

LCRR Definition of Lead Service Line

40 CFR 141.2 “Lead service line” means a portion of pipe that is made of lead, which connects the water main to the building inlet. A lead service line may be owned by the water system, owned by the property owner, or both. For the purposes of this subpart, a galvanized service line is considered a lead service line if it ever was or is currently downstream of any lead service line or service line of unknown material.

If the only lead piping serving the home is a lead gooseneck, pigtail, or connector, and it is not a galvanized service line that is considered a lead service line the service line is not a lead service line.

For purposes of § 141.86(a) only, a galvanized service line is not considered a lead service line.

Private vs. Public Side
