## PETROLEUM CLEANUP PARTICIPATION PROGRAM (PCPP) INFORMATION SHEET Section 376.3071(13)

The Florida Department of Environmental Protection's (Department) records indicate that your property may be eligible for this program. This information sheet explains what the PCPP is and how to participate. Attached is an affidavit that can be completed and returned to the Department if you want to participate in PCPP.

### WHAT IS PCPP?

PCPP is a cost-sharing clean-up program providing rehabilitation funding assistance for property currently contaminated by discharges of petroleum or petroleum products from a petroleum storage system occurring before **January 1, 1995**. The Department scores and ranks PCPP eligible discharges based on human health and safety risks. When Department funds become available to clean up the PCPP eligible discharge based on that priority ranking the Department will notify the current real property owner in writing. The property owner, operator or person otherwise responsible for site rehabilitation (owner/RP) must then prepare and provide the Department a limited contamination assessment report (LCAR) sufficient to determine the extent of the contamination and cleanup. After the approval of a complete LCAR, the owner/RP must then enter into a PCPP site rehabilitation agreement with the Department and may recommend (but is not required) a Department agency term contractor to clean up the PCPP eligible discharge. The owner/RP must pay for the LCAR and enter into a PCPP Agreement that provides the department with either a 25% copayment, or 25% cost-savings (in the form of contractor rate reduction or RMO II), or combination of copayment/cost-savings equal to 25%. For cost-savings where the owner/RP agrees to a RMOII, a Conditional Closure Agreement (CCA) will be required along with an Interim Restoration Covenant (IRC) prior to the start of work.

### WHO MAY PARTICIPATE?

The Department shall accept any discharge reporting form (DRF) received prior to January 1, 1995, as an application for this program, and the facility owner/RP need not reapply. The owner/RP may also apply by filing a written report of the contamination incident, including evidence that such incident occurred before **January 1, 1995**. **The affidavit or the written report should be submitted to the Department as notification of intent to participate in PCPP.** Owner/RP's of property contaminated by petroleum or petroleum products from a petroleum storage system who are **not** already eligible under another IPTF program (Abandoned Tank Restoration Program (ATRP), Early Detection Incentive Program (EDI), Florida Petroleum Liability Restoration Insurance Program (FPLRIP), Innocent Victim Petroleum Storage System Restoration Program (IVPSSRP)), or have **not** already completed site cleanup may participate. Additionally, property owned by the federal government when the discharge occurred or identified by the U.S. EPA to be on, or qualify for listing on the National Priorities List under Superfund are not eligible to participate.

### WHERE DO I SEND MY AFFIDAVIT or WRITTEN REPORT or WHOM DO I CONTACT FOR MORE INFORMATION?
