Re: Final Submittal: Proposed Revision to State Implementation Plan – Chapter 62-296, F.A.C., Stationary Sources – Emission Standards Rule Removals and Amendments

Dear Mr. Blackman:

In accordance with 40 C.F.R. 51.103, the Florida Department of Environmental Protection (Department) requests approval of a State Implementation Plan (SIP) revision for – Chapter 62-296, F.A.C., Stationary Sources – Emission Standards Rule Removals and Amendments.

On December 15, 2021, the Department published in the Florida Administrative Register a notice of opportunity to submit comments regarding this proposed SIP revision, request a public hearing, or participate in a public hearing on January 19, 2022, if requested. No hearing was requested, and no hearing was held. This process met the public participation requirements of 40 C.F.R. 51.102.

This proposed SIP revision consists of the removal of outdated or superseded Florida Administrative Code (F.A.C.) requirements including the required CAA Section 110(l) noninterference demonstration. The proposed SIP revision also incorporates amendments to F.A.C. rules to make Florida's SIP consistent with current rules. EPA incorporates F.A.C. rules into Florida's SIP on a rule-by-rule basis according to their state-established effective dates. The rule language that DEP is requesting be removed from, or amended within, Florida's SIP is contained in Chapter 62-296, F.A.C., Stationary Sources – Emission Standards.

The Department has sent the complete proposed SIP submittal package directly to the Air Planning & Implementation Branch via EPA's State Planning Electronic Collaboration System (SPeCS).

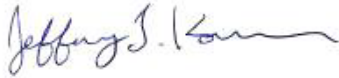

Mr. Daniel Blackman
