# Effective 11/14/2019, the Petroleum Restoration Program is not collecting deductibles. For PLRIP, the CAP amount will be reduced by the outstanding deductible balance.

* If excess restoration coverage in the amount of $700,000 is obtained prior to the date an incident is reported and in effect by September 1, 1993, the deductible shall be reduced to $500 for a period of one year from the effective date of the policy or other form of financial responsibility. For example, if a petroleum marketer purchased a policy for excess restoration financial responsibility coverage prior to discovery and reporting of an incident of petroleum contamination and the policy is in effect by September 1, 1993, that marketer may receive the benefit of a reduced deductible in the amount of $500 for subsequent eligible incidents discovered and reported within one year (latest possible date would be August 31, 1994). Such incidents would otherwise have a deductible of $1,000, $5,000 or $10,000 depending on the actual date reported.

** Petroleum marketers and non-marketers with more than 10,000 gallons monthly throughput are required by the EPA to have coverage in the amount of $1 million per incident and $1 million aggregate coverage if they have 100 or fewer tanks or $2 million aggregate coverage if they have more than 100 tanks.

*** Petroleum non-marketers with 10,000 gallons or less monthly throughput are required by the EPA to have coverage in the amount of $500,000 per incident and $1 million aggregate coverage if they have 100 or fewer tanks or $2 million aggregate coverage if they have more than 100 tanks.

**** In 2008, PLRIP Department coverage increased:
1 $1 million coverage increased $1.2 million
2 $300,000 coverage increased to $400,000
3 $150,000 coverage increased to $300,000
