archaeological investigations on state lands by other entities (§267.12, Florida Statutes). During Fiscal Year 2019-2020, PLA staff reviewed 86 such permit applications. Additionally, the DHR is responsible for protecting unmarked human remains on state lands, including consultation with Native American tribes (§872.05, Florida Statutes). There are 617 sites with evidence of human remains on state lands, mostly Native American peoples.

Submerged cultural resources on state-owned and state-owned sovereignty submerged lands are also a focus of the DHR's archaeology programs. Sovereign submerged lands under the state of Florida's management total over 11,618,561 acres. At the end of FY 2019-2020, there were 1,322 submerged cultural resources recorded with the Florida Master Site File, including submerged prehistoric sites, historic shipwrecks and dugout canoes. During FY 2019-2020 BAR archaeologists presented Archaeological Resource Management training to law enforcement and heritage managers ; presented lectures at the St. Augustine Historical Society, the St. Augustine Lighthouse and Maritime Museum, the PINC (People, Ideas, Nature, and Creativity) conference in Sarasota, the Oscher Lifelong Learning Institute, and the University of Leiden, Netherlands; met for strategic planning with representatives of DRASSM (Département des Recherches Archéologiques Subaquatiques et Sous-Marines), the underwater archaeology unit of the French government; and assessed a research partnership with the Bureau of Ocean Energy management

(BOEM). During FY 2019-2020 BAR archaeologists conducted underwater survey activities near Manasota Key (with a Cooperative Agreement with BOEM), Cape Canaveral (with assistance from DRASSM), Dog Ballard Artificial Reef, the Santa Fe River, Apalachee Bay, Ray Hole Springs, Dog Island, and the Wacissa River.

The DHR designs and conducts an archaeological and historic sites training program for state lands management personnel in other agencies. In FY 2019-2020, the Public Lands Archaeology program trained 156 state agency staff in protecting and preserving historical resources through the Archaeological Resource Management (ARM) training program. Agencies with staff trained in FY 2019-2020 include the FWC, FFS, FPS, DEP, and city and county governments. Those who take the training receive a certificate to conduct monitoring activities in accordance with review and compliance recommendations, thereby reducing the time and money spent to comply with state regulations. Public Lands Archaeology staff also conducts cultural resources training seminars for Law Enforcement agencies. During Fiscal Year 2019-2020, four of these seminars were conducted for state and local agencies, reaching 158 individuals.

#### **Cost Savings to Land Managing Agencies**

DHR's programs for archaeological site surveys and assessments on state lands, curation of state-owned artifacts, and training programs for state land managers have resulted in significant savings to state land managing agencies such as the CAMA, the OGT, the DRP, the FFS and the FWC. As demonstrated in the totals reported to the Land Management Uniform Accounting Council, the amounts spent by these agencies for Cultural Resources Management comprise a small fraction of their overall expenditures. Archaeological reconnaissance surveys, site damage assessments and artifact curation are services that do not have to be contracted by the land managing agencies because DHR provides these services to them. Also, the DHR training programs prepare state land managers to handle certain cultural resource issues without direct involvement of state or private archaeologists, likewise saving agency costs. Davis Productivity Awards in 2007, 2008 and 2010 recognized the DHR's training programs for a cost savings to land managing agencies of almost \$900,000.

## Florida Fish and Wildlife Conservation Commission (FWC)

### Mission Statement

To manage fish and wildlife resources for their long-term well-being and the benefit of people.

### Land Management Goals

- To achieve and maintain the natural diversity, abundance, and distribution of wildlife;
- To provide uses of wildlife on an optimum, sustained-use basis;
- To maintain, increase, and ensure the abundance and/or distribution of threatened and endangered wildlife to the point they are no longer threatened or endangered;
- To increase the awareness, appreciation, and understanding of wildlife and its needs by Florida's residents and visitors;
- To increase the enjoyment of wildlife by Florida's residents and visitors; and
- To maintain healthy wildlife populations at levels compatible with their requisite habitats, surrounding land uses and public demands for wildlife-related recreation.

### Background and Significant Developments

The FWC came into existence on July 1, 1999, as the result of a constitutional amendment proposed by the Constitution Revision Commission and approved by Florida voters in the 1998 General Election. In 2019-20 FWC managed 6,002,676 acres established as Wildlife Management Areas, Wildlife and Environmental Areas, Public Waterfowl Areas, Public Use Areas, Fish Management Areas or Public Small Game Hunting Areas. FWC has lead management responsibility for 54 managed areas totaling 1,460,443 acres, and the balance of this land base (4,542,233 acres) is state, water management district, federal and private lands in FWC's management area system.

FWC provides natural resource management expertise, public use administration and law enforcement for all areas within the management area system. FWC integrates scientific data with habitat management techniques to develop and implement conservation strategies necessary to sustain the natural biodiversity of Florida. Conservation efforts are focused at an ecosystem or landscape scale to provide for the greatest benefits to the widest possible array of fish and wildlife species. Public use administration encompasses the administration of hunting and fishing seasons on all areas within the management area system as well as all other public use activities on the FWC lead areas. Law enforcement efforts encompass all conservation lands within the state of Florida.

During the 2019-20 fiscal year, over 2.2 million in revenue was derived from various activities on 29 different areas. Activities generating revenue included day use fees, grazing leases, timber harvest, citrus harvest, farming leases, and a campground concessionaire.

Volunteers are an important component to completing many projects on several of the FWC lead areas. For the 2019-20 fiscal year there were 14,040 volunteer hours expended with an estimated value of \$381,893.

### Invasive Plant Management

The Invasive Plant Management Section (IPMS) is housed within the FWC, the section’s programs direct significant staff and monetary resources to controlling and eradicating invasive exotic plants on lands managed by other public agencies. In FY 2019-2020, the IPMS spent the following for management of terrestrial invasive exotic plants on public conservation land:

<b>MANAGER</b>	<b>COST</b>	<b>ACRES</b>
Cities	\$448,971	1019
Counties	\$2,243,448	11,759
<b>Local Total</b>	<b>\$2,692,419</b>	<b>12,778</b>
DEP <sup>1</sup>	\$223,098	409
FFS	\$890,642	9408
FPS	\$2,030,966	9636
FWC <sup>2</sup>	\$981,572	146,857
Universities <sup>3</sup>	\$29,830	38
WMD <sup>4</sup>	\$1,126,905	10,916
<b>State Total</b>	<b>\$5,283,013</b>	<b>177,264</b>
BLM <sup>5</sup>	0	0
DOD <sup>6</sup>	\$218,057	924
NPS	\$853,987	9550
USDA <sup>7</sup>	\$37,134	279
USFS <sup>8</sup>	\$137,507	1391
USFWS <sup>9</sup>	\$1,921,737	9922
<b>Federal Total</b>	<b>\$3,168,422</b>	<b>22,066</b>
<b>Grand Total</b>	<b>\$11,143,854</b>	<b>212,108</b>

<sup>1</sup> Department of Environmental Protection, other than the Division of Recreation and Parks (Florida Park Service). Includes Bureau of Mine Reclamation and Florida Coastal Office managed areas.

<sup>2</sup> Wildlife Management Areas, Wildlife Environmental Areas, and Public Small Game Hunting Areas; primarily assisting with herbicide for operations. The Wildlife Habitat Management Section has its own funding for invasive plant management on FWC managed land, but the Melaleuca money is used on their properties.

<sup>3</sup> Conservation lands managed by Florida’s state universities.

<sup>4</sup> Florida’s Water Management Districts, including the annual one-million-dollar Melaleuca Program and Loxahatchee NWR (aka WCA 1). This refuge is managed by the Fish & Wildlife Service, except for invasive plant management. The South Florida Water Management District owns this property and manages invasive plants with cooperative funding from FWC and FWS.

<sup>5</sup> The US Department of the Interior, Bureau of Land Management.

<sup>6</sup> The US Department of Defense, conservation land managed on military installations.

<sup>7</sup> The US Department of Agriculture, other than the Forest Service; in this case, one of their research stations.

<sup>8</sup> The US Department of Agriculture, Forest Service; Apalachicola and Ocala National Forests.

<sup>9</sup>The US Department of the Interior, Fish and Wildlife Service; National Wildlife Refuges other than Loxahatchee NWR.

The IPMS also expended approximately \$5,582,426 managing aquatic plants in FWC Fish Management Areas and an additional \$9,876,654 managing aquatic plants in other public water bodies. Public water bodies are state-owned waters with improved boat ramps that are open to the public.

### **Law Enforcement**

FWC's Division of Law Enforcement is responsible for protecting Florida's natural resources, including fish, wildlife and the environment, while providing a safe atmosphere for residents and visitors to recreate. FWC officers have full police powers and statewide jurisdiction. They patrol rural, wilderness and inshore and offshore areas and are often the sole law enforcement presence in many remote parts of the state. These areas include FWC managed lands, State Forests and State Parks. For fiscal year 2019-20 FWC spent \$9,635,423 for law enforcement activities on lead managed areas, \$29,583,334 on non-lead areas established within the Wildlife Management Area system and \$5,702,421 dollars were expended on State Parks and State Forests not established within the Wildlife Management Area system.

## Florida Department of Agriculture and Consumer Services

### Florida Forest Service (FFS)

#### Mission Statement

Protect Florida and its people from the dangers of wildland fire and manage Florida's forest resources through a stewardship ethic to ensure that these resources are available for future generations.

#### State Forest Management Goals

- Practice sustainable forest management for the efficient generation of revenue and in support of state forest management objectives;
- Provide for resource-based outdoor recreation opportunities for multiple interests;
- Restore and manage healthy forests and native ecosystems ensuring the long-term viability of populations and species listed as endangered, threatened or rare, and other components of biological diversity including game and nongame wildlife and plants;
- Protect known archaeological, historical, cultural and paleontological resources;
- Restore, maintain and protect hydrological functions related to water resources and the health of associated wetland and aquatic communities;
- Provide research and educational opportunities related to natural resource management.

#### Background and Significant Developments

The FFS has been in existence since 1928. State forest management first began in 1936 with the establishment of the 6,911-acre Pine Log State Forest in Washington County and Bay County. Additional acquisitions brought the total state forest system acreage to 305,625 by the late 1950s. Through the Preservation 2000 program in the 1990s and Florida Forever in the 2000s, the state forest system has expanded from 11 state forests totaling 349,465 acres, to 38 state forests and a working cattle ranch (Babcock Ranch Preserve) with 1,153,691 acres as of June 30, 2020.

FFS has been designated as a multiple-use land managing agency. FFS's expertise in habitat restoration, prescribed fire, silvicultural management, and resource-based recreation has prepared the agency to assume management responsibilities for these properties. FFS receives management funds from the Land Acquisition Trust Fund for implementing management activities including silvicultural activities, road maintenance, prescribed burning, reforestation, forest restoration, public recreation, and protection of listed flora and fauna. Since 2015, five state forests have been certified to the Forest Management Standard within the Sustainable Forestry Initiative (SFI) program by NSF International, a third-party certification company. The SFI program promotes sustainable forestry practices based on 13 principals, 15 objectives, and 37 performance measures. These requirements include measures to protect water quality, biodiversity, wildlife habitat, species at risk, and forests with exceptional conservation value. Through the SFI program, FFS is committed to continuously improve responsible forest management by meeting or exceeding applicable water quality laws and regulations, with

measures to manage and protect water, wetlands, and riparian zones, as well as continuing evaluation of habitat and biodiversity impacts from forest activities.

The Florida Forest Service is responsible not only for land management, but it is also the lead governmental agency in Florida responsible for wildfire mitigation and suppression, for both non-federal public and private lands, totaling over 26 million acres. In addition to wildfire suppression, FFS is responsible for issuing all prescribed fire authorizations statewide, managing an established wildland fire training center for the public and private sector (Basic Fire Control Training, Certified Pile Burning Training, National Wildfire Coordinating Group Training), providing certification courses for prescribed fire managers, providing “Firewise” wildfire mitigation courses for urban communities, and conducting wildland-urban interface wildfire threat mitigation. Additionally, FFS provides disaster support to the State of Florida for all-hazard emergency incidents and provides wildland fire support to other states across the nation. During the period covered by this report, FFS conducted 200,506 acres of prescribed fire on conservation lands it manages; and responded to 2,302 wildland fires on public and private properties that impacted over 70,825 acres. FFS issued 90,801 prescribed burn authorizations across the state of Florida in FY 2019-2020 for a total of 2,094,524 acres, many of which are state-owned conservation lands.

FFS provides expertise to other agencies in silvicultural management to oversee timber harvesting, fire management, reforestation, insect pest problems, and related activities. Since 1999, the Florida Legislature has required all land management agencies assess the potential for timber management on managed properties over 1,000 acres. FFS assists other state agencies, as well as municipal agencies in this assessment.

FFS operates under the budget that provides for management of the state forests, and wildfire controls on publicly and privately-owned forest land (over 26,000,000 acres). This includes FFS-managed lands listed in this report. The annual cost of wildfire protection provided by FFS on public lands that are not FFS-managed was over \$7,191,588. This cost is not incorporated into FFS land management figures in this report.

During the fiscal year 2019-2020, FFS reforested 2,567 acres on FFS-managed state forests, conducted prescribed burns on 200,506 acres, and harvested 310,768 tons of timber on FFS-managed state forests with an estimated economic benefit of approximately \$440 million, treated over 14,198 acres of non-native invasive plants and maintained approximately 3,115 miles of roads available for public access on FFS-managed state forests. The FFS actively recruits and utilizes available inmate labor. Inmate crews provided over 41,612 hours of work on State Forests. Volunteers are important assets to the FFS, with 725 active volunteers providing over 120,877 hours of services during fiscal year 2019-2020. The FFS provided public access for over 20,386,333 visitors for recreational and educational opportunities on the State Forests. The State Forest visitors had an estimated economic benefit of \$735,376,384 to local communities.

The annual LMUAC report does not reflect all expenditures related to the management of public lands performed by the Florida Forest Service. During fiscal year 2019-2020 FFS received appropriations derived from the Land Acquisition Trust Fund. Expenditures made in support of land management efforts on public lands which are not included in this report are salaries and benefits, operating and contractual services for public lands, the repair or replacement of aging land management equipment, reforestation of public lands, the Prescribed Burn Assistance Program to promote prescribed burns on public lands throughout the state by various land management agencies, the Invasive Species Program, and recreation improvements on FFS State Forests.

**Secondary / Additional Management<sup>1</sup> Costs of Conservation Land Management Units (FY 2019-20)**

Management Unit <sup>2</sup>	Type of Secondary/ Additional Management <sup>1</sup>	Lead Manager <sup>3</sup>	Acres	Annual Costs for 2nd/Add. Management
------------------------------	---	---------------------------	-------	--

**NOTES:**

<sup>1</sup> Includes management units managed as: aquatic preserves (submerged lands); secondary manager (non-lead agency); conservation easements; or subleases to another agency for management. **Substantial acres reported in this column overlap with acreages reported under Lead Management, and with others under Additional Management** because more than one agency assists in the management of lands managed by another agency. Substantial portion of this land is not owned by the state, but is owned by the federal government, water management districts or private entities. Notes for each agency:

- **DSL** oversees private sector management of conservation easements, each of which are monitored every 18 months on average;
- **CAMA** manages the aquatic preserves, estuarine research reserves and marine sanctuaries that are predominately submerged lands;
- **DRP** oversees management of sites subleased to counties, cities etc. for recreational trails;
- **FFS** provides timber management for many sites and assists other agencies in developing timber management plans, etc.;
- **FWC** provides wildlife management and oversees hunting for other agencies; and
- **DIIR** oversees management of sites subleased to counties, cities etc. and assists other agencies in historical and archaeological resource management.

*Note: FWC's wildlife mitigation parks are reported this year under lead management.*

<sup>2</sup> A unit is a state park, a state forest, a state wildlife management area, a state trail or other management unit.

<sup>3</sup> Agency acronyms:

- Armory Board = Florida Dept. of Military Affairs
- DOC/PRIDE = Florida Department of Corrections/Prison Rehabilitative Industries and Diversified Enterprise, Inc.
- DOD = US Department of Defense
- DRP = Division of Recreation and Parks
- FFS = Florida Forest Service
- FWC = Florida Fish and Wildlife Conservation Commission
- NPS = US National Park Service
- NFWFMD = Northwest Florida Water Management District
- SFWMD = South Florida Water Management District
- SJRWMD = St. Johns River Water Management District
- SRWMD = Suwannee River Water Management District
- SWFWMD = Southwest Florida Water Management District
- TNC = The Nature Conservancy
- USFS = US Forest Service
- USFWS = US Fish & Wildlife Service

<sup>4</sup> Unit has two secondary managers or advisors: FFS & FWC

<sup>5</sup> Program responds to wildfires on all state owned forest lands, which is funded by the Florida Forest Service

<sup>6</sup> Conducted on non-FFS state owned forest lands, including lands managed by FWC, DRP, CAMA & DOC

<sup>7</sup> WMA includes lands in addition to the state forest land

<sup>8</sup> WMA includes lands on which FWC is lead and other lands on which FWC is a secondary manager. Funds spent on secondary management were not tracked separately, but are included under FWC lead agency entry.

<sup>9</sup> Within Marjorie Harris Carr Cross Florida Greenway State Recreation and Conservation Area

<sup>10</sup> includes 2,940 acres that are part of MHI Carr Cross Fla. Greenway State Recreation & Conservation Area. Funds spent on secondary management of this portion were not tracked separately, but are included under FWC secondary management entry.

<sup>11</sup> Monitored by another public entity, but overseen by DSL.

## Ecosystem Services

### Reporting of Ecosystem Services

Ecosystem services are the benefits people obtain from ecological systems. These benefits have been divided into ‘provisioning’ services such as food, medicine, water, fuel and fiber; ‘regulating’ services such as erosion and flood control, drought protection, air and water quality, and prevention of disease; cultural services such as recreational, spiritual, religious and other nonmaterial benefits and ‘supporting’ services such as soil formation and nutrient cycling.

Prevention of ecosystem degradation has long been one of the goals of land conservation, with the often-stated outcome of such land protection being the preservation of ‘essential ecosystem services.’ However, the translation of ecosystem services such as “clean air and abundant clean water’ into economic values that allow comparisons with the economic values of other activities (such as deriving market value from extraction of timber or mining products, for example) is a complex challenge. Each of the services listed above carries economic value, but the science of calculating those values is still a developing field. Economists and ecologists are increasingly joining forces to assign dollar values to different ecosystem services through various modeling approaches, but many are not yet available or may not be specific to Florida ecosystems.

In order to understand the full economic value of Florida’s conservation lands and explain their vital importance to the state’s economy and quality of life, it will become ever more necessary to develop ways of measuring the values of ecosystem services provided by those lands. To advance this effort, the 2008 Legislature added a requirement for agency reporting of such values to the LMUAC Report. Section 259.037(3)(b)5., F.S., states that each reporting agency shall also “include a report of the estimated calculable financial benefits to the public for the ecosystem services provided by conservation lands, based on the best readily available information or science that provides a standard measurement methodology to be consistently applied by the land managing agencies. Such information may include but not be limited to, the value of natural lands for protecting the quality and quantity of drinking water through natural water filtration and recharge, contributions to protecting and improving air quality, benefits to agriculture through increased soil productivity and reservation of biodiversity, and savings to property and lives through flood control.”

The DSL and the land managing agencies have undertaken a systematic effort to assemble existing research, agency data reporting, and other relevant information to fulfill this portion of the statute. To date, the DSL’s efforts have resulted in the identification of measuring models that are either not applicable to Florida’s ecosystems, or too expensive or cumbersome to implement at the management unit level. The DSL continues to gather data that will move this effort forward. The desired long –term outcomes are to:

- Establish a list of those ecosystem services provided by state conservation lands for which reasonable measurement or estimation methodologies exist;

- Build interagency consensus for a select subset of these for which reporting methodology can be established across all managing agencies;
- Coordinate learning/training opportunities for agencies to become familiar with these methodologies;
- Discern ways of funding such data gathering and reporting activities, including identifying potential partners in that effort

It is possible that, as an interim solution to meeting the statutory requirements, the next several years may lead to the ability to provide broad estimates of ecosystem services for the total acres of land in public ownership. Several Florida local governments with much smaller acreage holdings are currently engaged in pilot studies to determine such broader estimates, and their outcomes will be monitored by Division staff. However, the science for measuring such services at the unit management level does not yet exist at a level that would be feasible for implementation by the state's managing entities. If such estimates become possible, they will appear in subsequent annual reports.

Despite the current lack of data regarding the values for many ecosystem services, information does exist regarding various aspects of the financial contributions made to the state's economy through uses of Florida's conservation lands. While a more comprehensive reporting on selected ecosystem services is in the planning stages, the managing agencies have chosen, wherever possible, to provide the financial benefit information that is currently available. It is important to note that, since data collection methodology for economic impact data varies by agency, there may be significant variability in numbers reported.

## **Economic Benefits**

### **Office of Coastal and Aquatic Managed Areas**

In fiscal year 2019-20, 635,707 visitors attended one of the three National Estuarine Research Reserves managed by CAMA. The visitors used the beaches, trails and fishing areas, toured the environmental learning centers and participated in boating opportunities on CAMA-managed lands. These three sites, out of the 48 CAMA areas, are the only ones that can count attendance, therefore using the Division of Recreation and Parks' formula for economic benefit significantly under reports CAMA's value to Florida. Using an economic model adopted by the Florida Park Service for estimating local economic benefits, visitors to CAMA's managed areas generated a total economic benefit to the communities consisting of \$58.3 million, sales tax revenues of \$4.09 million and 933 jobs.

Additional economic impact numbers are available from the Florida reef tract which CAMA manages. The reef resources in Martin, Palm Beach, Broward, and Miami-Dade counties are estimated to support 71,000 jobs and \$6.3 billion economic benefit in southeast Florida annually. CAMA has responsibility for water bodies at more than 80 of the state parks, providing the park's key water feature in 47 percent of its management units.

### Division of Recreation and Parks

Based on Fiscal Year 2019-2020 data, the Florida state park system had an overall direct economic impact of more than \$2 billion on local economies throughout the state. Direct economic impact is defined as the amount of new dollars spent in the local economy by non-local park visitors and by park operations. Over \$150 million were contributed to general revenues in the form of state sales taxes. In addition, approximately 31,810 jobs were supported as a result of the state parks, greenways and trails operations.

FY 2019-2020 DIRECT ECONOMIC IMPACT BY ADMINISTRATIVE UNIT				
ADMINISTRATIVE UNIT	TOTAL DIRECT IMPACT	INCREASED STATE SALES TAX	JOBS SUPPORTED	
CENTRAL	\$ 659,835,720	\$ 44,633,559	9,238	
CENTRAL OFFICE SUPPORT	\$ 23,907,507	\$	383	
NORTHEAST	\$ 351,356,220	\$ 23,466,021	4,919	
NORTHWEST	\$ 287,163,700	\$ 18,977,782	4,020	
SOUTHEAST	\$ 447,193,554	\$ 29,774,484	6,261	
SOUTHWEST	\$ 502,686,874	\$ 33,533,555	7,038	
STATEWIDE	\$ 2,272,143,576	\$ 150,385,401	31,810	

#### DEFINITION OF TERMS

- Total Direct Economic Impact:** The amount of new dollars spent in a local economy by non-local park visitors, and park operations.
- Increased State Sales Tax:** The estimated amount of tax dollars the state receives as a result of park visitor expenditures.
- Total Jobs Generated:** This may be any combination of seasonal, temporary, part-time or full-time employment that adds up to 16 full-time jobs per one million dollars in total new expenditures in the local area. Source: [Thomas, C., Huber, C. & Koontz, L. 2012 National Park Visitor Spending Effects: Economic Contributions to Local Communities, States, and the Nation. Fort Collins, Colorado: U.S. Geological Survey & National Park Service]

### Division of Historical Resources

The DHR is the state agency responsible for promoting the historical, archaeological, museum and folk culture resources in Florida. The director of the DHR serves as Florida's State Historic Preservation Officer, providing a liaison with the national historic preservation program conducted by the National Park Service. The economic benefits of state funding are not confined to cultural programs. State funding for local historic and archaeological preservation and history museum projects leverages financial support, as grant awards require local cost share and matching funds. While grant-in-aid programs directly support and benefit those involved with museum and preservation activities, they also provide a benefit to the local economy as a whole.

According to the Federal Advisory Council on Historic Preservation's 2008 study entitled "Statewide Studies on the Economic Impacts of Historic Preservation," research conducted in other states has consistently demonstrated the importance of heritage tourism as an economic engine. An update to the report Economic Impacts of Historic Preservation in Florida show that in FY 2012-2013, the Florida economy benefitted from \$2.55 billion in direct spending on cultural heritage tourism. Of the ninety-five million visitors, sixty-five percent participate in

culturally based activities. The overall economic impact of these visitors is \$72 billion dollars, demonstrating the economic benefit of cultural heritage tourism.

In addition to supporting the preservation of historic properties, the DHR also engages in the preservation of the archaeological history of Florida. On average, the DHR annually receives 83.28 cubic feet of new artifacts and 2.08 cubic feet of new documents (archaeological excavation field notes, field maps, and related items) for curation and storage. Archaeological objects are now curated at a special facility at Mission San Luis while the archaeological conservation laboratory remains in the R.A. Gray Building. The DHR manages Mission San Luis in Tallahassee, the seventeenth century capital of western Spanish Florida. The mission’s extensive interpretative program, including costumed living history, mission building reconstructions, exhibits, guided tours and educational programs are based on detailed archaeological research conducted at the site since 1983. Mission San Luis is capitalizing on their recently streamlined event planning, which has greatly increased annual visitation to the site and revenues.

**Florida Fish and Wildlife Conservation Commission**

Hunting, fishing, wildlife viewing and boating are just some of the activities enjoyed on state owned lands. These activities have a significant economic impact here in Florida:

CATEGORY	ECONOMIC CONTRIBUTION	JOBS
Hunting	\$1.6 billion	14,673
Saltwater Fishing	\$6.6 billion	96,801
Freshwater Fishing	\$1.7 billion	14,040
Wildlife Viewing	\$4.9 billion	44,623
Boating	\$10.4 billion	82,750

**Sources:**

**Hunting:** Southwick Associates. *Hunting in America: An Economic Force for Conservation*. Produced for the National Shooting Sports Foundation in partnership with the Association of Fish and Wildlife Agencies. 2012.

**Recreational freshwater fishing:** Southwick Associates. *Sportfishing in America: An Economic Force for Conservation*. Produced for the American Sportfishing Association under a U.S. Fish and Wildlife Service Sport Fish Restoration grant (F12AP00137, VA M-26-R) awarded by the Association of Fish and Wildlife Agencies. 2012.

**Recreational saltwater fishing:** National Marine Fisheries Service. 2017. *Fisheries Economics of the United States, 2015*. U.S. Dept. Commerce, NOAA Tech Memo. NMFS-F/SPO-170.

**Wildlife viewing:** Southwick Associates. *The 2011 Economic Benefits of Wildlife Viewing in Florida*. Prepared for Florida Fish and Wildlife Conservation Commission.

**Recreational boating:** National Marine Manufacturers Association. *Economic Significance of Recreational Boating in Florida*. 2013.

Using the information above, the 2006 IMPLAN economic models assembled by Southwick Associates and the United States Fish and Wildlife Service (updated to 2010), and the visitation data collected on select FWC managed units; a conservative estimate of visitor’s economic impact was calculated.

Analysis was done on a per trip basis meaning a vehicle entering and exiting an area counted as one trip. The number of visitors per vehicle was not used in this analysis.

Trip data was collected on 35 managed units in 2019-20 and totaled more than 1.3 million trips. Using this data the economic model estimated the following:

CATEGORY	ECONOMIC IMPACT
Retail Sales	\$149,794,146
State and Local Taxes paid	\$15,195,748
Ripple Effect (indirect spending influenced by visitors)	\$256,177,489
Number of Jobs Created	2,609

### Florida Forest Service

#### *Determining Economic Benefit from Timber Sales on State Forests*

The basis for developing the value of this benefit is a report from the University of Florida to the Florida Forestry Association titled: “**Economic Contributions of the Forest Industry and Forest-based Recreation in Florida**”, December 2017. FFS Forest Management staff further adjusted values for 2019 inflation based upon consultation with Mr. Alan Hodges in January 2020. Total timber harvest in Florida was estimated at 18,792,000 tons of pulpwood and sawtimber annually. In turn, total economic contributions of Florida’s forest industry were estimated at \$26.61 billion in output (adjusted for inflation to 2019 dollars, per Mr. Alan Hodges), and 124,104 jobs. In fiscal year 2019-2020, timber sales on State Forests totaled 310,768 tons, which was approximately 1.65 percent of the estimated state total. The economic benefit from timber sales on State Forests was approximately \$440 million and 2,052 jobs.

#### *Determining the Local Economic Benefit from Visitors to State Forests*

The number of visitors who attended a state forest managed by the Florida Forest Service in fiscal year 2019-2020 was 20,386,333. To determine the Local Economic Benefit from visitors to State Forests, the Florida Forest Service utilized the Division of Recreation and Parks method for calculating the economic benefit. The result for State Forest visitation is an estimated total economic benefit on local economies of \$735,376,384. Approximately 14,708 local jobs were created by State Forest visitation.

## **Addenda**

### **Uniform Land Management Cost Categories and Subcategories**

#### **Resource Management**

##### ***Exotic Species Control***

Invasive exotic plant and animal removal activities and costs for inventorying, planning, preparing, executing, evaluating, monitoring and reporting. Also includes equipment, chemicals, protective clothing and supplies. Includes nuisance native feral animal and plant control.

##### ***Prescribed Burning***

Prescribed burning activities and costs for assessing, planning, preparing, executing, evaluating and reporting. Also includes equipment, protective clothing and supplies.

##### ***Cultural Resource Management***

Management activities and costs for assessing, planning, executing, evaluating and reporting, and for all maintenance, restoration or monitoring activities for prehistoric and historic sites, features and collection objects.

##### ***Timber Management***

Activities and costs related to the establishment of a stand of potentially merchantable timber, harvest of merchantable timber, and cultural treatments intended primarily to improve the growth and overall health of a stand of merchantable timber. Also includes activities and costs related to the cutting of merchantable timber in natural community and habitat restoration projects.

##### ***Hydrological Management***

Hydrological management and restoration activities and costs for assessing, monitoring, planning, preparing, executing, evaluating and reporting. Includes water level management, repair, removal or back-filling of ditches, canals, berms and dams. Also includes water quality and water quality monitoring.

##### ***Other***

All other resource management activities and costs not captured in other specific subcategories. Examples include natural community and habitat restorations through other techniques; plant, animal or biological community survey, monitoring and research; listed species management; technical assistance; and evaluating and commenting on resource impacts to parks.

#### **Administration**

##### ***Central Office/Headquarters***

Headquarters units conducting general administration of land under management by the agency. Includes upper management direction, administration and fiscal, budget, personnel, purchasing

and record keeping required for operations oversight and specific programs. Includes all duties unless they specifically relate to other categories or subcategories.

***Districts/Regions***

Sub-state administrative districts or regions conducting general administration of the properties under their management. Includes all duties, unless they specifically relate to other categories or subcategories. General operating costs of district or region administrative facilities are included.

***Units/Projects***

Conducting general administration duties at a specific management unit (state park, state forest, state wildlife management area, etc.). Includes supervisory duties, fiscal and record keeping duties, and any other duties that do not specifically relate to other categories or subcategories. General operating costs for the property, such as utilities, telephones and garbage collection, are included.

**Support**

***Land Management Planning***

Developing land management plans required by Sec. 253.034, F.S., Includes researching and compiling plan information, materials and maps, coordinating planning activities, conducting review activities (internal reviews, public meetings, advisory group meetings, Acquisition and Restoration Council, etc.), and promulgating draft plans and final plans.

***Land Management Reviews***

Planning, organizing and conducting land management reviews by teams created under Sec. 259.036, F.S. Includes preparing and responding to land management review reports. Also includes similar work conducted as part of internal agency land management reviews.

***Training/Staff Development***

Staff training and development costs incurred in any facet of the agency's land management activities.

***Vehicle Purchase***

Acquisition of any vehicle purchased primarily for land management purposes or to support any category of land management activity by the agency.

***Vehicle Operation and Maintenance***

Costs of operating and upkeep of any vehicle used by the agency to support any category of land management activity.

***Other***

Any other support activity or cost not captured by other categories or other subcategories.

## **Capital Improvements**

### ***New Facility Construction***

Use of Fixed Capital Outlay (FCO) or other budget authority for all new facility design and construction activities. Includes new roads, parking and all other infrastructure.

### ***Facility Maintenance***

Use of Fixed Capital Outlay (FCO) or other budget authority for all repairs or renovations to existing facilities, roads or other infrastructure. Also includes Americans with Disabilities Act accessibility improvements and renovations.

## **Visitor Services/Recreation**

### ***Information/Education Programs***

Interpretive, environmental education and marketing programs that explain or promote the agency's mission or instill in visitors an understanding and appreciation for Florida's natural and cultural resources and their proper use and care. Includes signs, brochures, maps and other public information materials that are produced or disseminated.

### ***Operations***

Includes the non-administrative and non-support costs involved in providing public access to lands. Includes all actions required to manage visitor activities in a way to ensure safe and enjoyable use by the public. Includes routine maintenance, cleaning and other work required to provide safe and efficient utilization of facilities and resources that support visitor use and recreation. Includes protection activities required by staff to safeguard natural and cultural resources, facilities, material, staff and visitors.

## **Law Enforcement**

The provision of all activities for enforcing criminal, conservation and boating laws on land, freshwater and marine environments and all costs associated with these services. Includes the provision of uniform patrol, overt and covert criminal investigations, regulation of commercial wildlife trade and the direction and administration of all law enforcement programs and activities, and all associated costs.

**Section 259.037**

**2019 Florida Statutes**

259.037 Land Management Uniform Accounting Council. —

- (1) The Land Management Uniform Accounting Council (LMUAC) is created within the Department of Environmental Protection and shall consist of the director of the Division of State Lands, the director of the Division of Recreation and Parks, and the director of the Office of Coastal and Aquatic Managed Areas of the department; the director of the Florida Forest Service of the Department of Agriculture and Consumer Services; the executive director of the Fish and Wildlife Conservation Commission; and the director of the Division of Historical Resources of the Department of State, or their respective designees. Each state agency represented on the LMUAC shall have one vote. The chair of the LMUAC shall rotate annually in the foregoing order of state agencies. The agency of the representative serving as chair shall provide staff support for the LMUAC. The Division of State Lands shall serve as the recipient of and repository for the LMUAC's documents. The LMUAC shall meet at the request of the chair.
- (2) The Auditor General and the director of the Office of Program Policy Analysis and Government Accountability, or their designees, shall advise the LMUAC to ensure that appropriate accounting procedures are used and that a uniform method of collecting and reporting accurate costs of land management activities are created and can be used by all agencies.
- (3)
  - (a) All land management activities and costs must be assigned to a specific category, and any single activity or cost may not be assigned to more than one category. Administrative costs, such as planning or training, shall be segregated from other management activities. Specific management activities and costs must initially be grouped, at a minimum, within the following categories:
    1. Resource management.
    2. Administration.
    3. Support.
    4. Capital improvements.
    5. Recreation visitor services.
    6. Law enforcement activities.

Upon adoption of the initial list of land management categories by the LMUAC, agencies assigned to manage conservation or recreation lands shall account for land management costs in accordance with the category to which an expenditure is assigned.

- (b) Each reporting agency shall also:
  1. Include a report of the available public use opportunities for each management unit of state land, the total management cost for public access and public use, and the cost associated with each use option.

2. List the acres of land requiring minimal management effort, moderate management effort, and significant management effort pursuant to s. 259.032(9)(c). For each category created in paragraph (a), the reporting agency shall include the amount of funds requested, the amount of funds received, and the amount of funds expended for land management.
  3. List acres managed and cost of management for each park, preserve, forest, reserve, or management area.
  4. List acres managed, cost of management, and lead manager for each state lands management unit for which secondary management activities were provided.
  5. Include a report of the estimated calculable financial benefits to the public for the ecosystem services provided by conservation lands, based on the best readily available information or science that provides a standard measurement methodology to be consistently applied by the land managing agencies. Such information may include, but need not be limited to, the value of natural lands for protecting the quality and quantity of drinking water through natural water filtration and recharge, contributions to protecting and improving air quality, benefits to agriculture through increased soil productivity and preservation of biodiversity, and savings to property and lives through flood control.
- (4) The LMUAC shall provide a report of the agencies' expenditures pursuant to the adopted categories to the Acquisition and Restoration Council and the Division of State Lands for inclusion in its annual report required pursuant to s. 259.036.
- (5) Should the LMUAC determine that the list of land management categories needs to be revised, it shall meet upon the call of the chair.
- (6) Biennially, each reporting agency shall also submit an operational report for each management area along with an approved management plan. The report should assess the progress toward achieving short-term and long-term management goals of the approved management plan, including all land management activities, and identify any deficiencies in management and corrective actions to address identified deficiencies as appropriate. This report shall be submitted to the Acquisition and Restoration Council and the Division of State Lands for inclusion in its annual report required pursuant to s. 259.036.

*History.* —s. 25, ch. 2000-170; s. 46, ch. 2001-61; s. 11, ch. 2008-229; s. 61, ch. 2010-102; s. 7, ch. 2012-7; s. 36, ch. 2014-17; s. 23, ch. 2015-229; s. 20, ch. 2016-233.

*Note:* Subsection 259.037(4) requires LMUAC to provide its report to the Acquisition and Restoration Council pursuant to s. 259.036. Subsection 259.036(6), F.S., requires DEP to submit its annual land management review findings to the Board of Trustees of the Internal Improvement Trust Fund (i.e., Governor and Cabinet) "No later than the second board meeting in October of each year..."

***Distribution List***

**Members of the Florida Board of Trustees of the Internal Improvement Trust Fund**

The Honorable Ron DeSantis  
Governor  
State of Florida  
Plaza Level 5, The Capitol  
400 S. Monroe St.  
Tallahassee, FL 32399-0001
