Tabled and asked to provide the following information

A site plan prepared in accordance with s. 64E-6.004(3)(a), Florida Administrative Code, drawn to scale and showing all pertinent features, including the parking area.

In addition, the floor plan provided does not match the structure shown on the site plan.

Alternative locations on the property for both the private drinking water well and the onsite sewage treatment and disposal system to maximize the setback to all private drinking water wells.

Alternative onsite sewage treatment and disposal system designs, such as a performance based treatment system, will reduce the amount of drainfield area required and will maximize the setback to all private drinking water wells.

You may also want to consider reducing the size of the single-family residence. I would recommend contacting an onsite sewage treatment and disposal system professional to provide further recommendations.

Approved subject to the following conditions:

The onsite sewage treatment and disposal system shall be set back from the private drinking water wells by the maximum distance attainable but not less than 70 feet when installed.

To maximize the attainable setback, the applicant shall use an alternative drainfield product in a bed configuration that will reduce the area required to install the drainfield.

To maximize the attainable setback, the onsite sewage treatment and disposal system shall be allowed to maintain a two-foot separation from property lines when installed.

Failure to satisfy the department that:

The present system has inadequate capacity to treat the daily sewage flow from your proposed establishment.

Each of the above facts and conclusions is sufficient grounds for denial of your variance request.

Each of the above facts and conclusions is likely to adversely affect the health of the applicant and the public and likely to significantly degrade the groundwater.

It is not unreasonable for you to modify your onsite sewage treatment and disposal system to meet the minimum standards for sewage treatment under the Florida Statutes and the Florida Administrative Code.
