

BE A GREEN GUEST

Dear guest,
Every day, millions of gallons of water are used to wash towels that have only been used once.

IT'S YOUR CHOICE:

A towel on the rack means:
"I will use again."

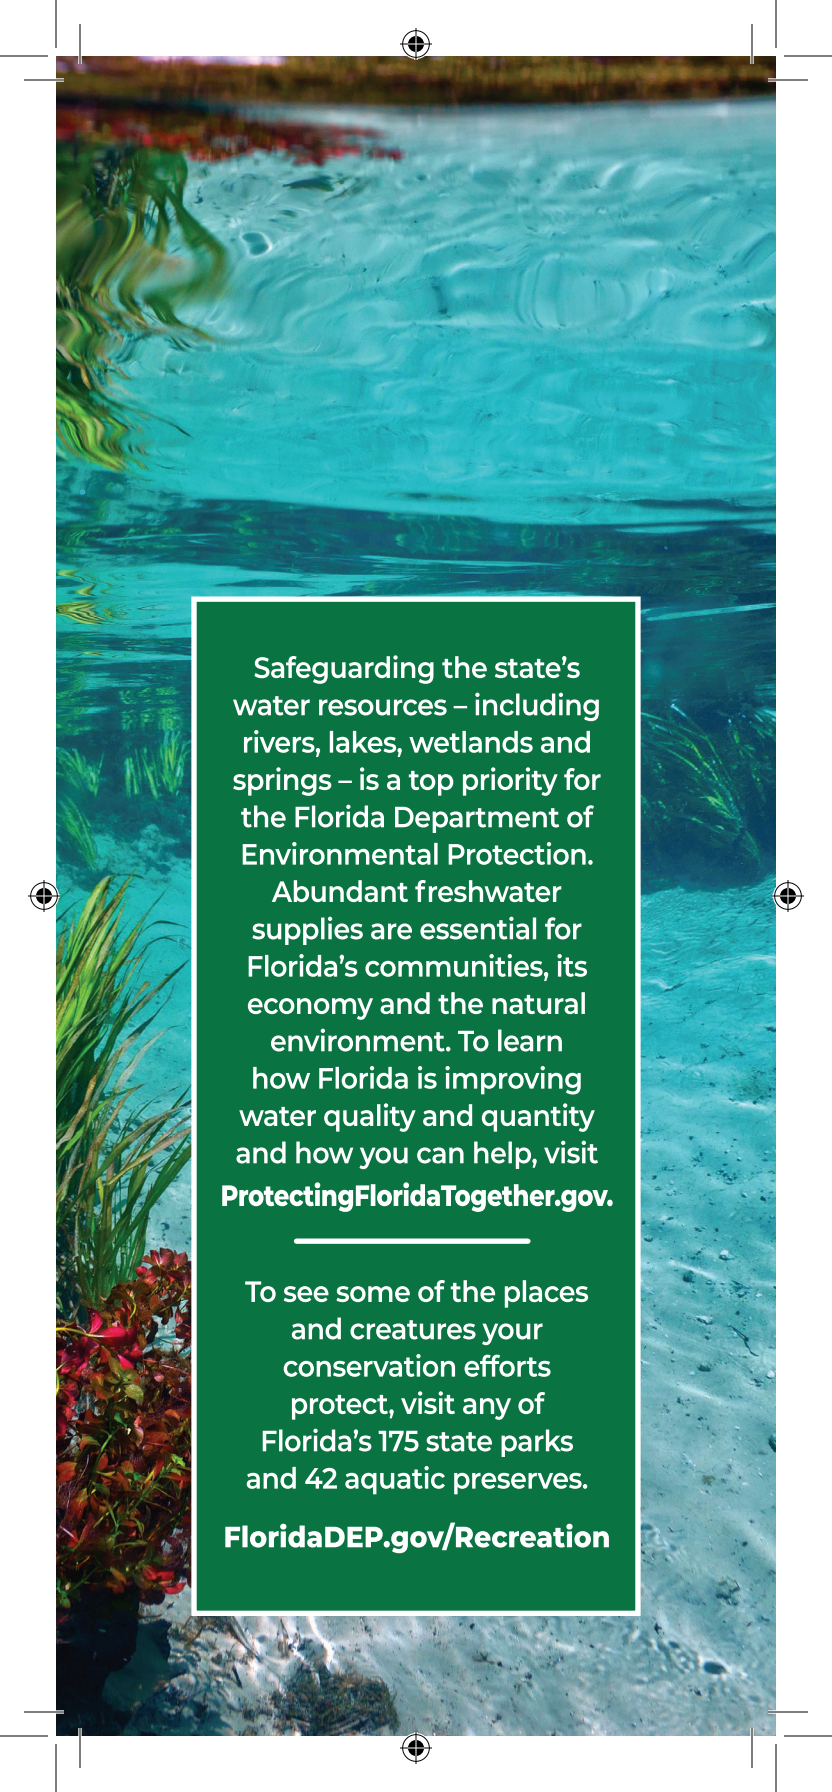

A towel on the floor means:
"Please replace."

THANK YOU
for helping us to
conserve Florida's
vital resources.

Florida GREEN Lodging Program

Florida
GREEN
Lodging

An underwater photograph showing a sandy bottom with various aquatic plants. In the foreground, there are green and red plants. The water is clear and blue. The background shows more green plants and a sandy bottom.

Safeguarding the state's water resources – including rivers, lakes, wetlands and springs – is a top priority for the Florida Department of Environmental Protection.

Abundant freshwater supplies are essential for Florida's communities, its economy and the natural environment. To learn how Florida is improving water quality and quantity and how you can help, visit **ProtectingFloridaTogether.gov**.

To see some of the places and creatures your conservation efforts protect, visit any of Florida's 175 state parks and 42 aquatic preserves.
