2017 Project Evaluation Update

(Project Submitted for 2015 Cycle)
Prepared by Florida Forest Service

Rural & Family Lands Protection Program "Protecting Florida's Agricultural Lands into the Future"

Rural and Family Lands Protection Program Project Summary

Project Name: Ryals Cattle Company

Owner: Ryals Citrus and Cattle, LLC

County: Charlotte

Total Land Area: 2,845 acres / Upland: 2,395 acres

Wetland: 450 acres

Land Uses:

Citrus:

Improved Pasture: 1,900 acres Planted Timber:

Native Pasture: Natural Forest (Upland): 195 acres

Row Crops: 300 acres Natural Forest (Wetland): 450 acres

Sod: Marsh / Wet Prairie:

Hay / Silage: Other:

Agricultural Uses:

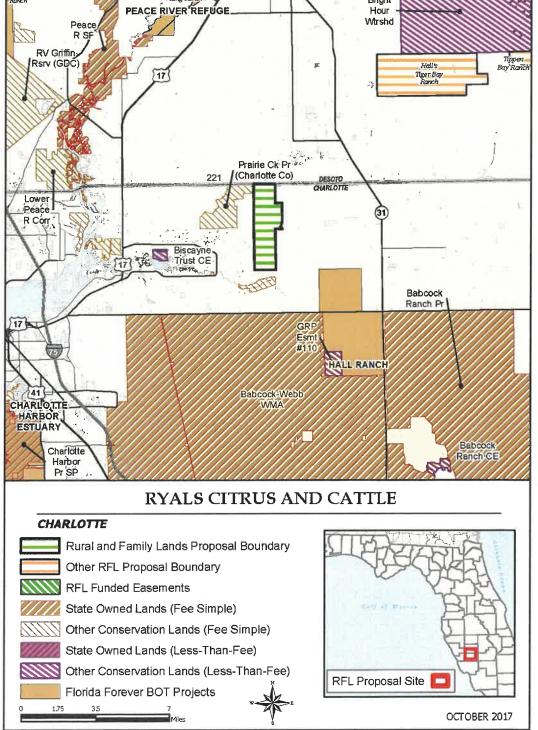

• Cow/Calf

• Row Crops / Watermelons

Property Description:

Agricultural activities on the property include a cow/calf operation, sod farming, and a seven year rotational watermelon crop. Multiple assistance programs are in place. The property is in close proximity to Prairie Creek on the north and Shell Creek on the south and is identified as a priority in the Babcock / Myakka connection.

RURAL AND FAMILY LANDS PROTECTION PROGRAM PROPOSAL BOUNDARY AS OF OCTOBER 2017

Public Purposes as Determined by the DACS Technical Team

Does the Project Comply with RFLPP Goals and Objectives:

Score

(None, Low, Moderate, High)

• Protects the integrity and function of working landscapes

High

• Ensures opportunities for viable agricultural activities on working lands threatened by conversion to other uses

Moderate

Does the Property Meet Any Public Purposes:

Score

(None, Low, Moderate, High)

• Perpetuates open space on working lands that contain significant natural areas:

Low Low

• Protects, restores or enhances water bodies, aquifer recharge areas including upland and springsheds, wetlands, or watersheds:

• Promotes a more complete pattern of protection, including buffers to natural areas, ecological greenways, functioning ecosystems and military installations:

Moderate

• Promotes the restoration, enhancement or management of species habitat:

Low

Agricultural or Silvicultural Legacy

The Ryals Family has been ranching in Charlotte and De Soto Counties since the 1920's and on this particular property for three generations. The Ryals Family generates income through agricultural activities including cow/calf operations, sod production, and a five-year rotational watermelon crop. The family also leases additional land for grazing to ensure an economically feasible operation.

Score

DACS Staff Assessment (site visit) – Agricultural Legacy:

(None, Low, Moderate, High)

• Benefits related to agric/forestry legacy, historical structures, etc.

Moderate

Description of Agricultural Uses from DACS Technical Team Site Visit

Silviculture Operations

The 195 aces of upland forest consists of scattered, small, low density stands of South Florida slash pine that are not suitable for commercial harvest.

		Score
\mathbf{D}	ACS Staff Assessment (site visit) – Silviculture/Forestry	(None, Low, Moderate, High)
•	Silvicultural BMP's followed during forestry operations(Yes/No)	N/A
•	Quality of forestry/ silvicultural operations	N/A
•	Suitability of the project's land for long-term forestry / silvicultural	use N/A

Cow / Calf - Livestock Operations

The Ryals Ranch is a commercial cattle operation with 3 herds of approximately 200 head of cattle per herd. The cattle are still nursing 500+ lb calves. The stocking rate appears to be adequate. Rotational grazing is utilized on the property.

The following programs are in place: a controlled breeding program (bulls are out with cattle for a 90-day breeding period); an animal identification program (cattle are branded, some have bangle tags or calf-hood brucellosis metal tags); a vaccination program (treats for internal and external parasites); and a supplemental feeding program (molasses is fed as needed as well as free choice mineral year-round).

Pasture fertilization is practiced in conjunction with soil sampling on the property. Phosphorus is not included in the fertilizer mix. Weed control is taking place on the property. Approximately 1/3 of the pastures is burned once every 3 to 5 years.

The property contains a few working cow horses. Water sources consist of mostly ponds and canal ditches. Fencing, pens and gates appear to be in good condition. A camp house for family use is located on the property.

		Score
D	ACS Staff Assessment (site visit) - Cow / Calf Operations	(None, Low, Moderate, High)
•	Beef quality assurance guidelines implemented (Yes/No)	Yes
•	Quality of cow-calf / livestock operations	Moderate
•	Suitability for long-term ranch / cow-calf /or other livestock use	High

Farming Operations / Other Agricultural Uses

Hay is produced and cut once a year.

Participation in Government Partnerships / Cost Shares

They have been involved with several NRCS projects including the Wildlife Habitat Incentive Program (WHIP), and the EQIP program. These programs have helped with controlling invasive plants and enhancing better wildlife habitat on the property.

Overall DACS Agricultural Production / Marketing Observations

Generally, this is a cow calf operation that occasionally is used for watermelon production and then returned to pasture lands. This operation can have future use in agriculture. A large-scale sod operation borders the east side of the ranch. This ranch can serve as a wildlife buffer and help enhance the water quality as it filters through the ranch. A lot of native pastures, with some improved pastures, could help keep this operation in long-term use. The cattle are marketed through satellite video auction and the remainder is sent to the local auction market. The Best management practices are utilized on this operation and it is part of their everyday management system.

DACS Staff Assessment (site visit) -Overall Agric. Production: (None, Low, Moderate, High)

• Participation in the DACS Agricultural BMP Program (Yes/No)

Yes

Quality of agricultural production

Moderate

• Suitability of project for long-term agricultural use

High

Property Maintenance & Other Activities

Prescribed Fire Regime

There have been no wildfires or prescribed fire implemented in the natural areas in the recent past. Approximately 1/3 of the pastures is burned once every 3 to 5 years.

Presence of Non-Native Invasive Species

Brazilian pepper, cogon grass, melaleuca and tropical soda apple occur on the property. According to Mr. Dodd, he chemically treats the cogon grass on the property periodically.

Recreational Use / Hunting

The primary recreational use of the property is hunting by family and friends of the family.

Agricultural/Forestry Government Program Participation:

Natural Features – Habitat and Wildlife Resources

Florida Natural Areas Inventory (FNAI) Observations (2017 Update):

The Ryals Cattle Company proposal includes approximately 2,845 acres in north-central Charlotte County. It is a contiguous 4-mile long, north-south oriented piece of property that contains a portion of Prairie Creek as it flows west to the Peace River. Punta Gorda and Port Charlotte are approximately 12 miles to the west. County Road 74 is 2 miles to the south, and State Road 31 less than 5 miles to the east.

Prairie Creek takes a meandering 1.5-mile route through the northern part of the property as it enters from DeSoto County and makes its way to Prairie Creek Preserve to the west. The creek is bordered by intact scrubby and mesic flatwoods and possibly some mesic hammock. Another area of relatively intact flatwoods occurs on the eastern boundary where the boundary juts out. About 80% of the Ryals Cattle Company property is in intensive agriculture, primarily citrus and row crops. Disturbed depression marsh wetlands are scattered throughout the agricultural area. Historically, scrubby and mesic flatwoods were probably the dominant natural communities present in what are currently agricultural lands.

Although no rare species are documented on the property, the application reports the presence of gopher tortoise, Florida sandhill crane, and wood stork, as well as a host of wading birds, including snowy egret, little blue heron, and tricolored heron, all state species of special concern. Florida scrub-jays have been seen off-site along the western boundary.

Natural Features (continued)

DACS Technical Team Site Visit Observations:

The property is composed primarily of improved pasture for the cow/calf operation. The property as a whole completes a corridor linkage between Charlotte County's Prairie and Shell Creek Preserves. Additionally, it has been identified as a wildlife corridor as part of the FWC Cooperative Conservation Blueprint.

This area does have natural upland areas containing timber resources, however, commercial timber operations are not conducted on the property and are not anticipated at any point in the future.

The entire parcel is classified as a ranch, with cattle operations being conducted throughout the entirety of the property. The natural areas are primarily uplands in moderate condition with a significant buildup of rough and limited vegetative diversity. This is most likely due to the timing/lack of prescribed burns, particularly in the upland flatwoods, and cattle grazing what little herbaceous vegetation is available within the flatwoods rough.

The natural habitat and resources are still viable and functional within the landscape, but are doing so short of their potential. As detailed in the acreage breakdown, a vast majority of the property consists of improved pasture with pasture grasses and other non-native vegetation encroaching on all of the wetlands observed.

The condition and location of the property would indicate that various types of wildlife including, but not limited to, deer, small mammals, various reptiles, and various bird species are all present in the area. The gopher tortoise is the only listed species that has been documented to occur on the property.

Low

Florida Fish and Wildlife Conservation Service (FWC)

The FWC uses the Integrated Wildlife Habitat Ranking System (IWHRS 2009) Geographic Information System (GIS) model to interpret wildlife habitat value on a scale from 0 to 10; a rank of 10 being of greatest value. This GIS model ranks landscape level wildlife habitat of importance to terrestrial vertebrates including listed species, focal species, or species that are otherwise rare or imperiled. Application of this model assists in the identification and conservation of important wildlife habitats.

The project has an IWHRS 2009 mean score of 3.5

Hydrological Resources and Conditions

Southwest Florida Water Management District Observations (SWFWMD):

A small portion of the property intersects the 100 year floodplain zone (A). Part of the property is located within the Prairie Creek basin (DO) and near Myrtle Slough (mercury in fish, Iron, & fecal coliform). Numerous ditches and creeks cross the property.

The property contains ephemeral and forested freshwater wetlands. The majority of the property lays within a discharge zone of 0.0-9.9 inches per year. On-site recharge varies from -0.53 to -0.87 inches per year. The property is not located with any known springsheds. No known spring vents occur on the property.

Score

SWFWMD Assessment – Hydrological Resources:

• Overall hydrological resource benefit

(None, Low, Moderate, High) Moderate

DACS Technical Team Site Visit Observations - Hydrological/Wetland Conditions:

This property discharges into both Prairie Creek and Shell Creek, and during times of high water the flow way is quite significant. Cattle routinely visit cow wells, streams, and wetlands as a source for water.

Water sources consist of mostly ponds and canal ditches.

Basin Management Action Plan

Is the property located within a geographic region protected by a Basin Management Action Plan as adopted by DEP Executive Order?(yes/no)

Yes

A Basin Management Action Plan (BMAP) is the "blueprint" for restoring impaired waters by reducing pollutant loadings to meet the allowable loadings established in a Total Maximum Daily Load (TMDL). A BMAP represents a comprehensive set of strategies - permit limits on wastewater facilities, urban and agricultural best management practices, conservation programs, financial assistance and revenue generating activities, etc. - designed to implement the pollutant reductions established by the TMDL. These broad-based plans are developed with local stakeholders relying on local input and local commitment - and BMAPs are adopted by Secretarial Order to be enforceable.

Connectivity / Buffering Benefit

Florida Department of Environmental Protection Observations (DEP):

There are no Florida Forever Projects adjacent to the property. Any benefits would be minimal. Other agency managed public conservation lands or conservation easements adjacent to this project are Charlotte County Prairie Creek Preserve.

The property is adjacent to one managed area with other conservation lands in the area. Connectivity benefits would be moderate. The property could provide a buffer to a small portion of Prairie Creek Preserve to the east. Buffering benefits would be moderate.

Adjacent Public Land Manager's Observations:

Prairie Creek Preserve, Charlotte County - Prairie Creek Preserve is central to the Habitat Conservation Plan for Charlotte County as a fundamental base in our reserve design. Conservation Charlotte was established to preserve our native Floridian flora and fauna, connectivity is essential. Within 2 miles are Biscayne Conservation Easement and Shell Creek Preserve, the intention is to establish connectivity with those properties and with the Cecil M. Webb Wildlife Management Area.

The Prairie Creek Preserve property supports 6-7 family groups of Florida Scrub Jays with approximately 35 birds. The benefit of buffering adjacent lands will facilitate immigration / emigration of genetic material. Currently, the only dispersal avenue for the offspring of jays on the preserve is to the south through the two housing communities.

Florida Natural Areas Inventory (FNAI) (2017 Update):

Prairie Creek Preserve (Charlotte County) is adjacent to the property's northwestern corner; one third of a mile to the south is Shell Creek Preserve, also county-owned. Fred C. Babcock-Cecil M. Webb Wildlife Management Area (FWC) is 2 miles south. Florida Forever BOT Projects in the vicinity include: Hall Ranch to the south; Peace River Refuge to the north, and Myakka Ranch Lands to the northeast. There are several land units such as Lower Peace River Corridor, Prairie/Shell Creek, and RV Griffin Reserve that act as steppingstones between Ryals Citrus and Cattle Company, Prairie Creek Preserve, and the Peace River and Myakka complex of lands to the west. According to the application, the Ryals Citrus and Cattle Company property is noted as an instrumental piece in the effort to connect the Babcock conservation lands with the Myakka Island Complex about 10 miles to the northwest. There are no FFS conservation easements in the region.

Land Planning and Growth Management

Florida Department of Economic Opportunity Observations (DEO):

Land Use Designation

The property's existing land use designation is Agriculture and includes an active cattle ranch, premium sod producers, occasional watermelon production, and some citrus crop activities. The surrounding land to the north and the east is designated Agriculture characterized by pasture lands and farming. To the south-west is a residential subdivision on property designated as Rural Estate Residential. There is preservation lands to the west (Prairie Creek) and the south (Shell Creek).

Threats of Conversion

If developed at the permitted density under the Agriculture Future Land Use Map (FLUM) designation, the maximum residential density would provide 284 units, 12.4 million square feet intensity. As the property is located within the identified Critical Wildlife Corridors in the Charlotte County FLUM Series Map No. 22, it is eligible for an increase in development potential to 568 units with a requirement for 70% of the site to be placed into open space conservation and restoration of critical habitats.

Development Trends

The subdivision to the southwest is adjacent to the property, and is between both of the nearby preservation areas. There is also additional residential development to the east.

FLORIDA FOREST SERVICE

Rural and Family Lands Program Ryals Citrus and Cattle, LLC Charlotte County

Managed Area boundaries courtesy of the Florida Natural Areas Inventory

Project: Ryals Cattle Company Charlotte County

OPTION AGREEMENT FOR SALE AND PURCHASE

THIS OPTION AGREEMENT FOR SALE AND PURCHASE ("Agreement") is made this _____ day of ____, 202___, between Ryals Citrus and Cattle, LLC, a Florida limited liability company, whose address is P.O. Box 127 Fort Ogden, FL 34267 as "Seller," and the BOARD OF TRUSTEES OF THE INTERNAL IMPROVEMENT TRUST FUND OF THE STATE OF FLORIDA ("Trustees"), whose address is Florida Department of Agriculture and Consumer Services ("FDACS"), Florida Forest Service, 3125 Conner Boulevard, C-25, Tallahassee, Florida 32399-1650, as "Buyer." Buyer's agent in all matters shall be the Florida Forest Service.

- 1. GRANT OF OPTION. Seller hereby grants to Buyer the exclusive option to purchase a perpetual conservation easement (the "Easement") in the entirety of the real property located in Charlotte County, Florida, described in Exhibit "A" (the "Property"), in accordance with the provisions of this Agreement. This Agreement becomes legally binding on execution of this Agreement, but exercise of the option is subject to approval by Buyer and is effective only if FDACS gives written notice of exercise to Seller.
- OPTION TERMS. The consideration for the option granted by this Agreement is \$100.00 ("Option 2. Payment"). Upon execution of this Agreement by FDACS, FDACS will apply to the Chief Financial Officer for a state warrant in the amount of the Option Payment, which, will be forwarded to the escrow agent to hold for the benefit of Seller. The Option Payment is non-refundable such that Seller shall be entitled to retain the Option Payment regardless of whether Buyer exercises the Option; Provided, however, the Option Payment shall be credited toward the purchase price at closing if Buyer timely exercises the option as discussed below. The option may be exercised during the period beginning with Buyer's approval of this Agreement at a regularly scheduled meeting of the Governor and Cabinet sitting as the Trustees, and ending 120 days after Buyer's approval of this Agreement ("Option Expiration Date"), unless extended by other provisions of this Agreement. If Buyer's funds in the amount of the purchase price (as hereinafter defined in paragraph 3.A.) are not available by the Option Expiration Date the period of exercise of the option may be extended until such funds become available, not to exceed 60 days after the Option Expiration Date, by written notice to Seller. If Buyer's funds are not available at the end of the 60-day extension then this Agreement shall terminate and neither party shall have further obligations under the provisions of this Agreement, If Buyer does not exercise its option by the Option Expiration Date, as extended if applicable, then the escrow agent is directed to release and disburse the Option Payment to Seller the following day. If Buyer does timely exercise its option, then escrow agent shall credit the Option Payment toward the purchase price paid by Buyer at closing.
- 3.A. PURCHASE PRICE. The purchase price for the Easement is EIGHT MILLION, SIX HUNDRED NINE THOUSAND, ONE HUNDRED FIFTY DOLLARS (\$8,609,150) ("Initial Purchase Price") which, after credit for the Option Payment, will be paid at closing. Seller hereby authorizes Buyer to issue a state warrant for the Purchase Price directly to an escrow agent who is authorized by law to receive such payment, and who is acceptable to Buyer, and to require the escrow agent to pay Seller's expenses of sale and real estate taxes. The Initial Purchase Price is subject to adjustment in accordance with paragraph 3.B. This Agreement is contingent upon approval of the Final Adjusted Purchase Price, hereinafter defined, by Buyer and upon confirmation that the Final Adjusted Purchase Price is not in excess of the maximum value of the Easement as determined in accordance with Section 253.025(8), Florida Statutes ("FDACS Approved Value"). The determination of the FDACS Approved Value and the Final Adjusted Purchase Price can only be made after the completion and FDACS's approval of the survey required in paragraph 6.
- 3.B. ADJUSTMENT OF PURCHASE PRICE. If, prior to closing, FDACS determines that the Initial Purchase Price exceeds the FDACS Approved Value of the Easement, the Initial Purchase Price will be reduced to the FDACS Approved Value of the Easement (herein the "Final Adjusted Purchase Price"). If the Final Adjusted Purchase Price is less than 95% of the Initial Purchase Price because of the adjustment provided for in this paragraph, Seller shall, in Seller's sole discretion, have the right to terminate this Agreement and neither party shall have any further obligations under this Agreement. If Seller elects to terminate this Agreement, Seller shall provide written notice to FDACS of Seller's election to terminate this Agreement within 10 days after Seller's receipt of written notice from FDACS of the Final Adjusted Purchase Price. If Seller fails to give Buyer a written notice of termination within the aforesaid time period from receipt of FDACS' written notice, then Seller shall be deemed to have waived any right to terminate this Agreement based upon a reduction in the Initial Purchase Price pursuant to the provisions of this paragraph 3.B. The Final Adjusted Purchase Price as calculated in this paragraph 3.B. is subject to further adjustment in accordance with the provisions of this Agreement. The Initial Purchase Price and the Final Adjusted Purchase Price, whichever is applicable depending on whether or not an adjustment has occurred under the provisions of this paragraph 3.B. are hereinafter referred to as the "Purchase Price".

Rev 2/17/2023

- 4. <u>ENVIRONMENTAL SITE ASSESSMENT</u>. Buyer, prior to the exercise of the option and at its sole cost and expense, may conduct an environmental site assessment of the Property to determine the existence and extent, if any, of any Hazardous Materials on the Property. If further investigations, testing, monitoring or environmental site assessments are required by FDACS to determine the existence or extent of Hazardous Materials on the Property, Buyer, at its sole option may elect to extend the Option Expiration Date to conduct such procedures at the Buyer's sole cost and expense. For purposes of this Agreement "Hazardous Materials" shall mean any hazardous or toxic substance, material or waste of any kind or any other substance which is regulated by any Environmental Law (as hereinafter defined in paragraph 5.)
- HAZARDOUS MATERIALS. If the environmental site assessment provided for in paragraph 4 confirms the presence of Hazardous Materials on the Property, Buyer, at its sole option, may elect to terminate this Agreement and neither party shall have any further obligations under this Agreement. Should Buyer elect not to terminate this Agreement, Seller shall, at Seller's sole cost and expense and prior to the exercise of the option and closing, promptly commence and diligently pursue any assessment, clean up and monitoring of the Property necessary to bring the Property into full compliance with Environmental Law to FDACS' satisfaction in its sole discretion. "Environmental Law" shall mean all federal, state and local laws, including statutes, regulations, ordinances, codes, rules, judgments, orders, decrees, permits, concessions, grants, franchises, licenses, agreements and other governmental restrictions relating to the protection of the environment or human health, welfare or safety, or to the emission, discharge, seepage, release or threatened release of any contaminant, solid waste, hazardous waste, pollutant, irritant, petroleum product, waste product, radioactive material, flammable or corrosive substance, carcinogen, explosive, polychlorinated biphenyl, asbestos, hazardous or toxic substance, material or waste of any kind into the environment, including, without limitation, ambient air, surface water, ground water, or land including, but not limited to, the Federal Solid Waste Disposal Act, the Federal Clean Air Act, the Federal Clean Water Act, the Federal Resource and Conservation and Recovery Act of 1976, the Hazardous and Solid Waste Amendments of 1984, the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980, the Federal Superfund Amendments and Reauthorization Act of 1986, Chapters 161, 253, 373, 376 and 403, Florida Statutes, Rules of the U.S. Environmental Protection Agency, Rules of the Florida Department of Environmental Protection, and the rules of the Florida water management districts now or at any time hereafter in effect. However, should the estimated cost to Seller of clean up of Hazardous Materials exceed a sum which is equal to 5% of the Initial Purchase Price as stated in paragraph 3.A. Seller may elect to terminate this Agreement and neither party shall have any further obligations under this Agreement. If Hazardous Materials placed on the Property prior to closing are discovered after closing, Seller shall remain obligated hereunder, with such obligation to survive the closing, delivery, and recording of the easement described in paragraph 9 of this Agreement, to diligently pursue and accomplish the clean up of Hazardous Materials in a manner consistent with all applicable Environmental Laws and at Seller's sole cost and expense.

Further, if neither party elects to terminate this Agreement as provided above, Seller shall indemnify and save harmless and defend Buyer, its officers, servants, agents and employees from and against any and all claims, suits, actions, damages, liabilities, expenditures or causes of action of whatsoever kind arising from Hazardous Materials placed on the Property prior to closing. Seller shall defend, at Seller's sole cost and expense, any legal action, claim or proceeding instituted by any person against Buyer as a result of any claim, suit, or cause of action for injuries to body, life, limb or property for which Hazardous Materials placed on the Property prior to closing are alleged to be a contributing legal cause. Seller shall save Buyer harmless from and against all judgments, orders, decrees, attorney's fees, costs, expenses and liabilities in and about any such claim, suit, investigation or defense thereof, which may be entered, incurred or assessed as a result of the foregoing.

The limitation herein on Seller's contractual obligation to indemnify Buyer as specified in this paragraph 5 shall not be construed to limit Seller's legal liability under any Environmental Law for Hazardous Materials located on the Property or to limit Buyer's legal and equitable remedies against Seller under any Environmental Law for Hazardous Materials located on the Property.

- 6. <u>SURVEY</u>. Buyer may have the Property surveyed at its expense. If the survey ("Survey"), certified by professional surveyor and mapper licensed by the State of Florida, shows any reduction in acreage from the appraised acreage to the surveyed acreage, any encroachment on the Property or that improvements intended to be located on the Property encroach on the land of others, the same shall be treated as a title defect.
- 7. <u>TITLE INSURANCE</u>. Buyer may provide a marketable title insurance commitment, to be followed by an owner's marketable title insurance policy (ALTA Form "B" with Florida revisions) from a title insurance company approved by FDACS, insuring marketable title to the Easement in the amount of the Purchase Price at Buyer's expense.

Page 2 of 10 Rev 2/17/2023

- 8. <u>DEFECTS IN TITLE</u>. If the title insurance commitment or Survey furnished pursuant to this Agreement discloses any defects in title which are not acceptable to Buyer, Seller shall, within 90 days after notice from Buyer, remove said defects in title. Seller agrees to use diligent effort to correct the defects in title within the time provided therefor, including the bringing of necessary suits. Defects arising from liens against the Property shall be satisfied at closing from Seller's proceeds. If Seller is unsuccessful in removing the title defects within said time, Buyer shall have the option to either: (a) accept the title as it then is with a reduction in the Purchase Price by an amount determined by FDACS, (b) accept the title as it then is with no reduction in the Purchase Price, (c) extend the amount of time Seller has to remove the defects in title, (d) cut out the affected portion of the Property and reduce the Purchase Price by an amount equal to the product of the Purchase Price per acre for the acres being cut out, multiplied by the acreage cut out, or (e) terminate this Agreement, thereupon releasing Buyer and Seller from all further obligations under this Agreement. If Seller fails to make a diligent effort to remove the title defects, Seller shall be in default and the provisions of paragraph 18 of this Agreement shall apply.
- 9. <u>INTEREST CONVEYED</u>. At closing, Seller shall execute and deliver to Buyer a perpetual, enforceable conservation easement in substantially the same form as hereto as Exhibit "B," free and clear of all liens, reservations, restrictions, easements, leases, tenancies and other encumbrances, except for those that are acceptable encumbrances in the sole discretion of Buyer and do not impair the marketability of the title to the Easement.
- SUBORDINATION. If at the time of conveyance of the Easement, the Property is subject to a mortgage or 9.1 other liens and encumbrances not accepted by Buyer and Seller elects to subordinate such encumbrances rather than satisfy them at closing, Seller shall obtain the agreement of the holder of such encumbrances, by separate instrument that will be recorded immediately after the Easement, to subordinate its rights in the Property to the Easement to the extent necessary to permit the Buyer to enforce the purpose of the Easement in perpetuity and to prevent any modification or extinguishment of the Easement by the exercise of any superior rights of the holder. The priority of any existing mortgage with respect to any valid claim on the part of the mortgage holder to the proceeds of any sale, condemnation proceedings, or insurance or to the leases, rents, and profits of the Property shall not be affected by the Easement, and any lien that may be created by Buyer's exercise of any of its rights under this Agreement or by Buyer's rights under the provisions of the Easement shall be junior to any such existing mortgage. Upon request, Buyer agrees to subordinate its rights under this Agreement and the Easement to the rights of any future mortgage holders or beneficiaries of deeds of trust to the proceeds, leases, rents, and profits described above and likewise to subordinate its rights under any lien and to execute any documents required with respect to such subordination, except that the priority of any lien created by Buyer's exercise of any of its rights under this Agreement or Buyer's rights under the provisions of the Easement prior to the creation of a mortgage or deed of trust shall not be affected thereby, nor shall this Agreement or the Easement be subordinated in any other respect.
- 10. <u>PREPARATION OF CLOSING DOCUMENTS</u>. Upon execution of this Agreement, Seller shall submit to Buyer a properly completed and executed beneficial interest affidavit and disclosure statement as required by Sections 286.23, 375.031(1) and 380.08(2), Florida Statutes. Buyer shall prepare the easement described in paragraph 9 of this Agreement, Buyer's and Seller's closing statements and the title, possession and lien affidavit certified to Buyer and title insurer and an environmental affidavit on FDACS forms provided by FDACS.
- 10.1 <u>BASELINE DOCUMENTATION</u>. Buyer shall prepare baseline documentation adequately documenting the condition of the Property at the date of closing. The cost of the baseline documentation shall be borne by Buyer. If the form of conservation easement provides for use of a management plan, the management plan shall be prepared as a part of the baseline documentation and the cost therefore absorbed in the same manner the cost of the baseline documentation is absorbed.
- 11. <u>FDACS REVIEW FOR CLOSING</u>. FDACS will approve or reject each item required for closing under this Agreement. If FDACS rejects an item for closing which was submitted by the Seller, Seller will have 30 days thereafter to remove and resubmit any rejected item. If Seller fails to timely deliver any items required of Seller, or FDACS rejects any item after delivery, the Option Expiration Date shall be extended until FDACS approves Seller's documents or until Buyer elects to terminate the Agreement.
- 12. <u>EXPENSES</u>. Seller will pay the documentary revenue stamp tax and all other taxes or costs associated with the conveyance, including the cost of recording the Easement described in paragraph 9. of this Agreement and any other recordable instruments that FDACS deems necessary to assure good and marketable title to the Easement.
- 13. <u>TAXES AND ASSESSMENTS.</u> Seller shall be responsible for paying all real estate taxes and assessments applicable to the Property that are legally due and payable.

Rev 2/17/2023

- 14. <u>CLOSING PLACE AND DATE</u>. The closing shall be on or before 15 days after Buyer exercises the option; provided, however, that if a defect exists in the title to the Property, title commitment, Survey, environmental site assessment, or any documents required to be provided or completed and executed, the closing shall occur either on the original closing date or within 60 days after receipt of documentation removing the defects, whichever is later. Buyer shall set the date, time and place of closing.
- 15. RISK OF LOSS AND CONDITION OF PROPERTY. Seller assumes all risk of loss or damage to the Property and warrants that the conservation easement shall be transferred and conveyed to Buyer with the Property in the same or essentially the same condition as of the date of Seller's execution of this Agreement, ordinary wear and tear excepted. If the condition of the Property is altered, by an act of God or other natural force beyond the control of Seller, however, Buyer may elect, at its sole option, to terminate this Agreement and neither party shall have any further obligations under this Agreement. Seller represents and warrants that there are no parties other than Seller in occupancy or possession of any part of the Property. Seller warrants that there are no facts known to Seller materially affecting the value of the conservation easement or the Property that are not readily observable by Buyer or which have not been disclosed to Buyer.

Seller agrees to clean up and remove all abandoned personal property, refuse, garbage, junk, rubbish, trash, and debris (hereafter, "trash and debris") from the Property to the satisfaction of FDACS prior to the exercise of the option by Buyer. If the Seller does not remove all trash and debris from the Property prior to closing, Buyer at its sole option, may elect to: (a) deduct the expense necessary to remove trash and debris from the Seller's proceeds of sale up to but not to exceed 5% of the Initial Purchase Price and proceed to close, with the Buyer incurring any additional expenses necessary to remove all trash and debris and clean up the Property subsequent to closing, (b) extend the amount of time the Seller has to remove all trash and debris from the Property, (c) terminate this Agreement, and neither party shall have any further obligations under the Agreement.

- 16. <u>RIGHT TO ENTER PROPERTY</u>. Seller agrees that from the date this Agreement is executed by Seller through Closing, Buyer, and its agents, upon reasonable notice, shall have the right to enter the Property for all lawful purposes in connection with this Agreement.
- 17. <u>ACCESS</u>. Seller warrants that there is legal and practical ingress and egress for the Property over public roads or valid, recorded easements for the use and benefit of and as an appurtenance to the Property.
- 18. <u>DEFAULT</u>. If Seller defaults under this Agreement, Buyer may waive the default and proceed to closing, seek specific performance, or refuse to close and elect to receive the return of any money paid, each without waiving any action for damages, or any other remedy permitted by law or in equity resulting from Seller's default.
- 19. <u>BROKERS</u>. Seller warrants that no persons, firms, corporations or other entities are entitled to a real estate commission or other fees as a result of this Agreement or subsequent closing, except as accurately disclosed on the disclosure statement required in paragraph 10. Seller shall indemnify and hold Buyer harmless from any and all such claims, whether disclosed or undisclosed.
- 20. RECORDING. Buyer may record this Agreement, or notice of it, in the appropriate county or counties.
- 21. <u>ASSIGNMENT</u>. This Agreement may be assigned by Buyer, in which event Buyer will provide written notice of assignment to Seller. Seller may not assign this Agreement without the prior written consent of Buyer.
- 22. TIME. Time is of essence with regard to all dates or times set forth in this Agreement.
- 23. <u>SEVERABILITY</u>. If any of the provisions of this Agreement are deemed to be unenforceable and the unenforceability of said provisions does not adversely affect the purpose and intent of this Agreement, in Buyer's sole discretion, the enforceability of the remaining provisions of this Agreement shall not be affected.
- 24. <u>SUCCESSORS IN INTEREST</u>. This Agreement shall bind and inure to the benefit of Seller and Buyer and their respective heirs, legal representatives and successors. Whenever used, the singular shall include the plural and one gender shall include all genders.
- 25. <u>ENTIRE AGREEMENT</u>. This Agreement contains the entire agreement between the parties pertaining to the subject matter contained in it and supersedes all prior and contemporaneous agreements, representations and understandings of the parties. No supplement, modification or amendment to this Agreement shall be binding unless executed in writing by the parties. Notwithstanding the foregoing, the parties acknowledge that the legal description

contained in Exhibit "A" was prepared based upon historic chain of title information, without the benefit of a current survey of the Property. The parties agree that if, in the opinion of FDACS, it becomes necessary to amend the legal description of the Property to correct errors, to more properly describe the Property, to cut out portions of the Property affected by title defects unacceptable to Buyer or which cannot be timely cured by the Seller, or to otherwise revise the legal description of the Property, the legal description to be used in the Survey (if any) and in the closing instruments required by this Agreement shall be revised by or at the direction of FDACS, and shall be subject to the final approval of FDACS. Anything to the contrary hereinabove notwithstanding, such a revision of the legal description of the Property shall not require a written amendment to this Agreement. In such event, the Seller's execution and delivery of the closing instruments containing the revised legal description and the Buyer's acceptance of said instruments and of the final Survey (if any) containing the revised legal description shall constitute a full and complete ratification and acceptance of the revised legal description of the Property by the parties. Any reduction in the square footage area of the Property resulting from changes in the legal description of Exhibit "A" or more accurate survey of the Property shall result in pro rata reduction of the purchase price for the Property, which reduction shall not constitute an adjustment to purchase price as contemplated in Paragraph 3.B above.

Seller acknowledges that the Trustees have made various delegations of power for the purpose of land acquisition, and not all representatives of the Trustees or the FDACS have authority to act in all situations. Consequently, this Agreement may be terminated by the Trustees pursuant to any provision therefor contained in this Agreement only in writing signed by the person or persons who signed this Agreement on behalf of the Trustees or that person's successor.

- 26. <u>WAIVER</u>. Failure of Buyer to insist upon strict performance of any covenant or condition of this Agreement, or to exercise any right herein contained, shall not be construed as a waiver or relinquishment for the future of any such covenant, condition or right; but the same shall remain in full force and effect.
- 27. <u>COUNTERPARTS</u>. This Agreement may be executed in one or more counterparts, but all such counterparts, when duly executed, shall constitute one and the same Agreement.
- 28. <u>ADDENDUM</u>. Any addendum attached hereto that is signed by the parties shall be deemed a part of this Agreement.
- 29. <u>NOTICE</u>. Whenever either party desires or is required to give notice unto the other, it must be given by written notice, and either delivered personally, transmitted via facsimile transmission, mailed postage prepaid, or sent by overnight courier to the appropriate address indicated on the first page of this Agreement, or such other address as is designated in writing by a party to this Agreement.
- 30. <u>CERTIFICATION REGARDING TERRORISM</u>. Seller hereby certifies that to the best of Seller's knowledge, after making all appropriate inquiries, Seller is in compliance with, and shall use all funds derived from the sale of the Easement in compliance with all applicable anti-terrorism laws, regulations, rules and executive orders, including but not limited to, the USA Patriot Act of 2001, 18 U.S.C. sections 2339A-C, and U.S. Presidential Executive Orders 12947 and 13224.
- 31. <u>SURVIVAL</u>. The covenants, warranties, representations, indemnities and undertakings of Seller set forth in this Agreement shall survive the closing, the delivery and recording of the Easement described in paragraph 9 of this Agreement.
- LIKE-KIND EXCHANGE. Seller may desire to effectuate a like-kind exchange ("Exchange") under Section 1031 of the Internal Revenue Code in connection with this sale of the Easement. Buyer agrees to use reasonable efforts to accommodate Seller in effectuating an Exchange, subject to each of the following provisions: (1) the Exchange does not directly or indirectly increase the Purchase Price; (2) the Exchange will not delay or otherwise adversely affect the closing; (3) there is no loss, cost, damage, tax, expense, or adverse consequence incurred by Buyer resulting from, or in connection with, the Exchange; (4) all documents to be executed by Buyer in connection with the Exchange must be subject to the approval of Buyer, which approval must not be unreasonably withheld provided that Seller has otherwise fully complied with the terms of this paragraph, and must expressly state, without qualification, "Buyer is acting solely as an accommodating party to the Exchange, Buyer will have no liability with respect to it, and is making no representation or warranty that the transactions qualify as a tax-free exchange under Section 1031 of the Internal Revenue Code, or any applicable state or local laws"; and (5) other than with respect to the Easement or the Property, in no event must Buyer be obligated to acquire any property or otherwise be obligated to take title, or appear in the records of title, to any property in connection with the Exchange. Seller shall indemnify and hold harmless Buyer from and against all claims, losses, costs, damages, taxes, and expenses incurred after the date of this Agreement in

Rev 2/17/2023

connection with the Exchange or Buyer's cooperation with Seller to effectuate the Exchange. Seller acknowledges that Buyer has made no representations or warranties concerning the tax consequences or effect of the Exchange.

IF THIS AGREEMENT IS NOT EXECUTED BY THE SELLER, ON OR BEFORE APRIL 20, 2023 BUYER SHALL BE UNDER NO OBLIGATION TO ACCEPT THIS AGREEMENT. BUYER'S EXECUTION OF THIS AGREEMENT IS SUBJECT TO APPROVAL BY THE BOARD OF TRUSTEES OF THE INTERNAL IMPROVEMENT TRUST FUND OF THE STATE OF FLORIDA. THE EXERCISE OF THE OPTION PROVIDED FOR HEREIN IS SUBJECT TO: (1) CONFIRMATION THAT THE PURCHASE PRICE IS NOT IN EXCESS OF THE FDACS APPROVED VALUE OF THE EASEMENT, AND (2) FDACS APPROVAL OF ALL DOCUMENTS TO BE FURNISHED HEREUNDER. THE STATE OF FLORIDA'S PERFORMANCE AND OBLIGATION TO PAY UNDER THIS AGREEMENT IS CONTINGENT UPON AN ANNUAL APPROPRIATION BY THE LEGISLATURE AND UPON THE FUNDING OF THE APPROPRIATION THROUGH THE ISSUANCE OF FLORIDA FOREVER BONDS BY THE STATE OF FLORIDA OR OTHER FUNDING AS PROVIDED BY THE LEGISLATURE.

THIS IS INTENDED TO BE A LEGALLY BINDING AGREEMENT WHEN DULY EXECUTED. IF NOT FULLY UNDERSTOOD, SEEK THE ADVICE OF AN ATTORNEY PRIOR TO SIGNING.

DEED OF CONSERVATION EASEMENT

THIS DEED OF CONSERVATION EASEMENT is made this ____ day of ______ 202_, by RYALS CITRUS AND CATTLE, LLC, a Florida limited liability company, whose address is Post Office Box 127, Fort Ogden, Florida 34267 ("Grantor"), in favor of the BOARD OF TRUSTEES OF THE INTERNAL IMPROVEMENT TRUST FUND OF THE STATE OF FLORIDA, whose address is Florida Department of Agriculture and Consumer Services, Florida Forest Service, 3125 Conner Boulevard, Tallahassee, Florida 32399-1650 ("Grantee").

The terms "Grantor" and "Grantee" shall include the singular and the plural, and the heirs, successors and assigns of Grantor and Grantee, and the provisions of this Easement shall be binding upon and inure to the benefit of Grantor, Grantee and their heirs, successors, and assigns.

NOTICES

All notices required to be given pursuant to this Deed of Conservation Easement shall be sent to the parties at the following addresses.

Grantor's Address: Ryals Citrus and Cattle, LLC, Post Office Box 127, Fort Ogden, Florida 34267.

Grantee's Address: Florida Department of Agriculture and Consumer Services, Florida Forest Service, 3125 Conner Boulevard, Tallahassee, Florida 32399-1650. Attention: Program Director, Rural and Family Lands Protection Program.

RECITALS

A. Grantor is the sole owner in fee simple of certain real property described in Exhibit "A" attached hereto ("Property"), which is the subject of the terms of this Deed of Conservation Easement ("Easement").

- B. This Easement is acquired under the Rural and Family Lands Protection Program administered by the Florida Department of Agriculture and Consumer Services ("FDACS"). The goal of this program is to protect the integrity, economic viability, and function of working landscapes, ensure opportunities for sustainable agricultural activities on working lands, and to promote the conservation, restoration, and enhancement of species habitat and natural areas consistent with sustainable agricultural activities and the purposes for which this Easement is acquired.
- C. The fact that any use of the Property that is expressly prohibited by the terms of this Easement may become greatly more economically valuable than uses allowed by the terms of this Easement, or that neighboring properties may, in the future, be put entirely to uses that are not allowed by this Easement has been considered by Grantor in granting this Easement and by Grantee in accepting it.
- D. Grantor and the Grantee mutually recognize the special character of the Property as a working landscape that has traditionally been used for agriculture, as that term is defined in Section 570.02(1), Florida Statutes, and have the common purpose of conserving certain values and character of the Property by conveyance to the Grantee of a perpetual conservation easement on, under, over, and across the Property, to conserve the character of the Property, continue certain land use patterns that are consistent with the purposes of this Easement, and prohibit certain further development activities on the Property.
- E. The existing agricultural uses and conservation values of the Property are documented in the Baseline Documentation Report dated _______ ("Baseline Documentation Report" or "BDR"), which consists of reports, maps, photographs, and other documentation that the parties agree provide, collectively, an accurate representation of the Property at the time of this Easement and which is intended to serve as an objective information baseline for monitoring compliance with the terms of this Easement. The BDR is maintained in the offices of the FDACS and is incorporated in this Easement by this reference. A copy of the BDR is available from the FDACS upon request.
- F. Significant Natural Area ("SNA"). There are certain agricultural lands with important species habitat or water resources occurring within the boundaries of the Property, more particularly identified as SNA(s) in the BDR. An SNA is defined as a particularly outstanding or sensitive area that the parties agree are desirous of protection due to the presence of the following: 1) high-quality terrestrial or aquatic habitats, which possess significant biodiversity, high-quality resources, intact community organization, or other ecologically significant qualities; 2) habitats for rare species of plants or animals; or 3) significant geological features or historic sites. Designation of an SNA accords an extra level of protection, ensuring that the natural or cultural features within the SNA will continue to be managed appropriately and in a manner ensuring the continued protection of the

resources. While the designation of these areas as SNAs in the BDR is intended to set them aside for conservation, management activities in an SNA may include activities commensurate with the management of conservation lands to include such activities as prescribed burning, removal of invasive species and native species restoration, and maintenance of existing agricultural structures, primarily roads, fences, drainage improvements, and boundary signs. In addition, Grantor may continue livestock grazing in an SNA, as long as Grantor's management of such grazing activity protects the quality and integrity of the SNA. Other activities that may be undertaken in SNAs are scientific research and environmental education, at Grantor's sole discretion. The SNAs are identified on the map in Exhibit "B" attached hereto.

- G. Grantee is an agency authorized under the terms of Sections 570.71, Florida Statutes, to hold easements for the preservation and protection of agricultural lands threatened by conversion to other uses, as well as the promotion and improvement of wildlife habitat, protection and enhancement of water bodies, aquifer recharge areas, wetlands and watersheds, and perpetuation of open space on lands with SNAs.
- H. The parties agree to honor the purposes for which this Easement is acquired and to preserve and protect in perpetuity the values of the Property for the benefit of this generation and the generations to come.

NOW, THEREFORE, to achieve these purposes, and in consideration of \$10.00 and other good and valuable consideration, including the recitals above, and the mutual covenants, terms, conditions, and restrictions contained herein, the receipt and sufficiency of which is acknowledged, and pursuant to the laws of Florida, and in particular Section 570.71, Florida Statutes, but without intending the validity of this Easement to be dependent on the continuing existence of such laws, Grantor hereby voluntarily grants and conveys to Grantee a conservation easement in perpetuity over the Property of the nature and character hereinafter set forth, and the parties intending to be bound hereby agree as follows:

ARTICLE I. RECITALS

The Recitals set forth above are true and correct and incorporated herein by reference.

ARTICLE II. DURATION OF EASEMENT

This grant of Easement over the Property shall be perpetual. It is an easement in gross, runs with the land, and is enforceable by Grantee against Grantor, Grantor's personal representatives, heirs, successors and assigns, lessees, agents, guests, and licensees.

ARTICLE III. PURPOSE OF EASEMENT

It is the purpose of this Easement to (i) effect the Rural and Family Lands Protection Program ("RFLPP") pursuant to Florida Statutes; (ii) assure that the Property will be retained forever in its condition as a working landscape; (iii) preserve the Property as productive agricultural land that sustains for the long term both the economic and conservation values of the Property and its environs; and (iv) provide a relatively natural habitat for fish, wildlife, plants, or similar ecosystems, through management guided by the following principles:

- Conservation and maintenance of economically viable agricultural practices that protect the landscape as a working enterprise in harmony with the open space and scenic qualities of the Property.
- Conservation and maintenance of soil productivity and control of soil erosion.
- Conservation and maintenance or improvement of the overall quality of the timber resource.
- Consistent with the conservation and protection of the integrity and function of the working landscape, promotion of a more complete pattern of protection, including buffers to natural areas, ecological greenways and functioning ecosystems.
- Promotion of the restoration, enhancement, or management of species habitat, consistent with the purposes for which this Easement is acquired.
- Conservation and protection, restoration, or enhancement of water bodies and aquifer recharge areas including uplands and springsheds, wetlands, or watersheds.
- Conservation and protection of unique and fragile natural areas and rare species habitats.
- Perpetuation of open space on working lands that contain significant natural areas.
- Allow appropriate uses of the Property for activities which will provide long term economic sustainability consistent with this Easement.

The above purposes (i.e., clauses (i) through (iv), inclusive of the bulleted principles) are hereinafter referred to as the "Easement Purposes." Grantor agrees that this Easement will confine the use of the Property to such activities as are consistent with the Easement Purposes, and Grantor agrees to manage the Property in a manner consistent with the Easement Purposes.

ARTICLE IV. RIGHTS GRANTED TO THE GRANTEE

To accomplish the Easement Purposes the following rights are conveyed to Grantee by this Easement:

- A. The right to enforce protection of the Easement Purposes of the Property for which this Easement was acquired.
- B. All future residential, commercial, industrial, and incidental development rights that are now or hereafter allocated to, implied, reserved, or inherent in the Property except as may be specifically reserved to Grantor in this Easement. The parties agree that such rights are hereby terminated and extinguished and may not be used on or transferred to other property. Neither the Property nor any portion thereof may be included as part of the gross area of other property not subject to this Easement for the purposes of determining density, lot coverage, or open space requirements, under otherwise applicable laws, regulations or ordinances controlling land use and building density. No development rights that have been encumbered or extinguished by this Easement shall be transferred to any other lands pursuant to a transferable development rights scheme or cluster development arrangement or otherwise. Nor shall any development rights or density credits be transferred onto the Property from other property.
- C. The right to enter upon the Property on an annual basis, and more often if Grantee determines that such entry is warranted, at reasonable times in order to inspect and monitor compliance with and otherwise enforce the terms of this Easement ("Inspections"); provided that such entry shall be upon prior reasonable notice to Grantor, and Grantee shall not unreasonably interfere with Grantor's use and quiet enjoyment of the Property.
- The right to conduct Inspections, annually or otherwise, to monitor Grantor's compliance with the terms of this Easement shall be in accordance with Rule Chapter 5I-7, F.A.C., and the Easement Monitoring Form attached hereto as Exhibit "C". The Grantee will review the completed monitoring form after each inspection and shall determine whether the uses and activities on the Property are consistent with the terms of this Easement and, where applicable, Grantee will enforce the terms through a corrective action plan, as agreed to by Grantor and Grantee; provided, however, that such corrective action plan will be in addition to, and not in lieu of or as a prerequisite to, Grantee's other enforcements rights hereunder. Upon Grantee's finding that Grantor is in compliance with the terms of this Easement, a copy of the completed monitoring form will be provided to the Grantor and a copy will be retained by the Grantee for a minimum of five (5) years. Upon a finding of noncompliance, a corrective action plan may be developed, which may be a notation in the comments section on the monitoring form regarding completion of certain actions or cessation of actions in order to attain compliance or the plan may be a more detailed plan developed separately to set expectations and deadlines for completion of remedial

measures. In either case, the Grantee will work with the Grantor to negotiate a reasonable schedule, but all remedial measures shall be completed at Grantor's expense.

- E. The right to prevent any activity on or use of the Property that is inconsistent with the Easement Purposes or terms of this Easement and to require the restoration of or to restore such areas or features of the Property that may be damaged by any inconsistent activity or use, at Grantor's cost.
- F. The right to have the ad valorem taxes, assessments and any other charges on the Property paid by Grantor.
- G. A right to prior notice of Grantor's intent to sell or transfer title as provided in Article IX, Paragraph G. This right of notice shall be triggered by sales or transfers of title by Grantor, including gifts and bequests as well as transfers to entities in which Grantor owns, directly or indirectly, a majority of the controlling interests.
- H. The right to be indemnified by Grantor for any and all liability, loss, damage, expense, judgment or claim (irrespective of whether the claim is a first-party claim or third-party claim), including any claim for attorney fees, arising out of or related to the Grantor's use or ownership of or activities on the Property or the use of or activities of Grantor's agents, guests, lessees, licensees or invitees on the Property.
- I. The right to be indemnified by Grantor for any liability for injury or property damage to persons on the Property arising out of any condition of the Property known to the Grantor to the best of Grantor's knowledge.
- J. The right to have the Property maintained in accordance with the terms of this Easement, understanding that the Property may develop through the forces of nature hereafter, subject only to the exercise of Grantor's Reserved Rights, and the Rights Granted to the Grantee, as described in this Easement.
- K. The right to cut and remove timber in Grantee's sole discretion, if Grantor, after a 30-day notice from Grantee, fails to cut and remove said timber damaged by natural disaster, fire, infestation, or the like. Any such cutting and removal by Grantee shall be at the expense of Grantee and all proceeds from the sale of any such timber shall inure to the benefit of Grantee.

ARTICLE V. PROHIBITED USES

The Property shall be maintained to preserve the Easement Purposes. Without limiting the generality of the foregoing, Grantor agrees that the following

uses and practices, though not an exhaustive recital of inconsistent uses and practices, are prohibited on the Property:

- Dumping of biodegradable or nonbiodegradable, toxic, unsightly, offensive or Α. hazardous substances, trash or garbage, wastes, abandoned vehicles, appliances, machinery, toxic wastes or substances, pollutants or contaminants, or similar material including those defined by the Federal Solid Waste Disposal Act, the Federal Clean Air Act, the Federal Clean Water Act, the Federal Resource Conservation and Recovery Act of 1976, the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980, the Federal Superfund Amendments and Reauthorization Act of 1986, the Federal Emergency Planning and Community Right-To-Know Act, the Federal Insecticide, Fungicide and Rodenticide Act, the Toxic Substances Control Act, Chapters 161, 253, 373, 376, and 403, Florida Statutes, and the rules and regulations of the (i) United States Environmental Protection Agency, (ii) the Florida Department of Environmental Protection, and (iii) the governmental water management district applicable to or having jurisdiction over the Property ("Water Management District"), now or at any time hereafter in effect, or any Florida Statute defining hazardous materials, wastes or substances, toxic wastes or substances, pollutants or contaminants (collectively referred to as "Contaminants") on the Property. This prohibition shall not be construed to include reasonable amounts of waste generated in accordance with allowed uses, including agriculture or game management, conducted in accordance with the terms of this Easement, and that is disposed of in accordance with applicable local, state and federal requirements, and Best Management Practices ("BMPs") adopted by FDACS or its successor agency, as amended from time to time.
- B. The mining, excavation of surface or subsurface materials, the exploration for and extraction of oil, gas, minerals, dolostone, peat, muck, marl, limestone, limerock, kaolin, fuller's earth, phosphate, common clays, gravel, shell, sand and similar substances either directly or indirectly by Grantor or on Grantor's behalf or with the joinder or consent of Grantor in any application for a permit so to do, by an individual or entity acting under and by virtue of the authority of a grant or reservation or other form of ownership of or interest in or control over or right to such substances, except for i) seismic or other non-invasive testing and the drilling for and extraction of oil, gas, and all other hydrocarbons under the property by slant or directional drilling from adjacent properties, so not to damage or interfere with the Easement Purposes or Property; ii) as reasonably necessary to combat erosion or flooding using material from existing excavation sites identified in the BDR; or iii) as necessary and lawfully allowed for the conduct of allowed activities using material from existing excavation sites identified in the BDR.
- C. Activities that affect the hydrology of the land or that detrimentally affect water conservation, erosion control, soil conservation, or fish and wildlife habitat, except those required for environmental restoration, federal, state or local regulatory

programs, or BMPs. There shall be no activities that will be detrimental to drainage, flood control, or fish and wildlife habitat preservation unless otherwise provided in this Easement. There shall be no dredging of new canals, construction of new dikes, manipulation of natural water courses, or disruption, alteration, or pollution of existing surface or subsurface water flow or natural water sources, freshwater lakes, ponds and pond shores, marshes, creeks, or any other water bodies except as consistent with BMPs for the type of agricultural activities being conducted. Provided, however, Grantor may construct, operate, maintain, or replace groundwater wells, ditches, swales and other water conveyance structures, drainage structures or other water management improvements incident to allowed uses on the Property, subject to legally required permits and regulations.

- D. Planting of nuisance, exotic or non-native plants as listed by the Exotic Pest Plant Council or the University of Florida's Institute of Food and Agricultural Sciences, or their successors, except for plants approved by Grantee and needed to support agricultural activities allowed hereunder. The Grantor shall, to the extent practical, control and prevent the spread of nuisance exotics or non-native plants on the Property. Grantor hereby grants to Grantee the right, in Grantee's sole discretion and at Grantee's expense, to develop and implement an exotic plant removal plan for the eradication of exotics, or non-native wild plants, on the Property. Under no circumstances shall this right conveyed to Grantee be construed to diminish Grantor's responsibilities under this paragraph or as an obligation of the Grantee.
- E. Concentrated animal feeding operation as defined by the United States Environmental Protection Agency.
- F. New construction or placing of temporary or permanent buildings, mobile homes, or other structures in, on or above the ground of the Property except as may be necessary by Grantor for maintenance or to serve the permitted uses of the Property that are consistent with the Easement Purposes or during emergency situations or as may otherwise be specifically provided for in this Easement. For purposes of this paragraph the term "emergency" shall mean those situations that will have an immediate and irreparable adverse impact on the Easement Purposes.
- G. Construction or placing of roads, billboards or other advertising, utilities, or structures, except those structures and unpaved roads necessary for the agricultural operations on the land or structures necessary for other activities allowed under this Easement, and except for linear facilities described in section 704.06(11), Florida Statutes. Provided, however, Grantee (i) may erect and maintain signs designating the Property as land under the protection of Grantee, and (ii) shall be entitled to recover from Grantor, and Grantor's personal representatives, heirs, successors, and assigns reasonable compensation based on diminution in value of Grantee's interest for the construction and operation of any public or private linear facilities and related access and appurtenances, as described in section 704.06(11)(b), Florida Statutes.

- H. Fertilizer use, including sludge or sludge products, for agriculture activities not in accordance with agricultural BMPs recommended by the United States Department of Agriculture Natural Resources Conservation Service ("NRCS") or FDACS, whichever is more stringent, as those BMPs may be amended from time to time. No agricultural activities shall occur within a 100-foot buffer around sinkholes or karst features that are connected to spring conduits, except as provided in the applicable BMPs.
- I. Actions or activities that may reasonably be expected to adversely affect state or federally listed threatened or endangered species.
- J. Any subdivision of the Property.
- K. Commercial water wells on the Property.
- L. Harvesting of cypress trees in the SNAs.
- M. Mitigation banks pursuant to Section 373.4135, et. seq., Florida Statutes.
- N. Construction or improvements in any SNA or conversion of any SNAs to more improved areas or more intense uses. Any use of the Property which would impair, adversely impact, or destroy an SNA, including a change to more intensive agricultural practices, is also prohibited.
- O. Activities detrimental to the preservation of historical, architectural, archaeological, or cultural resources on the Property.
- P. Conversion of forested areas within the SNAs as shown in the BDR to non-forested areas.

ARTICLE VI. GRANTOR'S RESERVED RIGHTS

Grantor reserves to Grantor, and to Grantor's personal representatives, heirs, successors, and assigns, the following specified rights ("Reserved Rights"), which are deemed to be consistent with the Easement Purposes. The exercise of the Reserved Rights are subject to the prohibitions in Article V and must be in full accordance with all applicable BMPs and local, state and federal law, as amended from time to time, as well as in accordance with the Easement Purposes.

A. Grantor has, and shall be deemed hereby to have retained, the underlying fee simple title in the Property, subject to this Easement. Further, Grantor retains and reserves all rights of, in, and to the Property not conveyed to Grantee under Article IV or prohibited by Article V.

- B. Agricultural and Related Rights. (i) The right to continued use of the Property for agricultural purposes and uses identified in the BDR; (ii) The right to convert any property not designated a Special Natural Area (SNA), as delineated in the BDR, to other agricultural and silviculture purposes and uses; (iii) The right to engage in cattle grazing as set forth in the BDR, including the right to maintain, utilize, restore, fertilize, and mow improved pasture; (iv) The right, as part of cattle operations, to supplement the cattle using minerals and hay; (v) The right to use current technologies on the Property, including fertilizers, pesticides and herbicides commonly used on agricultural property in the State of Florida at such time; and (vi) The right to install, use, maintain, replace and repair non-commercial groundwater wells on the Property. Any and all agricultural uses shall be conducted in accordance with BMPs and in compliance with all laws, rules, and regulations.
- C. The right to conduct silvicultural operations on the Property provided, however, that prior to any timbering in an SNA, Grantor shall consult with Grantee concerning reforestation methods and methods consistent with the perpetual protection of the SNAs.
- D. The right to conduct prescribed burning on the Property; provided, however Grantor shall obtain and comply with a prescribed fire authorization from the Florida Forest Service of FDACS or its successor agency.
- E. The right to mortgage the Property; provided, however, that the Mortgagee's lien shall be inferior and subordinate to this Easement.
- F. The right to contest tax appraisals, assessments, taxes, and other charges on the Property.
- G. The right to continue to use, maintain, repair, and reconstruct, but not enlarge all existing buildings, barns, outbuildings, fences, roads, ponds, wells, utilities, drainage ditches, culverts and such other facilities on the Property as depicted in the BDR. Expanding existing cow pens as necessary to conduct normal cattle operations on the Property shall be allowed, except when located in an SNA.
- H. The right to sell, devise or otherwise transfer ownership of fee title to the Property to a third party. No easements, rights-of-way, restrictions, or less than fee simple interests in the Property shall be granted or conveyed after the date of this instrument unless such encumbrances are approved, in advance and in writing, by the Grantee and recorded in the public records of the county(ies) in which the Property is located. The Grantee may give such approval if it determines, in its sole discretion, that such encumbrance would be consistent with the Easement Purposes.
- I. The right to exclusive use of the improvements on the Property.

- J. The right to obtain and comply with all permits for management of stormwater, water wells, and consumptive uses as may be required by the Water Management District or any governmental agency having jurisdiction over those activities.
- K. The right to construct, after giving notice to Grantee, buildings or other structures incident to agricultural uses carried on in accordance with sound agricultural practices. Such buildings shall not be used as residences.
- L. The right to establish (by survey, fencing, or marking) and maintain property lines around the perimeter of the Property to protect the Property from trespassing and to assist Grantor in the management of the Property in accordance with this Easement.
- M. The right to observe, maintain, photograph, introduce and stock native fish or wildlife on the Property, and to use the Property for hiking and horseback riding. Grantor reserves, and shall continue to own, the hunting and fishing rights on or related to the Property and Grantor may lease and sell privileges of such rights.
- N. The right to install connections to normal utility systems, such as electric, cable, water, sewer, communication, and telephone that are consistent with the Easement Purposes and incidental to serve the allowed uses of the Property. If a connection to a sewer system is not available, this right shall include the right to install a septic system provided it is not located in an SNA. The granting of easements or rights-of-way for power lines, gas lines, sewer lines, waterlines, telecommunications towers, and wind farms is prohibited, unless approved by Grantee pursuant to Article VI, Paragraph H. Existing utilities may be replaced or repaired at their current location.
- O. Grantor reserves one (1) Building Envelope, and the right, after giving notice to Grantee, to develop within the envelope up to 15,000 square feet of impervious surfaces for residential purposes, as further described in Exhibit "D" attached hereto and incorporated herein by reference. The Building Envelope will not exceed ten (10) contiguous acres and is limited to one single family residence and ancillary structures within the Building Envelope. Impervious surfaces are defined as material that does not allow water to percolate into the soil on the Property, including, but not limited to, residential buildings, residential support buildings with or without flooring, paved areas, and any other surfaces that are covered by asphalt, concrete, or roofs, not including agricultural buildings. Any such development may not be constructed within an SNA. Grantor, at its expense, shall provide to Grantee a legal description and survey for the Building Envelope prior to development.

ARTICLE VII. GRANTEE'S REMEDIES

- If Grantee determines that Grantor is in violation of the terms of this Α. Easement, including any amendments, modifications, updates, or revisions thereto, or that a violation is threatened, Grantee shall give written notice to Grantor of such violation and demand corrective action sufficient to cure the violation and, where the violation involves injury to the Property, to restore the portion of the Property so injured. If Grantor fails to cure the violation within 30 days after receipt of notice thereof from Grantee or, under circumstances where the violation cannot reasonably be cured within a 30-day period, fails to begin curing such violation within the 30-day period, or fails to continue diligently to cure such violation until finally cured, Grantee may bring an action at law or in equity in a court of competent jurisdiction to: (i) enforce the terms of this Easement, (ii) enjoin the violation, ex parte as necessary, by temporary or permanent injunction, (iii) recover any damages to which it may be entitled for violation of the terms of this Easement or injury to any values or Easement Purposes protected by this Easement, including damages for the loss of scenic, aesthetic, or environmental values, and (iv) require the restoration of the Property to the condition that existed prior to any such violation or injury.
- B. Without limiting Grantor's liability therefor, Grantee, in its sole discretion, may apply any damages recovered to the cost of undertaking any corrective action on the Property. If Grantee, in its sole discretion, determines that circumstances require immediate action to prevent or mitigate significant damage to the values of the Property, Grantee may pursue its remedies under this Article VII without prior notice to Grantor or without waiting for the period provided for cure to expire.
- C. Grantee's rights under this Article apply equally in the event of either actual or threatened violations of the terms of this Easement, and Grantor agrees that Grantee's remedies at law for any violation of the terms of this Easement are inadequate and that Grantee shall be entitled to the injunctive relief described in this Article, both prohibitive and mandatory, in addition to such other relief to which Grantee may be entitled, including specific performance of the terms of this Easement, without the necessity of proving either actual damages or the inadequacy of otherwise available legal remedies. Grantee's remedies described in this Easement shall be cumulative and shall be in addition to all remedies now or hereafter existing at law or in equity.
- D. Enforcement of the terms of this Easement shall be at the discretion of Grantee, and any forbearance by Grantee to exercise its rights under this Easement in the event of any breach of any term of this Easement by Grantor shall not be deemed or construed to be a waiver by Grantee of such term or of any subsequent breach of the same or any other term of this Easement or of any of Grantee's rights under this Easement. No delay or omission by Grantee in the exercise of any right or

remedy upon any breach by Grantor shall impair such right or remedy or be construed as a waiver.

- E. Grantor hereby waives any defense of estoppel, adverse possession, or prescription.
- F. Nothing contained in this Easement shall be construed to entitle Grantee to bring any action against Grantor for any injury to or change in the Property resulting from causes beyond Grantor's control, including fire, flood, storm, and earth movement, or from any prudent action taken by Grantor under emergency conditions to prevent, abate, or mitigate significant injury to the Property resulting from such causes.
- G. Grantor shall hold harmless, indemnify, and defend Grantee and its directors, officers, employees, agents, and contractors and the personal representatives, successors, and assigns of each of them (collectively "Indemnified Parties") from and against all liabilities, penalties, costs, losses, damages, expenses, causes of action, demands, judgments, or claims (irrespective of whether the claim is a first-party claim or third-party claim), including attorney fees, arising from or in any way connected with: (1) injury to or the death of any person, or physical damage to any property, resulting from any act, omission, condition, or other matter related to or occurring on or about the Property, regardless of cause, unless due solely to the negligence of any of the Indemnified Parties; (2) the obligations specified in Article IX, Paragraphs A and B; and (3) the enforcement of this Easement.

ARTICLE VIII. PUBLIC ACCESS

- A. No General Public Access. The granting of this Easement does not convey to the public the right to enter the Property for any purpose whatsoever, and Grantee will cooperate with Grantor in the enforcement of this prohibition.
- B. Scientific, Environmental, Conservation, Educational Organizations. Notwithstanding the foregoing, Grantor, in its sole discretion, may grant to scientific, environmental, conservation and educational organizations the right to enter upon the property or adjoining property of Grantor to conduct scientific or educational investigations or studies consistent with the Easement Purposes, on such terms as Grantor, in its sole discretion, may determine.

ARTICLE IX. MISCELLANEOUS

- A. Costs and Liabilities. Grantor retains all responsibilities and shall bear all costs and liabilities of any kind related to the ownership, operation, upkeep, and maintenance of the Property, including the maintenance of adequate comprehensive general liability coverage. Grantor shall keep the Property free of any liens arising out of any work performed for, materials furnished to, or obligations incurred by Grantor.
- B. Taxes. Grantor shall pay before delinquency all taxes, assessments, fees, and charges of whatever description levied on or assessed against the Property by competent authority (collectively "taxes"), including any taxes imposed upon or incurred as a result of this Easement, and shall furnish Grantee with satisfactory evidence of payment upon request. Grantee is authorized but in no event obligated to make or advance any payment of taxes, upon 3 days prior written notice to Grantor, in accordance with any bill, statement, or estimate procured from the appropriate authority, without inquiry into the validity of the taxes or the accuracy of the bill, statement, or estimate, and the obligation created by such payment shall bear interest until paid by Grantor at the maximum rate allowed by law.
- Extinguishment. If unforeseen circumstances arise in the future that render C. the Easement Purposes impossible to accomplish, this Easement can only be terminated or extinguished, whether in whole or in part, by judicial proceedings in a court of competent jurisdiction, and the amount of the proceeds to which Grantee shall be entitled, prior to the satisfaction of prior claims and costs of sale, from any sale, exchange, or involuntary conversion of all or any portion of the Property subsequent to such termination or extinguishment, shall be determined, unless otherwise provided by Florida law at the time, in accordance with Article IX, Paragraph D. If sufficient funds are not available for Grantee to be paid its entire Proportionate Share (as hereinafter defined) out of the proceeds, or if for any other reason Grantee is not paid its entire Proportionate Share, Grantee has the right to recover such deficiency (including the right to record a lien to secure its recovery of such deficiency) from the record owner of the Property at the time of such sale. Grantee shall use all such proceeds in a manner consistent with the Easement Purposes or the purposes of the bond or statutory program under which Grantee obtained the purchase money for this Easement. Grantor believes that any changes in the use of neighboring properties will increase the benefit to the public of the continuation of this Easement, and Grantor and Grantee intend that any such changes shall not be deemed to be circumstances justifying the termination or extinguishment of this Easement. In addition, the inability of Grantor to conduct or implement any or all of the uses allowed under the terms of this Easement, or the unprofitability of doing so, shall not impair the validity of this Easement or be considered grounds for its termination or extinguishment.

- D. **Proceeds**. This Easement constitutes a real property interest immediately vested in Grantee, which, for the purposes of Article IX, Paragraphs C and E, the parties stipulate to have a fair market value determined by multiplying the fair market value of the Property unencumbered by the Easement (minus any increase in value after the date of this grant of Easement attributable to improvements) by the ratio of the value of the Easement at the time of this grant to the value of the Property, without deduction for the value of the Easement, at the time of this grant (Grantee's percentage interest is referred to herein as Grantee's "Proportionate Share"). For the purposes of this paragraph, the ratio of the value of the Easement to the value of the Property unencumbered by the Easement shall remain constant.
- E. Condemnation. If the Easement is taken, in whole or in part, by exercise of the power of eminent domain or otherwise acquired by any authority with power of eminent domain through a purchase in lieu of a taking, Grantor and Grantee shall each take appropriate actions at the time of such taking to recover the full fair market value (without regard to any diminution in value attributable to the Easement) of the interests in the Property subject to the taking and all incidental, consequential, and direct damages resulting from the taking. Prior to the payment of any expenses reasonably incurred by the parties hereto in connection with such taking, Grantee shall be entitled to its Proportionate Share from the recovered proceeds in conformity with the terms of Article IX, Paragraph D. The respective rights of Grantor and Grantee set forth in this paragraph shall be in addition to, and not in limitation of, any rights of Grantee under applicable law.
- F. Assignment. This Easement is transferable by Grantee, but Grantee may assign its rights and obligations under this Easement only to a governmental entity with the legal capacity to enforce the terms of this Easement.
- G. Property Interest Transfers. In addition to Grantee's approval rights set forth in Article VI, Paragraph H, Grantor further agrees to give written notice to Grantee of the transfer of any interest in the Property. The failure of Grantor or Grantee to perform any act required by this paragraph shall not impair the validity or priority of this Easement or limit its enforceability in any way.
 - 1. Right of Grantee to Negotiate in Advance of Sale.
 - a. The terms of this right are such that if Grantor intends to publicly offer the Property for sale, or any interest or portion thereof, Grantor shall deliver to Grantee notice of such intent (including the date, time, and location of the intended offering) at least 45 days prior to offering the Property for sale.
 - b. In addition, if Grantor receives an unsolicited, but acceptable, offer from a prospective buyer to purchase the Property, or any interest therein or portion thereof, Grantor shall deliver to Grantee notice of Grantor's intent to accept the offer, including the names and addresses of any party to whom the Property

is to be transferred, a description of the land to be transferred, and all relevant terms of the offer received, such that Grantee receives the notice at least 45 days prior to execution of a contract for such sale (Grantor agrees that any such contract for sale shall be made expressly subject to Grantee's right to negotiate for the purchase of the Property provided in Paragraph 1.c. below).

- c. Under notice provided pursuant to Paragraphs 1.a. and 1.b. above, Grantor shall, in good faith, afford Grantee an opportunity to negotiate the acquisition of the Property, or such portion thereof or interest therein that Grantor intends to sell. If Grantee desires to negotiate the acquisition of the Property (or such portion thereof or interest therein as applicable), Grantee shall so notify Grantor within 30 days after receipt of Grantor's notice of intent. If Grantor and Grantee are unable, in good faith, to agree to terms of an acquisition of the Property (or such interest therein or portion thereof as applicable) within 45 days after Grantee's notice to Grantor under this paragraph, Grantor may sell the Property free of the right granted in this Article IX, Paragraph G.1.
- d. This right of notice shall not be triggered by sales or transfers between Grantor and lineal descendants of Grantor or entities in which Grantor owns a majority of the controlling interests. The right or notice granted herein applies to the original Grantor and to said original Grantor's heirs, successors, and assigns.
- 2. Subsequent Transfers. Grantor agrees to notify Grantee of the names and addresses of any party to whom the Property, is to be transferred at least 45 days prior to the date of such transfer.
- 3. Continuation of Agricultural Production. Grantor shall obtain assurances in writing from the prospective transferee that the Property will continue to be used for bona fide agricultural production purposes in accordance with this Easement. In addition, Grantor will incorporate (whether by reference or otherwise) the terms of this Easement in any deed or other legal instrument by which Grantor divests or conveys any interest in the Property, including a lease or license.
- 4. Statement of Compliance. Grantor may request in writing at least 45 days prior to sale, mortgage, transfer or long term (five years or longer) lease of the Property, or any portion thereof, a written statement from Grantee stating that, to Grantee's actual knowledge, Grantor is in compliance with the terms of this Easement, or if Grantor is not in compliance with the terms of this Easement, stating what violations of this Easement exist according to Grantee's actual knowledge. Grantee agrees in such cases to acknowledge, execute, and deliver to Grantor or to any mortgagee, transferee, purchaser, or lessee such a written statement concerning compliance within 45 days from receipt by Grantee of a

written request therefor. Nothing contained in this Easement shall relieve the Grantor from the responsibility to comply with applicable federal, state, and local laws and regulations.

- 5. Grantor's Liability after Transfer. In the event of a sale or the transfer of title of the Property to an individual or entity other than the current legal owner, Grantor will immediately notify Grantee. Thereafter, Grantee will confer with the new owner within 30 days and explain, discuss, and plan the transfer of the responsibility of carrying out the terms of this Easement, such that the long-term benefits to everyone concerned and the terms of this Easement will not be impaired by default or otherwise. Grantor and each subsequent owner of the Property shall have no personal liability for the observance or performance of the obligations of the Grantor hereunder, with respect to any interest in the Property conveyed, after the Grantor or subsequent owner has conveyed their interest in the Property as permitted by and pursuant to the terms of this Easement.
- H. Notices. Any notice, demand, request, consent, approval, or communication that either party desires or is required to give to the other party under this Easement shall be in writing and either served personally or sent by first class mail, postage prepaid, or by overnight mail service, addressed to the parties as set forth in this Easement, or to such other addresses such party may establish in writing to the other. If time is of the essence, initial notice by electronic mail is acceptable, but shall be followed by written notice as provided in this paragraph as soon as possible.
- I. Recordation. Grantee shall record this instrument and any amendments in timely fashion in the official records of the county(ies) in which the Property is located, and may re-record it at any time as may be required to preserve its rights in this Easement.
- J. Non-Homestead Certification. Grantor hereby certifies that if a Grantor who is married signs this Easement without the joinder of his or her spouse, the Property is neither the homestead of Grantor/Grantor's spouse nor the primary physical residence of Grantor/Grantor's spouse, nor is the Property contiguous to the homestead or primary physical residence of Grantor/Grantor's spouse.
- K. Amendments. The terms of this Easement may be amended by the mutual consent of the parties hereto. No amendment shall be effective until executed with the formality of a deed and recorded in the public records of the county(ies) in which the Property is located.
- L. Controlling Law. The laws of the State of Florida shall govern the interpretation and performance of this Easement.

- M. Liberal Construction. Any general rule of construction to the contrary notwithstanding, this Easement shall be liberally construed in favor of the Grantee to effect the Easement Purposes and the policy and purpose of Section 570.71, Florida Statutes. If any provision in this instrument is found to be ambiguous, an interpretation consistent with the Easement Purposes that would render the provision valid shall be favored over any interpretation that would render it invalid.
- N. Severability. If any provision of this Easement, or the application thereof to any person or circumstance, is found to be invalid, the remainder of the provisions of this Easement, or the application of such provision to persons or circumstances other than those as to which it is found to be invalid, as the case may be, shall not be affected thereby.
- O. **No Forfeiture.** Nothing contained herein will result in a forfeiture or reversion of Grantor's title in any respect.
- P. Joint Obligation. The obligations imposed by this Easement upon Grantor shall be joint and several.
- Q. Successors. The covenants, terms, conditions, and restrictions of this Easement shall be binding upon, and inure to the benefit of, the parties hereto and their respective personal representatives, heirs, successors, and assigns and shall continue as a servitude running in perpetuity with the Property.
- R. Termination of Rights and Obligations. A party's rights and obligations under this Easement terminate upon transfer of the party's entire interest in the Easement or Property as permitted by and pursuant to the terms hereof, except that liability for acts or omissions occurring prior to transfer shall survive transfer.
- S. **Captions**. The captions in this instrument have been inserted solely for convenience of reference and are not a part of this instrument and shall have no effect upon construction or interpretation.
- T. References. References to statutes or rules in this Easement shall be to the text of such statute or rule on the date of execution of this Easement.

TO HAVE AND TO HOLD unto Grantee, its successors, and assigns forever.

ADDENDUM (LIMITED LIABILITY COMPANY/FLORIDA)

- A. At the same time that Seller submits the closing documents required by paragraph 9. of this Agreement, Seller shall also submit the following to Buyer:
 - 1. Copies of the articles of organization and operating agreement and all amendments thereto,
 - 2. Certificate of Good Standing from the Secretary of State of the State of Florida,
 - 3. All certificates, affidavits, resolutions or other documents as may be required by Buyer or the title insurer, which authorize the sale of the Property interest to Buyer in accordance with the terms of this Agreement and evidence the authority of one or more of the members of Seller to execute this Agreement and all other documents required by this Agreement, and
 - 4. Copy of proposed opinion of counsel as required by paragraph B. below.
- B. As a material inducement to Buyer entering into this Agreement and to consummate the transaction contemplated herein, Seller covenants, represents and warrants to Buyer as follows:
 - 1. The execution of this Agreement and the performance by it of the various terms and conditions hereof, including, without limitation, the execution of all agreements, notices and other documents hereunder, have been duly authorized by the requisite authority of Seller.
 - 2. Seller is a limited liability company duly organized, validly existing and in good standing under the laws of the State of Florida and is duly qualified to own real property in the State of Florida.
 - 3. This Agreement, when executed and delivered, will be valid and legally binding upon Seller and enforceable in accordance with its terms and neither the execution of this Agreement and the other instruments to be executed hereunder by Seller, nor the performance by it of the various terms and conditions hereto will violate the Articles of Organization or Operating Agreement of Seller, any provisions of applicable law or any applicable order or regulation of any court or governmental agency, nor will they constitute a breach or default by Seller under any agreement, indenture or other instrument to which Seller is a party or by which Seller is bound.

At the closing, Seller shall deliver to Buyer an opinion of counsel from an attorney licensed to practice law in the State of Florida and an active member in good standing with the Florida Bar, to the effect that the covenants, representations and warranties contained above in this paragraph B. are true and correct as of the closing date. In rendering the foregoing opinion, such counsel may rely as to factual matters upon such other documents and data as counsel may deem necessary or advisable to render the opinions set forth above.

Project Information:

Richards Appraisal File Number

1352

Parcel Name Location Ryals Cattle Company CE Charlotte County, Florida

Effective Date of Appraisals

February 22, 2023

Summary of Review

Pursuant to your request, I have reviewed two individual appraisal reports on the Ryals Cattle Company Conservation Easement located in Charlotte County, Florida. One appraisal report was prepared by Mr. Joseph S. String, MAI of String Appraisal Services, Inc. The other report was prepared by Mr. Tod Marr, MAI, CCIM of Tod Marr and Associates, LLC. I have determined after review of the reports and some minor changes to each appraisal that they are acceptable as submitted.

The String report is dated April 17, 2023. The Marr report is dated April 18, 2023. Both appraisals have a valuation date of February 22, 2023. The value indications for the proposed conservation easement reflected by each appraiser were:

(1) Joseph S. String, MAI(2) Tod Marr, MAI, CCIM

\$8,400,000 \$8,815,000

In the reviewer's opinion the appraisal reports were completed substantially in conformance with USPAP, were reasonably well documented, and reflected reasonable value indications for the subject property. Both firms submitting appraisals consider their report to be appraisal reports according to USPAP. Both appraisals are considered sufficient to satisfy the requirements of Standard 2 of USPAP as it is applied to this type of report. The appraisals are also in substantial conformance with the Supplemental

Appraisal Standards for the Board of Trustees, Division of State Lands, Bureau of Appraisal, Florida Department of Environmental Protection, March 2, 2016.

The intended users of this appraisal assignment is the Florida Department of Agriculture and Consumer Services, Florida Forest Service (FDACS/FFS). The intended use is for FDACS/FFS and any other specific organization or entity that may be involved in the specific transaction or for consideration in determining the effect on value of the proposed conservation easement on the subject property.

Both Mr. String and Mr. Marr utilized the Sales Comparison technique to estimate the value of the subject tracts which is essentially vacant ranch land utilizing the "before and after" technique which is deemed by the reviewer to be the most appropriate method. The appraisers utilized meaningful data, appropriate adjustment procedures and therefore, the resultant conclusions are well supported.

It is important to note that the Hypothetical Condition is made by the appraisers in assuming that the proposed conservation easement is in place on the date of the appraisal. Hypothetical Condition is defined as that which is contrary to what exists but is assumed for appraisal purposes. Uniform Standards dictate that these type assumptions are prominently disclosed. This Hypothetical Condition is prominently disclosed and treated appropriately by both appraisers and are necessary for a credible assignment result. Two common Extraordinary Assumptions were made by the appraisers regarding relying upon the "Draft Copy" of the easement which is not yet executed by the parties. The appraiser's each stress the importance of the final agreement being exactly like the draft. This is also a common and reasonable procedure for this property type. Both appraisers also utilized an extraordinary assumption that access to the subject will be facilitated through the adjacent commonly owned ranch property.

In addition, Mr. String utilized an Extraordinary Assumption that there are no additional encumbrances or liens that would impact value since the Title Policy provided to the appraisers dated September 20, 2022.

The appraisers and the reviewer are in agreement that the highest and best use for the subject parcel is for continued agriculture and recreational use for the foreseeable future. More details regarding the highest and best use is included in a later section of this review report.

The valuation problem consists of estimating the impact on value of a proposed "Conservation Easement" which will encumber the subject property. The significance of the conservation easement is that it is proposed to assure that the property will be retained forever in its natural, scenic, wooded condition to provide a relatively natural habitat for fish, wildlife, plants or similar ecosystems and to preserve portions of the property as productive farmland and forest land that sustains for the long term both the economic and conservation values of the property and its environs, through management.

In order to value the subject property, the appraisers have applied the traditional appraisal methods and have arrived at a supportable opinion of the impact on Market Value of the proposed conservation easement.

Statement of Ownership and Property History

The subject is currently titled as:

Ryals Citrus & Cattle, LLC 5751 Cypress Grove Circle Punta Gorda, Florida 33982

There have been no transactions occurring on the subject property since 2008. The subject property does not appear to be listed for sale nor are there any reported pending contracts.

Property Description

This appraisal assignment encompasses 2,846 acres of the contiguous 5,676.53-acre Ryals Ranch located east of US Highway 17 and north of Bermont Road (CR 74) on the south side of the Charlotte/DeSoto County line in unincorporated north central Charlotte County, Florida. Access to Ryals Ranch is either from 5751 Cypress Grove Circle in Prairie Creek Park subdivision and from SE Notts Dairy Road from State Road 31 in DeSoto County. Neither of these roads physically touch the subject and the appraisers have therefore assumed that access sufficient for highest and best use conclusions will be obtained through adjacent commonly owned ranchlands. The subject is approximately 6 miles east of State Road 17 and approximately 10 miles east of Interstate 75. The nearest city is Punta Gorda located approximately 12 miles southwest.

The appraisal problem encompasses estimating the impact on value of a proposed conservation easement on the subject property. According to mapping provided by the client, the subject contains approximately 2,383 acres of uplands (84%) and approximately 463 acres of wetlands (16%). Otherwise, the ranch contains a mosaic of improved pasture areas, mesic and scrubby flatwoods along with intermittent wetland sloughs, and native woods and swamp.

The surrounding area is typically comprised of larger cattle ranches and/or recreational tracts and large government land holdings. Residential development is rural and very limited in the immediate area and typically only in support of larger agricultural holdings with the exception of the ranchette subdivision bordering the subject to the west. Known as Prairie Creek Park, this older ranchette subdivision appears to be about 50% built-out. This project appears to be the farthest east development activity in Charlotte County to date.

The ranch currently has no direct road frontage. The current access is through the commonly owned Ryals Ranch property either through the Prairie Creek Park subdivision by virtue of a lot owned within the subdivision by Ryals Ranch, and from NE

Notts Dairy Road by an apparent 60' wide fee owned strip extending northward from the ranch approximately 1 mile north. Notts Dairy Road is an asphalt paved publicly maintained road and the Ryals access strip is shell road and obviously private. The appraisers utilized an extraordinary assumption that access will be provided suitable to highest and best use from the adjacent Ryals Ranch property.

The subject parcel has a reasonably level topography as is common in this area of Charlotte County Florida with elevations ranging from about 31 to 37 feet above sea level.

The title insurance policy was silent on any outstanding OGM rights. Therefore, the appraisers and the reviewer believe that these rights are intact on this parcel.

The subject property is found on Charlotte County FEMA Flood Map 1215C0115G and 12015C0276G both dated December 15, 2022. According to this map most of the subject property (approximately 89%), is located within Flood Zone X which is considered to be an area outside of the 100-year flood plain. The rest of the property (approximately 11%) lies in Flood Zone A which is an area determined to be within the 500-year flood.

The subject ranch is improved with typical ranching improvements such as fencing, cross-fencing, gates, ditches, culverts, ranch roads, and water holes.

While electrical and telephone services are readily available to the area a municipal source for potable water or sewage disposal is not. Wells and septic systems are typical in the region.

The subject has an AG; Agriculture, General zoning classification by Charlotte County. Furthermore, the subject has an Agriculture Future Land Use. This classification is generally associated with rural areas of the county and are typically committed to open space and agricultural activities. The permitted residential density is one dwelling unit per ten acres of land area in Charlotte County with the opportunity for increased density to one dwelling unit per five acres with a Conservation Subdivision concept.

Highest and Best Use

Highest and best use is defined as the reasonably probable and legal use of vacant land or an improved property which is physically possible, appropriately supported, financially feasible, and that results in the highest value. The four criteria the highest and best use must meet are legal permissibility, physical possibility, financial feasibility, and maximum profitability.

Before

Mr. String concluded that the Highest and Best Use for the subject would be for continued agriculture and recreation, with future potential for rural residential subdivision development.

Mr. Marr concluded that the Highest and Best Use for the subject would be for continued recreational, agriculture, ranching with potential for long term future residential development.

<u>After</u>

Mr. String concluded that the Highest and Best Use for the subject, as encumbered, would be essentially limited to agricultural and recreational uses subject to the conservation easement limitations.

Mr. Marr concluded that the Highest and Best Use for the subject would be limited to continued agricultural and recreational subject to the terms of the conservation easement.

Both appraisers recognize the limited development potential of the property in the before scenario. The two most significantly impacting criteria of the proposed conservation easement are the loss of development rights and/or the rights to subdivide the property.

Overall, the highest and best use conclusions of both appraisers are reasonably similar. Each has made a convincing argument and has provided adequate market evidence to support these conclusions. Each of the appraisers have adequately addressed the issue of highest and best use for the subject property and more importantly the reviewer is convinced that the sales data utilized is that of a basically similar highest and best use.

Reviewer Comments

The reviewer found the reports to be very comprehensive and informative as to the relative components of a typical appraisal report. The physical characteristics and site descriptions were also found to be typical as were the details and documentation of the comparable sales expected in an appraisal for this property type. The reports have also conformed to the reporting standards expected by FDEP/FDACS and are substantially in conformance with the Uniform Standards of Appraisal Practice (USPAP).

In the valuation of the Subject property the appraisers have applied the sales comparison approach to value which is deemed to be the traditional and most appropriate method to value a vacant agricultural parcel. Considering that the subject of the appraisal is to estimate the impact on value of the proposed conservation easement it was necessary to apply the before and after methodology.

In the before scenario the appraisers contrasted the subject property to a set of unencumbered comparable sales within the subject market area. In estimating the value for the subject, the appraisers analyzed sales of agricultural properties offering similar locational attributes and highest and best use characteristics. Mr. String analyzed four comparable sales in his effort and Mr. Marr analyzed four comparable sales to contrast to the subject. The appraisers had three commonly utilized sales in this effort.

In the after scenario the appraisers contrasted the subject property to a set of comparable sales encumbered with conservation easements. Due to the limited number of sales

meeting these criteria the sale search had to be expanded for this property type. In estimating the value for the subject as encumbered the appraiser's analyzed sales of agricultural properties offering similar locational attributes and highest and best use characteristics similarly encumbered by conservation easements. Mr. String analyzed four comparable sales in his effort and Mr. Marr analyzed four comparable sales to contrast to the subject. The appraisers had three commonly utilized sales in this effort.

The appraisers demonstrated a very thorough analysis of the comparable data and adapted a very straightforward and reasonable valuation process. Both Mr. String and Mr. Marr utilized a qualitative adjustment process to contrast the sale properties to the subject. This method is widely accepted, well supported and reasonable.

Analysis of Appraisers' Sales

String Appraisal

The following sales were utilized by Mr. String in the valuation of the subject before the proposed conservation easement.

Sale No.	Subject	Sale 1	Sale 2	Sale 3	Sale 4
County	Charlotte	Charlotte	Glades	Charlotte	Hendry
Sale Date	N/A	12/21	9/21	4/21	3/22
Price/Ac	N/A	\$6,380	\$5,578	\$5,041	\$4,731
Size/Ac	2,846.00	1,152.00	2,240.76	2,539.10	3,393.44
Upland%	84%	85%	96%	70%	73%
Overall	N/A	Superior	Similar	Inferior	Slightly
Rating					Inferior

Mr. String analyzed the four tabulated sales above for the purpose of estimating the value of the subject before placing the conservation easement on the property. The sales are located in Charlotte, Glades and Hendry Counties in Florida.

The sales analyzed for the subject parcel have sale dates ranging from April 2021 to March 2022. The comparables selected are all agricultural properties with similar highest and best use characteristics. The comparable sales selected and analyzed by Mr. String are considered to be good indicators of value for the subject. These sales reflect a range from \$4,731 to \$6,380 per gross acre.

Mr. String has elected to apply a qualitative adjustment process to the comparable sales for comparable factors such as condition of sale, financing, motivation, market conditions, location, access, size, upland percentage, zoning/FLU, and improvements. Overall, the entire process of contrasting the sales to the subject property seems reasonable. The appraiser utilized sound logic and reasoning in contrasting the comparable sales to the subject property and, overall, the analyses and qualitative adjustment process is well supported and adequately discussed.

In his final analysis Mr. String recognizes a more refined range of from \$5,041 reflected by inferior rated sale 3 to \$6,380 per gross acre reflected by superior sale 1. Mr. String concludes at \$5,750 per acre recognizing similar rated sale 2 at \$5,578 per gross acre. This equates to a final indication of \$5,750 per acre times 2,846 acres; or \$16,364,500 which is rounded to \$16,350,000.

The following sales were utilized by Mr. String in the valuation of the subject after the proposed conservation easement.

Sale No.	Subject	Sale 1	Sale 2	Sale 3	Sale 4
County	Polk	Highlands	Hendry	Highlands	Manatee
Sale Date	N/A	1/23	6/22	1/23	12/21
Price/Ac	N/A	\$1,161	\$2,622	\$2,712	\$3,405
Size/Ac	3,634.26	3,369.60	1,022.00	1,069.20	1,248.33
Upland%	74%	83%	71%	75%	73%*
Overall	N/A	Significantly	Slightly	Slightly	Slightly
Rating		Inferior	Inferior	Superior	Superior

^{*}Slight variation in upland percentage of 1% is due to rounding and does not impact value.

Mr. String analyzed the four tabulated sales above for the purpose of estimating the value of the subject after placing the conservation easement on the property. The comparables are located in Highlands, Hendry and Manatee Counties in Florida.

The sales analyzed for the subject parcel have sale dates ranging from December 2021 to January 2023. The sales selected are all agricultural properties with similar highest and best use characteristics and encumbered by perpetual conservation easements. The comparable sales selected and analyzed by Mr. String are considered to be good indicators of value for the subject. These sales reflect a range from \$1,161 to \$3,405 per gross acre.

Mr. String has elected to apply a qualitative adjustment process to the comparable sales for comparable factors such as condition of sale, financing, motivation, market conditions, location, access, size, upland percentage, improvements and impact of conservation easement. Overall, the entire process of contrasting the sales to the subject property seems reasonable. The appraiser utilized sound logic and reasoning in contrasting the comparable sales to the subject property and, overall, the analyses and qualitative adjustment process is well supported and adequately discussed.

In his final analysis Mr. String recognizes a more refined range of from \$2,622 to \$3,405 per gross acre. He reconciles at a value indication of \$2,800 per gross acre recognizing sale 3's slightly superior indication at \$2,712 per gross acre. Mr. String concludes at a value of \$2,800 per gross acre times 2,846 acres; or \$7,968,800 which is rounded to \$7,950,000.

Mr. String's value estimate for the conservation easement is the difference between the value of the property before, minus the value of the property as encumbered. This summary follows:

 Total Value Before
 \$16,350,000

 Total Value After
 \$7,950,000

 Value of Easement
 \$8,400,000

Marr Appraisal

The following sales were utilized by Mr. Marr in the valuation of the subject before the proposed conservation easement.

Sale No.	Subject	Sale 1	Sale 2	Sale 3	Sale 4
County	Charlotte	Okeechobee	Charlotte	Glades	Charlotte
Sale Date	N/A	6/22	12/21	9/21	4/21
Price/Ac	N/A	\$6,008	\$6,380	\$5,578	\$5,041
Size/Ac	2,846.00	1,698.38	1,152.00	2,240.76	2,539.10
Upland %	84%	85%	85%	96%	70%
Overall	N/A	Superior	Superior	Inferior	Inferior
Rating					

Mr. Marr analyzed the four tabulated sales above for the purpose of estimating the value of the subject before placing the conservation easement on the property. The comparables are located in Okeechobee, Glades and Charlotte Counties in Florida.

The sales analyzed for the subject parcel have sale dates ranging from April 2021 to June 2022. The comparables selected are all agricultural properties with similar highest and best use characteristics. The comparable sales selected and analyzed by Mr. Marr are considered to be good indicators of value for the subject. These sales reflect a range from \$5,041 to \$6,380 per gross acre.

Mr. Marr has elected to apply a qualitative adjustment process to the comparable sales for comparable factors such as financing, conditions of sale, market conditions, location, access/road frontage, percentage uplands, topography, size/shape, zoning/land use and improvements. Overall, the entire process of contrasting the sales to the subject property seems reasonable. The appraiser utilized sound logic and reasoning in contrasting the comparable sales to the subject property and, overall, the analyses and qualitative adjustment process is well supported and adequately discussed.

In his final analysis Mr. Marr brackets the subject between the indications from inferior rated Sale 3 at \$5,578 per gross acre and superior rated Sale 1 at \$6,008 per gross acre. As such, a conclusion is reached at \$5,800 per gross acre. This equates to a final indication of 2,846.00 acres times \$5,800 per acre; or \$16,506,800 which is rounded to \$16,500,000.

The following sales were utilized by Mr. Marr in the valuation of the subject after the proposed conservation easement.

Sale No.	Subject	Sale 1	Sale 2	Sale 3	Sale 4
County	Highlands	Highlands	Highlands	Manatee	DeSoto
Sale Date	N/A	1/23	1/23	12/21	9/19
Price/Ac	N/A	\$2,712	\$1,161	\$3,405	\$1,450
Size/Ac	1,602.26	1,069.20	3,369.90	1,248.33	3,716.25
Upland %	67%	75%	83%	72%*	58%
Overall	N/A	Similar	Much	Superior	Much
Rating			Inferior	-	Inferior

^{*}Slight variation in upland percentage of 1% is due to rounding and does not impact value.

Mr. Marr analyzed the four tabulated sales above for the purpose of estimating the value of the subject after placing the conservation easement on the property. The sales are located in Highlands, Manatee and DeSoto Counties in Florida.

The sales analyzed for the subject parcel have sale dates ranging from September 2019 to January 2023. The comparables selected are all agricultural properties with similar highest and best use characteristics and all sales are actually encumbered by perpetual conservation easements. The comparable sales selected and analyzed by Mr. Marr are considered to be good indicators of value for the subject. These sales reflect a range from \$1,161 to \$3,405 per gross acre.

Mr. Marr has elected to apply a qualitative adjustment process to the comparable sales for comparable factors such as financing, conditions of sale, market conditions, location, percentage uplands, topography, access/road frontage, size/shape, improvements and impact of easement restrictions. Overall, the entire process of contrasting the sales to the subject property seems reasonable. The appraiser utilized sound logic and reasoning in contrasting the comparable sales to the subject property and, overall, the analyses and qualitative adjustment process is well supported and adequately discussed.

In his final analysis Mr. Marr reflects on a more refined range of value of from \$1,450 as indicated by much inferior rated sale 4 to \$2,712 per gross acre as indicated by similar rated sale 1. He concludes at a final value of \$2,700 per gross acre. This equates to a final indication of 2,846.00 acres times \$2,700 per acre; or \$7,684,200 which is rounded to \$7,685,000.

Mr. Marr's value estimate for the conservation easement is the difference between the value of the property before, minus the value of the property as encumbered. This summary follows:

Total Value Before	\$16,500,000
Total Value After	\$ 7,685,000
Value of Easement	\$ 8,815,000

Conclusions

Overall, the reviewer found both reports to be well supported and reasonable leading the reader to similar conclusions. The reports reflected a reasonable range of conclusions to value offering a variance of only 4.9%. The appraisers both arrived at similar conclusions regarding the highest and best use of the subject. As such, both reports are considered acceptable and approvable as amended.

The **purpose of the appraisals** was to estimate the market value of the subject property before and after acquisition of the proposed conservation easement to be placed on the subject property to estimate its impact on value. The intended use of the appraisals was to serve as a basis for potential acquisition of a conservation easement by the Department of Agriculture and Consumer Services, Florida Forest Service (DACS/FFS).

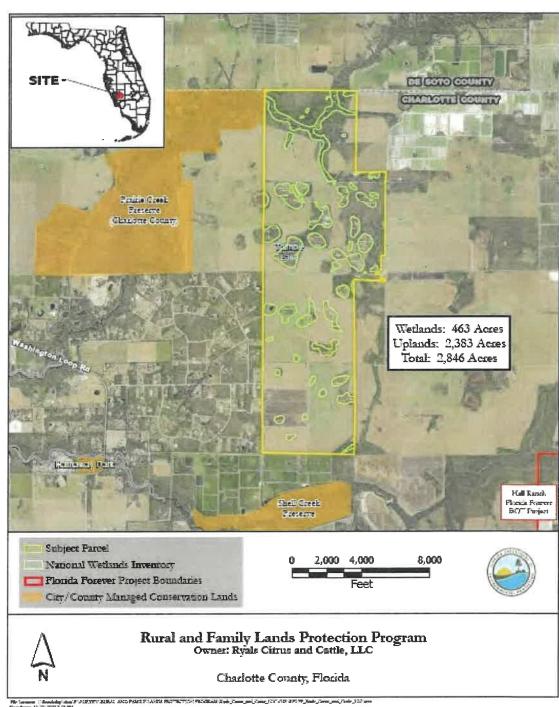

The reviewer has completed a **field review** of the above referenced appraisals. The Purpose of the Review is to form an opinion as to the completeness and appropriateness of the methodology and techniques utilized to form an opinion as to the value of the subject property.

The **Scope of the Review** involved a field review of each of the appraisal reports prepared on the subject property. The reviewer inspected the subject of these appraisals and is familiar with all of the data contained within the reports. The reviewer has not researched the marketplace to confirm reported data or to reveal data which may have been more appropriate to include in the appraisal report. As part of the review assignment the reviewer has asked the appraisers to address issues deemed relevant to the assignment. I have also analyzed the reports for conformity with and adherence to the *Uniform Standards of Professional Appraisal Practice* (USPAP) as promulgated by the Appraisal Foundation and that of the Appraisal Institute as well as the Supplemental Appraisal Standards for the Board of Trustees, Division of State Lands, Bureau of Appraisal, Florida Department of Environmental Protection, March 2, 2016.

Acceptance of Appraisals

The appraisal reports referenced herein are considered acceptable and approvable by the signed reviewer subject to the attached certification.

Certification

I certify that, to the best of my knowledge and belief:

- 1. The facts and data reported by the review appraiser and used in the review process are true and correct.
- 2. The analyses, opinions, and conclusions in this review report are limited only by the assumptions and limiting conditions stated in this review report, and are my personal, unbiased professional analyses, opinions and conclusions.
- 3. I have no present or prospective interest in the property that is the subject of this review and I have no personal interest or bias with respect to the parties involved.
- 4. My compensation is not contingent on an action or event resulting from the analyses, opinions, or conclusions in, or the use of this review report.
- 5. My analyses, opinion, and conclusions are developed and this review report was prepared in conformity with the Uniform Standards of Professional Appraisal Practice.
- 6. My analyses, opinion, and conclusions are developed and this review report was prepared in conformity with the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute and with the Supplemental Standards for the Board of Trustees Division of State Lands, Bureau of Appraisal, Florida Department of Environmental Protection, March 2016.
- 7. The appraisals reviewed are in substantial compliance with USPAP and SASBOT as well as Rule 18-1.006, Florida Administrative Code (FAC).
- 8. I did personally inspect the subject property.
- 9. No one provided significant professional assistance to the person signing this review report.
- 10. As of the date of this report, Thomas G. Richards, MAI has completed the requirements of the continuing education program for members of the Appraisal Institute.
- 11. The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
- 12. I have not appraised or performed any other services for any other party in regard to this property.

Thomas G. Richards, MAI
