RADIONUCLIDES Gross Alpha, Uranium, Radium-226, Radium-228 (62-550.519)	<b>X</b>				
MICROBIOLOGICAL <b>Revised Total Coliform Rule</b> <b>40 CFR 141 Subpart Y</b>			<b>**X</b>		
LEAD AND COPPER 40 CFR 141 Subpart I	<b>X</b>				

This chart is the DEP's good faith assessment of the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

\* Collect your Annual sample for the SOC of Dalapon during the third calendar quarter (July/August/September) of 2018

\*\* Routine monitoring under the Revised Total Coliform Rule requires this water system to collect microbiological samples at the rate of 1 raw water sample from each well and ONE distribution sample/calendar QUARTER. Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

This chart is the DEP's good faith assessment of the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

\* Collect your Annual samples for Nitrate, and Nitrite during the fourth calendar quarter (October/November/December) of 2018.

\*\* During the third calendar quarter (July/August/September) of 2018, perform Reduced/Annual monitoring for TTHMs and HAA5s under Stage 2 of the Disinfectants and Disinfection Byproducts Rule by collecting 1 dual sample set at the hose bib in front of custodial room Building 6. A dual sample set consists of a set of two samples collected at the same time and location, with one sample analyzed for TTHMs and one sample analyzed for HAA5s. This set of samples must be collected at the location (and during the specific month) identified in your DEP approved Stage 2 monitoring plan.

\*\*\* Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

## PUBLIC WATER SYSTEM CONTAMINANT MONITORING GUIDANCE FOR CALENDAR YEAR 2018

**SYSTEM NAME:** La Hispana

**PWS ID #:**5114149

CONTAMINANTS FAC Rule No./Rule Reference	Not Required In 2018	Quarterly in 2018	SemiAnnual (2 in 2018)	One Time in 2018
NITRATE AND NITRITE (62-550.512)				<b>X</b>

MICROBIOLOGICAL <u>Revised Total Coliform Rule</u> 40 CFR 141 Subpart Y		<b>***X</b>		
LEAD AND COPPER 40 CFR 141 Subpart I	<b>X</b>			

This chart is the DEP's good faith assessment of the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

**\*** At a minimum, continue quarterly monitoring for the Disinfection Byproducts of TTHMs and HAA5s during the first (January/February/March) calendar quarter of 2018, at the rate of one dual set/quarter. Remain on quarterly monitoring for TTHMs and HAA5s until the Running Annual Average TTHM concentration is less than or equal to 60 ug/L and the Running Annual Average HAA5 concentration is less than or equal to 45 ug/L.

**\*\*** Please note, if you do qualify to return to Annual monitoring for TTHMs and HAA5s after the monitoring during the first calendar quarter of 2018 has been performed, you will still be required to collect one dual set of samples for TTHMs and HAA5s during the third calendar quarter (July/August/September) of 2018.

Please note, you must submit an Operational Evaluation Level report to the Department by no later than the 10<sup>th</sup> day following the end of any calendar quarter that you violate the OEL for either TTHMs OR HAA5s. The format is also available at the [DEP Drinking Water forms page](#)

**\*\*\*** Routine monitoring under the Revised Total Coliform Rule requires this water system to collect microbiological samples at the rate of 1 raw water sample from each well and ONE distribution sample/calendar QUARTER. Please note that each water system is required to develop and adhere to a written RTRC sample siting plan that is subject to State review and revision.

LEAD AND COPPER 40 CFR 141 Subpart I	<b>X</b>				

This chart is the DEP's good faith assessment of the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

**\*** During the third calendar quarter (July/August/September) of 2018, perform Routine/Annual monitoring for TTHMs and HAA5s under Stage 2 of the Disinfectants and Disinfection Byproducts Rule by collecting 1 dual sample set. A dual sample set consists of a set of two samples collected at the same time and location, with one sample analyzed for TTHMs and one sample analyzed for HAA5s. The dual set of samples must be collected at the location (and during the specific month) identified in your DEP approved Stage 2 monitoring plan.

**\*\*** Continue quarterly monitoring for the SOC of Dalapon during the first (January/February/March), and second (April/May/June), calendar quarters of 2018.

**\*\*\*** At a minimum, continue quarterly monitoring for the Radiological contaminants of Gross Alpha, Uranium (only if the GA is greater than 15 pCi/L), Radium 226, and Radium 228 during the first, and second calendar quarters of 2018. Please note you may only substitute Gross Alpha for Uranium, and/or Radium 226 if the criteria identified in Rule 62-550.519, F.A.C., is met. Following the second calendar quarter of 2018, continue quarterly monitoring for the above-referenced radiological contaminants until the four most recent quarters of results are each less than the MCLs for EACH contaminant.

**\*\*\*\*** Routine monitoring under the Revised Total Coliform Rule requires this water system to collect microbiological samples at the rate of 1 raw water sample from each well and ONE distribution sample/calendar QUARTER. Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

**SYSTEM NAME: RCMA Hendry Headstart**

**PWS ID #:5264077**

CONTAMINANTS FAC Rule No./Rule Reference	Not Required In 2018	Monthly in 2018	Quarterly in 2018	One Time in 2018
NITRATE AND NITRITE (62-550.512)				<b>X</b>
INORGANIC ONTAMINANTS (62-550.513)	<b>X</b>			
TOTAL TRIHALOMETHANES & HALOACETIC ACIDS <b>40 CFR 141 Subpart V, <u>Stage 2</u></b> Disinfectants and Disinfection Byproducts			<b>*X</b>	<b>**X</b>
VOLATILE ORGANIC CONTAMINANTS (62-550.515)	<b>X</b>			
SYNTHETIC ORGANIC CONTAMINANTS (62-550.516)	<b>X</b> Whole SOCs Group			<b>***X</b> Dalapon, and Hexachlorocyclopentadiene, and DEHP only
MICROBIOLOGICAL <b><u>Revised Total Coliform Rule</u></b> <b>40 CFR 141 Subpart Y</b>			<b>****X</b>	
LEAD AND COPPER 40 CFR 141 Subpart I	<b>X</b>			

This chart is the DEP's good faith assessment of the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

**\*** Continue quarterly monitoring for the Disinfection Byproducts of TTHMs and HAA5s at the rate of one dual set/quarter during each calendar quarter of 2018. A dual set consists of a set of two samples collected at the same time and location, with one sample analyzed for TTHMs and one sample analyzed for HAA5s. A dual set of samples must be collected at the location (and during the specific month of each calendar quarter) identified in your DEP approved revised Stage 2 sampling plan. Remain on quarterly monitoring for TTHMs and HAA5s until the Running Annual Average TTHM concentration is less than or equal to 60 ug/L and the Running Annual Average HAA5 concentration is less than or equal to 45 ug/L.

Please note, you must submit an Operational Evaluation Level report to the Department by no later than the 10<sup>th</sup> day following the end of any calendar quarter that you violate the OEL for either TTHMs OR HAA5s. The format is also available at the [DEP Drinking Water forms page](#)

**\*\*** Please note, if you do qualify to return to Annual monitoring for TTHMs and HAA5s after the monitoring during the first and second calendar quarters of 2018 has been performed, you will still be required to collect one dual set of samples for TTHMs and HAA5s during the third calendar quarter (July/August/September) of 2018.

**\*\*\*** Collect your Annual samples for the SOCs of Dalapon, Hexachlorocyclopentadiene, and Di(2-ethylhexyl)phthalate during the second calendar quarter (April/May/June) of 2018.

**\*\*\*\*** Routine monitoring under the Revised Total Coliform Rule requires this water system to collect microbiological samples at the rate of 1 raw water sample from each well and ONE distribution sample/calendar QUARTER. Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

This chart is the DEP's good faith assessment of the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

\* Routine monitoring under the Revised Total Coliform Rule requires this water system to collect microbiological samples at the rate of 1 raw water sample from each well and ONE distribution sample/calendar QUARTER. Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

**\*** During the third calendar quarter (July/August/September) of 2018, perform Routine/Annual monitoring for TTHMs and HAA5s under Stage 2 of the Disinfectants and Disinfection Byproducts Rule by collecting 1 dual sample set. A dual sample set consists of a set of two samples collected at the same time and location, with one sample analyzed for TTHMs and one sample analyzed for HAA5s. The dual set of samples must be collected at the location (and during the specific month) identified in your DEP approved Stage 2 monitoring plan.

**\*\*** Collect your Annual sample for the SOC of Dalapon during the second calendar quarter (April/May/June) of 2018.

**\*\*\*** Routine monitoring under the Revised Total Coliform Rule requires this water system to collect microbiological samples at the rate of 1 raw water sample from each well and ONE distribution sample/calendar QUARTER. Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

**\*** Continue quarterly monitoring for the Disinfection Byproducts of TTHMs and HAA5s at the rate of one dual set/quarter during each calendar quarter of 2018. A dual set consists of a set of two samples collected at the same time and location, with one sample analyzed for TTHMs and one sample analyzed for HAA5s. A dual set of samples must be collected at the location (and during the specific month of each calendar quarter) identified in your DEP approved revised Stage 2 sampling plan. Remain on quarterly monitoring for TTHMs and HAA5s until the Running Annual Average TTHM concentration is less than or equal to 60 ug/L and the Running Annual Average HAA5 concentration is less than or equal to 45 ug/L.

Please note, you must submit an Operational Evaluation Level report to the Department by no later than the 10<sup>th</sup> day following the end of any calendar quarter that you violate the OEL for either TTHMs OR HAA5s. The format is available at the [DEP Drinking Water forms page](#)

**\*\*** Routine monitoring under the Revised Total Coliform Rule requires this water system to collect microbiological samples at the rate of 1 raw water sample from each well and ONE distribution sample/calendar QUARTER. Please note that each water system is required to develop and adhere to a written RTRC sample siting plan that is subject to State review and revision.

This chart is the DEP's good faith assessment of the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

**\*** Collect your Annual samples for the VOCs of Total Xylenes and Ethylbenzene during the third calendar quarter (July/August/September) of 2018.

**\*\*** Routine monitoring under the Revised Total Coliform Rule requires this water system to collect microbiological samples at the rate of 1 raw water sample from each well and ONE distribution sample/ calendar QUARTER. Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

This chart is the DEP's good faith assessment of the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

**\*** At a minimum, continue quarterly monitoring for the Radiological contaminants of Gross Alpha, Uranium (only if the GA is greater than 15 pCi/L), Radium 226, and Radium 228 during the first (January/February/March), second (April/May/June), and third (July/August/September) calendar quarters of 2018. Please note you may only substitute Gross Alpha for Uranium, and/or Radium 226 if the criteria identified in Rule 62-550.519, F.A.C., is met. Following the third calendar quarter of 2018, continue quarterly monitoring for the above-referenced radiological contaminants until the four most recent quarters of results are each less than the MCLs for EACH contaminant.

**\*\*** Routine monitoring under the Revised Total Coliform Rule requires this water system to collect microbiological samples at the rate of 1 raw water sample from each well and ONE distribution sample/ calendar QUARTER. Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

**\*** During the third calendar quarter (July/August/September) of 2018, perform Routine/Annual monitoring for TTHMs and HAA5s under Stage 2 of the Disinfectants and Disinfection Byproducts Rule by collecting 1 dual sample set. A dual sample set consists of a set of two samples collected at the same time and location, with one sample analyzed for TTHMs and one sample analyzed for HAA5s. This set of samples must be collected at the location (and during the specific month) identified in your DEP approved *revised* Stage 2 monitoring plan.

**\*\*** Routine monitoring under the Revised Total Coliform Rule requires this water system to collect microbiological samples at the rate of 1 raw water sample from each well and ONE distribution sample/ calendar QUARTER. Please note that each water system is required to develop and adhere to a written RTRC sample siting plan that is subject to State review and revision.
