

SOLID WASTE MANAGEMENT REPORT OVERVIEW

Presentation Agenda

- Recovered Materials
- Recovered Materials Dealers
- Construction and Demolition Debris
- Certified and Non-Certified Tons
- Workbook
- WasteCalc
- Re-TRAC

SOLID WASTE MANAGEMENT REPORT OVERVIEW

Timeline

Feb 1: Recovered Materials Dealer, C&D and Class I/III annual reports due to FDEP.

Mar 1: Above reports submitted to the counties by FDEP.

Apr 1: County Annual Solid Waste Management Reports due to FDEP.

Jul 1: Annual Solid Waste Management Report published on FDEP website.

RECOVERED MATERIALS

- Paper.
- Plastic.
- Metal.
- Glass.
- Textiles.
- Rubber (other than tires).

RECOVERED MATERIALS DEALER

An entity that recovers & ships 600 Tons or more per year of Recovered Materials.

RECOVERED MATERIALS PROCESSING FACILITY (RMPF)

Recovered Materials Processing Facility (RMPF)

- Only processes Recovered Materials.
- Does not require a solid waste permit.

Materials Recovery Facility (MRF)

- Processes solid waste.
- Requires a solid waste permit.

- Steel.
- Glass.
- Brick.
- Concrete.
- Asphalt roofing material.
- Pipe.
- Gypsum wallboard.
- Lumber.

Clean Debris processors (i.e., concrete crushers) are not required to be permitted and, therefore, do not report to FDEP.

These are tonnages you must seek out on your own.

What Counts?

Basically, all C&D that has been <u>processed</u>, and <u>reused</u> or <u>shipped</u>.

What **Does Not** Count?

Unprocessed C&D

Asphalt, concrete, or other byproducts from road building or maintenance that are directly reused as part of an associated works project.

CERTIFIED TONS

Tons Reported to FDEP that FDEP Provides to the Counties:

- Recovered Materials Dealers Tons.
- Construction and Demolition Debris Tons.
- Class I & III Landfill Tons.

NON-CERTIFIED TONS

Tons that <u>You</u> can locate in addition to those certified by FDEP:

- Concrete.
- Food.
- Miscellaneous Retail.
- Household Hazardous Waste.
- Used Cooking oil.
- Used motor oil.
- Used auto batteries.

COMPLETING THE WORKBOOK NON-CERTIFIED TONS TAB

			concrete) ie. Landfill					
Shipped Tons	Commodity	Company	cover, fill, mulch, etc.	Address	City	Zip	Phone Number	Contact Name
0	Misc. Tab Total	Total from misc. worksheet tab						
	Processed Fuel	Total From Re-TRAC						
	White Goods	Total From Re-TRAC						
						·		

Ensure commodities match categories in the Re-TRAC Annual report:

- Paper.
- Plastic, Metals, Yard Trash.
- Processed fuel.
- Miscellaneous total.
- White goods.

COMPLETING THE WORKBOOK MISCELLANEOUS TAB

County:							
Shipped							
Tons	Commodity	Company	Address	City	Zip	Phone Number	Contact Name

Anything that does not have a category in Re-TRAC such as batteries, paint, used cooking & motor oil, e-waste.

The Miscellaneous total will automatically populate in the Non-Certified Tons tab and the total goes in the Miscellaneous category in Re-TRAC.

COMPLETING THE WORKBOOK LANDFILLED TONS TAB

	+	-		
		County	Landfilled	
Facility Name	Facility Type	Owned?	Tons	Comments
Certified C&D Tons	NA	NA		
COUNTY OWNED FACILITIES				
	Class I	Yes		
	Class III	Yes		
Landfilled/Disposed Tons Not Included Above				
Transferred Out of State		No		
		No		
Total Landfilled		•	0	

Account for <u>All</u> landfilled tons generated in your county which includes:

- Certified C&D landfilled tons from Certified C&D Report.
- Tons transferred out-of-state, Landfill Report.
- If there is a discrepancy in Landfill Report, put in Landfill Report tons minus the difference and why in comment section.

COMPLETING THE WORKBOOK

Where can you find additional uncertified tons?

- Concrete processors.
- Food banks.
- Big-box stores.
- County HHW collection events.
- Food service industry.
- Auto service industry.

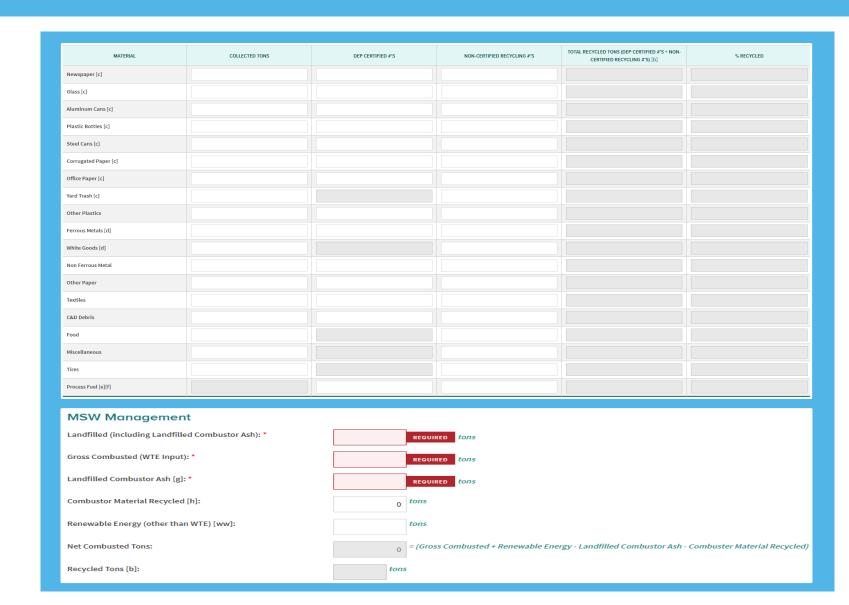

STARTING THE REPORT IN Re-TRAC

Enter Certified RM and C&D.

Enter Non-Certified Materials Tons From Workbook.

Enter MSW Management Data.

Re-TRAC

Workbook: Re-TRAC:

Non-Certified Total = Non-Certified Column

Misc. Tab Total = Misc. Category

Landfill Tab Total = Landfilled Total

USING WASTE-CALC

DEPARTURE OF THE PROPERTY OF T

WasteCalc Public Reports

Division of Waste Management

Estimate your county's waste composition data online

2019 WasteCalc Introduction:

Welcome to the Florida Waste Composition Calculation Model (WasteCalc), a user-friendly tool to estimate the composition of municipal solid waste (MSW) generated in Florida counties. The composition data generated by WasteCalc should prove useful for annual reporting purposes, as well as solid waste and recycling program planning.

WasteCalc was originally funded through a Florida Department of Environmental Protection (FDEP) innovative recycling grant, and was developed by Pinellas County, Franklin Associates, and Kessler Consulting in 2000. The University of Florida has updated the model by changing the estimation methods for some materials and utilizing US EPA waste generation data and waste composition data from Florida counties to provide more accurate MSW material composition results.

2019 WasteCalc Model

The 2018 WasteCalc model uses the same technique as the original WasteCalc model. It is used to estimate the percent MSW composition in a county's waste stream by using waste composition study data and US EPA generation data. The waste composition studies used were completed after 2002. The US EPA data was updated using the Characterization of Municipal Solid Waste in the United States: 2015 Update report, the most recent publishing. This is the most up-to-date model.

Should you have questions or comments about WasteCalc, please contact: Jennifer L. Simmons at Jennifer.L. Simmons@floridadep.gov.

Please be sure to open WasteCalc in Chrome, Firefox, or Edge web browsers for optimum functionality. This site is not supported by Internet Explorer (IE).

Click on the button below to begin using WasteCalc.

WasteCalc

USING WASTE-CALC

Calculate Re-TRAC Collected Tons

- Select year.
- Select County.
- Enter Population.
- Enter MSW Landfilled Tons.
- Enter TOTAL Collected C&D Tons.
- Enter Combusted (WTE/Renewable Energy, if any).
- Enter Total Recycled Tons by commodity.

USING WASTE-CALC

Waste-Calc results for Collected tons or tons from your own county waste composition study should be used to calculate Collected Commodity tons in Re-TRAC.

	WASTECALC				
1	Current Year:	2022 🗸			
2	Enter County:	~			
3	Enter County Population:				
4	Enter MSW Landfilled (in tons):				
5	Enter Collected C&D (in tons)*:				
6	Enter MSW Net Combusted by WTE (in tons):				
7	Enter MSW Net Combusted by Renewable Energy (not WTE) (in tons):				

WASTE-CALC TONS

	WASTECALC						
1	Data Year (DON'T EDIT):	2015					
2	Current Year:	2017 🗸					
3	Enter County:	Alachua 🗸					
4	Enter County Population:	600,000					
5	Enter MSW Landfilled (in tons):	277,367					
6	Enter Collected C&D (in tons):	102,219					
7	Enter MSW Net Combusted by WTE (in tons)):	600,000

Total Recycled	191,877		
Total MSW collected		100%	1,138,229

Re-TRAC

Collected Tons

- Collected Tons by commodity must equal Total MSW Collected Tons.
- If the totals are different, adjust Collected Miscellaneous amount to make them equal.
