

Oct. 15, 2025 10 a.m.–12p.m.
ERP Quarterly Workshop Series:
WETLAND DREDGE AND FILL PERMITTING PROJECTS

This workshop is designed to provide in-depth insights into wetland fill and dredge permitting requirements within the ERP framework. The training is essential for professionals working in industries that impact wetlands and surface waters, such as construction, land development and infrastructure projects. During the workshop, participants will explore the specific regulations and guidelines related to wetland fill and dredge activities, including permit application materials, mitigation requirements and best practices for compliance.

Topic and Speaker	Start Time
Welcome and Introduction Katie Craver, External Affairs Director	10:00 a.m.
