PUBLIC WATER SYSTEM CONTAMINANT MONITORING GUIDANCE FOR CALENDAR YEAR 2018

SYSTEM NAME: Bocilla Utilities, Inc.

PWS ID #:6084079

CONTAMINANTS FAC Rule No./Rule Reference	Not Required In 2018	Monthly In 2018	Quarterly In 2018	SemiAnnual (2 in 2018)	One Time in 2018
ASBESTOS (62-550.511)	X				
TOTAL TRIHALOMETHANES & HALOACETIC ACIDS 40 CFR 141 Subpart V, <u>Stage 2</u> Disinfectants and Disinfection Byproducts Rule					*X
MICROBIOLOGICAL <u>Revised Total Coliform Rule</u> 40 CFR 141 Subpart Y		**X			
LEAD AND COPPER 40 CFR 141 Subpart I					***X

This chart is the DEP's good faith assessment for the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

***** During the third calendar quarter (July/August/September) of 2018, perform Reduced/Triennial monitoring for TTHMs and HAA5s under Stage 2 of the Disinfectants and Disinfection Byproducts Rule by collecting 1 dual sample set. A dual sample set consists of a set of two samples collected at the same time and location, with one sample analyzed for TTHMs and one sample analyzed for HAA5s. A dual set of samples must be collected at the location (and during the specific month) identified in your DEP approved Stage 2 monitoring plan.

****** Routine monitoring under the Revised Total Coliform Rule requires this water system to collect microbiological samples at the rate of **ONE distribution sample/month**. Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

******* Collect samples for Lead and Copper (in accordance with your approved sampling plan) sometime between June 1 and September 30, 2018. **Submit the analyses results to the DEP by no later than October 10, 2018.**

This chart is the DEP's good faith assessment for the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

***** During the third calendar quarter (July/August/September) of 2018, perform Annual reduced monitoring for TTHMs and HAA5s under Stage 2 of the Disinfectants and Disinfection Byproducts Rule by collecting 2 individual samples. One individual sample for TTHMs shall be collected at the Warden's House location, and one individual sample for HAA5s shall be collected at the Y Dorm location.

****** You are required to collect one full set of samples for all of the SOCs (except Dioxin) during the 2018 calendar year. However, if you submit a Reduced Monitoring Application Questionnaire for Synthetic Organic Contaminants to the Department, available at: <http://www.dep.state.fl.us/water/drinkingwater/forms.htm>, you may receive Department approval to either fully or partially waive monitoring for SOCs in 2018. If you do not receive approval to waive any of the required monitoring for SOCs for 2018, or do not submit the Questionnaire, you will have to perform one full set of monitoring for SOCs in 2018.

******* Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

******** Collect samples for Lead and Copper (in accordance with your approved sampling plan) sometime between June 1 and September 30, 2018. **Submit the analyses results to the DEP by no later than October 10, 2018.**

LEAD AND COPPER 40 CFR Part 141			*****X Standard Number of Monitoring Sites

This chart is the DEP's good faith assessment for the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

***** At a minimum, continue increased/quarterly monitoring for the Disinfection Byproducts of TTHMs and HAA5s during the first (January/February/March) and second (April/May/June) calendar quarters of 2018, at the rate of one dual set/quarter. Remain on quarterly monitoring for TTHMs and HAA5s until the Running Annual Average TTHM concentration is less than or equal to 60 ug/L and the Running Annual Average HAA5 concentration is less than or equal to 45 ug/L.

****** Please note, if you do qualify to return to Annual monitoring for TTHMs and HAA5s after the monitoring during the first and second calendar quarters of 2018 has been performed, you will still be required to collect one dual set of samples for TTHMs and HAA5s during the third calendar quarter (July/August/September) of 2018.

******* Continue quarterly monitoring for the VOCs Group, SOCs Group (excluding Dioxin), and Radiological contaminants (Gross Alpha, Uranium, Radium 226, and Radium 228) during the first calendar quarter of 2018.

******** Continue quarterly monitoring for the SOC of Di-2(ethylhexyl)phthalate (DEHP) during the first and second calendar quarters of 2018.

********* Collect your second initial set of samples for Lead and Copper (in accordance with your approved sampling plan) sometime between January 1 and June 30, 2018. Please note, the number of sites that are sampled must be in accordance with the number of sites required for Standard monitoring NOT reduced monitoring.

This chart shall not relieve any person from any requirement of Florida law.

IF WATER SYSTEM BECOMES ACTIVE IN 2018

* Since this water system was closed in 2017, with no monitoring for Nitrate, and Nitrite being performed, please collect samples for Nitrate, and Nitrite as soon as possible, but by no later than 30 days after restart-up of the Plant.

** During the third calendar quarter (July/August/September) of 2018, perform Reduced/Triennial monitoring for TTHMs and HAA5s under Stage 2 of the Disinfectants and Disinfection Byproducts Rule by collecting 1 dual sample set. A dual set of samples must be collected at the location (and during the specific month) identified in your DEP approved Stage 2 monitoring plan.

*** Collect one full set of SOCs (all 29 contaminants) during the second calendar quarter (April/May/June) of 2018. This will then also count as your Annual sample for the SOC of Dalapon which must be collected during the second calendar quarter of 2018.

**** Collect Start-up Bactis at two locations in the distribution system for each of two consecutive days and perform a 10 sample well survey prior to placing the Plant or the Well in service.

***** Collect a sample for the Radiological contaminant of Uranium only, sometime during the 2018 calendar year.

***** Collect samples for Lead and Copper (in accordance with your approved sampling plan) sometime between June 1 and September 30, 2018. **Submit the analyses results to the DEP by no later than October 10, 2018.**

SECONDARY CONTAMINANTS (62-550.520)					X
LEAD AND COPPER 40 CFR 141 Subpart I				*****X Standard Number of Monitoring Sites	

This chart is the DEP's good faith assessment for the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

***** During the third calendar quarter (July/August/September) of 2018, perform Annual reduced monitoring for TTHMs and HAA5s under Stage 2 of the Disinfectants and Disinfection Byproducts Rule by collecting 1 dual sample set at the Ted Smallwood's Store location. This dual set of samples must be collected at the above-referenced location (and during the specific month) identified in your DEP approved Stage 2 revised monitoring plan.

****** You are required to collect one full set of samples for all of the SOCs (except Dioxin) during the 2018 calendar year. However, if you submit a Reduced Monitoring Application Questionnaire for Synthetic Organic Contaminants to the Department, available at: <http://www.dep.state.fl.us/water/drinkingwater/forms.htm>, you may receive Department approval to either fully or partially waive monitoring for SOCs in 2018. If you do not receive approval to waive any of the required monitoring for SOCs for 2018, or do not submit the Questionnaire, you will have to perform one full set of monitoring for SOCs in 2018.

******* Each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

******** Collect a sample for the Radiological contaminant of Uranium only, sometime during the 2018 calendar year

********* Collect two sets of samples for Lead and Copper (in accordance with your approved sampling plan) in 2018. Collect the first set of samples by no later than **April 1, 2018**, following Department approval of your revised Lead and Copper sampling plan. Collect your second set of samples sometime between July 1 and December 31, 2018. **Submit the first set of results to DEP by 7/10/18, and the second set by 1/10/19.** Please note, the number of sites that are sampled must be in accordance with the number of sites required for Standard monitoring NOT reduced monitoring.

This chart is the DEP's good faith assessment for the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

***** At a minimum, continue quarterly monitoring for the Disinfection Byproducts of TTHMs and HAA5s during the first (January/February/March) and second (April/May/June) calendar quarters of 2018, at the rate of one dual set/quarter. Remain on quarterly monitoring for TTHMs and HAA5s until the Running Annual Average TTHM concentration is less than or equal to 60 ug/L and the Running Annual Average HAA5 concentration is less than or equal to 45 ug/L.

****** Please note, if you do qualify to return to Annual monitoring for TTHMs and HAA5s after the monitoring during the first and second calendar quarters of 2018 has been performed, you will still be required to collect one dual set of samples for TTHMs and HAA5s during the third calendar quarter (July/August/September) of 2018.

******* Collect one full set of SOCs (all 29 contaminants) during the third calendar quarter of 2018. This will then also count as your Annual sample for the SOC of Di(2-ethylhexyl)phthalate (DEHP) which must be collected during the third calendar quarter of 2018.

******** Collect your Annual sample for the SOC of Dalapon during the fourth calendar quarter (October/November/December) of 2018.

********* Please note that each water system is required to develop and adhere to a written RTRC sample siting plan that is subject to State review and revision.

********* Collect samples for Lead and Copper (in accordance with your approved sampling plan) sometime between June 1 and September 30, 2018. **Submit the analyses results to the DEP by no later than October 10, 2018.**

SECONDARY CONTAMINANTS (62-550.520)					X
LEAD AND COPPER 40 CFR 141 Subpart I					*****X

This chart is the DEP's good faith assessment for the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

***** Continue quarterly monitoring for the Disinfection Byproducts of TTHMs and HAA5s at the rate of two dual sets/quarter. A dual set of samples must be collected at EACH of the two locations (and during the specific month of each calendar quarter) identified in your DEP approved revised Stage 2 sampling plan. Remain on quarterly monitoring for TTHMs and HAA5s until the Running Annual Average TTHM concentration is less than or equal to 60 ug/L and the Running Annual Average HAA5 concentration is less than or equal to 45 ug/L at each location.

Please note, you must submit an Operational Evaluation Level report to the Department by no later than the 10th day following the end of any calendar quarter that you violate the OEL for either TTHMs OR HAA5s at ANY sample location. The format is also available at the [DEP Drinking Water forms page](#).

****** Please note, if you do qualify to return to Annual monitoring for TTHMs and HAA5s after the monitoring during the first and second calendar quarters of 2018 has been performed, you will still be required to collect two dual sets of samples for TTHMs and HAA5s during the third calendar quarter (July/August/September) of 2018.

******* Collect one full set of SOCs (all 29 contaminants) during the fourth calendar quarter (October/November/December) of 2018. This will then also count as your Annual sample for the SOC of Dalapon which must be collected during the fourth calendar quarter of 2018.

******** Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

********* Collect samples for Lead and Copper (in accordance with your approved sampling plan) sometime between June 1 and September 30, 2018. **Submit the analyses results to the DEP by no later than October 10, 2018.**

This chart is the DEP's good faith assessment for the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

***** During the third calendar quarter (July/August/September) of 2018, perform routine Annual monitoring for TTHMs and HAA5s under Stage 2 of the Disinfectants and Disinfection Byproducts Rule by collecting 2 dual sample sets. Each dual sample set consists of a set of two samples collected at the same time and location, with one sample for analyzed for TTHMs and one sample analyzed for HAA5s. Each set of samples must be collected at the two different locations (and during the specific month) identified in your approved Stage 2 monitoring plan.

****** You are required to collect one full set of samples for all of the SOCs (except Dioxin) during the 2018 calendar year. However, if you submit a Reduced Monitoring Application Questionnaire for Synthetic Organic Contaminants to the Department, available at: <http://www.dep.state.fl.us/water/drinkingwater/forms.htm>, you may receive Department approval to either fully or partially waive monitoring for SOCs in 2018. If you do not receive approval to waive any of the required monitoring for SOCs for 2018, or do not submit the Questionnaire, you will have to perform one full set of monitoring for SOCs in 2018.

******* Collect samples for the Radiological contaminants of Gross Alpha, Uranium (conditional), Radium 226, and Radium 228, sometime during the 2018 calendar year.

******** Collect samples for Lead and Copper (in accordance with your approved sampling plan) sometime between June 1 and September 30, 2018. **Submit the analyses results to the DEP by no later than October 10, 2018.**

RADIONUCLIDES Gross Alpha, Uranium, Radium-226, Radium-228 (62-550.519)					****X Gross Alpha and Uranium only
SECONDARY CONTAMINANTS (62-550.520)					X
LEAD AND COPPER 40 CFR 141 Subpart I					*****X

This chart is the DEP's good faith assessment for the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

***** During the third calendar quarter (July/August/September) of 2018, perform Annual reduced monitoring for TTHMs and HAA5s under Stage 2 of the Disinfectants and Disinfection Byproducts Rule by collecting 1 dual set of samples at the 10809 Hwy 27 Lake Josephine RV Campground location.

****** You are required to collect one full set of samples for all of the SOC's (except Dioxin) during the 2018 calendar year. However, if you submit a Reduced Monitoring Application Questionnaire for Synthetic Organic Contaminants to the Department, available at: <http://www.dep.state.fl.us/water/drinkingwater/forms.htm>, you may receive Department approval to either fully or partially waive monitoring for SOC's in 2018. If you do not receive approval to waive any of the required monitoring for SOC's for 2018, or do not submit the Questionnaire, you will have to perform one full set of monitoring for SOC's in 2018.

******* Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

******** Collect samples for the Radiological contaminants of Gross Alpha, and Uranium (conditional), sometime during the 2018 calendar year.

********* Collect samples for Lead and Copper (in accordance with your approved sampling plan) sometime between June 1 and September 30, 2018. **Submit the analyses results to the DEP by no later than October 10, 2018.**

RADIONUCLIDES Gross Alpha, Uranium, Radium-226, Radium-228 (62-550.519)					****X Radium 226 and Radium 228 only
SECONDARY CONTAMINANTS (62-550.520)					X
LEAD AND COPPER 40 CFR 141 Subpart I					*****X

This chart is the DEP's good faith assessment for the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

***** During the third calendar quarter (July/August/September) of 2018, perform Reduced/Triennial monitoring for TTHMs and HAA5s under Stage 2 of the Disinfectants and Disinfection Byproducts Rule by collecting 1 dual sample set. A dual set of samples must be collected at the location (and during the specific month) identified in your DEP approved Stage 2 monitoring plan.

****** You are required to collect one full set of samples for all of the SOCs (except Dioxin) during the 2018 calendar year. However, if you submit a Reduced Monitoring Application Questionnaire for Synthetic Organic Contaminants to the Department, available at: <http://www.dep.state.fl.us/water/drinkingwater/forms.htm>, you may receive Department approval to either fully or partially waive monitoring for SOCs in 2018. If you do not receive approval to waive any of the required monitoring for SOCs for 2018, or do not submit the Questionnaire, you will have to perform one full set of monitoring for SOCs in 2018.

******* Please note that each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

******** Collect samples for the Radiological contaminants of Radium 226, and Radium 228, sometime during the 2018 calendar year.

********* Collect samples for Lead and Copper (in accordance with your approved sampling plan) sometime between June 1 and September 30, 2018. **Submit the analyses results to the DEP by no later than October 10, 2018.**

This chart is the DEP's good faith assessment for the contaminant monitoring requirements for the above referenced public water system for the calendar year 2018 (only). If you disagree, then please contact the DEP as soon as possible. Please be aware that monitoring schedules are subject to change at any time based upon analyses results or other factors. This chart shall not relieve any person from any requirement of Florida law.

*** Revised 9/6/18:** During the fourth calendar quarter of 2018 initiate quarterly monitoring for TTHMs and HAA5s. Perform quarterly monitoring at the approved location, and during the month and week identified in your approved sampling plan

****** During the third calendar quarter (July/August/September) of 2018, perform Reduced/Triennial monitoring for TTHMs and HAA5s under Stage 2 of the Disinfectants and Disinfection Byproducts Rule by collecting 1 dual sample set. A dual set of samples must be collected at the location (and during the specific month) identified in your DEP approved Stage 2 monitoring plan.

***** Revised 6/12/18:** During the third calendar quarter (July/August/September) of 2018, initiate quarterly monitoring for the VOC of Carbon Tetrachloride.

******** Collect one full set of SOCs (all 29 contaminants) during the second calendar quarter (April/May/June) of 2018. This will then also count as your Annual sample for the SOC of Dalapon which must be collected during the second calendar quarter of 2018.

********* Each water system is required to develop and adhere to a written RTCR sample siting plan that is subject to State review and revision.

********* Collect samples for Lead and Copper (in accordance with your approved sampling plan) sometime between June 1 and September 30, 2018. **Submit the analyses results to the DEP by no later than October 10, 2018.**
