APPLICATION FOR PETROLEUM CLEANUP PROGRAM SITE REHABILITATION FUNDING ALLOCATION (SRFA) AGREEMENT

This application is for a site rehabilitation funding allocation (SRFA) agreement pursuant Section 376.30714, Florida Statutes (F.S.), to establish the respective cleanup obligations of the Department of Environmental protection (Department) for the eligible discharge and of the applicant for the ineligible discharge and the cleanup priority for the site.

Applications for a SRFA agreement must be submitted to the Department at the address below within 120 days after discovery of the new discharge, together with a limited contamination assessment report (LCAR), sufficient to demonstrate the extent of the new discharge or the impact of the new discharge relative to the existing contamination, and to establish the cleanup priority for the site.

SRFA Coordinator
Petroleum Restoration Program
Florida Department of Environmental Protection
2600 Blair Stone Road, Mail Station 4575
Tallahassee, Florida 32399-2400
(850) 245-8839

Certain sites are excluded from participation, as follows:

- Sites owned or operated by the federal government at the time of the new discharge;
- Facilities that failed to correct a violation previously cited which contributed to or caused the new discharge;
- Discharges intentionally caused by the owner, operator, responsible party or applicant;
- Sites where the Department has been denied access;
- Sites that are identified on the National Priorities List; and
- Sites where the entity required to report the discharge or initiate free product recovery failed to do so as required by Department rules.

The information requested below must be provided to enable the Department to properly review and consider this application (only one application may be submitted for any new discharge under this program):

**APPLICATION FOR PETROLEUM CLEANUP PROGRAM
SITE REHABILITATION FUNDING ALLOCATION (SRFA) AGREEMENT**

IV. Limited Contamination Assessment Report (LCAR)

The purpose of the LCAR is to demonstrate the extent of the new discharge and may include any evidence relevant to establish the extent or volume of the new discharge, or the impact of the new discharge relative to the existing contamination, in order to accurately allocate the appropriate funding responsibilities of the applicant for the new discharge and of the Department for the existing eligible contamination. The LCAR will be further used as a basis for establishing the priority in which cleanup of the new discharge and the existing contamination will occur, based on the provisions of subsection 376.3071(5)(a), F.S., and taking into consideration the cost-effectiveness associated with the timing of site rehabilitation activities.

The LCAR must be provided with this application and must conform to the requirements set forth in Attachment A. Due to the statutory time constraints associated with submittal of the application and negotiation of the agreement following a new discharge, it will not be possible for the Department to request and obtain supplemental assessment data for the new release. Therefore, a consequence of an inadequate LCAR may be that the Department will be unable to negotiate an agreement or that negotiations may be delayed.

In addition to the required LCAR, the applicant may include with this application any other evidence which is relevant to establish the extent or volume of the new discharge or the impact of the new discharge relative to the existing contamination in order to help establish the appropriate funding responsibilities of the applicant and the Department.

V. Applicant's Certification

The undersigned applicant, under penalty of perjury, hereby certifies that the applicant has the authority to negotiate and enter into a Site Rehabilitation Funding Allocation Agreement with the Department of Environmental Protection and qualifies as an applicant pursuant to Section 376.30714, Florida Statutes.
